

IWRB Recharge Contested Applications (consolidated for hearing purposes) Info. & Instructions for Filing

On March 20, 1998 the Board filed 19 applications for managed aquifer recharge. Protests were filed on all 19 applications. The contested case did not move forward. In 2012 the Department reinitiated the processing of the numerous water right applications, including the Board's applications. On January 15, 2013, the Board resubmitted the original 19 applications for recharge. Four of the water right applications were resubmitted unmodified. The remaining original 15 applications were revised, consolidated into four applications, and resubmitted to the Department.

With the filings on Jan. 15, 2013, the original documents for these applications are located in file 1-7142, which is the base water right hearing file. Documents are profiled to all related (active) water rights, but are contained in file 1-7142. Upon the issuance of a final decision; the decision will be profiled and copied to all active files, with the original in the base file, and with a support stamp showing the file number that contains the supporting information/data.*

If a document is filed as part of the consolidated case, but pertains to a certain water right application, then the original document(s) are filed in the file(s) they reference, and copied to water right file no.01-7142.

Applications for Recharge:(Active file numbers are bolded.)

Existing applications that were **unmodified** on Jan. 15, 2013:
1-7142*, 21-7577, 21-7578, & 21-7580

1-7143 was renumbered to **1-10609**.

1-7131, 1-7132, 1-7136, 1-7137, 1-7139, 1-7140, 1-7141 were combined into **1-10613**.

1-7133, 1-7134, & 1-7135 were renumbered and consolidated into **1-10612**

21-7574, 21-7575, 21-7576, 21-7579 were renumbered and consolidated into **21-13160**
