#### **I. Overview:**

This form applies to the *Idaho Water Resource Board Ground Water Conservation Grant Program*. The Ground Water Conservation Grant Program provides financial assistance to municipal providers and other eligible entities interested in pursuing ground water conservation/efficiency projects. Pursuing ground water conservation/efficiency projects can help water providers reduce water demands, lower operational costs such as pumping and water treatment, and reduce or postpone the need for additional water supplies.

Grants amounts can range from \$5,000 to \$20,000 for projects and up to \$10,000 for studies leading to a ground water conservation project. Grants for projects require a 66% match of the total costs. In-kind services can account for 33% of the total project costs. Grants for studies or water system audits require a 50% match of the total costs.

Unless directed otherwise by the IWRB funds will be distributed in the following manner:

25% - upon signing of grant contract by both parties

25% - upon submittal of Mid-Point Progress Report at the mid-point of the contract

50% - upon completion of project and submittal of the Grant Performance Report

#### **Prepare and attach a "Grant Document" to this application.**

The Grant Application Document requirements are outlined in the Water Project Grant Program Guidelines. The guidelines can be found at:

<http://www.idwr.idaho.gov/waterboard/Financial%20program/financial.htm>

You can also obtain a copy by contacting IWRB staff.
