"There shall be constituted a Water Resource Agency, composed as the Legislature may now or hereafter prescribe, which shall have power to construct and operate water projects; to issue bonds, without state obligation, to be repaid from revenues of projects; to generate and wholesale hydroelectric power at the site of production; to appropriate public waters as trustee for Agency projects; to acquire, transfer and encumber title to real property for water projects and to have control and administrative authority over state lands required for water projects; all under such laws as may be prescribed by the Legislature. Additionally, the State Water Resource Agency shall have power to formulate and implement a state water plan for optimum development of water resources in the public interest ..."

INTRODUCTION

The Idaho Water Resource Board (IWRB) provides assistance to plan, design, build, improve, and rehabilitate water projects that are found to be in the public interest and in compliance with the State Water Plan and to promote and achieve the efficient and effective use of Idaho's water resources.

This report, required by Idaho Code § 42-1759, provides an overview of the program and its accomplishments and describes program activities during Fiscal Year 2013.

THE NEED FOR A WATER RESOURCE FUNDING PROGRAM

Idaho, like all of the western states, was settled where water was available. The planning and development of adequate water supplies is an ongoing activity. Systems were built to bring water to farms and cities. Pipelines, dams, and canals were built and rebuilt. Historically, the overwhelming burden of this work fell on private individuals and cooperative groups until the federal government stepped in and assisted in the construction of irrigation, flood control, and rural and municipal drinking water projects. For the past several decades, federal budget deficits, environmental concerns, and other priorities have reduced federal spending for water projects. Thus, by necessity, the western states, including Idaho, have become more involved in the planning, financing, and construction of water projects for a variety of uses.

Photo: Reconstruction on the Blue Lakes Pipeline that delivers water to both Blue Lakes Trout Farm and the Board's Pristine Springs project

The demand for water continues to increase in Idaho, resulting in the need to construct new water systems, rehabilitate and expand existing water systems, and make more efficient use of existing water supplies. Many community water systems around the state were constructed years ago and now need rehabilitation or replacement. The rapid growth of the past several years is forcing many communities to find additional water supplies and upgrade their water systems to meet higher demand levis. Many small community water systems are struggling to comply with the provisions of the Safe Drinking Water Act. Because these regulations

often require expensive upgrades or new facilities, most small water systems are finding it difficult to finance the required improvements.

Many irrigation systems around the state were built during pioneer days. Old systems can be inefficient in their conveyance or water. Improving or rebuilding these irrigation systems with current technologies can result in more efficient use of Idaho's water resources.

Opportunities exist for, and the Board encourages, constructing "in-town" irrigation systems for residential lawn and garden irrigation, and the irrigation of parks, schoolyards, and cemeteries. These systems can reduce the demand on municipal water systems. Since most municipal systems provide some level of water treatment, it can be more cost-effective to use untreated surface water for outside irrigation uses and reserve the more expensive treated water for indoor uses.

Many of the dams around the state are approaching or have exceeded 100 years in age and need replacement or major rehabilitation. This can be very costly and often the organizations responsible for the dams have limited ability to pay for the needed repairs.

Devastating floods have occurred in Idaho during some years. Opportunities exist for projects, both structural and nonstructural, to reduce the damages caused be these floods. Some flood control projects can be combined with surface water storage or ground water recharge by diversion of flood flows into recharge basins.

Hydroelectric power production opportunities remain at many existing dams, canal drops, and other water control structures that were built for irrigation, flood control, or other purposes. These hydroelectric projects serve to make Idaho more energy independent, are carbon-neutral, are renewable energy, and may provide revenues to the water users to help offset operation costs.

The water resource funding program provides lasting benefits to Idaho in the areas of irrigation and community water supplies, flood control, and hydroelectric power, greatly enhancing Idaho's economy.

Photo: Canyon County Drainage District No. 2 replaced 1300 feet of failed drainage tile with a \$35,000 loan provided by the Idaho Water Resource Board.

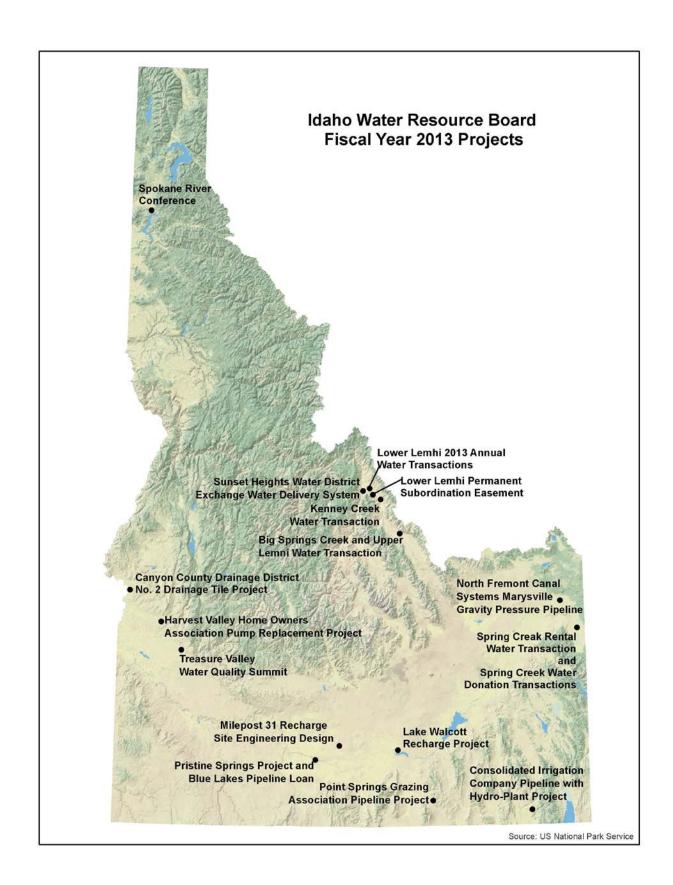

PROJECTS FUNDED DURING FISCAL YEAR 2013

During Fiscal Year 2013, The Idaho Water Resource Board authorized \$6,349,218 in funds for the water projects listed below. More complete descriptions of these projects are included in Appendix A.

Project	Loan	IWRB Project Expenditure
Consolidated Irrigation Co. Pipeline with	\$1,500,000	
Hydro-Plant Project		
Point Springs Grazing Association Pipeline	\$48,277	
Project		
Kenney Creek Water Transaction*		\$10,220
Big Springs Creek and Upper Lemhi Water Transaction*		\$69,439
Treasure Valley Water Quality Summit		\$500
Mile Post 31 Recharge Site		\$35,000
Canyon County Drainage District No. 2	\$35,000	
Drainage Tile Project		
Lower Lemhi 2013 Annual Water Transactions*		\$88,344
Spring Creek Rental Water Transactions*		\$7,463
Spring Creek Water Donation Transactions*		\$3,481
North Fremont Canal System Marysville	\$2,500,000	
Gravity Pressure Pipeline Project-Phase 4		
Spokane River Conference		\$3,000
Harvest Valley HOA Pump Replacement	\$4,500	
Project		
Pristine Springs Project and Blue Lakes Pipeline	\$1,500,000	\$170,000
Loan		
Lower Lemhi Water Transactions*		\$239,850
Sunset Heights Water District Exchange Water	\$48,000	
Delivery System		
Lake Walcott Recharge Project		\$85,644
TOTALS	\$5,635,777	\$712,941

Grand Total: \$6,348,718

^{*} The source of these funds is Bonneville Power Administration

COMPONENTS AND OPERATION OF THE PROGRAM

The Water Resource Funding Program provides financial assistance to plan, design, construct, improve, expand, and rehabilitate the infrastructure necessary to deliver water to the people of Idaho and promote the efficient and effective use of Idaho's water resources. The financial assistance provided is in the form of loans, grants, and Board-issued revenue bonds.

Projects proposed for funding through this program must be in the public interest, be in compliance with the State Water Plan, and be economically feasible, technically viable, and environmentally acceptable. One of the guiding principles of the program is that as much of the work as possible is performed by private-sector engineering and construction firms, helping to

provide employment and economic stimulus throughout the state. Guidance and project oversight is provided by the Board's engineering staff to ensure that the projects are properly designed and constructed, address problems and needs, and ensure the Boards funds are efficiently utilized. Assistance is also provided in determining the scope of a proposed project and determining when the assistance of an engineering consultant is needed. When possible, projects with multiple uses are encouraged. On numerous occasions the Legislature has authorized to Board to undertake projects and studies with regional or statewide significance.

Photo: *IWRB* members examining core drilling investigation work at the proposed Galloway dam site to determine the site's suitability for development of a large dam and reservoir project.

The Water Resource Board Funding Program consists of the Revolving Development Account, Water Management Account, and the Water Resource Development Revenue Bond Program.

REVOLVING DEVELOPMENT ACCOUNT

The Revolving Development Account was created by the Idaho Legislature in 1969 to support the development of Idaho's water resources through new construction, and through the rehabilitation or expansion of existing water projects. Funds from this account may used by the Water Resource Board for any water project in the public interest or may be loaned to appropriate entities to finance water projects. The Revolving Development Account balance sheet as of June 30, 2013, is included in Appendix B.

WATER MANAGEMENT ACCOUNT

The Idaho Legislature created the Water Management Account in 1978 to complement the Revolving Development Account. Loans and grants may be awarded to appropriate entities to finance water projects, and the Water Resource Board may expend money from this account to undertake appropriate projects that are in the public interest. Projects funded through the Water Management Account must fall into one of the following categories: reclamation, upstream storage, off-stream storage, aquifer recharge, reservoir site acquisition and protection, water supply, water quality, recreation, or water resource studies. In addition, this account serves as a mechanism for the Legislature to fund specific water projects or studies.

WATER RESOURCE DEVELOPMENT REVENUE BONDS

The constitutional amendment that created the Idaho Water Resource Board authorizes the Board to issue Water Resource Development Revenue Bonds to finance the construction of water projects. The 1981 Legislature clarified the Board's authority to issue these bonds and loan the proceeds to finance water projects undertaken by local organizations within Idaho such as irrigation districts and water companies. The Board receives the proceeds from the bond sale, and then loans the funds to the project sponsor. The Bonds are issued by the Water Resource Board, usually enabling the project sponsor to obtain the advantages of tax-exempt financing.

The bonds are secured by project revenues. The Board may also issue revenue bonds to finance projects undertaken by the Board. An example is the Board's Dworshak Hydropower Project, a 3 MW power plant on the water supply pipelines that deliver water from Dworshak Reservoir to the Dworshak and Clearwater Fish Hatcheries.

SECONDARY AQUIFER PLANNING, MANAGEMENT, & IMPLEMENTATION FUND

The "Secondary Aquifer Fund" was created by the Legislature in 2010 to fund aquifer management projects statewide. To date, the projects have been focused on efforts to stabilize the Eastern Snake Plain Aquifer, including managed recharge.

ONGOING PROJECTS

The Board has responsibility for owning and managing several ongoing water projects on behalf of the State of Idaho.

Dworshak Small Hydropower Plant

This 3 MW hydropower plant is located on twin pipelines that run from Dworshak Dam to supply two federally-constructed fish hatcheries below the dam. The Water Resource Board constructed the plant in 1999 - 2000. The energy is sold to the Bonneville Power Administration. Power sales revenues in excess of debt service, operations and maintenance, and repair and replacement reserve funds are used to finance other water projects around the state.

Bell Rapids Water Rights

As a result of a complex series of negotiations, in 2005 the Legislature directed the Water Resource Board to acquire the water rights from the Bell Rapids irrigation project near Hagerman. The water is leased to the U.S. Bureau of Reclamation for purposes specified in the Nez Perce Water Rights Agreement.

Pristine Springs Project

In 2008 the Water Resource Board acquired the Pristine Springs facility near Twin Falls. This purchase was undertaken in partnership with the North Snake and Magic Valley Ground Water Districts and the City of Twin Falls in order to resolve water use conflicts in the area and provide water for future municipal growth. The facility consists of a fish hatchery, 200 acres of irrigated pasture, and two small hydroelectric power plants with a combined capacity of 325 kW. Even after execution of the water use agreements with the ground water districts and the City, which reduced its available water supply, the facility still has fish production capability. The hatchery and agricultural ground are leased to the former operators. The energy from the hydropower plants is sold to Idaho Power. The Water Resource Board is currently evaluating long-term options for the facility.

ESPA Recharge

The Legislature has directed the Water Resource Board to undertake a program of aquifer recharge for the Eastern Snake Plain Aquifer (ESPA). The Board owns water rights for recharge from the Snake River and Wood River. In anticipation of recharge playing a central role in the ESPA Comprehensive Aquifer Management Plan (CAMP), the Board has been laying the groundwork for a large-scale, sustainable recharge program on the Eastern Snake Plain. Between 2009 and 2013, approximately 475,000 acre-feet of recharge into the ESPA was accomplished to help begin implementation of the ESPA CAMP. The Board utilized this operational experience, along with hydrologic modeling, to determine how to most effectively undertake recharge to accomplish aquifer stabilization.

Photo: Test Drilling at the Walcott Recharge Site.

Palisades Storage Contract

In 2008, the Water Resource Board purchased a 5,000-acre-foot water storage contract in Palisades Reservoir from the FMC Corporation. Palisades is a large federally-owned and operated reservoir. The Board intends to utilize this storage to help in making additional water available in the eastern Snake Plain area

Upper Salmon Basin

In cooperation with several state and federal agencies over the past several years, the Water Resource Board has entered into several short-term and long-term agreements with water right holders in the Upper Salmon Basin. The purpose of these agreements is to provide stream flows sufficient for endangered species needs while maintaining the agricultural economy of the area. These voluntary agreements may take the form of non-diversion agreements, water leases, conservation easements, and changes in diversion locations. Very few agreements result in actual dry-ups of land. The funding source for these agreements is the Bonneville Power Administration and federal Pacific Coast Salmon Recovery funds.

WATER PROJECTS AND IDAHO'S ECONOMIC DEVELOPMENT

Water is essential for the stability and continued growth of Idaho's economy. Agriculture is a major part of the state's economy and has traditionally been a stabilizing influence to moderate the boom and bust cycles of the state's mining and timber industries. Idaho's newer high-tech industries are subject to boom and bust cycles, making agriculture's

Photo: Little Springs Creek in the Upper Salmon Basin

stabilizing influence all the more important. By assisting with the reconstruction and improvement of irrigation systems, the Water Resource Board is helping to ensure that the water supply, storage, and delivery infrastructure necessary for agricultural production will be in place for many years to come.

Water is essential for the stability and growth of Idaho's communities. By assisting with the construction and improvement of community water supply, storage, treatment, and delivery projects, the Water Resource Board is helping make the state's communities attractive places to live. These projects foster economic development by providing a stable water supply for business and industry.

A secondary benefit of these projects is the increased employment and material purchases involved in project planning, design, and construction. This helps to provide private-sector employment and economic stimulus throughout the state.

LOOKING AHEAD

The Water Resource Board is assisting the people of Idaho with maintaining and improving the vital infrastructure required to manage the state's water resources. Local governments and cooperatives throughout the state have demonstrated their capability, with state assistance, to develop projects that address local water needs. There may be needs for the construction of state-sponsored projects that provide regional benefits, such as construction of additional above or below-ground water storage to alleviate conflicts and provide for growth. In addition, the Water Resource Board is cooperating with the Department of Water Resources to evaluate the impacts

of climate change on water management in Idaho. Depending on the climate change-related effects on our water resources, modifications to water storage and delivery systems may be necessary, including enlarged surface and ground water storage capacity.

The Water Resource Board is encouraging irrigation system improvements wherever possible, keeping in mind the importance of incidental recharge to our aquifer levels. Dam repair, municipal and community water system projects, and irrigation system improvements are anticipated in Fiscal Year 2014 and 2015. The Eastern Snake Plain Comprehensive Aquifer Management Plan, which has been approved by the Legislature and signed into law with the goal of stabilizing the Eastern Snake Plain Aquifer, will require the implementation of several aquifer management measures.

Photo: The North Fremont Canal System, Inc. received a \$2,500,000 loan to construct Phase 4 of Marysville project to convert open canals to gravity-pressurized pipelines.

Appendix A: Project Reports

Fiscal Year 2013 Idaho Water Resource Board Funded Projects and Studies

CONSOLIDATED IRRIGATION COMPANY PIPELINE WITH HYDRO-PLANT PROJECT

Project Sponsor: Consolidated Irrigation Company

IWRB Funds: \$1,500,000 (Loan)

Account: Revolving Development Account

Project Description: The Consolidated Irrigation Company requested \$1,500,000 to convert 6 miles of unlined canal to 3.5 miles of pressurized pipeline with a small hydro-plant at the end. Consolidated Irrigation Company delivers water to 456 share holders irrigating 17,000 acres. The Consolidated Irrigation Company loan was approved at 5.5% interest for a term of 20 years, contingent upon the fact that no monies go out until concrete cost estimates and the power sales contract are obtained.

POINT SPRINGS GRAZING ASSOCIATION PIPELINE PROJECT

Project Sponsor: Point Springs Grazing Association

IWRB Funds: \$48,276.62 (Loan)

Account: Revolving Development Account

Project Description: The Point Springs Grazing Association requested \$48,276.62 to replace an existing 6 miles of pipeline. The Association is a group of 6 ranchers that pasture cattle in the Meadow Creek Canyon. It grazes approximately 550 head of cattle during the summer months on 13,000 acres. The Point Springs Grazing Association loan was approved at 5.5% interest for a term of 10 years.

KENNEY CREEK WATER TRANSACTION

Project Sponsor: Idaho Water Resource Board

IWRB Funds: \$10,219.79 from the Bonneville Power Administration

(Idaho Fish Accord)

Account: Revolving Development Account

Project Description: The Kenney Creek transaction is a 20-year agreement not to divert 0.14 cfs out of Kenney Creek with the Andrews family. The goal of the project is to reduce the diversion that might adversely impact the creek by putting a small pumping station on a wastewater ditch that runs along the Andrews property. Funds for the project come from the Bonneville Power Administration through the Idaho Fish Accord and are used to compensate the irrigator for power costs associated with operating the new pumping system.

BIG SPRINGS CREEK AND UPPER LEMHI WATER TRANSACTION

Project Sponsor: Idaho Water Resource Board

IWRB Funds: \$69,438.50 from the Bonneville Power Administration

(Idaho Fish Accord)

Account: Revolving Development Account

Project Description: The Big Springs Creek (Upper Lemhi) transaction is a 20-year agreement not to divert 1.36-4.54 cfs out of Big Springs Creek and the Lemhi River with the Beyeler Ranches. In order to increase flows in Big Springs Creek and the Upper Lemhi River, Beyeler Ranches would consolidate some of its Lemhi River water rights and all of its Big Springs water rights into one diversion. Funds for the project come from the Bonneville Power Administration through the Idaho Fish Accord and are used to compensate the irrigator for power costs associated with operating the new pumping system.

TREAUSRE VALLEY WATER QUALITY SUMMIT

Project Sponsor: Idaho Water Resource Board IWRB Funds: \$500 (Fund Allocation)

Account: Revolving Development Account's Rathdrum Prairie/Treasure Valley

CAMP Subaccount

Project Description: The Treasure Valley Partnership requested \$500 towards funding a Treasure Valley Water Quality Summit. Matching funds were also requested from other organizations. The Treasure Valley Water Quality Summit supports several actions delineated in the Recommended Treasure Valley Comprehensive Aquifer Management Plan, including: coordination and implementation through coordinating with water users and evaluating and addressing environmental issues; partnership among stakeholders to fund activities and leverage programs with CAMP implementation, and overall IWRB efforts to resolve potential conflicts through cooperation and collaboration rather than crisis and litigation. The IWRB approved the allocation of funds to the Treasure Valley Partnership for the Treasure Valley Water Quality Summit.

MILE POST 31 RECHARGE SITE

Project Sponsor: Idaho Water Resource Board **IWRB Funds:** \$35,000 (Fund Allocation)

Account: Secondary Aquifer Planning, Management, and Implementation Fund

Project Description: The American Falls Reservoir District No. 2 requested to partner with the Board to construct the Mile Post 31 Recharge Site. Managed aquifer recharge is a major water management strategy spelled out in the ESPA CAMP. The Board approved the expenditure of up to \$35,000 to assist the American Falls Reservoir District No. 2 with construction of the Mile Post 31 Managed Recharge Site, not to exceed 40% of actual project costs.

CANYON COUNTY DRAINAGE DISTRICT NO. 2 DRAINAGE TILE PROJECT

Project Sponsor: Canyon County Drainage District No. 2

IWRB Funds: \$35,000 (Loan)

Account: Revolving Development Account

Project Description: The Canyon County Drainage District No. 2 (CCDD2) requested \$35,000 to replace 1300 feet of failed drainage tile. The CCDD2 was formed in 1918 and services 2300 acres of agriculture and rural development in southwestern Idaho in Payette County and Washington County. The CCDD2 loan was approved at 5.5% interest for a term of 10 years.

LOWER LEMHI 2013 WATER TRANSACTIONS

Project Sponsor: Idaho Water Resource Board

IWRB Funds: \$88,343.65 from the Bonneville Power Administration

(Idaho Fish Accord)

Account: Revolving Development Account

Project Description: The Lower Lemhi 2013 Annual Transaction was a set of eight annual agreements not to divert out of the Lemhi River to improve stream flow for anadromous and resident fish. The irrigators were paid \$80.65 per cfs for each day that water was not diverted for irrigation use. During the 2013 irrigation season 822 acre-feet was used under these annual agreements to maintain the target flows in the river. The IWRB approved the funding for this project for \$82,343.65 and \$12,800 (\$6,000) to come from the Idaho Fish Accords) to Water District 74 for administration of the easements. However, only \$38,891.86 was actually spent on this project.

SPRING CREEK RENTAL WATER TRANSACTION

Project Sponsor: Idaho Water Resource Board

IWRB Funds: \$7,463.31 from the Bonneville Power Administration

(Columbia Basin Water Transaction Program)

Account: Revolving Development Account

Project Description: The Spring Creek Rental Water transaction is an agreement between water right owners Richard LaVere Beard and Richard and Ella Beard and the IWRB. The water right owners proposed to lease their rights into the Water Supply Bank for a term of five years. The IWRB could then rent the water rights out for delivery to the Teton River minimum stream flow right. It is in the interest of the State of Idaho to increase stream flow in the Teton River and its tributaries to encourage recovery of Yellowstone cutthroat trout. Funds for the project come from the Bonneville Power Administration through the Columbia Basin Water Transaction Program.

SPRING CREEK WATER DONATION TRANSACTIONS

Project Sponsor: Idaho Water Resource Board

IWRB Funds: \$3,480.63 from the Bonneville Power Administration

(Columbia Basin Water Transaction Program)

Account: Revolving Development Account

Project Description: The Spring Creek Water Donation transaction is an agreement between water right owners City of Tetonia and Mitchell Smaellie and the IWRB. The water right owners proposed to donate their rights to the IWRB to put into the Water Supply Bank for a term of five years. The IWRB could then rent the water rights out for delivery to the Teton River minimum stream flow right. It is in the interest of the State of Idaho to increase stream flow in the Teton River and its tributaries to encourage recovery of Yellowstone cutthroat trout. Funds for the project come from the Bonneville Power Administration through the Columbia Basin Water Transaction Program.

NORTH FREMONT CANAL SYSTEMS MARYSVILLE GRAVITY PRESSURE PIPELINE

PROJECT – PHASE 4

Project Sponsor: North Fremont Canal System, Inc

IWRB Funds: \$2,500,000 (Loan)

Account: Revolving Development Account

Project Description: The North Fremont Canal System, Inc. requested \$2,500,000 construct Phase 4 of Marysville project to convert open canals to gravity-pressurized pipelines. The estimated cost of the project is around \$9.2 million with the NRCS providing a cost share for the remainder of this project. The portion of the project called Phase 4 will encompass 34 shareholders servicing 4928 acres. The North Fremont Canal Systems loan was approved at 5.5% interest for a term of 15 years.

SPOKANE RIVER CONFERENCE

Project Sponsor: Idaho Water Resource Board **IWRB Funds:** \$3,000 (Fund Allocation)

Account: Revolving Development Account's Rathdrum Prairie/Treasure Valley

CAMP Subaccount

Project Description: The Spokane River Forum requested \$3,000 to support the Spokane River Conference scheduled for March 26th and 27th, 2013. Matching funds were also requested from other organizations. The Treasure Valley Water Quality Summit supports several RP CAMP objectives including: prevention and resolution of water conflicts, protecting the aquifer through bringing the key agencies in an effort to address overlapping jurisdictions with the goal of improving efficiency and

sharing knowledge, and adaptive management, monitoring and data gathering. The IWRB approved the allocation of funds to the Spokane River Forum for the Spokane River Conference.

HARVEST VALLEY HOME OWNERS ASSOCATION PUMP REPLACEMENT PROJECT

Project Sponsor: Harvest Valley Home Owners Association

IWRB Funds: \$4,500 (Loan)

Account: Revolving Development Account

Project Description: The Harvest Valley Home Owners Association (HOA) requested \$4,500 to their irrigation pump. The Harvest Valley HOA is made up of 81 homes in Phases 1 through 3 with additional homes expected for phases 4 and 5 as the economy improves. The Harvest Valley HOA loan was approved at 6 % interest for a term of 5 years.

PRISTINE SPRINGS PROJECT AND BLUE LAKES PIPELINE LOAN

Project Sponsor: Idaho Water Resource Board

Various Ground Water/Irrigation Districts

IWRB Funds: \$170,000 (Fund Allocation)

\$1,500,000 (Loan)

Account: Revolving Development Account

Project Description: The ground water districts and other parties who own the Blue Lakes Trout Farm requested that the Board participate in rebuilding the pipeline that delivers water to both Blue Lakes Trout Farm and the Board's Pristine Springs project. The IWRB approved an expenditure of 10% of the total project cost, not to exceed \$170,000, as well as approved a loan in the amount of \$1.5 million at 4% interest rate with a 5-year term to finance the balance of the pipeline replacement.

LOWER LEMHI WATER TRANSACTIONS

Project Sponsor: Idaho Water Resource Board

IWRB Funds: \$239, 850 from the Bonneville Power Administration

(Idaho Fish Accord)

Account: Revolving Development Account

Project Description: These Lower Lemhi River water transactions are subordination agreements entered into with the current or subsequent water right owners of water rights 74-319B and 74-320 to subordinate their diversions from the Lemhi River to the IWRB's Lemhi River minimum streamflow water right. The goal of these agreements is to maintain a minimum streamflow water right of 35 cfs in the Lower Lemhi River, as directed by the Idaho Legislature. Funds for the project come from the Bonneville Power Administration through the Idaho Fish Accord and are used to compensate the irrigator for power costs associated with operating the new pumping system.

SUNSET HEIGHTS WATER DISTRICT EXCHANGE WATER DELIVERY SYSTEM

Project Sponsor: Sunset Heights Water District

IWRB Funds: \$48,000 (Loan)

Account: Revolving Development Account

Project Description: The Sunset Heights Water District requested \$48,000 to install an irrigation pump and pipeline to supply exchange water as stated in the SRBA. The Sunset Heights Water District has 57 members whose main water source is from a spring which it collects via pipelines and stores in two 20,000 gallon tanks before delivering it to the users. The Sunset Heights Water District loan was approved at 5.5% interest for a term of 10 years.

LAKE WALCOTT RECHARGE PROJECT

Project Sponsor: Idaho Water Resource Board **IWRB Funds:** \$85,644 (Fund Allocation)

Account: Secondary Aquifer Planning, Management, and Implementation Fund

Project Description: The A&B Irrigation District and the Magic Valley Ground Water District (Districts) proposed to partner with the Board to develop the Walcott managed Recharge Site. The Districts proposed to cost share 40%(IWRB):60%(Districts) on the engineering and environmental studies. Managed aquifer recharge is a major water management strategy spelled out in the ESPA CAMP. The Board approved the expenditure of \$85,644 to assist the Districts with engineering studies and environmental studies associated with the Walcott Managed Recharge Site, not to exceed 40% of actual project costs.
