Re: CM-DC-2011-003  
SeaPac Delivery Call for Water Right Nos. 36-7072 and 36-8356.

Dear Mr. Spackman:

Pursuant to the arrangement agreed upon at the August 8, 2011, scheduling conference, below is a list of information that we are requesting from the Department and Department staff on behalf of the Idaho Ground Water Appropriators, Inc.

- All data sets, model files and related documents generated or used in any analysis of the SeaPac delivery call or the spring source for water right nos. 36-7072 and 36-8356, the Magic Springs complex, Thousands Springs or the Thousands Springs reach of the Snake River.
- All historical records of measured water flows in the SeaPac facility that is supplied by water right nos. 36-7072 and 36-8356, including discharges, diversions and bypasses at each spring outlet.
- All correspondence between the Department and owners/operators of the SeaPac facility and Wendell Starke.

- All records and documents associated with any wells, well pumps, groundwater production, and groundwater quality located within one mile of the spring source for water right nos. 36-7072 and 36-8356.
- All documents and records associated with geologic, hydrologic and hydrogeologic investigations within two miles of the spring source for water right nos. 36-7072 and 36-8356.

We would also like you to verify that the water right files available online for water right nos. 36-7072 and 36-8356 are complete and contain all permits, licenses and decrees and related documentation relative these water rights, including all related documentation and field inspection and verification reports made by the Department. If the online water right files are not complete, please provide information on where the complete files are and when they can be inspected and copied.

We appreciate your prompt attention to this matter and please let us know if you have any questions.

Very Truly Yours,

  
Candice McHugh
