Subject: Basin 63 - Refill Matter

Al,

It has been many weeks since we last discussed the refill issue in Basin 63. I wanted to touch base with you to let you know that we are currently working on pulling together several documents for your consideration. The first two are a pair of draft water rights that are intended to provide a possible way forward in licensing/decreeing water rights that recognize the existing practice of refill, and attempt to protect with a priority date, an additional volume of water for refill moving forward. I hope to have something to you on that regard either today or early next week. The second issue is analysis of the interplay between junior natural flow diverters and refill, and the affects juniors have had on refill in the past. Liz is currently working on synthesizing and summarizing her previous analysis in a report form. Again, I hope we can share her analysis with you either today or early next week.

Either myself or Gary will follow up with you with the material.

Thank you,

Mathew Weaver, PE
