Re: Status Conference on accounting for distribution of storage to storage reservoirs in Water District 1

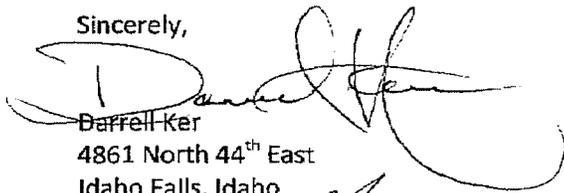

Dear Mr. Spackman,

This letter is to request that the surface and storage water users on the South Fork of the Snake River be afforded whatever status is required to participate, intervene, receive copies of all documents produced and filed with the department and be given any other rights of participation granted to those involved in this matter. Specifically, we are speaking for, and acting on behalf of the water users that have elected us to the two Committee of Nine positions we currently hold.

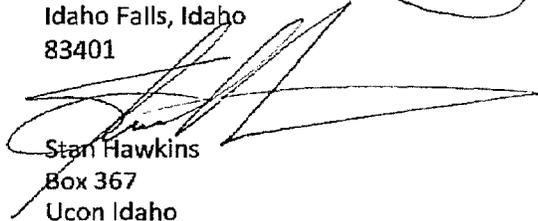

The South Fork water users divert nearly 25 % of the water utilized above Milner Dam each year and have a huge stake in the reservoir system.

We look forward to proceeding on this important issue while we try to find a solution that will benefit all concerned.

Sincerely,

Darrell Ker
