

related to water management such as Ground Water and Surface Water Relationships, Hydraulics, Water Management Workshop, Field Hydrogeology, Irrigation System Design and several water law workshops.

3. I worked from September 1988 to August 1991 for IDWR as a Senior Water Rights Agent. My duties included, but were not limited to the review, analysis, recommendation and processing of water right transfers, and the review and processing of applications to reallocate water held in trust under the Swan Falls agreement.
4. From September 1991 to February 1992, I worked for IDWR as a Hydrologist-in-Training, in the Water Permits Section. My duties included, but were not limited to water district assistance, field inventory and measurement of diversions, and water right analysis.
5. I worked from March 1992 to February 1997 for IDWR as a Hydrologist in the Water Permits and Water Distribution Sections. My duties included, but were not limited to, assisting in the implementation of the water measurement program, field inventory and measurement of diversions, water district assistance, water right analysis, reduction and analysis of hydrologic data and preparation of reports, and investigation of water distribution complaints and water right disputes.
6. From March 1997 to the present, I have served as the Section Manager for the Water Distribution Section. My primary responsibilities are the implementation and management of the water measurement program, provide assistance to water districts, periodic training of watermasters, and assistance or resolution of water distribution/water right disputes.
7. I have personal knowledge of the water supply conditions and water rights in Basins 35, 36, 41 and 43 through my work with IDWR's Water Distribution Section.

8. The general reasons for the creation or enlargement of a water district are:
- Provide a mechanism for administration, regulation and enforcement of water rights;
  - Provide a means for regular measurement and reporting of diversions, including ground water diversions.
  - Provide a more local and immediate response to general calls for water delivery;
  - Provide for improved management of water rights and keeping water rights current with respect to ownership and water use;
  - Provide a system whereby local watermasters or deputy watermasters can provide for local and timely response to general calls for water distribution; and
  - Water district administration and regulation can be accomplished by assessing water users directly through the districts.
9. The specific reasons for creation or enlargement of water districts in Basins 35, 36, 41 and 43 are:
- Existing water districts in these basins are limited to surface water sources and do not include ground water sources. Additionally, some surface water sources in these basins are not included in any water district.
  - All of the water rights claimed in Basins 35, 36, 41 and 43 have been reported or partially decreed in the SRBA as required under I.C. § 42-1417.
  - IDWR has already created Water Measurement Districts in these areas, but the Measurement Districts' authority is limited to measurement and reporting of water use and does not include authority to regulate water rights, including enforcement of water right conditions.
  - The establishment of water districts will provide the watermasters with the ability to administer water rights in accordance with the prior appropriation doctrine as established by Idaho law.
  - The available water supply is currently not adequate to satisfy some senior priority water rights and is projected, in the future, to be insufficient, at times, to satisfy these water rights.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

  
TIMOTHY J. LUKE

SUBSCRIBED AND SWORN to before me this 19<sup>th</sup> day of NOVEMBER, 2001.

  
Notary Public for Idaho
