Pam,

I misspelled the title for diversion 13054405P to be added to next years accounting shown below. It should be HIBBERT FARMS, instead of Hibbard Farms.

Subject: 2003 Accounting Changes

Pam,

Here are a few accounting program changes needed for the start of the 2003 irrigation season:

The EAST TETON CANAL (13050108F) title listed on the 4th page of the report printout needs to be changed to the S. BRANCH FALL RIVER CANAL BLW XCUT (same station, but the name was originally misidentified). The SOUTH BRANCH FALL RIVER CANAL (13050102F) title, currently listed on the same line on the report, should be changed to S. BRANCH FALL RIVER CANAL ABV XCUT.

Delete diversions 13038179D (Rigby Lateral), 13055306 (McCormick-Rowe), and 13055311D (Pincock-Garner). These tches have been abandoned. Note: There is a special computation in the program which combines 13038179 with 038180.

4045

Add diversions 13054405P HIBBARD FARMS (#22-7349, 5.0 cfs, 3/12/1981, AB S LEIGH TO ST ANTH reach) and 13062051D JENSEN GROVE (#01-7092, 2.8 cfs, 7/15/1987, 320.6 AF annual volume limit, SHELLEY TO AT BLACKF reach). The diversions that are added and deleted to SNKWRA also need to be added and deleted in the SNKSTO program.

Currently, the percentage split for the Southwest Irrigation District water right (77.9 cfs, 2/6/1895), delivered to the Minidoka Canal, Milner Irrigation, or Twin Falls Canal, is assigned to the accounting program every year (SWID has not yet identified the split that will occur in 2003). In the past, the natural flow right is delivered to the assigned canals as soon as those diversions turn on at the beginning of the season. This has resulted in the last couple years of the three canals using most of the SWID allotted volume limitation before SWID has ever begun using water. To help alleviate the problem, we need to program a "start-up date" for this right. SWID will notify Water District #1 the percentage split between the three canals and the start-up date prior to the start of the irrigation season.

There may be some additional changes for next season, but I thought I would pass these along to you now if you or Bob wanted to start working on them.

Tony

uses AF limitation,
so divert
one day of flow to fill lake.
2.8 won't fill lake.

RE: Southwest Irrigation District Correspondence

Attached is the correspondence concerning the Southwest Irrigation District 2003 water delivery. I thought maybe you might want to keep copies of these on file somewhere if anyone ever needed to understand the reason the accounting program has been programmed the way it has been. I suspect the timing and percentages of this right will change annually from this point on.

Mr. Ronald Carlson
Water District #1
900 W. Skyline Drive, Suite A
Idaho Falls, ID 83204-1718

RE: Southwest Irrigation District
Our File No. 69

Dear Mr. Carlson:

Pursuant to the request of the Board of Directors of Southwest Irrigation District, the District requests that its water right on the natural flow in the river be delivered fifty percent (50%) through Burley Irrigation District, twenty-five (25%) through Twin Falls Irrigation District and twenty-five (25%) through Milner.

Southwest would request one-half flow from May 1 to May 15, 2003, and at the full rate from May 15, 2003 until the water right runs out.

If you have any additional questions, please feel free to give us a call or Grant Wyatt at 208-678-2856.

Very truly yours,

PLACE OF USE: See Remarks

CONDITIONS OF APPROVAL AND REMARKS

1. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
2. Use of Water Right No. 01-00023 pursuant to approved Transfer No. 4859 shall be subordinate to all existing water rights diverting from Snake River in the American Falls to Milner reach except to the extent that water available under this right at the Aberdeen Springfield Canal diversion is specifically identified and shown to be delivered in the American Falls-Milner reach.
3. The annual volume diverted under this right is limited to 6725 acre feet at the points of diversion approved under Transfer No. 4859 except that any water diverted during flood control operations that result in a release of water past Milner Dam shall not be charged against the seasonal volume limitation.

TRANSFER NO. 4859
WATER RIGHT NO. 01-00023

CONDITIONS OF APPROVAL AND REMARKS

4. Diversion and use of water under Right No. 01-00023 shall be regulated by the watermaster of State Water District 01 (Upper Snake River).
5. Approval of Transfer No. 4859 does not grant any easement or right-of-way to use diversion and delivery facilities owned by persons other than the right owner.
6. Water diverted under this right shall be used within the boundaries of and applied to the lands of the Southwest Irrigation District.
7. The Director of the Department of Water Resources retains jurisdiction to determine and assess a delivery loss to prevent injury to existing water rights in Water District 01.
8. Failure to comply with the conditions of this transfer is cause for the Director to issue an order to show cause why the approval of the transfer should not be rescinded and to take such other action as authorized by law to prevent unauthorized use of water.
9. Water used under this transfer when combined with all other right shall provide no more than 0.02 cubic feet per second per acre no more than 4.0 acre feet per acre per year for the lands herein authorized to be irrigated.

RE: Southwest Irrigation District water delivery

Dear Mr. Alberdi:

Pursuant to the request of Southwest Irrigation District, 9.738 cfs (19.31 acre-feet) of their 2/6/1895 natural-flow water right will be delivered each day to the Twin Falls Canal, beginning May 1, 2003 through May 14, 2003. The amount will double to 19.475 cfs (38.63 acre-feet), beginning May 15, 2003, and will be delivered each day thereafter until either the volume limit is reached or the 2/6/1895 priority has been cut in the Shelley-Blackfoot reach, whichever comes first.

The total 1,681.25 acre-feet of volume assigned to Twin Falls Canal by Southwest Irrigation District will be reached on June 20, 2003 if the 2/6/1895 priority has not been cut prior to June 20, 2003 in the Shelley-Blackfoot reach.

If you have any questions, please give me a call.

RE: Southwest Irrigation District water delivery

Dear Mr. Bingham:

Pursuant to the request of Southwest Irrigation District, 19.475 cfs (38.63 acre-feet) of their 2/6/1895 natural-flow water right will be delivered each day to the Minidoka Canal diversion for Burley Irrigation District (BID), beginning May 1, 2003 through May 14, 2003. The amount will double to 38.95 cfs (77.26 acre-feet), beginning May 15, 2003, and will be delivered each day thereafter until either the volume limit is reached or the 2/6/1895 priority has been cut in the Shelley-Blackfoot reach, whichever comes first.

The total 3,362.5 acre-feet of volume assigned to BID by Southwest Irrigation District will be reached on June 20, 2003 if the 2/6/1895 priority has not been cut prior to June 20, 2003 in the Shelley-Blackfoot reach.

If you have any questions, please give me a call.

Sincerely,

Subject: RE: Meeting Next Week

Pam,

I just finished up all my field work for this week and answered all my e-mails and voice-mails. I'm taking annual leave on Friday to go camping with my family. I'll be in the office Monday morning and will head over to Boise Monday afternoon.

I started throwing some things together I might need for the meeting such as:

- My listings of the water rights in the accounting
- The Fort Hall Water Right Agreement
- Diagrams for the Fall River/Crosscut, Lower Teton and Reservation Canal areas
- Miscellaneous memos

I'm assuming you have all the USGS topo maps over there if we need them, so I won't have to bring any. Let me know of anything else you think I should bring.

I'm hoping that Bob can kind of narrate through the code. I can elaborate on why things are done the way they're done based on my knowledge of the physical delivery system if Bob can't remember the specifics. I would also like to talk about upcoming changes we'll probably see in the program.

Speaking of a change.....An emergency temporary transfer was approved yesterday moving 34 cfs of 6/1/1889 water right from 13048560 Fall River Canal to 13049705 Farmers Friend. The transfer requested that the 34 cfs be transfered from June 9th (the day the transfer was recieved) to July 1st. The 34 cfs will revert back to Fall River Canal on July 1st. I assume the requested period of use shown on the transfer is for the "actual date" in the reach, rather than "Milner time". You might also be aware that this particular water right is one of those that is reduced in the program on July 1st of each year (I think you modified this last year). Could you make the change in the SNKWRA.RTS file and any other files in order that this new transfer will be included in the accounting as soon as possible.

Thanks,
Tony

Tony,

I'm trying to decide what we will need next week. So far, I think we will need the program and the schematics (old and new). I also have some memos with descriptions and diagrams of "special computations". The Sandoval thesis has some good things, but I don't know if each of us needs a copy. What do you think we need?

I tried to incorporate your suggestions into my schematic. There are a few items we will need to go over with Bob.

The Payette water users excepted my explanation of reach gain averaging. I used the first part of your PowerPoint to explain reach gains and expanded my explanation from there.

Pam

Subject: Minidoka Credit

Pam,

I'll hesitate from saying the Minidoka Credit calculation is wrong in the accounting because I seem to remember a "chicken and egg" explanation or something, but if it's working the way it's supposed to, then I need to understand why, or it needs to be changed.

Helga finally got the BOR to enter the Minidoka return flow and she re-ran the accounting with the newly entered data (please refer to SNKWRA.RPT;279). May 15th is the first day the accounting credits the Minidoka Project, however, the Minidoka Canals aren't using any storage that day. Minidoka shouldn't recieve any credit if they haven't used storage. The second thing that appears wrong on that day is that the Minidoka Reach Gain is shown as 91 cfs on the last page of the printout which is the same as the 91 cfs gain shown on the first page for the reach gain in reach #9. If the Minidoka Project has been credited for a portion of the gain, shouldn't the amount credited be subtracted from the total gain resulting in a lesser gain in reach #9? One of those two things are correct: Either Minidoka shouldn't have recieved any credit, or the gain in #9 should have been reduced.

On May 16th, the Minidoka Canals are using storage, and it appears the credit was computed correctly, however, the Minidoka reach gain is still equal to the gain in reach #9. I would think that the reach #9 gain would be the Minidoka Reach Gain reduced by the amount of the credit.

This same process continues through May 18th. Then on May 19th the Minidoka Canals are not using storage, but the accounting computes a credit anyway, and adds it to the total credit. The reach gain still isn't adjusted by the credit.

On May 20th, the Minidoka Canals are not using storage, zero credit is computed, and no adjustment is made to the reach gains. This is correct, but could you please explain to me what's happening on May 15th though May 19th?

That's as far as I've gotten. It's time to go home and varnish my kitchen table. Talk to you later.

Thanks
Tony

Subject: Change SNKWRA.RTS file

Pam,

Ron just approved an emergency transfer to split off a water right from the St. Anthony Union Canal to two other canals. I was going to make the change, but it's one of those rights with a special computation and I thought it would probably be better if you made the change for me.

The St. Anthony Canal (13049725) wants to transfer 100 cfs of its (600 cfs) 6/21/1888 water right. 50 cfs will go to the Last Chance Canal (13049550) and the other 50 cfs will go to the Independent Canal (13050535). The transfer was signed by Ron today, so the transfer should begin on July 3, 2003.

Let me know if there are any problems.

Thanks,
Tony

Subject: Programming Change Needed

Pam,

We've got a transfer that enables the Hill-Pettinger (13038436), Nelson-Corey (13038437), and Hill (13038438) diversions to combine, share, and rotate the water rights that are still on for those diversions. Could you combine the three diversions in the program? It's too bad we have to go through this every drought year, but if we don't un-combine the diversions at the beginning of each year, they wouldn't use any storage and be forced to come in and fill out the necessary temporary transfer forms to re-combine them each year. They're not interested in doing a permanent transfer because they really don't get along unless someone is about to lose crops in a drought situation.

Thanks,
Tony

Subject: New .RTS and .IND files

Pam,

I've just created a new .RTS and .IND file to implement the temporary transfers which move a portion of the Clark & Edwards (13038115) and Harrison Canal (13038055) water rights to the Enterprize Canal (13037985) for a few select days. I couldn't remember if the dates in the .RTS file should correspond to "actual date" or "Milner date". I changed them to correspond with actual date. I'll check the accounting when it's run tomorrow to see if it runs correctly. If not, I'll have to change the .RTS file once more.

Pam,

I just edited and created some new .RTS and .IND files. The North Rigby Canal (13038315) transferred their natural flow right to the Burgess Canal (13038110) for five days, and the Long Island Canal (13038225) transferred 4.0 cfs of their 6/1/1886 right to the D. Boyce Pump (13057105) for the month of August.

Subject: New .RTS & .IND files again

Pam,

It's beginning to sound like a broken record, but I created new .RTS and .IND files today to update another temporary transfer. Long Island Canal (13038225) has transferred another portion (4.4 cfs) of their 6/1/1886 right beginning August 1st for the rest of the season to the W. Dabell pump (13038382). I didn't get any interruptions while I was trying to edit the file this time, so hopefully I did it right. However, it is getting late in the afternoon and I need a nap.

I told Lyle that Garth was coming over for Friday's meeting. It looks like Lyle appreciated it so much that he put him first on the agenda, and neither one of us has to do a thing but just sit back and watch. Just kidding. I hope Lyle talked to him beforehand before putting him on the agenda.

Have fun in Michigan if I don't talk to you before you leave.

Subject: Baffled. What's going on in Teton River?

Pam,

We've gotten another knock against our credibility. At the end of last week, many Teton River Canals (that are watching our accounting on the web like hawks because they're very close to running out of storage) called and wanted an explanation as to why their storage usage totals went up from earlier in the week when they hadn't used any storage that week? Initially I thought it was because some flow data or diversion data had changed, but Helga said that she didn't change any Teton River diversions, exchange wells, or river flows for the period that she re-ran. I told the canals I couldn't explain it. I didn't know why. I was dumbfounded.

When I look at the accounting printouts made September 9th and compare them with printouts made September 10th and later, the natural flow in the St. Anthony to Teton Mouth reach is different without any apparent changes to diversions or flows? Can you take a look and see if you can figure out what's going on? Perhaps I could call back these Teton canals and restore some credibility if I could find out why the data changed.

The best comparison is to look at SNKWRA.RPT;368 and SNKWRA.RPT;374. The only thing I could find inconsistent was the natural flow and actual flow in Reach 19. What's causing this?

Subject: Tribal and non-Tribal Drop/Volume data

Pam,

On September 10th, 288 cfs was shown for the TRIBAL AT DROP and the 100,000 AF TRIBAL TOTAL VOLUME limit was reached (see SNKWRA.RPT;377). Everyday thereafter 288 cfs is listed for the TRIBAL AT DROP. Shouldn't it be zero after the 100,000 AF volume limit is reached? Why does it keep putting in 288 cfs?

I can't figure out where the value for the NON TRIBAL AT DROP is coming from beginning on September 11th. However, the amount being charged towards the NON TRIBAL VOLUME each day is correct.

Wouldn't it be better to have the program list the cfs amount being charged towards the total volumes each day? I think this is the way it was last year or the year before. For example, on September 11th the TRIBAL AT DROP would be 0 CFS, and the NON TRIBAL AT DROP would be 254 CFS (increasing the previous days NON TRIBAL VOLUME by 504 acre feet).

Subject: Accounting program flaw

Pam,

If you got my voice-mail message Wednesday, Jim Doty fixed the problem I had downloading the data.

If you look at the latest accounting, you'll see Twin Falls has been using 19 cfs of storage when the last right being filled is 3/26/1903 in that reach. The accounting shouldn't be charging them any storage. I'm going to guess that since 19 is 25% of 77.9, the accounting is assuming SWID is diverting their 19 cfs through Twin Falls Canal and, because the volume limitation has been reached, they're being charged for diverting storage. This didn't happen under the same conditions last year, so it's due to something that was changed for this year. (Lyle guessed it was because of the new Minidoka Credit programming).

I'm taking annual leave all day Thursday. I'm cleaning my carpets and finishing the baseboards in my kitchen. Maybe I'll talk to you Friday about it.

ISPEC 6

Pam,

I'm putting together a presentation to explain to American Falls Reservoir District #2 (13086530) how their natural flow and storage delivery is computed in the accounting, and I noticed there has been a slight error in the accounting program computation over the last few years. They are supposed to receive 850 cfs of 3/30/1921 priority beginning on May 1st if the American Falls storage right hasn't filled. The accounting hasn't been crediting their diversion with the natural flow until May 2nd. After May 1st, it seems to be accounting for it correctly from that point on.

There's no travel time involved, so I think you just need to tweak the day on which the right begins. It's imbedded in the code because it's a special computation. I think you may have to change one or both of the lines in Section 29-2, such as

IF(IVV.EQ.10.AND.LD.LT.121) T(L)=0.0
IF(IVV.EQ.11.AND.LD.GE.121) T(L)=850.0

to day 120 to make it work correctly. (may) That's my guess.

It's not high priority, as long as we get it changed before running the final accounting. I'll have some other diversions you'll need to add to the program later before we run the final accounting, but I'd thought I'd make you aware of this problem now if you wanted to start working on it a little earlier.

Tony

Re: Water Accounting for the Snake River – Lake Walcott to Milner

Gentlemen:

On October 2, 2003, we met at the Farm Bureau building in Pocatello to again discuss the water accounting for the Snake River from Lake Walcott to Milner Dam. At the conclusion of that meeting, I asked that the irrigation districts and canal companies consider among one or more of three alternatives for moving towards resolution on the associated issues: (1) have the technical group reconvene to pursue resolution of a defined set of technical issues; (2) have the managers of the irrigation districts and canal companies continue to pursue a negotiated agreement; and/or (3) request that I proceed to make a preliminary determination. I have not received any feedback from you regarding which of these alternatives you would recommend.

I believe it is important to continue moving towards resolution of these water accounting issues, both for the 2004 irrigation season and for the Department's recommendations in the SRBA later that year. Accordingly, I would like to schedule another meeting with you, your respective technical consultants, and your respective legal counsel, at my offices in Boise on November 3, 2003, at 1:00 pm. I have checked this time with your respective legal counsel and they have confirmed their availability at the proposed time on November 3.

What I propose as an agenda for this meeting would be to have your respective technical consultants make presentations setting forth their individual conclusions and recommendations. These would be supplemented with either a presentation by a hydrologist from the Department, discussions between myself and your technical consultants, or both. We would then decide whether there was any remaining technical work that should be completed, and if so, what the scope of that work would be. Based on that decision, we would discuss the viability of pursuing continued negotiations between the managers at this time, or my proceeding to make preliminary determinations on the accounting issues.

Please confirm your availability to participate in this meeting by calling my administrative assistant, Victoria Wigle, by telephone to (208) 327-7910. Thank you in advance for being willing to travel to Boise for this meeting.

Sincerely,

Karl J. Dreher
Director

Subject: Accounting changes

Pam,

I've finally gotten around to compiling the diversions we need added, deleted, renumbered, or renamed in the accounting program before running the 2003 final accounting. We're still in the process of reviewing and entering diversion data. Lyle has made some headway trying to download the ADAPS data. We've gotten access to the system and we're able to do some things but, between our two sets of notes, haven't been able to quite figure out how to download exactly what we want. Lyle will probably be calling you for help on this if he hasn't already. Let me know if you need any more information other than what's listed below:

Subject: Gene Scott Pump

Pam,

Transfer #70681 moves 2.19 cfs of 6/1/1885 from the 13038050 STEELE DITCH to the new Gene Scott pump. I was wrong earlier. The transfer moved the water right rather than combining the two diversions.

That leaves 0.01 cfs of the right remaining in the Steele Ditch. I asked why they didn't move the whole right, but no one knows for sure. By the way, the protests for the transfer have been withdrawn and it will be approved.

Tony
