

- from Bill Simon on 4/17/2024 meeting P.S.

The BWRGWMA advisory committee recognizes that the USGS in coordination with the IDWR is in the process of a multiyear study of the Camas aquifer. This study has a completion date of 2027. Upon the completion and publication of the study results, the advisory committee at the first regular scheduled meeting will determine the extent of participation by the WD37B Groundwater Association in this plan
