Subject: RE: In the Matter of Distribution of Water to Water Right Nos. 36-02551 & 36-07694 (Rangen, Inc.); CM-DC-2011-004--Pocatello request for documents from IDWR
Date: Friday, March 01, 2013 1:55:22 PM

We would like to add the following requests to Sarah's list.

p. 59 "IDWR's Minimum Acceptable Standards for Open Channel and Closed Conduit Measure Devices"

p. 61 "USBR Water Measurement Manual" 1984, 1997 and 2001 editions

Thanks

Candice M. McHugh

Subject: In the Matter of Distribution of Water to Water Right Nos. 36-02551 & 36-07694 (Rangen, Inc.); CM-DC-2011-004--Pocatello request for documents from IDWR

Hi Garrick and Chris,

By this email I'm requesting certain materials from IDWR that were referred to in the agency memo we received on Thursday. To assist in understanding our requests, we've referred to the page number in the memo upon which the reference is mentioned (either expressly or impliedly).

If you have any questions, please give me a call.

1. Water measurement reports from 1995-1996 (**page 58**).
2. Correspondence and/or other documentation regarding IDWR's "acceptance" of annual water measurement reports from 1995-2012 (**p. 58**)

3. List of other fish hatcheries where IDWR has “accepted” water measurements made using non-standard devices, including raceway check board-structures (p. 59).
4. Similarly, correspondence and/or other documentation regarding IDWR’s “acceptance” of annual water measurement reports from 1995-2012 (p. 58)
5. Data, documentation and correspondence for all IDWR comparisons of “portable discharge measurements against check board structures at other hatchery and irrigation diversions in both the Hagerman area and other locations in Idaho” (p. 59).
6. Data, documentation or any notes made by Cindy Yenter related to her flow measurements made at Rangen (p. 60).
7. Documentation related to the method used by Rangen employees to measure flows in the raceways and at the Lodge Dam (p. 60).
8. IDWR records referenced as an attachment to the Staff Memo (there were no records attached to the Memo) (p. 60).
9. Rangen rating table that was faxed to the IDWR Southern Region office on December 18, 2003 by Rangen staff, and all related documentation and correspondence (p. 60).
10. Documents or other materials that would allow comparison of IDWR flow measurements made on November 25, 2003 with Rangen flow measurements made on November 24, 2003, including but not limited the actual IDWR and Rangen head measurements made on those dates (p. 60).
11. All data, documentation, and correspondence related to measurements by the USGS in Billingsley Creek just downstream of the Rangen hatchery (p. 65).
12. Documents, notes or other bases for the statement made on page 65 that “systematic under-measurement of discharge at the Rangen spring complex would be expected to result in lower model predictions of discharge and response to curtailment at the Rangen spring cell.”

Thanks and enjoy your weekend!

Best regards,

Sarah
