---

Hi Shelly and Corey,

Here are my comments on the Memo.  
Thanks for keeping the ball moving forward,  
Justin

### **Plan Goals**

1- Yes

I thought that Cooper and Sharon were to provide the Goals  
Plan must provide safe harbor not just reduce likelihood.

2 -yes

Aquifer health is ambitious and the data shows the aquifer is in a steady state

### **Flow Targets**

1- maybe

Location of target my be changed

Target should drop in dry years and must take into account storage water delivery

2- maybe

How to administer?

SVGWD has very little impact here and therefore cannot 'maintain' flow. Perhaps the  
cities and SVC should bear this responsibility

3-maybe

Don't like maintain

4- yes

Don't like maintain

5- yes

### **Management Actions**

1- no

Don't remember this discussion

2-yes

3-yes

We don't like baseline action and would like to focus on total reductions

GW levels concept needs to be vetted

4- maybe

Not sure of the date

### **CIEF**

1-yes

2- yes

3- no

This seems to reduce flexibility

4-yes

5- yes

### **Storage Water**

1- yes

Amount of storage water should decrease on dry years not increase

2- yes

This seems very meaningful

### **Irrigation Season**

1- no

Modeling shows very little impact from this action. Rather focus on annual pumping reductions

2- see above

3- yes
