Bryce

This is the new ibound array updated to reflect decisions made during the Sep 21-22 ESHMC meeting. I ran this in MKMOD5 and got usable output that then ran in mudflow using the same ibound. The mudflow output maps OK, and the ibound joins to the model grid and also looks OK. That is the extent of my error checking.

Allan -

I only found one difference: Row 38 Column 13 is in the old i-bound but not in the new, per the attached GIS illustration.

Unless you holler quick I will assume this is correct and I'll apply it to the ESPAM2 data.

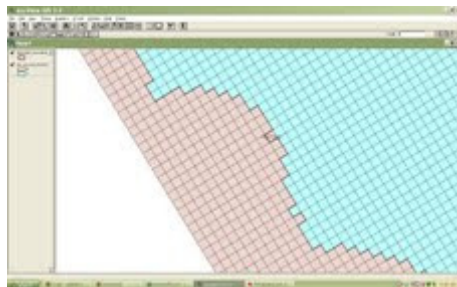

Bryce

This looks correct Bryce. The removed cell looks like it is near Malad.
