

Plan Tweaks Topics

- Adjustment to “table 1” in plan
 - ?(240)? KAF wet year – baseline actions get removed (fallowing, season of use, storage water)
 - Specifying the average between the predictions (math verbage)
- Fallowing –
 - removing language from baseline required action
- Cities
 - Escalate CIEF contributions (agreed, numbers to be negotiated)
- Other actions –
 - Moratorium – delete this bullet (completed)
 - Add completion dates to projects
 - Update present day verbiage
 - Petition USGS to monitor and calibrate (maintain) stream gauges, focusing on Sportsmans.
- Storage water – too much? (CIEF procurement)
 - New volume decision to be made from “stream flow target” committee
 - Change to reflect “as needed” basis (trigger)
- GGWD
 - Contribution to CIEF for storage at the same rate as the Cities
- CIEF –
 - inflation adjustment (%age)
 - Acquire storage water
 - Separate funds (storage water, fallowing?)

3 Year Projects

- Station 10 - 32 cfs justification – WR administration on LW and Silver Cr
- GW measurement data from WD37
- Sr surface water users in the upper valley
- CIEF hunting down non contributing users who are classified as non consumptive
- A1A
- Camas study
- Basin scada
- Rule 161
- Wd37 accounting model (LWR)
- Flow model calibration
