**RE: WATER RIGHT 72-4052C, ORDER REQUIRING MEASURING DEVICES IN
WATER DISTRICT 170**

Dear Ms. Giese:

I received your letter dated May 23, 2008 regarding measurement and control for water right number 72-4052C. As the water right is currently in the Water Supply Bank and is not being diverted from Peach Creek, no further action is necessary to comply with the requirements of the February 20, 2007 IDWR order that requires measurement and control of diversions in Water District No. 170. However, if the water right is removed from the Water Supply Bank, measurement and control structures must be installed before diversion from Peach Creek may resume.

Thank you for contacting me on this matter. If you have any questions, or if I can be of further assistance, please feel free to contact me at the address and phone number on the letterhead.

Sincerely,

Nick Miller, P.E.
Staff Engineer, IDWR
Watermaster, Water District No. 170

Dear Mr. Miller,

I just spoke with Bob Foster, Deputy Watermaster in Salmon, who suggested that I send you this information in order to resolve the order requiring measuring devices in Water District 170.

Wood River Land Trust owns water right No. 72-4052C, 0.39 cfs water right from Peach Creek, a tributary of the Salmon River. As part of a Conservation Management Plan, we have banked the water right to benefit fish in Peach Creek and the Salmon River. The water right was accepted into the Water Supply Bank as of May 26, 2005. The water right was leased for an indefinite period.

I hope that this letter resolves the requirement for measuring devices. Please let me know if you need any further information from the Wood River Land Trust. Thank you.

Sincerely,

Kate Giese
Director of Conservation
