Subject: Sylte Appointment

Mr Spackman

I am an owner of three properties on Twin Lakes, Idaho and a taxpayer within the Flood Control District. I have attended Flood mtgs when concerned and looking for information and insight. I've found the meetings to be misguided. It appears Mr Sylte is confused as to his role and duties as a chairman and commissioner. He also tries to say he doesn't know things? That seems odd since he's been a commissioner since the flood districts inception. At meetings it seems to always come to a conversation about his water right and what he needs. This is what has people upset and why he has a conflict of interest. It seems to me based on the past three years there has been plenty of violations and complaints. The previous gal who worked at IDWR seemed to try and hold him accountable. That doesn't seem to have been happening since her departure. I wonder to what level of fact finding was done prior to the appointment to Mr Sylte. I want to voice my concern about this appointment and request you look further into this matter. He should not have been appointed.
