Hi -

Right now a file is uploading to the Incoming IDWR FTP titled "NIR_Placeholder_III.zzz." Change it to "zip" and it should open into a folder that contains a placeholder NIR data set made using the ESPAM1.1 algorithm, along with supporting files.

Stacey -

Would you mind making a new version of P100527A or P100604A (they are identical except for NIR) that contains this new nir table? It is in the folder as

"ESPAM1_1_NIR_Modified_20100607.nir"

You may not be able to fetch this off the IDWR FTP site, but in my computer it is in

"C:\TEMP\NIR_PLACEHOLDER_III\"

You can zip it up and send it along to Allan. I'll forward you an e-mail that has the secret handshake for the Incoming FTP.

Bryce

Bryce,

I see the file "NIR_ESPAM1_1_Modified_20100607.nir" and it looks complete. Did you just want me to rename this file to P100604A.nir and send this along to Allan. I'm just not sure if I'm missing a step or not? We can talk about it when you get in.

Stacey
