

2025 Water District 37 Storage Water Delivery

Pursuant to page ten of the December 20, 2024, Extension of Final Big Wood River Ground Water Management Area Management Plan January 1, 2025 – December 2027 (the Plan), the following is a report by Water District 37 of annual storage water deliveries, intended for the Big Wood River Ground Water Management Area Advisory Committee (BWRGWMA AC), IDWR, and IWRB. The report describes the amount of water delivered to BWLWWUA (Big Wood Little Wood Water Users Association) members and the locations of delivery.

Storage water to the Big Wood River water users was delivered based on percent availability of storage water, and on the inflow to Magic, tracked using historically established calculations from Stanton's Crossing, Willow Creek, Camas Creek, unnamed streams, and Rock Creek. An adjustment was made for seepage using historical calculations. Storage water to the Little Wood River water users was delivered based on flows at Station 54, and percent availability of storage water.

In an email to the BWGWMA AC April 9, 2025, it was reported that there would be no additional management actions required due to the average predicted discharge values at the Hailey Gage forecasted at 241.5 KAF, which is considered an adequate water supply. A "wet" year requires equal or greater than 240 KAF forecasted AND Magic carryover above 90KAF. In 2025 there was 2000 AF of storage water purchased pursuant to the Plan. Storage water became available August 8, 2025. An additional estimated ~200 AF of storage water may have been required if Barbara farms had not donated their Magic rental water to the system.

In 2022, 1,161.87 AF storage water was delivered to LWWUA members, and 177.46 AF storage water was delivered to BWWUA members. There was no storage water delivered to the Little Wood or Big Wood Rivers in 2023 or 2024. In 2025, 337.12 AF storage water was delivered along the Little Wood River and 347.21 AF along the Big Wood River. In 2025, storage water pursuant to the plan was delivered to LWWUA members as follows: Huyser 0 AF, Newell 58.43 AF, Arkoosh 260.14 AF, 18.55 AF Brossy. In 2025, storage water pursuant to the plan was delivered to BWWUA members: 0 AF Westendorf, 0 AF Sabala, 347.21 AF M&M, 0 AF Hulz. Utilization of 161 Exchange Condition water rights below Magic decreased demand for purchased storage water 82.78 AF. Any unused storage water can be marketed after September 30th, and any proceeds return to the CIEF.

AFRD2 deliveries were turned on April 12, 2025, and turned off October 10, 2025. Magic Reservoir deliveries were turned on April 30, 2025, and turned off August 27, 2025.

Special notes: The USGS gage Silver Creek at Sportsman Access near Picabo, ID was measured May 14, July 2, July 14, August 12, and August 25, 2025. The first half of July, the USGS online reporting was occasionally unavailable, and during the days of July 8-July 9 had no data available across the whole county.

Data Sources included: Willow Creek-SPF Engineering, Camas Creek-USGS, Stanton Crossing-USGS, Unnamed streams-historical, Rock Creek-historical, Adjustment-historical, Station 54-IDWR, and field measurements and calibrations made throughout the season.
