

Treasure Valley Advisory Committee Meeting #4 -- July 30, 2010

Meeting location: Meridian City Hall, 33 East Broadway Avenue, Meridian, Idaho.

Specific Meeting Goals for 30 July 2010

1. Review results from the Future Demand Study and clarify the implications of the study for the CAMP;
2. Refine options to provide a reliable water supply over the next 50 years;
3. Identify water conflicts likely to occur in the Treasure Valley in the next 50 years; and
4. Learn about downriver obligations and conjunctive administration.

8:30 **Coffee and snacks, sign up lists available for public comments**

9:00 **Welcome, Introductions, and Review Agenda**

9:15 **Discuss the Future Demand Study**

- Saquib Najmus and Elias Tijerina will present preliminary results from the Future Demand Study
- After the presentation the Advisory Committee will (1) clarify any questions and/or concerns they have about the study itself; (2) identify what the preliminary results mean for the CAMP; and (3) determine timing for integrating the results of the study into the CAMP.

11:00 **Background Information**

Downriver Obligations

- Brian Patton, IDWR

Conjunctive Administration

- Garrick Baxter, Office of the Attorney General
- David Tuthill, former Director, IDWR

12:15 **Lunch**

1:00 **Refine Reliable Water Supply Options**

- Building the work completed at the prior meeting to address the first CAMP goal (*provide reliable sources of water, projecting 50 years into*

the future), the purpose of this discussion will be to (1) review and discuss the results of the online survey; and (2) prioritize options.

- Brief reports from advisory committee members that attended Lower Boise Feasibility Study public meetings including public suggestions for options to meet future water demand.

2:30 Break

2:45 Identify Likely Water Conflicts Over the Next 50 Years

- Through a round-robin discussion, the Advisory Committee will begin to address another CAMP goal – *to develop strategies to avoid conflicts over water*. The purpose of this discussion is to simply identify likely water conflicts over the next 50 years. During the next meeting of the Advisory Committee, the participants will generate options to address the likely conflicts.
