Corey,

To further flesh these out, the idea with point 1 is to try and have a draft plan by November 1 so that the details can be worked out before the deadline. This is simply a scheduling request to keep everyone on track.

The idea with point 2 is if a junior is able to mitigate for consumptive use then there should be a pathway for that to happen. During the 3-year deal there wasn't enough time for change, so the idea wasn't incorporated. In a 10-15 year plan there's time for mitigation to be developed. This would be an addition to the plan, to take into account what could happen during a longer term.

Thanks,

Chris

Hi Corey,

Myself and Sun Valley Co. just had two questions.

- We would like to see a set monthly schedule with a target end date, Somewhere around November 1st.
- If at some point a water users situation changes can we have an "off ramp". If a junior gained the ability to mitigate for example. We support the idea of the management plan being set for 10 or even 15 years but that is also a long time.

Look forward to working with the committee to implement a plan benefits WD37, Thanks,
Corey.

Subject: Big Wood GWMA Advisory Committee Reminder

Committee Members,

The next Big Wood GWMA Advisory Committee meeting is scheduled for March 20th at the Community Campus in Hailey. The meeting is scheduled to start at 10:00 a.m. Since the current BWRGWMA management plan expires on December 31, 2024, the Advisory Committee will review a list of questions to be considered as it evaluates possible adjustments or updates needed for an extended management plan. As you recall, the Director stated that he is anticipating a 10 – 15-year plan extension. A meeting agenda with remote meeting link will be distributed before the meeting.

This Friday, March 8th is the deadline for the submittal of questions/ideas for updating the plan. These can be submitted to Shelley Keen or myself. These submittals should be specific, and include the following components:

- Who is advocating for the update?
- What is the update and why is it needed? Be specific and as quantitative as possible.
- What section of the plan needs to be updated? Refer to plan heading level and page numbers.
- What data or information do we need to review or evaluate the proposed update?

Shelley and I will review the submittals on March 12th and organize them for distribution to the committee.

Corey Skinner
