To: Rick Raymondi &lt;Rick.Raymondi@idwr.idaho.gov&gt;, Stacey Taylor &lt;taylsl@if.uidaho.edu&gt;, gmoore@if.uidaho.edu

This is first of several e-mails containing a GIS shapefile that can be used with any new GIS representation of irrigated lands, to obtain a new ESPAM2 irrigated-lands data set.

Rick -

1) Could you please post these in

[http://www.idwr.idaho.gov/WaterInformation/Projects/espam/d/model\\_files/Version\\_2.0\\_Development/Current\\_Data/IRRLANDS\\_ROUND2\\_20100422/](http://www.idwr.idaho.gov/WaterInformation/Projects/espam/d/model_files/Version_2.0_Development/Current_Data/IRRLANDS_ROUND2_20100422/)

2) Could you please post the unprocessed 2002 data from Margie in the same folder, as was done with Margie's 2006 CLU data set?

Greg and Stacey -

The \*.doc file explains how to use this file (I think). Please look it over, if I need to tune it up or clarify I will, and send the revised version to Rick for posting. When you can work it in, try to follow the \*.doc and create an irrigated lands data set from the 2002 shapefile. Rick should have it posted by the time you are ready.

Everybody -

This only gets us halfway there. The other piece is the 100 sample model cells of hand-drawn polygons to calculate RED. Maybe Greg, Stacey and I should work together on these in the conference room, at least to get started.

Bryce,

I created a new folder with the irrigated lands datasets. The 2006 CLU dataset is already there, or am I missing something?

Rick

There was already a "Round2 Irrigated Lands" folder with the 2006 CLU as well as the 5 data sets already prepared for ESPAM2. But if there was a different folder with only the 2006CLU, that would be a fine place for the 2002 CLU.

We have developed a folder for the 2002 data. It should be there by early afternoon.

Good.

Greg is in Moscow on another project, but when he gets back he will start on calculating the reduction for non-irrigated inclusions. That is the last big effort before those 2002 irrigated lands can be incorporated into ESPAM2.
