Re: In the Matter of Request for Administration in Water District 120 and the Request for Delivery of Water to Senior Surface Water Rights / Response to Director's February 14, 2005 Information Request

Dear Director Dreher:

This letter is being sent on behalf of the members of the Surface Water Coalition.¹ On March 15, 2005 the Coalition filed a document entitled *Petitioners' Joint Response to Director's February 14, 2005 Information Request* along with five exhibits. As explained in my letter of March 16, 2005, Exhibit A to the *Joint Response* contained diversion quantities by "water year" instead of "calendar year".

Given the potential for misunderstanding about the numbers in the Exhibit, I advised that the Coalition would file an amended Exhibit A. Accordingly, the amended exhibit is being filed today and should replace the original Exhibit A contained in the March 15, 2005 *Joint Response*.

Please contact me at (208) 733-0700 if you have any questions.

¹ The coalition consists of A & B Irrigation District, American Falls Reservoir District #2, Burley Irrigation District, Milner Irrigation District, Minidoka Irrigation District, North Side Canal Company, and Twin Falls Company.

Director Karl J. Dreher

* All data is from preliminary Water District 01 end of month reports or BID preliminary data because MID & BID diversions, natural flow and storage use are not divided between MID and BID until the end of the year and are not print with monthly totals by Water District 01. Data is only compiled and print as annual data.

** Real Total are final from water district 01 except 2004 which is preliminary as of Jan 1, 2005. Years 2001-2004 are not published yet.

*** BID's maximum pump capacity for at Farmer headgate diversion is about .75 inches per acre plus canal losses.

**** Because water is not divided monthly to storage and natural flow the annual total percentage of storage and natural flow was use to compute monthly data. Therefore these are only estimates.

Minidoka Irrigation District Diversions

We estimate our transmission loss from total diversions, not at the individual headgates.
Our estimation of transmission loss is approximately 45-50%.

All data is from preliminary Water District 01 end of month reports or MID preliminary data because MID & BID diversions, natural flow and storage use are not divided between MID and BID until the end of the year and are not printed with monthly totals by Water District 01. Data is only compiled and printed as annual data.

Because water is not divided monthly to storage and natural flow, the annual total percentage of storage and natural flow was used to compute monthly data. Therefore, these are ONLY ESTIMATES.

M.I.D. has not made available to other users through means other than the water supply bank or the Water District 01 Rental Pool any water. All water leases are through the water supply bank or the Water District 01 Rental Pool.
