RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 71-10886

NAME AND ADDRESS: STATE OF IDAHO
IDAHO WATER RESOURCE BOARD
322 E FRONT ST
PO BOX 83720
BOISE ID 83720-0098

SOURCE: VALLEY CREEK TRIBUTARY: SALMON RIVER

QUANTITY: 787.000 CFS

Future non-DCMI = 4.2

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 4.2 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 36 cfs, Feb - 36 cfs, Mar - 59 cfs, Apr - 138 cfs, May - 378 cfs, Jun - 334 cfs, Jul - 89 cfs, Aug - 48 cfs, Sep - 41 cfs, Oct - 42 cfs, Nov - 44 cfs, and Dec - 36 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T10N R13E S3 SWSENW End of Stream Flow Within Custer County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	49.000 CFS
	2/1 2/28	48.000 CFS
	3/1 3/31	85.000 CFS
	4/1 4/30	298.000 CFS
	5/1 5/31	765.000 CFS
	6/1 6/30	787.000 CFS
	7/1 7/31	215.000 CFS
	8/1 8/31	83.000 CFS

9/1	9/30	61.000 CFS
10/1	10/31	57.000 CFS
11/1	11/30	59.000 CFS
12/1	12/31	52.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

Future non-DCMI = 0.4

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.4 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 3.2 cfs, Feb - 3.2 cfs, Mar - 5.1 cfs, Apr - 12.2 cfs, May - 33.3 cfs, Jun - 29.2 cfs, Jul - 7.7 cfs, Aug - 4.1 cfs, Sep - 3.6 cfs, Oct - 3.7 cfs, Nov - 3.9 cfs, and Dec - 3.3 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T11N R12E S5 SENENW Lot 3 End of Stream Flow Within Custer County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	4.100 CFS
	2/1 2/28	4.100 CFS
	3/1 3/31	6.800 CFS
	4/1 4/30	22.000 CFS
	5/1 5/31	57.000 CFS
	6/1 6/30	59.000 CFS
	7/1 7/31	15.000 CFS
	8/1 8/31	6.600 CFS

9/1	9/30	5.000 CFS
10/1	10/31	4.600 CFS
11/1	11/30	4.800 CFS
12/1	12/31	4.300 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

4/1	4/30	21.000 CFS
5/1	5/31	54.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 59.000 CFS

Future non-DCMI = 0.4

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.4 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 3 cfs, Feb - 3 cfs, Mar - 5 cfs, Apr - 12 cfs, May - 33 cfs, Jun - 29 cfs, Jul - 8 cfs, Aug - 4 cfs, Sep - 4 cfs, Oct - 4 cfs, Nov - 4 cfs, and Dec - 3 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T12N R14E S10 SENENE End of Stream Flow Within Custer County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	4.100 CFS
	2/1 2/28	4.000 CFS
	3/1 3/31	6.900 CFS
	4/1 4/30	22.000 CFS
	5/1 5/31	57.000 CFS
	6/1 6/30	59.000 CFS
	7/1 7/31	15.000 CFS
	8/1 8/31	6.600 CFS
	9/1 9/30	5.000 CFS

10/1	10/31	4.600 CFS
11/1	11/30	4.800 CFS
12/1	12/31	4.200 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: EAST PASS CREEK TRIBUTARY: HERD CREEK

QUANTITY: 91.000 CFS

Future non-DCMI = 0.7

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.7 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 7 cfs, Feb - 7 cfs, Mar - 6 cfs, Apr - 8 cfs, May - 22 cfs, Jun - 48 cfs, Jul - 18 cfs, Aug - 13 cfs, Sep - 9 cfs, Oct - 8 cfs, Nov - 8 cfs, and Dec - 8 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T09N R19E S29 NWSESW End of Stream Flow Within Custer County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	9.000 CFS
	2/1 2/28	8.000 CFS
	3/1 3/31	8.000 CFS
	4/1 4/30	11.000 CFS
	5/1 5/31	40.000 CFS
	6/1 6/30	91.000 CFS
	7/1 7/31	39.000 CFS
	8/1 8/31	20.000 CFS
	9/1 9/30	13.000 CFS

10/1	10/31	11.000 CFS
11/1	11/30	10.000 CFS
12/1	12/31	9.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality.

PLACE OF USE:

The place of use of the minimum stream flow water right is stream reach from the beginning quantification point to the ending quantification point identified above.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 193.000 CFS

Future non-DCMI = 2.1

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 2.1 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 18 cfs, Feb - 18 cfs, Mar - 21 cfs, Apr - 42 cfs, May - 112 cfs, Jun - 85 cfs, Jul - 23 cfs, Aug - 15 cfs, Sep - 16 cfs, Oct - 19 cfs, Nov - 20 cfs, and Dec - 17 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T20N R18E S35 NENENW End of Stream Flow Within Lemhi County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	22.000 CFS
	2/1 2/28	22.000 CFS
	3/1 3/31	28.000 CFS
	4/1 4/30	77.000 CFS
	5/1 5/31	193.000 CFS
	6/1 6/30	173.000 CFS
	7/1 7/31	45.000 CFS
	8/1 8/31	24.000 CFS

9/1	9/30	22.000 CFS
10/1	10/31	24.000 CFS
11/1	11/30	25.000 CFS
12/1	12/31	23.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 1,374.000 CFS

Future non-DCMI = 4.8

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 4.8 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 96 cfs, Feb - 80 cfs, Mar - 90 cfs, Apr - 138 cfs, May - 490 cfs, Jun - 583 cfs, Jul - 197 cfs, Aug - 121 cfs, Sep - 106 cfs, Oct - 105 cfs, Nov - 105 cfs, and Dec - 91 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T24N R12E S1 SENENW End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	131.000 CFS
	2/1 2/28	107.000 CFS
	3/1 3/31	130.000 CFS
	4/1 4/30	298.000 CFS
	5/1 5/31	992.000 CFS
	6/1 6/30	1,374.000 CFS
	7/1 7/31	474.000 CFS
	8/1 8/31	211.000 CFS
	9/1 9/30	159.000 CFS

10/1	10/31	143.000 CFS
11/1	11/30	142.000 CFS
12/1	12/31	131.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 175.000 CFS

Future non-DCMI = 0.4

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.4 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 7 cfs, Feb - 6 cfs, Mar - 7 cfs, Apr - 16 cfs, May - 71 cfs, Jun - 74 cfs, Jul - 17 cfs, Aug - 8 cfs, Sep - 7 cfs, Oct - 8 cfs, Nov - 8 cfs, and Dec - 7 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T21N R09E S13 SESWSE End of Stream Flow Within Valley County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	9.000 CFS
	2/1 2/28	9.000 CFS
	3/1 3/31	10.000 CFS
	4/1 4/30	34.000 CFS
	5/1 5/31	143.000 CFS

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 195.000 CFS

Future non-DCMI = 0.6

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.6 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 10 cfs, Feb - 10 cfs, Mar - 9 cfs, Apr - 22 cfs, May - 112 cfs, Jun - 95 cfs, Jul - 30 cfs, Aug - 13 cfs, Sep - 11 cfs, Oct - 15 cfs, Nov - 15 cfs, and Dec - 11 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T20N R06E S19 SENENE End of Stream Flow Within Valley County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	13.000 CFS
	2/1 2/28	12.000 CFS
	3/1 3/31	12.000 CFS
	4/1 4/30	40.000 CFS
	5/1 5/31	193.000 CFS
	6/1 6/30	195.000 CFS
	7/1 7/31	59.000 CFS
	8/1 8/31	21.000 CFS
	9/1 9/30	16.000 CFS

10/1	10/31	19.000 CFS
11/1	11/30	18.000 CFS
12/1	12/31	15.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

PO BOX 83720
BOISE ID 83720-0098

SOURCE: TAMARACK CREEK TRIBUTARY: EAST FORK SOUTH FORK SALMON RIVER

QUANTITY: 130.000 CFS

Future non-DCMI = 0.3

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.3 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 6 cfs, Feb - 6 cfs, Mar - 6 cfs, Apr - 14 cfs, May - 65 cfs, Jun - 64 cfs, Jul - 16 cfs, Aug - 7 cfs, Sep - 6 cfs, Oct - 7 cfs, Nov - 7 cfs, and Dec - 6 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T19N R09E S29 SENWNW End of Stream Flow Within Valley County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	8.000 CFS
	2/1 2/28	7.000 CFS
	3/1 3/31	8.000 CFS
	4/1 4/30	25.000 CFS
	5/1 5/31	112.000 CFS
	6/1 6/30	130.000 CFS
	7/1 7/31	31.000 CFS
	8/1 8/31	11.000 CFS
	9/1 9/30	8.000 CFS

10/1	10/31	9.000 CFS
11/1	11/30	9.000 CFS
12/1	12/31	8.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 367.000 CFS

Future non-DCMI = 1

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 1 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 17 cfs, Feb - 16 cfs, Mar - 17 cfs, Apr - 40 cfs, May - 183 cfs, Jun - 180 cfs, Jul - 44 cfs, Aug - 19 cfs, Sep - 17 cfs, Oct - 19 cfs, Nov - 20 cfs, and Dec - 17 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T18N R06E S4 NWSWSW End of Stream Flow Within Valley County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	21.000 CFS
	2/1 2/28	20.000 CFS
	3/1 3/31	23.000 CFS
	4/1 4/30	72.000 CFS
	5/1 5/31	315.000 CFS
	6/1 6/30	367.000 CFS
	7/1 7/31	87.000 CFS
	8/1 8/31	31.000 CFS

9/1	9/30	23.000 CFS
10/1	10/31	24.000 CFS
11/1	11/30	25.000 CFS
12/1	12/31	23.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: MARBLE CREEK TRIBUTARY: MIDDLE FORK SALMON RIVER

QUANTITY: 825.000 CFS

Future non-DCMI = 2.8

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 2.8 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 49 cfs, Feb - 46 cfs, Mar - 47 cfs, Apr - 95 cfs, May - 407 cfs, Jun - 323 cfs, Jul - 85 cfs, Aug - 56 cfs, Sep - 54 cfs, Oct - 62 cfs, Nov - 61 cfs, and Dec - 52 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T16N R12E S8 NENENE Lot 1 End of Stream Flow Within Valley County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	67.000 CFS
	2/1 2/28	62.000 CFS
	3/1 3/31	68.000 CFS
	4/1 4/30	206.000 CFS
	5/1 5/31	825.000 CFS
	6/1 6/30	762.000 CFS
	7/1 7/31	203.000 CFS
	8/1 8/31	98.000 CFS
	9/1 9/30	81.000 CFS

10/1	10/31	85.000 CFS
11/1	11/30	82.000 CFS
12/1	12/31	74.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

PO BOX 83720
BOISE ID 83720-0098

SOURCE: RAPID RIVER TRIBUTARY: MIDDLE FORK SALMON RIVER

QUANTITY: 874.000 CFS

Future non-DCMI = 2.5

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 2.5 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 46 cfs, Feb - 42 cfs, Mar - 41 cfs, Apr - 69 cfs, May - 354 cfs, Jun - 371 cfs, Jul - 103 cfs, Aug - 66 cfs, Sep - 59 cfs, Oct - 62 cfs, Nov - 56 cfs, and Dec - 50 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T16N R11E S32 NENWSW Lot 5 End of Stream Flow Within Valley County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	62.000 CFS
	2/1 2/28	57.000 CFS
	3/1 3/31	58.000 CFS
	4/1 4/30	149.000 CFS
	5/1 5/31	717.000 CFS
	6/1 6/30	874.000 CFS
	7/1 7/31	248.000 CFS
	8/1 8/31	115.000 CFS
	9/1 9/30	89.000 CFS

10/1	10/31	84.000 CFS
11/1	11/30	75.000 CFS
12/1	12/31	72.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

PO BOX 83720
BOISE ID 83720-0098

SOURCE: ELK CREEK TRIBUTARY: LITTLE SALMON RIVER

QUANTITY: 29.400 CFS

While the instream flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T22N R01E S27 SESWNE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	3.300 CFS
	2/1 2/28	4.100 CFS
	3/1 3/31	6.000 CFS
	4/1 4/30	23.200 CFS
	5/1 5/31	29.400 CFS
	6/1 6/30	17.600 CFS
	7/1 7/31	5.900 CFS
	8/1 8/31	2.100 CFS
	9/1 9/30	2.000 CFS
	10/1 10/31	2.700 CFS
	11/1 11/30	3.300 CFS
	12/1 12/31	4.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

10/1	10/31	3.400 CFS
11/1	11/30	5.300 CFS
12/1	12/31	6.800 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 50 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: SALMON RIVER TRIBUTARY: SNAKE RIVER

QUANTITY: 31,000.000 CFS

This water right will be administered consistent with Wild and Scenic Flows from the North Fork Salmon to Long Tom Bar. This water right is subordinated to the extent necessary to permit full utilization of the future water development preserved by the subordinations contained within the description of the Wild and Scenic River water rights for the Salmon River, water right numbers 75-13316 and 77-11941.

While the instream flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T24N R06E S12 NWNWSE Lot 6 Begin of Stream Flow Within Idaho County

T29N R04W S14 NWSWNE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above (End of Streamflow) location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	4,000.000 CFS
	2/1 2/28	4,000.000 CFS
	3/1 3/31	4,000.000 CFS

9/1	9/30	314.000 CFS
10/1	10/31	211.000 CFS
11/1	11/30	230.000 CFS
12/1	12/31	225.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 50 percent exceedence flows.

PLACE OF USE:

The place of use of the minimum stream flow water right is stream reach from the beginning quantification point to the ending quantification point identified above.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 1,189.000 CFS

Future non-DCMI = 2.8

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 2.8 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 48 cfs, Feb - 53 cfs, Mar - 66 cfs, Apr - 171 cfs, May - 582 cfs, Jun - 475 cfs, Jul - 101 cfs, Aug - 55 cfs, Sep - 55 cfs, Oct - 40 cfs, Nov - 42 cfs, and Dec - 34 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T37N R15E S6 SESENE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	4/1 4/30	382.000 CFS
	5/1 5/31	1,072.000 CFS
	6/1 6/30	1,189.000 CFS
	7/1 7/31	236.000 CFS
	8/1 8/31	90.000 CFS
	9/1 9/30	89.000 CFS
	10/1 10/31	79.000 CFS
	11/1 11/30	101.000 CFS

12/1	12/31	86.000 CFS
1/1	1/31	111.000 CFS
2/1	2/28	139.000 CFS
3/1	3/31	153.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. 11/1	11/30	293.000 CFS
12/1	12/31	331.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 111.000 CFS

Future non-DCMI = 0.3

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.3 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 4 cfs, Feb - 5 cfs, Mar - 6 cfs, Apr - 16 cfs, May - 55 cfs, Jun - 45 cfs, Jul - 10 cfs, Aug - 5 cfs, Sep - 5 cfs, Oct - 4 cfs, Nov - 4 cfs, and Dec - 3 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T37N R14E S34 NESWNE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

12/1	12/31	15.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 338.000 CFS

Future non-DCMI = 0.8

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.8 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 14 cfs, Feb - 15 cfs, Mar - 18 cfs, Apr - 50 cfs, May - 166 cfs, Jun - 135 cfs, Jul - 29 cfs, Aug - 16 cfs, Sep - 16 cfs, Oct - 12 cfs, Nov - 12 cfs, and Dec - 10 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T34N R12E S13 NWSENE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	31.000 CFS
	2/1 2/28	39.000 CFS
	3/1 3/31	42.000 CFS

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 2,237.000 CFS

Future non-DCMI = 3.2

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 3.2 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 57 cfs, Feb - 57 cfs, Mar - 112 cfs, Apr - 369 cfs, May - 1216 cfs, Jun - 600 cfs, Jul - 144 cfs, Aug - 67 cfs, Sep - 49 cfs, Oct - 64 cfs, Nov - 63 cfs, and Dec - 72 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T33N R12E S36 NENWNE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	131.000 CFS
	2/1 2/28	150.000 CFS
	3/1 3/31	259.000 CFS

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 365.000 CFS

Future non-DCMI = 0.6

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.6 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 16 cfs, Feb - 21 cfs, Mar - 30 cfs, Apr - 110 cfs, May - 198 cfs, Jun - 80 cfs, Jul - 15 cfs, Aug - 10 cfs, Sep - 9 cfs, Oct - 13 cfs, Nov - 18 cfs, and Dec - 20 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T31N R09E S3 SESWNE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	36.000 CFS
	2/1 2/28	56.000 CFS
	3/1 3/31	68.000 CFS
	4/1 4/30	246.000 CFS
	5/1 5/31	365.000 CFS
	6/1 6/30	200.000 CFS

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 80.000 CFS

Future non-DCMI = 0.1

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.1 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 3.5 cfs, Feb - 4.8 cfs, Mar - 6.6 cfs, Apr - 23.7 cfs, May - 43.5 cfs, Jun - 17.5 cfs, Jul - 3.4 cfs, Aug - 2.2 cfs, Sep - 2.1 cfs, Oct - 2.8 cfs, Nov - 3.8 cfs, and Dec - 4.4 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T31N R07E S12 NWSESE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	8.000 CFS
	2/1 2/28	13.000 CFS
	3/1 3/31	15.000 CFS
	4/1 4/30	53.000 CFS
	5/1 5/31	80.000 CFS
	6/1 6/30	44.000 CFS
	7/1 7/31	8.000 CFS
	8/1 8/31	4.000 CFS
	9/1 9/30	3.000 CFS

10/1	10/31	5.000 CFS
11/1	11/30	9.000 CFS
12/1	12/31	11.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 864.000 CFS

Future non-DCMI = 2

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 2 cfs based on 5 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 34 cfs, Feb - 38 cfs, Mar - 46 cfs, Apr - 127 cfs, May - 422 cfs, Jun - 345 cfs, Jul - 72 cfs, Aug - 40 cfs, Sep - 40 cfs, Oct - 29 cfs, Nov - 30 cfs, and Dec - 25 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T30N R13E S21 NESESE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	78.000 CFS
	2/1 2/28	100.000 CFS
	3/1 3/31	107.000 CFS
	4/1 4/30	283.000 CFS
	5/1 5/31	777.000 CFS
	6/1 6/30	864.000 CFS
	7/1 7/31	168.000 CFS
	8/1 8/31	65.000 CFS

9/1	9/30	64.000 CFS
10/1	10/31	58.000 CFS
11/1	11/30	73.000 CFS
12/1	12/31	63.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 30 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: SOUTH FORK CLEARWATER RIVER TRIBUTARY: CLEARWATER RIVER

QUANTITY: 3,639.000 CFS

Future non-DCMI = 23.4

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 23.4 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 251 cfs, Feb - 286 cfs, Mar - 510 cfs, Apr - 1155 cfs, May - 2240 cfs, Jun - 1350 cfs, Jul - 403 cfs, Aug - 210 cfs, Sep - 181 cfs, Oct - 159 cfs, Nov - 162 cfs, and Dec - 192 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T29N R05E S29 SWSENE Begin of Stream Flow Within Idaho County

T32N R04E S7 NESWNE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above (End of Streamflow) location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	452.000 CFS
	2/1 2/28	597.000 CFS
	3/1 3/31	995.000 CFS
	4/1 4/30	2,198.000 CFS
	5/1 5/31	3,639.000 CFS
	6/1 6/30	2,789.000 CFS
	7/1 7/31	783.000 CFS
	8/1 8/31	308.000 CFS

9/1	9/30	262.000 CFS
10/1	10/31	259.000 CFS
11/1	11/30	319.000 CFS
12/1	12/31	371.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use of the minimum stream flow water right is stream reach from the beginning quantification point to the ending quantification point identified above.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: PEASLEY CREEK TRIBUTARY: SOUTH FORK CLEARWATER RIVER

QUANTITY: 47.000 CFS

Future non-DCMI = 0.2

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.2 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 1.7 cfs, Feb - 1.9 cfs, Mar - 3.5 cfs, Apr - 14.3 cfs, May - 28.8 cfs, Jun - 11.5 cfs, Jul - 2.7 cfs, Aug - 1.5 cfs, Sep - 1.4 cfs, Oct - 1.4 cfs, Nov - 1.6 cfs, and Dec - 1.5 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T29N R05E S27 SWSESE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	3.000 CFS
	2/1 2/28	4.000 CFS
	3/1 3/31	7.000 CFS
	4/1 4/30	27.000 CFS
	5/1 5/31	47.000 CFS
	6/1 6/30	24.000 CFS
	7/1 7/31	5.000 CFS
	8/1 8/31	2.300 CFS

9/1	9/30	2.000 CFS
10/1	10/31	2.300 CFS
11/1	11/30	3.100 CFS
12/1	12/31	2.900 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: CROOKED RIVER TRIBUTARY: SOUTH FORK CLEARWATER RIVER

QUANTITY: 291.000 CFS

Future non-DCMI = 1.1

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 1.1 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 11 cfs, Feb - 12 cfs, Mar - 22 cfs, Apr - 88 cfs, May - 179 cfs, Jun - 70 cfs, Jul - 17 cfs, Aug - 10 cfs, Sep - 9 cfs, Oct - 9 cfs, Nov - 10 cfs, and Dec - 10 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T29N R07E S25 SWSENE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	19.000 CFS
	2/1 2/28	25.000 CFS
	3/1 3/31	44.000 CFS
	4/1 4/30	168.000 CFS
	5/1 5/31	291.000 CFS
	6/1 6/30	145.000 CFS
	7/1 7/31	34.000 CFS
	8/1 8/31	14.000 CFS
	9/1 9/30	13.000 CFS

10/1	10/31	15.000 CFS
11/1	11/30	19.000 CFS
12/1	12/31	19.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 260.000 CFS

Future non-DCMI = 1

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 1 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 13 cfs, Feb - 17 cfs, Mar - 23 cfs, Apr - 88 cfs, May - 160 cfs, Jun - 65 cfs, Jul - 12 cfs, Aug - 8 cfs, Sep - 7 cfs, Oct - 10 cfs, Nov - 14 cfs, and Dec - 16 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T41N R08E S27 SESWSE End of Stream Flow Within Clearwater County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	23.000 CFS
	2/1 2/28	35.000 CFS
	3/1 3/31	46.000 CFS
	4/1 4/30	168.000 CFS
	5/1 5/31	260.000 CFS
	6/1 6/30	134.000 CFS
	7/1 7/31	24.000 CFS
	8/1 8/31	11.000 CFS

9/1	9/30	11.000 CFS
10/1	10/31	16.000 CFS
11/1	11/30	27.000 CFS
12/1	12/31	30.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

BOISE ID 83720-0098

SOURCE: LAKE CREEK TRIBUTARY: NORTH FORK CLEARWATER RIVER

QUANTITY: 385.000 CFS

Future non-DCMI = 1.5

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 1.5 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 18 cfs, Feb - 25 cfs, Mar - 35 cfs, Apr - 127 cfs, May - 237 cfs, Jun - 95 cfs, Jul - 18 cfs, Aug - 12 cfs, Sep - 11 cfs, Oct - 15 cfs, Nov - 20 cfs, and Dec - 23 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T41N R11E S28 SWSWNE End of Stream Flow Within Clearwater County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	33.000 CFS
	2/1 2/28	51.000 CFS
	3/1 3/31	68.000 CFS
	4/1 4/30	241.000 CFS
	5/1 5/31	385.000 CFS
	6/1 6/30	196.000 CFS
	7/1 7/31	35.000 CFS
	8/1 8/31	17.000 CFS

9/1	9/30	16.000 CFS
10/1	10/31	24.000 CFS
11/1	11/30	40.000 CFS
12/1	12/31	44.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: TOBOGGAN CREEK TRIBUTARY: CAYUSE CREEK

QUANTITY: 156.000 CFS

Future non-DCMI = 0.6

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.6 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 7 cfs, Feb - 10 cfs, Mar - 14 cfs, Apr - 51 cfs, May - 96 cfs, Jun - 38 cfs, Jul - 7 cfs, Aug - 5 cfs, Sep - 5 cfs, Oct - 6 cfs, Nov - 8 cfs, and Dec - 9 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T39N R11E S35 NWNWSW End of Stream Flow Within Clearwater County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	13.000 CFS
	2/1 2/28	21.000 CFS
	3/1 3/31	27.000 CFS
	4/1 4/30	97.000 CFS
	5/1 5/31	156.000 CFS
	6/1 6/30	79.000 CFS
	7/1 7/31	14.000 CFS
	8/1 8/31	7.000 CFS
	9/1 9/30	7.000 CFS

10/1	10/31	9.000 CFS
11/1	11/30	16.000 CFS
12/1	12/31	18.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 141.000 CFS

Future non-DCMI = 2.5

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 2.5 cfs based on 25 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 14 cfs, Feb - 31 cfs, Mar - 56 cfs, Apr - 88 cfs, May - 96 cfs, Jun - 44 cfs, Jul - 12 cfs, Aug - 8 cfs, Sep - 9 cfs, Oct - 7 cfs, Nov - 11 cfs, and Dec - 11 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T34N R06E S6 SWSWSE End of Stream Flow Within Clearwater County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	8/1 8/31	10.000 CFS
	9/1 9/30	11.000 CFS
	10/1 10/31	11.000 CFS
	11/1 11/30	18.000 CFS
	12/1 12/31	18.000 CFS
	1/1 1/31	22.000 CFS
	2/1 2/28	53.000 CFS
	3/1 3/31	94.000 CFS
	4/1 4/30	141.000 CFS

5/1	5/31	138.000 CFS
6/1	6/30	78.000 CFS
7/1	7/31	20.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 50 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 30.000 CFS

Future non-DCMI = 0.2

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.2 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 2.6 cfs, Feb - 5.7 cfs, Mar - 10.7 cfs, Apr - 16 cfs, May - 17.3 cfs, Jun - 8 cfs, Jul - 2.3 cfs, Aug - 1.4 cfs, Sep - 1.6 cfs, Oct - 1.4 cfs, Nov - 2.1 cfs, and Dec - 2 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T34N R05E S23 SWSESE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	5.000 CFS
	2/1 2/28	12.000 CFS
	3/1 3/31	21.000 CFS
	4/1 4/30	30.000 CFS
	5/1 5/31	28.000 CFS
	6/1 6/30	17.000 CFS
	7/1 7/31	4.000 CFS
	8/1 8/31	2.000 CFS

9/1	9/30	2.000 CFS
10/1	10/31	2.000 CFS
11/1	11/30	4.000 CFS
12/1	12/31	4.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

QUANTITY: 56.000 CFS

Future non-DCMI = 0.8

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.8 cfs based on 25 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 8.6 cfs, Feb - 14.8 cfs, Mar - 28.5 cfs, Apr - 23 cfs, May - 21.1 cfs, Jun - 9.8 cfs, Jul - 3.3 cfs, Aug - 1.8 cfs, Sep - 3.1 cfs, Oct - 4.3 cfs, Nov - 6.9 cfs, and Dec - 9 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T36N R01W S14 SENWNE End of Stream Flow Within Nez Perce County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	13.000 CFS
	2/1 2/28	32.000 CFS
	3/1 3/31	56.000 CFS
	4/1 4/30	48.000 CFS
	5/1 5/31	42.000 CFS
	6/1 6/30	15.000 CFS
	7/1 7/31	7.000 CFS
	8/1 8/31	3.000 CFS

9/1	9/30	4.000 CFS
10/1	10/31	7.000 CFS
11/1	11/30	10.000 CFS
12/1	12/31	13.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 50 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

BOISE ID 83720-0098

SOURCE: UNNAMED STREAM TRIBUTARY: BIG CANYON CREEK

QUANTITY: 4.300 CFS

Future non-DCMI = 0.1

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.1 cfs based on 25 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 0.7 cfs, Feb - 1.1 cfs, Mar - 2.2 cfs, Apr - 1.8 cfs, May - 1.6 cfs, Jun - 0.7 cfs, Jul - 0.3 cfs, Aug - 0.1 cfs, Sep - 0.2 cfs, Oct - 0.3 cfs, Nov - 0.5 cfs, and Dec - 0.7 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T35N R01W S25 NENESW End of Stream Flow Within Lewis County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	1.000 CFS
	2/1 2/28	2.500 CFS
	3/1 3/31	4.300 CFS
	4/1 4/30	3.700 CFS
	5/1 5/31	3.200 CFS
	6/1 6/30	1.100 CFS
	7/1 7/31	0.500 CFS

8/1	8/31	0.300 CFS
9/1	9/30	0.300 CFS
10/1	10/31	0.500 CFS
11/1	11/30	0.700 CFS
12/1	12/31	1.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 50 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T34N R04W S28 SWNWSE Lot 13 End of Stream Flow Within Nez Perce County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	1.400 CFS
	2/1 2/28	3.300 CFS
	3/1 3/31	5.800 CFS
	4/1 4/30	5.300 CFS
	5/1 5/31	4.400 CFS
	6/1 6/30	1.600 CFS
	7/1 7/31	0.700 CFS
	8/1 8/31	0.300 CFS
	9/1 9/30	0.500 CFS
	10/1 10/31	0.700 CFS
	11/1 11/30	1.000 CFS
	12/1 12/31	1.400 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

	11/1 11/30	19.000 CFS
	12/1 12/31	28.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

QUANTITY: 47.600 CFS

Future non-DCMI = 0.2

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.2 cfs based on 25 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 12.8 cfs, Feb - 11 cfs, Mar - 28.6 cfs, Apr - 24.2 cfs, May - 9.6 cfs, Jun - 2.6 cfs, Jul - 0.8 cfs, Aug - 0.6 cfs, Sep - 0.8 cfs, Oct - 1.1 cfs, Nov - 2 cfs, and Dec - 2.9 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T31N R04E S5 NESWSE End of Stream Flow Within Idaho County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	19.700 CFS
	2/1 2/28	18.800 CFS
	3/1 3/31	47.600 CFS
	4/1 4/30	38.700 CFS
	5/1 5/31	13.800 CFS
	6/1 6/30	4.600 CFS
	7/1 7/31	1.200 CFS
	8/1 8/31	0.700 CFS

9/1	9/30	1.000 CFS
10/1	10/31	1.600 CFS
11/1	11/30	3.100 CFS
12/1	12/31	4.600 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 50 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. 10/1	10/31	1.000 CFS
11/1	11/30	1.200 CFS
12/1	12/31	1.600 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 50 percent exceedence flows.

PLACE OF USE:

The place of use for this water right is the reach above the quantification point.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This water right shall be subordinated to all future DCMI uses.

The Idaho Water Resource Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to this water right after complying with the notice and consultation procedures of Section 42-1507(4), Idaho Code. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or notify interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the water right should be amended in the public interest.

This water right was established by Chapter 150, 2005 Idaho Session Laws (codified as Section 42-1507, Idaho Code). In accordance with such law, this water right will not become effective until the governor issues a proclamation certifying that all conditions for the effectiveness of the Snake River Water Rights Agreement of 2004 have been satisfied.

When this water right is not capable of being maintained using existing flows, Idaho Code Section 42-1507 authorizes the Idaho Water Resource Board to maintain the flow through operation of the water supply bank authorized by Section 42-1761 through 42-1765, Idaho Code, and by other available methods consistent with Idaho Law.

SOURCE: BEDROCK CREEK TRIBUTARY: CLEARWATER RIVER

QUANTITY: 48.000 CFS

Future non-DCMI = 0.2

This water right is subordinated to future non-Domestic-Commercial-Municipal-Industrial ("non-DCMI") development in an amount up to 0.2 cfs based on 10 percent of the lowest unimpaired median monthly flow or the amount available above a base flow which is equivalent to the unimpaired monthly 80% exceedence flow whichever is less. The 80% monthly exceedence flows are as follows: Jan - 1.5 cfs, Feb - 4 cfs, Mar - 9.4 cfs, Apr - 22.1 cfs, May - 8.1 cfs, Jun - 3 cfs, Jul - 1.3 cfs, Aug - 1 cfs, Sep - 1 cfs, Oct - 1.4 cfs, Nov - 1.3 cfs, and Dec - 1.3 cfs.

While the instream flow and the future allocation for non-DCMI uses and base flows are to be decreed in cubic feet per second (cfs), such quantities are intended to reflect the percentages of the unimpaired exceedence flows at the quantification point described in this water right. The unimpaired exceedence flows were estimated using regional regression equations developed by the United States Geological Service. Upon further finding and order of the director that gaging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director. If actual flow data become available, the quantities in this water right will be adjusted as necessary to give effect to the exceedence assumption stated above. Such adjustments do not result in a material change to the water right and are not subject to the notice and hearing requirements set forth in this partial decree, but shall comply with the notice and consultation requirements of Section 42-1507(4), Idaho Code.

PRIORITY DATE: 04/01/2005

Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than the date of priority of this right.

POINT OF DIVERSION: T37N R02W S28 SWSESW End of Stream Flow Within Nez Perce County

There are no diversions associated with this minimum stream flow water right. The quantification point for this instream flow water right is at the above location.

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
MINIMUM STREAM FLOW	1/1 1/31	8.000 CFS
	2/1 2/28	16.000 CFS
	3/1 3/31	23.000 CFS
	4/1 4/30	48.000 CFS
	5/1 5/31	21.000 CFS
	6/1 6/30	7.000 CFS
	7/1 7/31	3.000 CFS
	8/1 8/31	2.000 CFS

9/1	9/30	2.000 CFS
10/1	10/31	3.000 CFS
11/1	11/30	4.000 CFS
12/1	12/31	6.000 CFS

Use of water under this right shall be non-consumptive.

The purpose of this instream flow is to preserve fish and wildlife, scenic, and recreational values and to protect and enhance water quality, and is equivalent to the unimpaired monthly 40 percent exceedence flows.
