Candice,

Allan and Rick have gone back and searched their records. The only things they received were the spreadsheet (Rangen Water History for IDWR.xls) and the presentation at the ESHMC (rangen_data_presentation.pdf).

Subject: IDWR Production

Garrick,

On disc 3 of 6 of the Department's production response is a spreadsheet of historical Rangen flows developed by Jim Brannon at Leonard Rice Engineers titled "Rangen Water History for IDWR.xls". There is a statement to Allan Wylie from Brannon on the first page of this spreadsheet that says "I am working on the documentation that will explain the basis of the numbers, and it should follow tomorrow" and "I'll get you the accompanying report soon".

On the same disc is a document entitled "rangen_data_presentation.pdf" but we aren't sure that's all there is.

Is this something you could confirm with Allan?

Thanks for your help.
