Hebden needs updates on
 water use for Lewis Goodenough Ditch

Also, Spring south of
 McCannan, west side of
 River

Sirs,

My name is Johanna Wallace, I'm writing you with mine and my sisters, La Rue Whitworth, concerns with using the water from the Indian Creek water source at Inkom, Idaho.

Indian Creek drains into the Portneuf River, 2 1/2 miles below where my sister and I live. Both of us have junior water rights to Leo Lewis, and live above Mr. Lewis, so we

are not able to use the water because Mr. Lewis will not get his full amount. I drive Mr. Lewis's yard every day and see the beautiful green yard, I would like to have half the

pretty yard he does. He has had to cut down the amount he waters because the water does not flow like it has in the past, because of the droughts. My sister and I have more

of a stream flow than he does, the creek water drops into the ground after it leaves my sisters, before it gets to Mr. Lewis's property.

We wanted to rotate watering days with Mr. Lewis, but he wanted all of the water, so I would like to know if a water marshall would benefit us? I know both my sister and i

would be willing to rotate the days.

I was asked to stop water in September by Mr Luke, Lewis's had called him asking him to contact me. I know Lewis's were in doubt of us still using the water for several weeks

because they would drive up past our house. I checked the flow of water from the culvert to his yard and it is just not there like it has been in the past years. If a water master

would help us I would like to know what we need to do take these steps.

Thanks for any help,

Johanna Wallace
