Little Lost River Near Howe

USGS Gage 13119000

Little Lost River near Howe Gage

- Newly added USGS river gage
- Reinstated in April 2014
- Previously included data for June 1921-June 1990
- Only Little Lost River gage CLOSE to the model domain on the Little Lost River
- This will improve perched river seepage estimates on the Little Lost River since the gage “Little Lost River below Wet Creek” (20 miles upstream) is the gage used to estimate data for 1990-present.
