RE: Application for Permit #63-33344

This is formal notice that we oppose the application for above captioned water permit. My check for \$25.00 payable to Idaho Dept. of Water Resources accompanies this protest.

It is apparent that there is no substantiated evidence of sufficient water to feed the populations of various developments waiting in the wings for the Mayfield area – especially Mayfield Townsite and the thousands of homes and users this permit represents.

The reports I have read authored by IDWR do not provide any comfort as to water reserves or the ability of the aquifer to recharge. I am interested in the data from IDWR on water levels of existing homeowners since the two commercial wells have been pumping from Indian Creek over the last couple years. As far as I know, no one from IDWR has taken impact measurements on our two domestic wells on Slater Creek.

If the water permit is approved and the existing homeowners are negatively impacted, who is liable? Thank you for considering the concern of those living in Mayfield.
