# **IDAHO WATER RESOURCE BOARD**

Board Meeting No. 7-16 November 2, 2016 8:00 a.m.

Idaho Water Center Conference Rooms B, C & D 322 E Front Street BOISE

- 1. Roll Call
- 2. Executive Session Board will meet pursuant to Idaho Code §74-206(1) subsection (f), for the purpose of communicating with legal counsel regarding legal ramifications of and legal options for pending litigation, or controversies not yet being litigated but imminently likely to be litigated. Executive Session is closed to the public. Topics: CSRBA Update

Following adjournment of Executive Session – meeting reopens to the public.

- 3. Agenda & Approval of Minutes 6-16
- 4. Public Comment
- 5. Update on "Refill" Litigation Decisions
- 6. Procurement Considerations
- 7. Financial Status
- 8. Ground Water Conservation Grants
- 9. Treasure Valley Recharge Study
- 10. Island Park Reservoir Enlargement
- 11. Sustainability Policy Addition to State Water Plan
- 12. Wood River Ground Water Policy-Water Supply Bank
- 13. Priest River Gage
- 14. Director's Report
- 15. Non-Action Items for Discussion
- 16. Next Meeting & Adjourn

#### Americans with Disabilities

The meeting will be held in facilities that meet the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations to attend, participate in, or understand the meeting, please make advance arrangements by contacting Department staff by email jennifer.strange@idwr.idaho.gov or by phone at (208) 287-4800.

## WATER RESOURCE BOARD EXECUTIVE SESSION MOTIONS

**Motion to resolve into Executive Session:** Pursuant to Idaho Code § 74-206(1) subsection (f) I request that the Board resolve into executive session for to communicate with legal counsel regarding legal ramifications of and legal options for pending litigation, or controversies not yet being litigated but imminently likely to be litigated. I request that a roll call vote be taken and that the Secretary record the vote in the minutes of the meeting.

**Motion to Resolve into Public Session:** I move that the Board resolve out of executive session and that the official minutes of the meeting reflect that no action was taken during the executive session.

# MINUTES MEETING NO. 6-16

Clarion Inn 1399 Bench Road POCATELLO, ID

September 15, 2016 Work Session

Chairman Chase called the Work Session meeting to order at 8:15 a.m. All Board members were present. <u>IDWR staff members present were</u>: Brian Patton, Cynthia Bridge Clark, Neeley Miller, Rick Collingwood, Gary Spackman, Mathew Weaver, Wesley Hipke, Sean Vincent, Mike McVay, Jennifer Strange, and James Cefalo. <u>Guests present were</u>: Sarah Hagen, Shaun Parkinson, Jon Bowling, John Simpson, Harvey Walker, Alan Hansten, Stephen Goodson, Ann Vonde, Amy Verbeten, Sarah Lien, Kelly Park, Walt Poole, Nancy Murillo, John Williams, and Del Kohtz.

During the Work Session the following items were discussed:

- An annual update of ESPA monitoring and aquifer storage by Sean Vincent and Mike McVay, both of IDWR.
- A presentation by Mr. Hipke of current ESPA resolutions and projects planned.
- A presentation that introduced a loan request for North Side Canal Company by Mr. Collingwood.
  - An update on water storage studies by Ms. Bridge Clark.
- A presentation by Mr. Shaun Parkinson from Idaho Power that updated the Board on the statewide cooperative cloud seeding program.
- A presentation by the Teton Water Users Association, which included Lynn Bagley, Amy Verbeten, and Sarah Lien.

Around noon the Board broke for lunch. A tour of the Last Chance Canal Diversion Dam followed lunch. They met in Grace, Idaho to hear a presentation from the Last Chance Canal Company representatives. Then the group toured the site of the Last Chance diversion dam, the power plant and flumes. The tour ended around 4:45 p.m.

No action was taken by the Board during the Work Session.

# September 16, 2016 **Board Meeting No. 6-16**

At 8:00 a.m. Chairman Chase called the meeting to order. All members were present.

# **Agenda Item No. 1: Roll Call**

Board Members Present Roger Chase, Chairman Vince Alberdi, Secretary Bert Stevenson Chuck Cuddy

Jeff Raybould, Vice-Chairman Pete Van Der Meulen Dale Van Stone Albert Barker

Staff Members Present
Gary Spackman, Director
Cynthia Bridge Clark, Water Projects Section Manager
Rick Collingwood, Planning Engineer
Ann Vonde, Deputy Attorney General
Mathew Weaver, Deputy Director

Brian Patton, Planning Bureau Chief Neeley Miller, Senior Planner Lyle Swank, Eastern Region Manager Mike McVay, Technical Engineer

Guests Present
Terrell Sorensen, Falls Irrigation District
Stephen Goodson, Governor's Office
John Williams, BPA
Jerry Rigby, WSWC
Walt Poole, IDFG
Elese Teton, Shoshone Bannock Tribes
Garry Ratzlaff, Sagebrush Steppe Land Trust

Shaun Tischendorf, Falls Irrig. District Chris Colson, Ducks Unlimited Lyle Swank, Water Dist #01 Bob Bruce, Stanley Consultants Randy Budge, IGWA Nancy E. Murillo

## Agenda Item No. 2 Executive Session

Mr. Alberdi made a motion for the Board to resolve into Executive Session. Mr. Stevenson seconded. Roll call vote: Mr. Alberdi: Yes; Mr. Barker: Yes; Mr. Cuddy: Yes; Mr. Raybould: Yes; Mr. Stevenson: Yes; Mr. Van Der Meulen: Yes; Mr. Van Stone: Yes; and Chairman Chase: Yes. 8 Ayes.

At approximately 8:05 a.m. the Board resolved into Executive Session by unanimous consent pursuant to Idaho Code Section 74-206(1) subsections (f), for the purposes of communicating with legal counsel regarding legal ramifications of and legal options for pending litigation, or controversies not yet being litigated but imminently likely to be litigated. Topics discussed were: Big Wood, Lemhi and ESPA Recharge Water Rights.

No actions were taken by the Board during the Executive Session. Mr. Alberdi moved to exit out of Executive Session. Mr. Raybould seconded the motion. Voice vote: All were in favor. Motion carried. The Board resolved out of Executive Session at approximately 9:32 a.m.

# Agenda Item No. 3: Agenda and Approval of Minutes 5-16

There was one noted adjustment to the Agenda. Mr. Patton said item No. 8b—a loan request for 3D Water Association—would not be addressed, per the memo that had been included in the meeting materials.

For the 5-16 Minutes, Mr. Raybould recommended that the word "requirement" be changed to "goal" on page 5 under Agenda item No. 12. Mr. Stevenson moved to approve the minutes as amended. It was seconded by Mr. Cuddy. <u>Voice vote</u>: all were in favor. The minutes were adopted.

# Agenda Item No. 4: Public Comment

Some members of the community had requested time to speak during public comment. Chairman Chase recommended a five minute maximum per person. The following individuals addressed the Board:

Mr. Terrell Sorensen previously with the Falls Irrigation District and currently with the University of Idaho shared with the Board a need for help with late season water needs. They proposed a desire for three new wells to provide more water in the Falls Irrigation District.

Mr. Chris Colson of Ducks Unlimited expressed a desire to be included on the next meeting's agenda regarding water fowl conservation. Ducks Unlimited is looking for common ground where aquifer recharge and breeding grounds can overlap to provide flood irrigation in historic flood plains.

Mr. John Williams provided updates on Bonneville Power Administration. He said a scoping process will begin and that he would keep the Board updated. He also thanked the Board members who participated in the BPA constituent survey.

Mr. Lyle Swank from Water District #01 had two issues for the Board to hear. First, he suggested that large private leases in the district could potentially cause problems for water supply balances. Also, he had concerns regarding Water District #01 rental pool leases that went outside of the ESPA boundaries. Secondly, he expressed concern with balancing federal programs that encourage the use of more efficient irrigation systems with the efforts to provide for the ESPA recharge program.

No actions were taken by the Board.

# **Agenda Item No. 5: Financial Status**

Mr. Patton provided updates as of September 1<sup>st</sup> on the Board's account balances. He highlighted changes to the Fiscal Memo. He presented the newest format for the Secondary Aquifer budget. Board members expressed appreciation for the new format. Finance Committee Chair, Mr. Alberdi said that the new format made the budget easy to track and understand. Mr. Patton said the Committee recommended that the new format be carried to the Revolving Development account balance sheets as the next goal to accomplish.

No actions were taken by the Board.

# Agenda Item No. 6 ESPA Recharge

Mr. Hipke presented six resolutions for the Board to consider in the matter of aquifer stabilization and the Eastern Snake Plain Aquifer recharge efforts. The first was for the Butte Market Lake Canal Company to conduct recharge site identification.

Mr. Raybould moved to adopt the resolution that authorized expenditures not to exceed \$39,000 to the BMLCC to conduct potential site identification. Mr. Van Stone seconded the motion. Roll call vote: Alberdi: Aye; Barker: Aye; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 8 Ayes. Motion passed. The resolution was adopted.

The second resolution was for the New Sweden Irrigation District to do the preliminary survey work for the managed recharge site evaluation on their system.

Mr. Alberdi moved to adopt the resolution authorizing expenditures not to exceed \$39,000 to the NSID to conduct a survey. Mr. Cuddy seconded the motion. Roll call vote: Alberdi: Aye; Barker: Aye; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 8 Ayes. Motion passed. The resolution was adopted.

The third resolution was for the Quayles Lake site evaluation proposed by the Egin Bench Canal Company and Fremont-Madison Irrigation District. Mr. Raybould recused himself from the vote on this resolution.

Mr. Van Stone moved to adopt the resolution authorizing expenditures not to exceed \$20,000 to evaluate the site and provide necessary information to obtain BLM easements for that area. Mr. Van Der Meulen seconded the motion. Roll call vote: Alberdi: Aye; Barker: Aye; Cuddy: Aye; Raybould: Abstain; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 7 Ayes. Motion passed. The resolution was adopted.

The fourth resolution was for the Woodville Canal Company to conduct a managed recharge site evaluation.

Mr. Stevenson moved to adopt the resolution authorizing expenditures not to exceed \$17,000 to evaluate the site. Mr. Raybould seconded the motion. Roll call vote: Alberdi: Aye; Barker: Aye; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 8 Ayes. Motion passed. The resolution was adopted.

The fifth resolution was for the Big Wood Canal Company to survey the Richfield managed recharge site.

Mr. Barker moved to adopt the resolution authorizing expenditures not to exceed \$47,000 to provide the preliminary survey work for the proposed site. Mr. Cuddy seconded the motion. Roll call vote: Alberdi: Aye; Barker: Aye; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Abstain; Van Stone: Aye; Chairman Chase: Aye. 7 Ayes. Motion passed. The resolution was adopted.

The final resolution was for the South Fork managed recharge feasibility evaluation. There was some discussion among the Board regarding the options to evaluate six or nine of the possible sites.

Mr. Van Stone moved to adopt the resolution authorizing expenditures not to exceed \$166,000 to evaluate up to nine sites. Mr. Alberdi seconded the motion. Roll call vote: Alberdi:

Aye; Barker: Aye; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 8 Ayes. Motion passed. The resolution was adopted.

## Agenda Item No. 7 Presentation by the Shoshone-Bannock Tribes on Water Issues

Ms. Elese Teton provided an overview of the Water Resources Department for the Shoshone-Bannock Tribes. She discussed the history of water issues on the reservation; current solutions; and future considerations.

No actions were taken by the Board.

# Agenda Item No. 8 Loan Requests

Mr. Collingwood presented a loan for the North Side Canal Company. Mr. Raybould had a question about how soon NSCC would begin making repayments. Mr. Barker asked to be recused from discussion of this loan request. There was discussion about amending the resolution to include repayment terms.

Mr. Van Der Meulen moved to adopt the resolution as amended approving a loan not to exceed \$5,200,000 to the North Side Canal Company. Mr. Alberdi seconded the motion. Roll call vote: Alberdi: Aye; Barker: Abstain; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 7 Ayes. Motion passed. The resolution was adopted.

# Agenda Item No. 9 IGWA Items

Mr. Patton introduced the first section of this agenda item, which requested action on a loan extension for the Ground Water Districts. He reminded the Board of the Finance Committee's recommendations. They had questions and concerns for IGWA. Mr. Stevenson informed the Board that he does have ground water rights within the Magic Valley Ground Water District, but that he is not affected any differently than any other water right holders. He expressed an intention to be included on the vote for the resolution.

Mr. Randy Budge represented IGWA and spoke with the Board about the issues. He informed the Board that he did not see any prohibition for the Districts to obtain further indebtedness. There was some discussion about repayment obligations. Mr. Raybould had some amendments to the resolution.

Mr. Raybould moved to adopt the resolution as amended approving an extension of the due date of the interim loan. Mr. Van Stone seconded the motion. Roll call vote: Alberdi: Aye; Barker: Aye; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 8 Ayes. Motion passed. The resolution was adopted.

Mr. Budge continued his discussion with the Board regarding other IGWA issues. He said most of the issues in the Hagerman Valley have been resolved. He discussed the trim line decision along the Great Rift and the Billingsley Creek decision. He stated the settlement with Buckeye is expected to be completed within a year. He said there is a 5<sup>th</sup> mitigation plan pending with Rangen.

Further, Mr. Budge provided updates on the Surface Water Coalition settlement agreement. There was some discussion on the State's role. He discussed the year's activities and the upcoming expectations.

# Agenda Item No. 10 NRCS Snow Survey

Ms. Bridge Clark introduced Mr. Abramovich with NRCS. She reminded the Board that a resolution was included with the board materials. Mr. Abramovich had a presentation for the Board on a proposal for the identification and installation of new SNOTEL sites. He said that they would like a list of basins the Board would like to see evaluated. There was some discussion about having mid-level sites developed and about having other agencies on board for funding.

Ms. Bridge Clark discussed the resolution with the Board. There is an expectation for a future update to include the names of the others funding the project.

Mr. Van Stone moved to adopt the resolution as amended to provide funding not to exceed \$200,000 to develop new SNOTEL sites. Mr. Van Der Meulen seconded the motion. Roll call vote: Alberdi: Aye; Barker: Aye; Cuddy: Aye; Raybould: Aye; Stevenson: Aye; Van Der Meulen: Aye; Van Stone: Aye; Chairman Chase: Aye. 8 Ayes. Motion passed. The resolution was adopted.

# <u>Agenda Item No. 11 Appointment of Hearing Officer for Stream Channel Alteration Permits</u> on the South Fork of the Clearwater

Mr. Patton informed the Board that a hearing officer needed to be appointed in regards to notice received from holders of stream channel alteration permits on the South Fork of the Clearwater.

Mr. Raybould moved to adopt the resolution appointing a hearing officer—Mr. James Cefalo. Mr. Cuddy seconded the motion. <u>Voice vote</u>: all were in favor. The resolution was adopted.

# Agenda Item No. 12 Western States Water Council Report-Jerry Rigby

Mr. Jerry Rigby talked to the Board about his recent appointment to Director of Western State Water Council. He discussed the role of the WSWC in water issues of the West. He stated the next meeting will be in St. George, UT. The theme is "strategic planning" and will include the following topics: NASA landsat, Water SMART continuation, state water laws, and NPDES. He discussed other areas that the WSWC is involved. He said the Council is considering an increase in States' dues in the Council.

No action was taken by the Board.

## Agenda Item No. 13 State Water Plan Sustainability Policy Update

Mr. Miller updated the Board on the Sustainability Policy. He reminded the Board that the final public hearing was held and that the comment period would end September 30, 2016. He stated that there is a Water Planning Committee meeting set for October 5<sup>th</sup>. Mr. Barker suggested that Mr. Miller have a summary of the comments and draft responses to those comments at that meeting.

No action was taken by the Board.

# Agenda Item No. 14 Director's Report

Director Spackman mentioned the following topics to be discussed at the next meeting: GWMA public meetings; critical ground water areas orders issued; and Priest Lake levels. He did express concerns regarding the WD01 rental pool issues that Mr. Swank had discussed during public comment. He listed some of the current demands on the system in light of the mitigation demands. There was discussion among board members about the stresses on the system. The Director also discussed the proposed 2018 budget for the Department.

# Agenda Item No. 15 Non-Action Items for Discussion

Mr. Raybould suggested that a discussion on Water Supply Bank functioning would be appreciated at the next Work Session. Also recommended was a meeting for the WSB Committee.

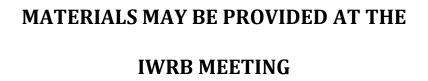

# Agenda Item No. 16 Next Meeting and Adjourn

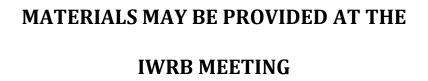

The next meeting was confirmed for November 1-2, 2016 in Boise in conjunction with the Idaho Water Users Association seminar. Mr. Raybould moved to adjourn. Mr. Cuddy seconded. Voice vote: all in favor. The meeting adjourned.

Respectfully submitted this 2 <sup>nd</sup> day of Nov	ember, 2016.
	Vince Alberdi, Secretary
	Jennifer Strange, Administrative Assistant II

## **Board Actions:**

- 1. Mr. Stevenson moved to adopt Minutes 5-16. Mr. Alberdi seconded the motion. Voice Vote. All were in favor. Motion passed.
- 2. Mr. Raybould moved to adopt the resolution allocating funds up to \$39,000 to the BMLCC to conduct potential site identification. Mr. Van Stone seconded the motion. Roll Call Vote. 8 Ayes. Motion carried.
- 3. Mr. Alberdi moved to adopt the resolution allocating funds up to \$39,000 to the NSID. Mr. Cuddy seconded the motion. Roll Call Vote. 8 Ayes. Motion carried.
- 4. Mr. Van Stone moved to adopt the resolution allocating funds up to \$20,000 to Egin Bench Canal Company and FMID. Mr. Van Der Meulen seconded the motion. Roll Call Vote. 7 Ayes. 1 Abstain. Motion carried.
- 5. Mr. Stevenson moved to adopt the resolution allocating funds up to \$17,000 to the Woodville Canal Company. Mr. Raybould seconded the motion. Roll Call Vote. 8 Ayes. Motion carried.
- 6. Mr. Barker moved to adopt the resolution allocating funds up to \$47,000 to the Big Wood Canal Company. Mr. Cuddy seconded the motion. Roll Call Vote. 7 Ayes. 1 Abstain. Motion carried.
- 7. Mr. Van Stone moved to adopt the resolution allocating funds up to \$166,000 to the South Fork Canals. Mr. Cuddy seconded the motion. Roll Call Vote. 8 Ayes. Motion carried.
- 8. Mr. Van Der Meulen moved to adopt the resolution approving a loan not to exceed \$5,200,000 to the North Side Canal Company. Mr. Cuddy seconded the motion. Roll Call Vote. 7 Ayes. 1 Abstain. Motion carried.
- 9. Mr. Raybould moved to adopt resolution approving an extension of the due date of the interim loan for the Ground Water Districts. Mr. Van Stone seconded the motion. Roll Call Vote. 8 Ayes. Motion carried.
- 10. Mr. Van Stone moved to adopt the resolution authorizing funding not to exceed \$200,000 to the NRCS. Mr. Van Der Meulen seconded the motion. Roll Call Vote. 8 Ayes. Motion carried.
- 11. Mr. Raybould moved to adopt the resolution appointing a hearing officer—Mr. James Cefalo. Mr. Cuddy seconded the motion. Voice Vote. All were in favor. Motion passed.

## **Procurement Considerations**

IWRB is exempt from the statute requiring construction contracts be administered and reviewed by Dept. of Admin. (Idaho Code § 67-5711). Even so, IWRB must comply with procedures of section 67-5711C, Idaho Code, for advertising and bidding of contracts. Section 67-5711C describes bidding process on public projects (sealed bids, advertising, awarded to "lowest responsible and responsive bidder," etc.).

Chapter 92 of Title 67, State Procurement Act, directs the Administrator (in Division of Purchasing (within the Department of Administration)) in acquiring property and services for state agencies.

#### **Definitions.** Idaho Code § 67-9203.

- (3) "Agency" means all officers, departments, divisions, bureaus, boards, commissions and institutions of the state, including the public utilities commission, but excluding: (a) The legislative and judicial branches of government; (b) The governor, lieutenant governor, secretary of state, state controller, state treasurer, attorney general and superintendent of public instruction; and (c) A state institution of higher education that complies with the provisions of section 67-9225, Idaho Code.
- (12) "Property" means goods, services, parts, supplies and equipment, both tangible and intangible, including, but not limited to, designs, plans, programs, systems, techniques and any rights or interests in such property.
- (17) "Vendor" means a person or entity capable of supplying property to the state.

## **Disqualification of vendors**. Idaho Code § 67-9217.

- (1) A disqualified vendor may not submit a bid.
- (2) A vendor may be disqualified by the administrator for any of the following reasons:
- (a) Failure to perform according to the terms of any contract;
- (b) Attempts by whatever means to cause specifications to be drawn so as to favor a specific vendor;
- (c) Use of the provisions of this chapter to obstruct or unreasonably delay acquisitions by the state;
- (d) Perjury in a vendor disqualification hearing;
- (e) Knowingly violate the provisions of this chapter; or
- (f) Debarment, suspension or ineligibility from federal contracting of the vendor, its principals or its affiliates.

...

#### Prohibitions. Idaho Code § 67-9230.

...

(2) No member of the legislature or any officer or employee of any branch of the state government shall directly, himself, or by any other person in trust for him or for his use or benefit or on his account, undertake, execute, hold or enjoy, in whole or in part, any contract made or entered into by or on behalf

of the state of Idaho, if made by, through, or on behalf of the department in which he is an officer or employee; or if made by, through or on behalf of any other department unless the same is made after competitive bids.

- (3) Except as provided in this chapter, no officer or employee shall influence or attempt to influence the award of a contract to a particular vendor, or to deprive or attempt to deprive any vendor of a contract.
- (4) No officer or employee shall conspire with a vendor or its agent, and no vendor or its agent shall conspire with an officer or employee, to influence or attempt to influence the award of a contract, or to deprive or attempt to deprive a vendor of a contract.

•••

(8) No vendor or related party, or subsidiary, or affiliate of a vendor, may submit a bid to obtain a contract to provide property to the state, if the vendor or related party, or affiliate or subsidiary was paid for services used in preparing the specifications or if the services influenced the procurement process.

## Ethics in procurement. Idaho Code § 67-9233.

- (1) It is the intent of the legislature that all persons involved in the process of procuring property for the state conduct themselves in a manner that protects the public interest and fosters confidence in the integrity of the process. To that end, this section shall apply to all such persons, including:
- (a) State officers, even if the officer or officer's employer is excluded from the definition of "agency" under section 67-9203, Idaho Code;
- (b) State employees, even if the employee works for an officer, institution or entity that is excluded from the definition of "agency" under section 67-9203, Idaho Code; and
- (c) Vendors or any person acting on behalf of a vendor.
- (2) In any matter relating to state procurement, it is an unethical breach of the public trust to:
- (a) Knowingly attempt to realize personal gain through state office or employment by any conduct inconsistent with this chapter or any other applicable law or rule;
- (b) Attempt to influence a state officer or employee to violate the policy or provisions of this chapter or any other applicable law or rule; or
- (c) Knowingly violate an applicable law or rule.
- (3) Subject to due process requirements, and in addition to any other administrative, civil or criminal sanctions provided by law or rule, a state employee's supervisor may impose the following sanctions on the employee for an unethical breach of the public trust:
- (a) A reprimand or warning, either oral or written;
- (b) Suspension with or without pay for a specified period of time; or
- (c) Termination of employment.
- (4) In addition to any other administrative, civil or criminal sanction provided by law or rule, a vendor who commits an unethical breach of the public trust, or whose advocate or representative commits an unethical breach of the public trust, may be disqualified pursuant to section 67-9217, Idaho Code.

RE: Ground Water Conservation Grants

- As IWRB members may recall there has been a desire on the part of the IWRB to develop a
  ground water conservation grant to provide financial assistance to municipalities and other
  eligible entities interested in pursuing ground water conservation projects. Pursuing ground
  water conservation projects can help water entities reduce water demands, lower operational
  costs such as pumping and water treatment, and reduce or postpone the need for additional
  water supplies.
- The IWRB Finance Committee met on May 6<sup>th</sup> and reviewed available funds, prioritized needs and developed a recommend Fiscal Year 2017 budget that included \$200,000 for ground water conservation grants.
- The IWRB adopted by resolution a budget for Fiscal Year 2017 on May 20<sup>th</sup> authorizing the use of
  continuously appropriated Secondary Aquifer Planning and Management and Implementation
  Fund for ground water conservation grants. The budget resolution adopted on May 20<sup>th</sup> by the
  IWRB required the IWRB to develop criteria for the award of ground water conservation grants
  prior to any grants being awarded.
- A resolution is attached that establishes the criteria for the award of ground water conservation grants. The IWRB may amend the criteria as needed during FY 2017.
- Please review the attached resolution and criteria to ensure it matches the IWRB's expectations.

# BEFORE THE IDAHO WATER RESOURCE BOARD

IN THE MATTER OF GROUND WATER ) A RESOLUTION  CONSERVATION GRANTS )
WHEREAS, House Bill 547 passed and approved by the 2014 legislature allocated \$5 million annually from the Cigarette Tax to the Idaho Water Resource Board ("IWRB") for statewide aquifer stabilization; and
WHEREAS, many aquifer across Idaho are declining and have existing or potential conjunctive administration water use conflicts, including the Eastern Snake Plain Aquifer, the Wood River Aquifer, the Mountain Home Aquifer, the Treasure Valley Aquifer, the Palouse Basin Aquifer, the Rathdrum Prairie Aquifer and others; and
WHEREAS, on May 6, 2016, the IWRB Finance Committee met and recommended a Fiscal Year 2017 budget that included \$200,000 for ground water conservation grants; and
WHEREAS, on May 20, 2016, the IWRB adopted by resolution a budget for Fiscal Year 2017 authorizing the use of continuously appropriated Secondary Aquifer Planning and Management and Implementation Fund for ground water conservation grants; and
WHEREAS, the budget resolution adopted on May 20, 2016 by the IWRB required the IWRB to develop a criteria for the award of ground water conservation grants prior to any grants being awarded; and
NOW, THEREFORE BE IT RESOLVED that the IWRB adopts the criteria attached hereto in Attachment A for the award of ground water conservation grants for Fiscal Year 2017.
BE IT FURTHER RESOLVED that any funds awarded for ground water conservation grants shall be approved by the IWRB by resolution.
BE IT FURTHER RESOLVED that the IWRB may modify these criteria during Fiscal Year 2017 at a properly noticed meeting of the IWRB.
DATED this 2 <sup>nd</sup> day of November 2016.
ROGER CHASE, Chairman Idaho Water Resource Board
ATTEST VINCE ALBERDI, Secretary

#### **ATTACHMENT A**

#### **IWRB Ground Water Conservation Grant Criteria**

The Ground Water Conservation Grant Program provides financial assistance to municipalities and other eligible entities interested in pursuing groundwater conservation projects and studies. Pursuing ground water conservation can help water providers reduce water demands, lower operational costs such as pumping and water treatment, and reduce or postpone the need for additional water supplies. To be considered for funding, entities must be metered or have a plan for metering.

**Eligible Entities\*:** Municipalities, Homeowner Associations, Water User Associations, Private Corporations, Irrigation Districts, Irrigation Companies, and Ground Water Districts

**Eligible Geographic Area**: Statewide; priority will be given to grant applications from the Eastern Snake Plain Aquifer, the Wood River Aquifer, the Mountain Home Aquifer, the Treasure Valley Aquifer, the Palouse Basin Aquifer, and the Rathdrum Prairie Aquifer.

#### **Program Budget:**

- \$200,000 (set annually by the Finance Committee; program must be renewed each year);
- No more than 50% (\$100,000) of total budget will be spent within a single Board District
- No more than 50% of total budget allowed within a single Board District (\$50,000) will be spent on agricultural groundwater conservation projects.
- These limits may be waived if there are not competing demands.

**Grant Amount:** <u>Projects</u> - \$5,000 to \$20,000; <u>Studies</u> – up to \$10,000

Grant Term: 1 year

Application Deadline: Open through April 1, 2017

#### **Matching Funds for Projects:**

- Entities requesting funding for ground water conservation <u>projects</u> must provide \$2 (66%) for every \$1 (33%) awarded by the Board.
- In-kind services can be used for one-third (33%) of the projects costs.

### **Matching Funds for Studies**

• Entities requesting funding for ground water conservation <u>studies</u> must provide \$1 (50%) for every \$1 (50%) awarded by the Board.

#### **Funding Distribution:**

- 25% of the grant funds will be distributed at the start of the project.
- 25% will be distributed upon submittal of Mid-Point Progress Report.
- The final 50% of the grant funds will be distributed at the end of the project.

**Project Deliverables:** Entities that receive grant funding will be required to provide a written final Grant Performance Report to the Board (including a review of the activities completed under the grant), an estimate of actual water savings realized and other information that may be relevant to the Board. Future grant funds will not be considered if a final project report is not submitted.

#### **Board Districts are as follows:**

District No. 1: Boundary, Bonner, Kootenai, Shoshone, Benewah, Latah, Clearwater, Nez Perce, Lewis and Idaho counties.

District No. 2: Adams, Valley, Washington, Payette, Gem, Boise, Canyon, Ada, Elmore and Owyhee counties.

District No. 3: Camas, Gooding, Jerome, Twin Falls, Cassia, Blaine, Lincoln, Minidoka, Lemhi, Custer and Butte counties.

District No. 4: Clark, Fremont, Jefferson, Madison, Teton, Bingham, Bonneville, Power, Bannock, Caribou, Oneida, Franklin and Bear Lake counties.

\*Entities with agricultural operations of more than 40 acres are not eligible for this grant. Other funding sources are available for these entities.

<sup>\*\*</sup>The Board can adjust and/or waive these criteria on a case-by-case basis by resolution.

# Memorandum

To: Idaho Water Resource Board

From: Wesley Hipke

Date: October 25<sup>th</sup>, 2016

Re: Treasure Valley Managed Recharge Feasibility Study

# I. Introduction

The Idaho Water Resource Board (IWRB) is commissioning the Treasure Valley Managed Recharge Study ("Study") to obtain a better understanding of the feasibility of using managed recharge within the Treasure Valley as a viable water management tool. The study will assess the volume of water available for recharge and the managed recharge potential throughout the Treasure Valley Study Area (as depicted on Figure 1). The completed study will provide a tool for the IWRB and water managers in the Treasure Valley to determine if managed recharge is an appropriate water management tool to address their specific water management challenges.

# II. Background

The Idaho Water Resource Board (IWRB) is responsible for formulating and implementing the State Water Plan for optimum development of the water resources in the public interest. Within the Treasure Valley, historically upstream mountain snowpack has provided a storage mechanism to retain wintertime precipitation and release it in the spring and summer. As demand grew, this natural storage mechanism has been augmented with man-made reservoirs for additional surface water storage. The demand for water is expected to continue to grow considering the large metropolitan area within the Treasure Valley. Boise, Nampa, and Meridian were one of the fastest growing metro areas in 2014 according to the U.S. Census Bureau.

The projected increase in growth within the Treasure Valley will present challenges concerning water supply. This issue could be further compounded considering the finite volume of groundwater and surface water supplies becoming increasingly variable. When water is available, strategies need to be developed on how best to manage the water. The Treasure Valley water system is a complex system of dynamic interconnection between surface water and groundwater. The connection between these waters is a critical element in determining strategies that will meet the future water needs of the Treasure Valley.

The IWRB is employing a science-based approach to develop plans and associated projects that will address the uncertainties in the Treasure Valley's future water supply. One of the water management tools being considered for the Treasure Valley is managed recharge. Managed

recharge has been used to address a variety of issues throughout the West, including aquifer replenishment, aquifer storage for future recovery, water quality improvement of the recharged water and/or groundwater, and increasing aquifer discharge to surface water supplies. Managed recharge can be adapted to address a variety of concerns taking into account uncertain and changing future conditions.

Within the Treasure Valley, managed recharge could be used to capture water that would otherwise flow out of the state, assist in keeping the aquifer in balance, and develop additional water supply for future demand. Three key components of a successful managed recharge program that need to be addressed are the availability of the supply/sources of water for recharge, identification of locations with the hydrogeological properties that are conducive for managed recharge, and the fate of the recharge water meeting management goals.

# III. Treasure Valley Managed Recharge Feasibility Study

The proposed Treasure Valley Managed Recharge Feasibility Study (Study) has been designed to assess the potential and viability for managed recharge in the Treasure Valley. The Study will address recharge issues such as the volume and timing of available water, the potential physical locations for recharge, fate of the water recharged, and potential infrastructure cost. Included in the assessment will be cost estimates for developing the infrastructure required for the areas with the greatest potential for managed recharge sites. The final product is to be a technical report documenting all data, analysis, and results from the Study.

The Study is estimated to cost \$200,000 and require between a year to two years to complete. Staff is recommending using the State's RFP process to find a suitable firm (Contractor) to conduct the Study. A summary of the key task involved in the study are provided below.

# A. Analysis of Water Availability for Managed Recharge

The Contractor will conduct a water availability analysis that determines the potential sources of water available for Managed Recharge within the study area. Potential source waters will minimally include surface water and reuse of treated wastewater. The analysis will include the volume and availability of water taking into account the timing of availability and the location that the water would be available for managed recharge. This analysis must take into account the physical supply and the legal access of the water. The Contractor will analyze the available data to determine the volume, timing, and location of water that could be used for managed recharge.

# B. Managed Recharge Physical Feasibility Analysis

The Contractor will conduct an analysis of the study area to determine the physical feasibility of conducting managed recharge. The intent of the analysis is to distinguish areas within the Treasure Valley that have similar physical characteristics concerning managed recharge. Key elements that are to be included in this characterization are:

- Depth to groundwater
- Infiltration rate
- Hydraulic conductivity
- Aquifer capacity
- Retention time of recharged water in the aquifer.

This portion of the Study will also include an assessment of other potentially limiting factors to managed recharge such as:

- Increased landslide risk due to potential managed recharge
- Urbanization/limited land space
- Positive and negative effects managed recharge could have on water quality issues
- Positive and negative effects managed recharge could have on an area due to changes in groundwater levels.

The Contractor will analyze the available data to assess the physical capacity of the Treasure Valley to conduct managed recharge. The analyses will identify and rank "areas" of managed recharge capacity based on hydrogeological parameters, depth to groundwater, estimated retention time of the recharge water, and potential infiltration rates. The ranking of the areas will also include potentially limiting factors to managed recharge. The analyses will also include identification of potential perched aquifers and the affect they could have on the movement of recharge waters to the aquifer.

# C. Infrastructure Requirements to Develop Managed Recharge Areas

The Contractor will conduct an analysis to determine the infrastructure and associated costs that would be required to develop recharge sites in the highest potential areas for conducting managed recharge. This analysis will include alternatives for infrastructure development and associated cost estimates for the alternatives. The following assumptions will be incorporated in the analysis:

- The analysis will incorporate the finds from the previous task,
- The infrastructure estimates will be conducted on a minimum of three (3) areas. The specific areas will be determined in consultation with IWRB staff,
- Current infrastructure will be incorporated into the analysis where applicable

• The Contractor will conduct Class 5 cost estimates for the required infrastructure improvements to conduct managed recharge in the specified areas.

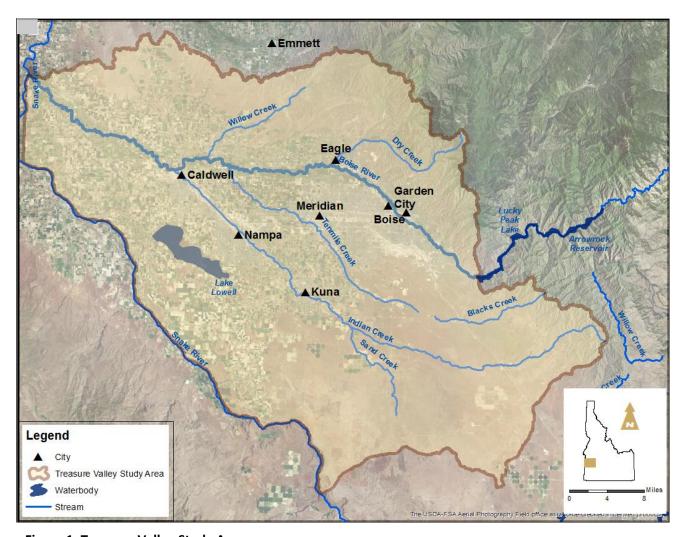

Figure 1. Treasure Valley Study Area

#### BEFORE THE IDAHO WATER RESOURCE BOARD

IN THE MATTER OF WATER SUSTAINABILITY AND TREASURE VALLEY RECHARGE A RESOLUTION TO APPROVE FUNDS FOR TREASURE VALLEY MANAGED RECHARGE FEASIBILITY STUDY

WHEREAS, House Bill 547 passed and approved by the 2014 Legislature allocates \$5 million annually through 2019 from the Cigarette Tax to the Idaho Water Resource Board's (IWRB) Secondary Aquifer Planning, Management, and Implementation Fund (Secondary Aquifer Fund) for statewide aquifer stabilization; and

WHEREAS, Senate Bill 1402 passed and approved by the 2016 Legislature allocated \$5 million ongoing to the General Fund and \$2.5 million in Economic Recovery Reserve Funds to the IWRB's Secondary Aquifer Fund for statewide water sustainability and aquifer stabilization; and

WHEREAS, many aquifers across Idaho are declining or have existing or potential conjunctive administration water use conflicts, including the Wood River, the Mountain Home Aquifer, the Treasure Valley Aquifer, the Palouse Basin Aquifer, the Rathdrum Prairie Aquifer and others; and

WHEREAS, Governor Otter directed the Idaho Water Resource Board to develop a water sustainability policy and support water sustainability and aquifer stabilization projects across Idaho to address declining ground water levels, existing or potential conjunctive administration water use conflicts, alternative water supplies and long-term water management needs; and

WHEREAS, the Idaho State Water Plan states that aquifer recharge may be an appropriate means for enhancing ground and surface water supplies, optimizing existing water supplies to meet demand and should be promoted and encouraged; and

WHEREAS, the 2016 Idaho Legislature passed and approved Senate Concurrent Resolution 137 directing the IWRB to address statewide aquifer stabilization and sustainability projects including aquifer recharge studies for the Treasure Valley Aquifer; and

WHEREAS, on May 20, 2016, the IWRB adopted the Secondary Aquifer Fund Fiscal Year 2017 Budget which included \$200,000 for a Treasure Valley Managed Recharge Feasibility Study (Feasibility Study) to assess whether managed recharge has the potential to enhance water supplies or provide other water management benefits in the Treasure Valley; and

NOW THEREFORE BE IT RESOLVED that the IWRB authorizes expenditures not to exceed \$200,000 from the Secondary Aquifer Fund, for a Treasure Valley Managed Recharge Feasibility Study; and

NOW THEREFORE BE IT RESOLVED that the IWRB authorizes its chairman or designee, Brian Patton, to execute the necessary agreements or contracts to complete the Feasibility Study.

DATED this 2 <sup>nd</sup> day of November 2016.	
	ROGER W. CHASE, Chairman Idaho Water Resource Board
ATTEST VINCE ALBERDI, Secretary	-

#### BEFORE THE IDAHO WATER RESOURCE BOARD

IN THE MATTER OF	)	RESOLUTION TO APPROVE
THE ISLAND PARK	)	FUNDS FOR THE
RESERVOIR ENLARGMENT	)	LAND AND REAL ESTATE
PROJECT	)	ASSESSEMENT

WHEREAS, the 2008 Legislature passed House Joint Memorial No. 8 encouraging the Idaho Water Resource Board (IWRB), in coordination with other public and private entities, to initiate studies to determine the potential for additional water storage projects in the state; and

WHEREAS, the IWRB and the US Bureau of Reclamation (Reclamation) completed the Henrys Fork Basin Study, July 2014 (Basin Study), which evaluated a number of potential alternatives for additional surface water storage in the Henrys Fork Basin including an enlargement of the Island Park Reservoir, a Reclamation facility; and

WHEREAS, House Bill No. 479 passed and approved by the 2014 Idaho legislature appropriated \$2.5 million to pursue the enlargement of Island Park Reservoir (project); and

WHEREAS, additional evaluation of potential impacts to land, real estate, roads and utilities and other appurtenant structures as a result of a raise of the Island Park Reservoir is required to determine the viability of the project; and

WHEREAS, the IWRB authorized expenditure of up to \$100,000 from the Revolving Development Account for advisory services in the coordination between the IWRB and Reclamation, and for the completion of the Island Park Reservoir Enlargement Land and Real Estate Assessment (Assessment); and

WHEREAS, a portion of the of the authorized funds (\$55,570) were expended to collect airborne Lidar and orthoimagery of the Island Park Reservoir and project area to provide high resolution elevation data and geometrically corrected aerial photographs for use in the Assessment; and

WHEREAS, the new elevation data and imagery will be used to complete the inventory of impacts to property and infrastructure and the development of estimated associated costs under a range of increased reservoir water surface elevations; and

WHEREAS, the estimated cost for the remaining work to complete the Assessment is approximately \$100,000;

NOW THEREFORE BE IT RESOLVED that the IWRB authorizes the expenditure of up to \$100,000 from the Revolving Development Account to complete the Assessment.

Assessi	ment.	
	Dated this 2nd day of November 2016.

RE:

State Water Plan Sustainability Section

## ACTION TO BE CONSIDERED: Adoption of the Proposed Sustainability section

The Water Resource Planning Committee met on October 5, 2016 to review written comments and oral testimony received during the public comment period which commenced on Friday, May 20th through September 30, 2016.

One-hundred twenty comments were received in total. Sixty-two of the comments were received though written comment and fifty-eight comments were received though oral testimony at the public hearings shown below:

Hearing #	Dates	Time	Location	City
1	June 7	6:30 pm	Idaho Water Center; Rm 602 C & D	Boise
2	June 13	6:30 pm	Community Campus, Minnie Moore Rm	Hailey
3	June 28	6:30 pm	CSI Campus, Shields Bldg., Rm 118	Twin Falls
4	July 20	6:30 pm	Edgewater Resort	Sandpoint
5	August 23	6:30 pm	Red Lion	Lewiston
6	August 30	6:30 pm	City Council Chambers, City Annex	Idaho Falls
7	September 14	6:30 pm	City of Chubbuck, City Council Chambers	Chubbuck

The Water Resource Planning Committee has recommended changes to the Proposed Sustainability section in response to the comments and testimony (see attached).

## **Next Steps**

- 1. Board adopts Proposed Sustainability section by resolution.
- 2. Board submits Sustainability section, Board resolution, and cover letter from IWRB Chairman to the Governor, Pro Tem, Speaker, Natural Resources Committee chairs, Director of IDWR, and anyone else we think might want notice including committee members. It will also need to be

- "distributed generally." The IWRB website would be a good place to do this (anywhere else?). This should be done no later than the first day of the legislative session. We should try to submit as early as we can after Board adoption. We will need to get a receipt from the Pro Tem and Speaker showing the date it was submitted to their offices.
- 3. Legislature has to act "by law" to "amend or reject" within 60 days. That means they have to pass a statute through both houses and secure a signature from the Governor. They can only deal with the changes submitted and cannot open the whole SWP.

### Attached:

- 1) WRP recommended changes to the Proposed Sustainability section
- 2) A resolution for the Board to consider for the adoption of the Proposed Sustainability section
- 3) A draft letter from the IWRB Chairman submitting Sustainability Section to the Legislature

#### 8. SUSTAINABILITY

Sustainability focuses on the overall stewardship of the State's water resources for the good of the people of the State of Idaho.

#### 8A - SUSTAINABILITY OF IDAHO'S WATER RESOURCES

Sustainability is the active stewardship of Idaho's water resources to satisfy current uses and assure future uses of this renewable resource in accordance with State law and policy.

#### Discussion:

This Sustainability Policy depends upon the State's sovereignty over its water resources. Water is the foundation of Idaho's economy and culture; the lives and livelihoods of Idahoans depend on a reliable supply of water. Stewardship of Idaho's water resources begins with the realization that the water resources of the State are not inexhaustible and therefore it is necessary to manage, administer, and take action to sustain, maintain, and enhance the resource and protect the quality of the water resources. Stewardship, by necessity, also includes taking affirmative steps to address declining trends in the resource where those trends exist and to establish policies that will prevent future unsustainable declines. The goal must be overall stewardship of the State's water resources for the good of the people of the State of Idaho.

The State of Idaho encompasses some of the most diverse and awe inspiring physical and geological features in the country. From the depths of Hells Canyon to the peak of Mount Borah, from sage brush deserts, to the extensive agricultural farm and ranch land, to alpine forests and meadows, to the cities and towns, the ecosystems of each of these varied areas all rely on the water resources of the State. The people of the State interact with and depend upon the water resources in these different landscapes in many different ways. Therefore, the water sustainability policy of the state of Idaho must embrace the diversity of the State, while recognizing the potential for a use or activity in one place to affect the water resources in another part of the State.

Sustainable water management strategies to meet current and future needs must be based on adequate knowledge regarding available supplies, existing use, trends. competing economic and social demands, and future needs. Planning and management actions to promote water sustainability must be designed and implemented to ensure that existing water rights are protected and the economic vitality of Idaho is optimized.

The goal of sustainable use of water resources of the State must recognize that the goals of sustainable economic growth and protection of existing rightsrights must coexist and are enhanced by measures that protect and maintain surface and ground water resources and the

aquatic, riparian, <u>fish and wildlife, recreational</u>, and human resources that depend on these water resources. Recognizing these needs will promote economic and environmental security and enhance the quality of life for the people of the State of Idaho.

#### **Implementation Strategies:**

- Ensure that all actions taken toward a sustainable water future protect and respect private property rights, both in the land and water rights
- Inventory Idaho's water supply, current uses, and future water supply needs
- Evaluate long-term and short-term trends in water availability for present and future uses
- Identify areas where present water supplies are either inadequate for present uses or not sustainable, and develop management plans to address supply in an appropriate timeframe respecting private property rights
- Identify management alternatives and projects that optimize existing and future water supplies without compromising water quality
- Prioritize and implement management alternatives and projects where competing demands and future needs are most critical
- Enhance water transfer mechanisms in Idaho law, policy and regulations to allow future economic opportunities to utilize existing water supplies, while protecting existing uses
- Utilize the Idaho Water Resource Board's Funding Program and prioritize allocation of funds for projects that ensure water sustainability across the state
- Utilize the state protected river system and the Idaho Water Resource Board minimum stream flow water rights to sustain water supplies for fisheries and recreational opportunities.
- Educate the public about water uses and the needs for water conservation measures
- Identify\_water conservation measures that water users, municipalities, governmental
  agencies and other entities can undertake to help protect the water resources of the
  State and provide guidance to those entities on best practices to implement those
  conservation measures
- Recognize that conservation measures may reduce water supplies utilized by others in other parts of the resource
- Identify measures and provide funding for aquifer stabilization strategies, including managed recharge, throughout the state with due regard to the priorities of basin specific Comprehensive Aquifer Management Plans
- Pursue enhancement of surface water storage supply as a mechanism for meeting Idaho's future water needs
- Recognize weather modification may help to achieve water sustainability goals
- Cooperate with flood control entities to ensure flood control actions are consistent with water sustainability.

Formatted: Font: Times New Roman, 12 pt

Formatted: Font: Times New Roman, 12 pt

- Use a grassroots approach to identify problems and developing optimal solutions. The needs of individual basins must be taken into consideration in how the resource should be managed while recognizing the potential for decisions in one basin to affect the resources of another basin. An integrated and collaborative approach to water resource management is critical for the sound and efficient use of Idaho's water resources. The State of Idaho when appropriate should work together with, water users, tribes, local communities, neighboring states, and the federal government to resolve water issues
- Protection of the quality of existing water supplies, particularly those ground water resources that are used for drinking water supplies, to ensure the vitality of local communities. This goal requires other state and local agencies to exercise their appropriate authorities to protect the water resources and to assist in meeting the goal of sustainable economic growth

### **Milestones:**

- Respect for Protect and respect private property rights in accordance with State law and policy
- Identify number of basins where water supply and demand have been inventoried
- Identify number of basins where management alternatives have been identified and implemented to optimize existing and future water supplies, including surface water storage, ground water recharge, conservation measures and weather modification
- Obtain more accurate water supply, water measurement, and forecasting information
- Disseminate water supply forecasts and trends to water users in cooperation with other federal and state agencies
- Measure utilization of water bank and transfer procedures to allow sustainable use of the resource
- Determination and implementation of measures and policies to enhance the utility of the water bank and transfer procedures
- Financial programs and funding strategies that meet the future water resource needs
  of the State of Idaho. Secure funding and resources in cooperation with the Governor
  and legislature. Reliable on-going, long-term funding will be needed to enable and
  support active stewardship of Idaho's water resources.
- Basin aquifer stabilization stabilization of ground water levels in basins where declines are occurring to restore and maintain sustainable aquifer levels
- Initiate and facilitate construction of additional surface water storage to meet current and future needs
- Use of adaptive management to identify and address uncertainties for success, including those related to data, modeling, and impacts of climate variability
- Balance water supply and demand supply and demand must be in balance to support current and future use within a particular basin

WRP Recommended Changes to Proposed Sustainability Section 10-5-16

- Consider impact of water use changes and water supply trends on future water availability
- Improve data management accurate and abundant data is necessary to assist with ensuring stewardship of Idaho's water resources to satisfy current and future uses
- Coordination with State and local entities on measures to protect and enhance ground water and surface water resources so that these resources are available for use by the people of the State of Idaho

#### 8. SUSTAINABILITY

Sustainability focuses on the overall stewardship of the  $\underline{s}$ State's water resources for the good of the people of the State of Idaho.

### 8A - SUSTAINABILITY OF IDAHO'S WATER RESOURCES

Sustainability is the active stewardship of Idaho's water resources to satisfy current uses and assure future uses of this renewable resource in accordance with state law and policy.

### Discussion:

This Sustainability Policy depends upon the state's sovereignty over its water resources. Water is the foundation of Idaho's economy and culture; the lives and livelihoods of Idahoans depend on a reliable supply of water. —Stewardship of Idaho's water resources begins with the realization that the water resources of the state are not inexhaustible. Therefore, and therefore it is necessary to -manage and , administer Idaho's water resources and , and take action to protect Idaho's water quality. sustain, , enhance and protect the quality of the water resources.

Stewardship, by necessity, also includes taking affirmative steps to address declining trends in the resource, where those trends exist, and to establish policies that will prevent future unsustainable declines. The goal must be overall stewardship of the state's water resources for the good of the people of the State of Idaho.

The State of Idaho encompasses some of the most diverse and awe\_inspiring physical and geological features in the country. -From the depths of Hells Canyon to the peak of Mount Borah, from sage-brush deserts, to the extensive agricultural farm and ranch land, to-from alpine forests and meadows, to the cities and towns, -the ecosystems of each of these varied areas all rely on the water resources of the setate. -The people of the setate interact with and depend upon the water resources in these different landscapes in many different ways. -Therefore, the water sustainability policy of the setate of Idaho must embrace the diversity of the setate, while recognizing the potential for a use or activity in one place to affect the water resources in another part of the setate.

Sustainable water management strategies to meet current and future needs must be based on adequate knowledge regarding available supplies, existing use, trends, competing economic and social demands, and future needs. Planning and management actions to promote water sustainability must be designed and implemented to ensure that existing water rights are protected and the economic vitality of Idaho is optimized.

The goal of sustainable use of water resources of the <u>s</u>State must recognize that the goals of sustainable economic growth and protection of existing rights must coexist <u>with</u> and are

enhanced by measures that protect and maintain surface and ground water resources and the aquatic, riparian, fish and wildlife, recreational, and human resources that depend on these water resources. Recognizing these needs will promote economic and environmental security and enhance the quality of life for the people of the State of Idaho.

## **Implementation Strategies:**

- Ensure that all actions taken toward a sustainable water future protect and respect private property rights, both in the land and water rights.
- Inventory Idaho's water supply, current uses, and future water supply needs.
- Evaluate long-term and short-term trends in water availability for present and future uses.
- Identify areas where present water supplies are either inadequate for present uses or not sustainable, and develop management plans to address supply in an appropriate time\_frame, while respecting private property rights.
- Identify management alternatives and projects that optimize existing and future water supplies without compromising water quality.
- Prioritize and implement management alternatives and projects where competing demands and future needs are most critical.
- Enhance water transfer mechanisms in Idaho law, policy, and regulations to allow future economic opportunities to utilize existing water supplies, while protecting existing uses.
- Utilize the Idaho Water Resource Board's Funding Program and prioritize allocation of funds for projects that ensure water sustainability across the state.
- Utilize the state protected river system and the Idaho Water Resource Board minimum stream flow water rights to sustain water supplies for fisheries and recreational opportunities.
- Educate the public about water uses and the needs for water conservation measures.
- Identify water conservation measures that water users, municipalities, governmental
  agencies, and other entities can undertake to help protect the water resources of the
  <a href="mailto:sState"><u>sS</u>tate and provide guidance to those entities on best practices to implement those
  conservation measures.</a>
- Recognize that conservation measures may reduce water supplies utilized by others in other parts of the resource.
- Identify measures and provide funding for aquifer stabilization strategies, including managed recharge, throughout the state with due regard to the priorities of basin specific Comprehensive Aquifer Management Plans.
- Pursue enhancement of surface water storage supply as a mechanism for meeting Idaho's future water needs.
- Recognize weather modification may help to achieve water sustainability goals.
- Cooperate with flood control entities to ensure flood control actions are consistent with water sustainability.

- Use a grassroots approach to identify problems and developing optimal solutions. The needs of individual basins must be taken into consideration in how the resource should be managed, while recognizing the potential for decisions in one basin to affect the resources of another basin. -An integrated and collaborative approach to water resource management is critical for the sound and efficient use of Idaho's water resources. The State of Idaho, when appropriate, should work together with, water users, tribes, local communities, neighboring states, -and the federal government to resolve water issues.
- Protection of the quality of existing water supplies, particularly those ground water
  resources that are used for drinking water supplies, to ensure the vitality of local
  communities. -This goal requires other state and local agencies to exercise their
  appropriate authorities to protect the water resources and to assist in meeting the goal
  of sustainable economic growth.

### **Milestones:**

- Protect and respect private property rights in accordance with sstate law and policy.
- Identify number of basins where water supply and demand have been inventoried.
- Identify number of basins where management alternatives have been identified and implemented to optimize existing and future water supplies, including surface water storage, ground water recharge, conservation measures, and weather modification.
- Obtain more accurate water supply, water measurement, and forecasting information.
- Disseminate water supply forecasts and trends to water users in cooperation with other federal and state agencies.
- Measure utilization of <u>the wWater Supply Bbank</u> and transfer procedures to allow sustainable use of the resource.
- Determination and implementation of measures and policies to enhance the utility of the <u>Wwater Supply bBank</u> and transfer procedures.
- Financial programs and funding strategies that meet the future water resource needs
  of the State of Idaho. Secure funding and resources in cooperation with the Governor
  and legislature. Reliable on-going, long-term funding will be needed to enable and
  support active stewardship of Idaho's water resources.
- Basin aquifer stabilization \_\_\_\_\_stabilization of ground water levels in basins where
  declines are occurring to restore and maintain sustainable aquifer levels.
- Initiate and facilitate construction of additional surface water storage to meet current and future needs.
- Use of adaptive management to identify and address uncertainties for success, including those related to data, modeling, and impacts of climate variability.
- Balance water supply and demand—supply and demand must be in balance to support current and future use within a particular basin.
- Consider impact of water use changes and water supply trends on future water availability.

# AV EDITS 10-17-16 WRP Recommended Changes to Proposed Sustainability Section 10-5-16

- Improve data management——accurate and abundant data is necessary to assist with ensuring stewardship of Idaho's water resources to satisfy current and future uses.
- Coordination with <u>s</u>State and local entities on measures to protect and enhance ground water and surface water resources so that these resources are available for use by the people of the State of Idaho.

# Memorandum

To: Idaho Water Resource Board

From: Remington Buyer
Date: November 2, 2016

Re: Water Supply Bank ground water management policy for the Wood River Valley

Action Items: The Board may approve by resolution a renewal of the Wood River Valley interim ground water management policy for the Water Supply Bank and commit to crafting a new, long-term ground water management policy during calendar year 2017.

In recent years, the Water Supply Bank has been authorized by the Idaho Water Resource Board (Board) to regulate the movement of ground water right rental requests in the Wood River Valley pursuant to an interim ground water management policy. The policy seeks to balance the need to avoid injury via rentals, while simultaneously expediting rental request processing where possible, through restricting the movement of rentable ground water rights to within six zones. Modeling of ground water rental requests is only required if an application proposes to rent ground water across zone boundaries.

The interim management policy was implemented as a temporary measure, with the intent that the policy would only be in effect until such time as the Department of Water Resources (IDWR) issued a formal ground water management policy for the valley. When the interim policy was first implemented, IDWR was concluding collaborative work with the US Geological Survey (USGS) to develop a ground water model for the Wood River Valley. The Board authorized the interim ground water rental policy with the knowledge that the ground water model might be used at a future date to regulate the movement of ground water rights.

Development of the USGS-IDWR ground water model is now complete and the model is available for public use. However, no formal ground water management policy has yet been issued for the Wood River Valley, based on the Wood River Valley ground water model. Because the interim ground water management policy was intended to be a stop-gap measure, to be in place only until such time as the ground water model was available for use, and because the model is now available for public use, the time has come for the Board to contemplate sunsetting the interim policy so that it can be replaced with a more lasting ground water management policy for the Water Supply Bank based on the best available scientific information, which may be generated by the Wood River Valley ground water model.

The Board and its representatives are thus called upon to work IDWR staff, as well as regional Wood River Valley water users and their representatives, to evaluate the results of water rental scenarios run through the new ground water model. The use of the model and its results should be used to develop a logical, lasting, regional ground water management policy for the Water Supply Bank. Public engagement with local water users should be part of the policy making process. A series of Water Supply Bank Subcommittee meetings are recommended to be held during spring and summer 2017, to allow for public engagement and input in the modeling evaluation and policy making process.

However, until such time as the formal policy is established, the interim ground water rental policy should remain in effect, to allow for continuity of ground water rentals in the Wood River Valley during calendar year 2017. As such, the Board is called upon to approve a resolution that both authorizes a renewal of the interim ground water rental policy concurrent with a commitment to hold Water Supply Bank Subcommittee meetings during 2017, so that a long-term, ground water rental policy will be crafted for the Water Supply Bank in the Wood River Valley, prior to the end of calendar year 2017.

A draft version of the resolution is provided for consideration by the Board, along with a copy of interim ground water management policy, which is currently in effect until December 31, 2016.

#### BEFORE THE IDAHO WATER RESOURCE BOARD

IN THE MATTER OF RENEWING	)	
AN INTERIM GROUND WATER	)	
RENTAL POLICY AND	)	A RESOLUTION PERTAINING
ESTABLISHING A LONG-TERM	)	TO ADMINISTRATIVE POLICY
GROUND WATER RENTAL POLICY	)	OF THE WATER SUPPLY BANK
FOR THE WATER SUPPLY BANK IN	)	
THE WOOD RIVER VALLEY	)	

WHEREAS, section 42-1761, Idaho Code provides that the Idaho Water Resource Board shall have the duty of operating a Water Supply Bank; and

WHEREAS, section 42-1762, Idaho Code provides that the Idaho Water Resource Board shall adopt rules and regulations governing the management, control, delivery and use and distribution of water to and from the Water Supply Bank; and

WHEREAS, the Idaho Water Resource Board authorized the Water Supply Bank to implement a temporary ground water right rental policy in the Wood River Valley, to facilitate efficient administration of ground water rentals while the Department of Water Resources concluded work on a ground water model for the Wood River Valley; and

WHEREAS, development of the ground water model is now concluded but no formal policy has yet been issued regarding the use of the model and administration of rental requests for ground water rights in the Wood River Valley; and

WHEREAS, the Idaho Water Resources Board may now use the ground water model to identify impacts to water rights caused by the rental of Wood River Valley ground water rights from the Water Supply Bank; and

WHEREAS, the Idaho Water Resource Board may evaluate and utilize the results of modeled ground water rental scenarios to develop a long-term, ground water right rental policy for the Water Supply Bank in the Wood River Valley; and

WHEREAS, a series of Water Supply Bank Subcommittee meetings is the recommended forum in which modeled rental scenarios should be discussed as policy is crafted; and

WHEREAS, Wood River Valley water users should have the opportunity to engage the Board and its representatives in the policy making process, by attending and providing public comments at Water Supply Bank Committee meetings; and

WHEREAS, Wood River Valley water users would also benefit from the continuance of the interim rental policy for an additional year, while a new, long-term policy is crafted and enacted by the Idaho Water Resource Board;

NOW THEREFORE BE IT RESOLVED, that the Idaho Water Resource Board commits to holding a series Water Supply Bank Subcommittee meetings during calendar year 2017, in which Committee members, IDWR staff and interested members of the public will evaluate the modeled impacts of Wood River Valley ground water rental scenarios, and from which a long-term ground water rental policy will be established for the Water Supply Bank in the Wood River Valley; and

NOW THEREFORE BE IT FURTHER RESOLVED, that the Idaho Water Resource Board authorizes a renewal of the interim ground water rental policy, to be in effect until such time as the Idaho Water Resource Board formally authorizes and establishes a new, long-term policy to guide administration of Water Supply Bank ground water right rental requests within the Wood River Valley.

Dated this o	this day of November, 2016.

## RE: Water Supply Bank Interim Ground Water Rental Policy for the Wood River Valley

The surface and ground waters of the Big Wood River drainage are interconnected and diversions of ground water from wells can deplete the surface water flow in streams and rivers. Wood River Valley water users can be injured if Water Supply Bank rentals authorize ground water pumping that in turn causes extended depletions of the Big Wood River. To protect prior appropriators in the Wood River Valley while simultaneously ensuring efficient operation of the Water Supply Bank, the Idaho Water Resource Board (IWRB) has approved a temporary ground water rental policy for the Water Supply Bank (Bank) in the Wood River Valley.

The interim ground water rental policy establishes a safe distance within which all ground water rental requests can be considered and it creates six ground water transaction zones to guide how the Water Supply Bank can process all other rental requests. The IWRB originally authorized the interim ground water rental policy for the Wood River Valley on January 23, 2015 and the policy was reauthorized by the IWRB September 18<sup>th</sup>, 2015. The interim policy is in effect until December 31, 2016.

The Water Supply Bank considers that where a point of diversion for a ground water rental request is equal to or less than 657 feet (200 meters) from a point of diversion for a water right leased to the Water Supply Bank, diversions of ground water from both the lease and the rental points of diversion will be similar. Therefore, subject to standard rental review procedures, all requests can be accepted where a rental of water is less than 657 feet from the original (leased) point of diversion.

Additionally, the Water Supply Bank accepts that impacts to surface and ground water resources caused by ground water pumping can be significantly limited and constrained if ground water pumping is restricted to specific areas or transaction zones. Under this interim ground water rental policy, when a point of diversion for a leased right and the point of diversion for a rental request are both found within the same transaction zone, the Bank will not necessarily require any additional information to accept and review the rental request. Subject to standard rental review procedures, the Bank may approve rental requests where the lease and rental points of diversion occur within the same transaction zone.

When the distance between the points of diversion for a leased right and a rental request is more than 657 feet however, and when such a request seeks to rent ground water from a well that is located in a different zone than that in which a leased water right is located, the Bank requires that a stream depletion analysis or a ground water impact analysis be submitted with the rental request. If the results of a stream depletion or ground water impact analysis reveal that a rental will cause surface water depletions within a zone that are larger than accretions to surface water within the zone (occurring through the lease into the Bank of the water right being rented) than mitigation is required to offset the impacts of the rental. Additionally, if a request is made to rent a water right across a transaction zone up gradient of the original location of the leased right, or into the River Zone, to within one hundred feet of the Big Wood River (or a major tributary), such rentals need to demonstrate that the timing, magnitude and location of impacts to surface water does not result in injury to the IWRB's minimum streamflow water rights, else the rental may be subject to curtailment once the minimum stream flow of the Big Wood River is not being satisfied

## **Wood River Valley Transaction Zones**

This interim ground water rental policy delineates the Wood River aquifer into the following zones:

- 1) The Ketchum Zone, 4 A) River Zone, northern reach (within the Ketchum Zone),
- 2) The Hailey Zone, 4 B) River Zone, central reach (within the Hailey Zone),
- 3) The Bellevue Zone, 4 C) River Zone, southern reach (within the Bellevue Zone),
- 5) The Eastern Bellevue Triangle Zone, and 6) The Western Bellevue Triangle Zone.

The Ketchum Zone covers all ground water rights located north of the point of diversion for the Hiawatha Canal (effectively the intersection of Highway 75 and Ohio Gulch Road) and outside the 200 foot wide Northern River Zone. The Ketchum Zone includes all northern tributary valleys for the Big Wood River including Eagle Creek, East Fork, Greenhorn Creek, Lake Creek, Trail Creek and Warm Springs Creek. Stream depletion analyses may not be necessary for ground water rental requests that both originate (are leased) from and are satisfied within this zone, though all rental requests remain subject to standard rental review procedures to guard against injury and enlargement of water use.

The Hailey Zone covers all ground water points of diversion south of the Ketchum Zone, outside the Central River Zone and north of the point of diversion for the Irrigation District #45 Bellevue Canal. The Hailey Zone extends to all central tributaries of the Big Wood River including Croy Creek, Deer Creek, Indian Creek and Quigley Creek. Stream depletion analyses may not be necessary for ground water rental requests that both originate from and are satisfied within this zone, though rental requests remain subject to standard rental review procedures to guard against injury and enlargement of water use.

The Bellevue Zone extends from the southern end of the Hailey Zone to the point of diversion for the Bypass Canal (effectively Glendale Road) and includes all ground water points of diversion tributary to Seaman's Creek/Muldoon Canyon, but not ground water rights within the Southern River Zone. Stream depletion analyses may not be required for ground water rental requests that both originate from and are satisfied within this zone though rental requests remain subject to standard rental review procedures to guard against injury and enlargement of water use.

The River Zone is a two hundred foot wide buffering of the Big Wood River, from the northern end of the Ketchum Zone, to the Bypass Canal at the southern end of the Bellevue Zone. The River Zone includes major surface water tributaries of the Big Wood River, including Croy Creek, Deer Creek, East Fork, Trail Creek and Warm Springs Creek. The zone is segmented into a northern reach, a central reach and a southern reach, corresponding to the extent of the boundaries of the Ketchum, Hailey and Bellevue Zones. Due to the direct and immediate connection between surface and ground water within this two hundred foot wide River Zone, no stream depletion analysis is required for rentals within the zone because all ground water pumping within the zone is expected to have a direct and immediate impact on surface water resources. All ground water rentals within any of the three reaches of the zone should be satisfied by ground water rights that are leased into the Bank from within the same reach of the River Zone. Ground water users may also request to rent surface water rights.

The final two zones cover the western and eastern halves of the confined and unconfined aquifers of the Bellevue triangle. Ground water in the western half of the triangle is hydraulically connected to surface water flowing west into the Big Wood River while eastern ground water flows east into Silver Creek and the Little Wood River. The two zones correspond roughly to all lands east and west of Kingsbury Lane. No stream depletion analyses or ground water impact analyses are required for ground water to ground water rental requests that both originate from and are satisfied within a zone, though rental requests remain subject to standard rental review procedures to guard against injury and enlargement of water use. A Theis ground water analysis is required for all cross-zone rentals in the Bellevue Triangle.

For reference, a map of the rental transaction zones is provided in Figure 1, and detailed cross sections of the zone transitions is provided in Figures 2-4.

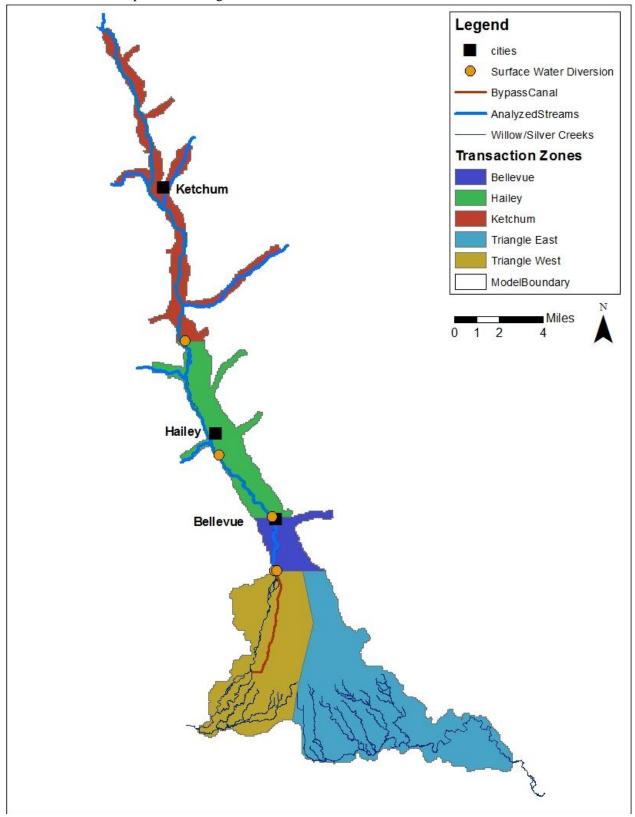

Figure 1. Map of the Water Supply Bank Transaction Zones within the Wood River Valley

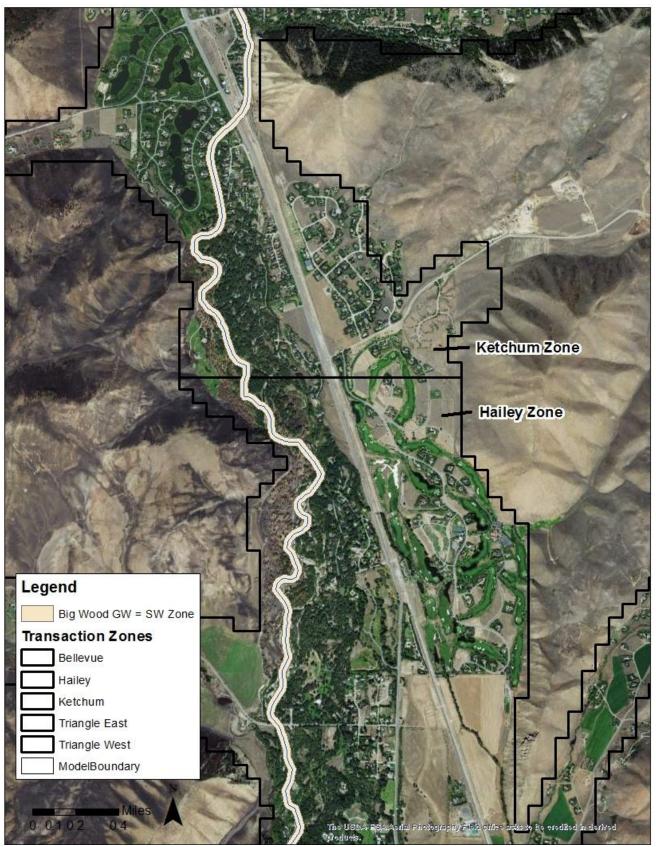

Figure 2. Transition between the Ketchum and Hailey Zones

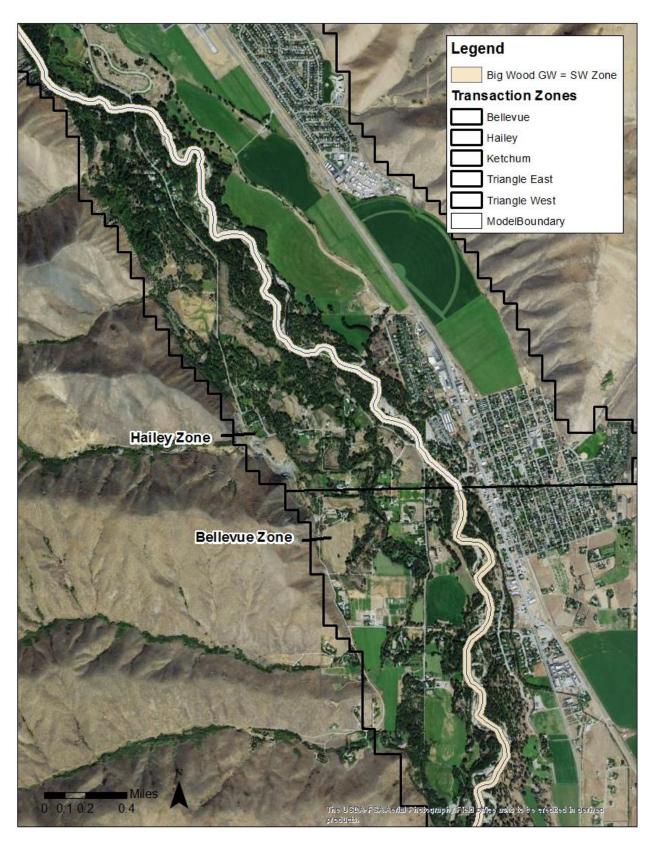

Figure 3. Transition between the Hailey and Bellevue Zones

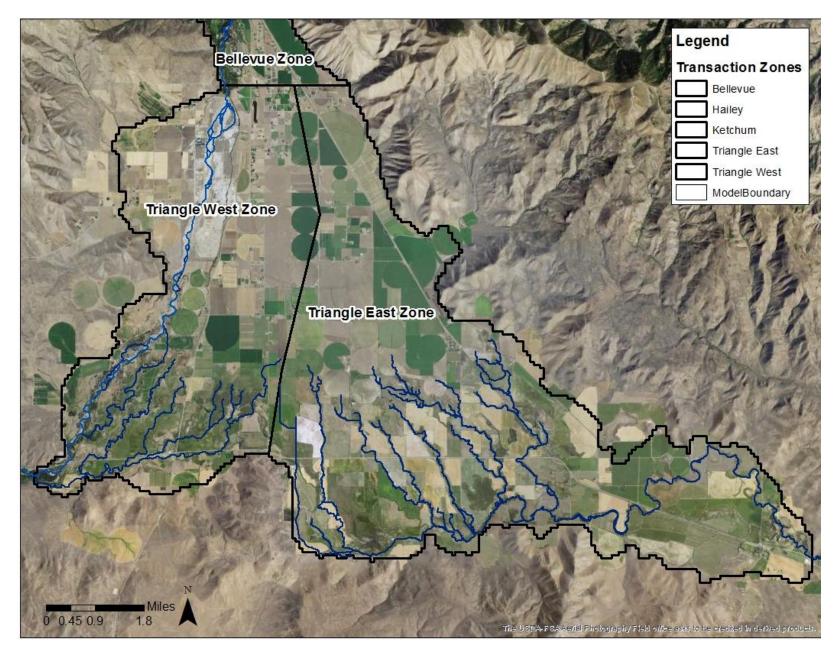

Figure 4. Transition between the Bellevue and Triangle Zones

## **Supplemental Impact Analyses for Cross-Zone Rental Transactions**

Rental requests that both originate from and are satisfied within a transaction zone are not required to submit additional information with their rental application, however where a rental request is located further than 657 feet from a point of diversion of the leased water right sought for rent, such proposals may be required to conduct a stream depletion analysis and/or ground water impact analysis supplemental to the standard rental application. IDWR may request stream depletion analyses for intra-zone rentals if a review of water modeling data is necessary to ensure no injury occurs through a rental.

Stream depletion analyses are required for all cross-boundary rental requests within the River, Ketchum, Hailey or Bellevue Zones whereas a Theis ground water impact analysis should be submitted for cross-boundary ground water rental requests in the Bellevue Triangle. Where stream depletion or Theis ground water impact analyses indicate that a ground water rental will deplete surface and/or ground water in excess of any water accreted to the zone through a Water Supply Bank lease, mitigation may be required to ensure no injury is permitted against other water users. The Water Supply Bank will consider all stream depletion and Theis ground water impact analyses to advise rental applicants on whether mitigation is necessary. Applicants may also consult the decision matrix at the end of this information package to determine whether mitigation of their rental is likely to be required.

The type of stream depletion analysis submitted for a cross-zone rental request is to the discretion of the applicant however the Water Supply Bank can expedite processing of stream depletion analyses conducted using the Alluvial Water Accounting System (AWAS), which is free software available from Colorado State University at: <a href="http://www.ids.colostate.edu/projects.php?project=awas/awas.html">http://www.ids.colostate.edu/projects.php?project=awas/awas.html</a>.

The following may assist rental applicants utilizing AWAS to complete a cross-zone stream depletion analysis:

Start by selecting **new IDS** (**modified**) under the file menu to begin your modeling. Use **Year Type:** *Calendar* and **Time Scale:** *Days* or *Months* with the starting year and the ending year corresponding to the starting year of the rental request and ending year being the year following the final year of the rental request. In the initial screen (**Input**) click **New Well** twice, once to model the ground water point(s) of diversion for the leased water right being rented, and once to model the point(s) of diversion being utilized for the rental request. If multiple ground water rights are being rented to satisfy a single rental, multiple wells should be modeled.

The **Well Name** can be set as the water right being rented (for the leased right) and the renter's name for the rental point of diversion. **Type** should be set to **Recharge** for the leased right and **Irrigation** for the rental site. The aquifer **Boundary Condition** should be set to **Alluvial Aquifer** for both wells. The **W** (**Feet**) field should be populated with the linear distance (measured in feet) from the model boundary to the Big Wood River (or major tributary being modeled) at the location of the lease or the rental, while the **X** (**Feet**) field should be populated with the linear distance between the lease/rental points of diversion and the Big Wood River (or major tributary). The **Transmissivity** (**GPD/FT**) value may be ascertained by referencing the map in Figure 5, selecting a value between the minimum and maximum values of the corresponding color ramp, and multiplying the value by 7.48 to convert from feet/day to gallons/day. For applicants that have access to geographic information systems, GIS raster and spatial data can be downloaded from IDWR's website. **Specific Yield** should be set as 0.20 while **Show in Output** should be checked and **Use Partial Stream** should not be checked.

For the leased water right being rented, the radio button selection should be left as **Recharge** and the daily (or monthly) acre foot amounts can be populated by calculating the total acre foot volume of water available to be rented, divided by the total number of season of use days (or months) authorized by the water right. Similarly, the rental radio button should be left as **Consumptive Use** and daily or monthly acre-foot volumes should be populated based on the total intended rental volume, divided by the days or months of the intended season of use. **Run Start:** should be left as **Jan year one** to **year two** and the box should be checked for **Ignore pumping/recharge after: Dec year one**.

Examples of model inputs are provided in Figures 6 and 7.

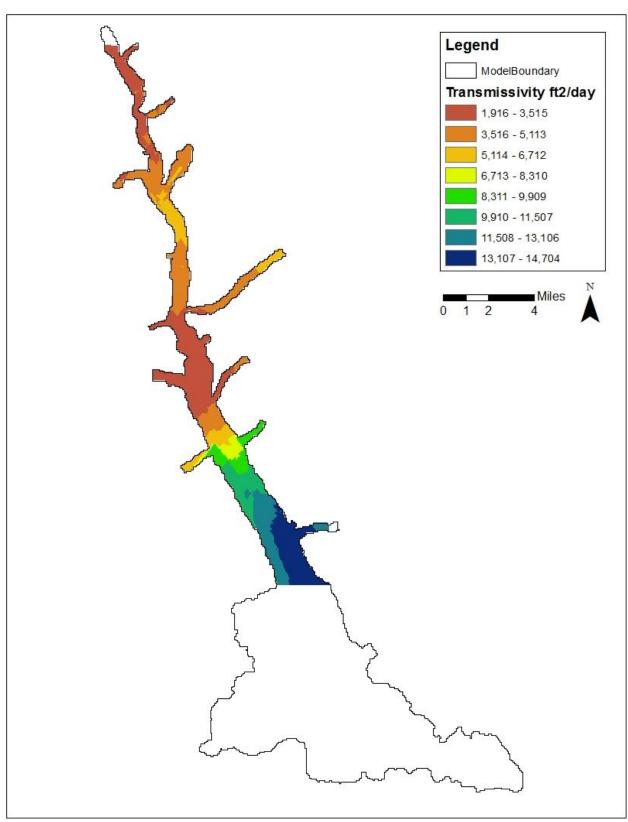

Figure 5. Transmissivity ratings for the Wood River Valley
This map models the speed of ground water movement through the Wood River Valley aquifer.

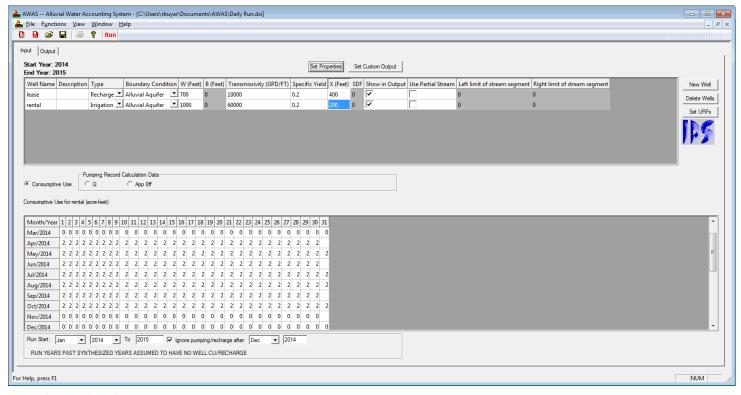

Figure 6. Daily Inputs

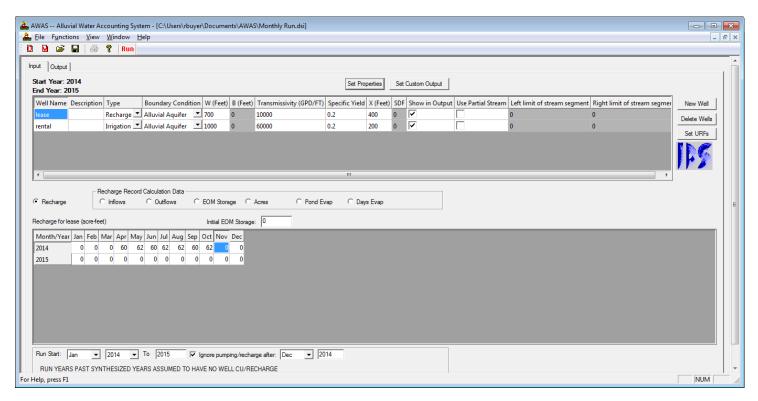

Figure 7. Monthly Inputs

Once all inputs are completed, the red *Run* button can be clicked. The **Net Impact on Stream** results for <u>all rental years</u> should be selected, and the scale should be set to Daily if such results have been modeled. A screen shot of the model results can be printed, or a printout of the model results printed from Excel is possible if the *Export Open in Excel* is selected under **Display Options**.

See Figure 8 for an example of the outputs of a model run.

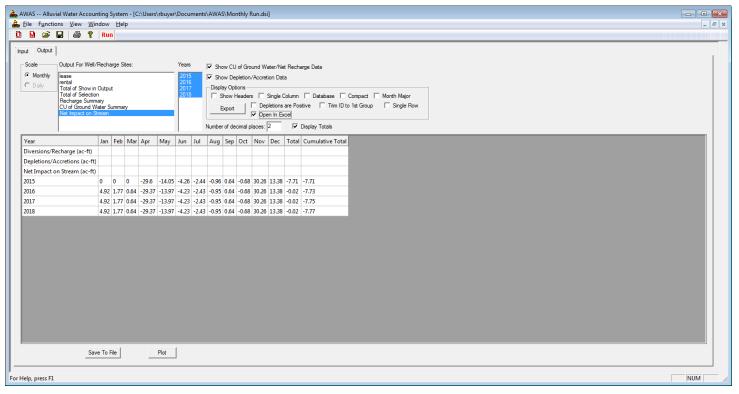

Figure 8. AWAS Model Outputs

For rental requests that seek to rent ground water rights across zones within the Bellevue Triangle, a Theis ground water impact analysis should be conducted. The Department of Water Resources is currently working on guidance that can be made available on how to complete a Theis analysis in the triangle. Any water users intending to submit a cross-zone rental request in the triangle can contact the Department for information on how they might complete a Theis analysis.

### Mitigating the Impacts of Ground Water Rentals Causing Excessive Surface Water Depletions

For the Ketchum, Hailey, Bellevue and River Zones, injury shall be evaluated based on the monthly net change in surface water depletions of the Big Wood River (or major tributaries) that occur during the rental season of use within the reach of the River Zone where the rental is occurring. For example, the measurement of injury for a ground water rental located within the Ketchum Zone is measured based on the net change in depletions to the northern reach of the Big Wood River. To ensure no injury occurs under such a scenario, the sum of all monthly depletions of the northern reach of the Big Wood River (caused by the rental) must be equal to or less than all monthly accretions to the northern reach of Big Wood River (that stem from the water right being leased).

If accretions to the river are greater than depletions from the river, no mitigation is necessary. However, if depletions of the river within the reach of the rental zone are greater than accretions to the river within the zone, additional surface or ground water rights must be rented to offset injurious depletions of surface water within the reach. If no additional water rights are available to offset the rental, the rental should be reduced so that depletions do not exceed accretions. If a rental cannot be reduced to avoid injurious impacts, such a rental may not be approved, or it may be approved as subordinated to the IWRB's minimum streamflow water rights.

the GW rental zone) equal to

or less than accretions to the

reach of the river within the

GW rental zone?

### **Minimum Stream Flow Subordination**

Ground water rental requests cannot result in increased depletions to Big Wood River within the reach of the river where the Idaho Water Resource Board (IWRB) holds minimum stream flow (MSF) water rights (from Ketchum, south to the District #45 Canal in Bellevue). If a ground water rental request proposes to move upgradient from the Bellevue Zone into the Hailey Zone, it is expected to have a greater impact on the minimum stream flow reach of the Big Wood River. Similarly, if a ground water rental request proposes to move from outside the River Zone into the River Zone, such a move is also expected to result in increased depletions to the surface waters within the minimum stream flow reach of the river. Such rentals must submit evidence that any depletions to the surface water within this reach will be offset by accretions to the reach through the leased right being rented, else they must rent additional water rights to ensure no injury comes to the IWRB's MSF right. If it is expected that a rental will have an impact on the IWRB's MSF water rights and the rental applicant does not provide evidence to confirm that the rental will not adversely impact the IWRB's MSF water rights, the rental will be subordinated to the MSF.

## Additional Information on the Interim Ground Water Rental Policy

The Water Supply Bank has implemented this temporary ground water rental policy to ensure optimal administration of ground water rental requests in the Wood River Valley while the Idaho Department of Water Resources and the US Geological Survey continue to work toward completion and administrative use of a hydrologic ground water model of the Wood River Valley. The Water Supply Bank anticipates that IDWR will issue a directive on ground water transfers within the Wood River Valley once the Wood River Valley model has been completed, tested and approved for use in modeling ground water transfers.

In light of future IDWR policy pertaining to ground water transfers, this interim ground water rental policy has been approved for use until December 31, 2016. All ground water rental requests approved pursuant to this interim policy are only in effect for one year. The Water Supply Bank is monitoring the implementation of the interim ground water rental policy and welcomes public comment on the approach to administering ground water in the Wood River Valley.

## BEFORE THE IDAHO WATER RESOURCE BOARD

IN THE MATTER OF THE	)	RESOLUTION TO APPROVE
PRIEST LAKE	)	FUNDS FOR THE
IMPROVEMENT PROJECTS	)	PRIEST RIVER OUTFLOW GAGE

WHEREAS, the Idaho Department of Water Resources (IDWR) owns the Priest Lake Dam (Dam) which was constructed in 1951 as an outlet control structure to maintain lake levels and downstream flows in the Priest River in accordance with Idaho Code § 70-507; and

WHEREAS, Idaho Code § 70-507 authorizes the director of IDWR to contract operation and maintenance of the dam, and requires that the water surface level of Priest Lake be maintained at 3.0 feet on the US Geologic Society (USGS) Priest lake Outlet gage (located upstream of the Dam) after run-off of winter snowpack until the close of the main recreational season; and

WHEREAS, the USGS operated a streamflow gage on the Priest River approximately four miles downstream of the Dam until 2006; however, the closest operational streamflow gage is now located 45 miles downstream of the Dam which measures flows in the Priest River, including inflow from tributary streams below the Dam, and therefore, does not reflect the discharge rate from the Dam; and

WHEREAS, limited water supply and drought conditions in northern Idaho in 2015 limited the director's ability to maintain required pool levels and downstream flow in the Priest River during the recreational season; and

WHEREAS, Priest Lake, Upper Priest Lake and the Priest River are significant draws for tourism and recreation, and are highly valued environmental and economic assets for Bonner County and the state of Idaho; and

WHEREAS, IDWR recognizes the need for potential improvements to the Priest Lake Dam to address general maintenance needs, and improve measurement of lake levels, outflow, and operation of the outlet structure to help manage available water supplies into the future; and

WHEREAS, Governor Otter directed the Idaho Water Resource Board (IWRB) to develop a water sustainability policy and support water sustainability and aquifer stabilization projects across Idaho to address declining ground water levels, existing or potential conjunctive administration water use conflicts, alternative water supplies and long-term water management needs; and

WHEREAS, the IWRB, with support from Bonner County, the community, local officials and the Lake Pend Oreille, Pend Oreille River, Priest Lake and Priest River Commission, has initiated the Priest Lake Water Management Study (Study) to evaluate options to improve operation of the Priest Lake and Priest River system, and identify potential

improvements to the Outlet Dam, lake level and streamflow measurement, and options for rehabilitation of the Thorofare; and

WHEREAS, the USGS is prepared to enter into a Joint Funding Agreement (JFA) for installation, operation and maintenance, and publication of data collected for a new streamflow gage located immediately downstream of the Dam to provide accurate outflow data and to assist with reservoir and dam operations; and

WHEREAS, the total estimated cost of installation plus operation and maintenance (O&M) for a new gage for Fiscal Year 2017 is \$24,500, and annual O&M costs in subsequent years are estimated to be \$16,400; and

WHEREAS, the IDWR Safety of Dams Program secured a FEMA grant in the amount of \$7,500 to assist with installation expenses for the new outflow gage; therefore, the total remaining expenses for installation and O&M in Fiscal Year 2017 are \$17,000; and

WHEREAS, the USGS expects to share costs associated with the O&M in subsequent years, though the amount will be defined on an annual basis;

NOW THEREFORE BE IT RESOLVED that the IWRB authorizes expenditure of funds not to exceed \$17,000 from the Revolving Development Account for the installation of a new gage below the Priest Lake Outlet Dam by the USGS.

NOW THEREFORE BE IT RESOLVED that the IWRB authorizes an annual expenditure of funds beginning in Fiscal Year 2018 not to exceed \$10,000 from the Revolving Development Account for expenditures associated with operations and maintenance of the Priest River Outflow gage.

NOW, THEREFORE, BE IT RESOLVED that the IWRB authorizes its chairman or designee, Brian Patton, to execute the necessary agreements or contracts to complete the installation and ongoing operation and maintenance of the new Priest River Outflow gage.

ROGER W. CHASE, Chairman Idaho Water Resource Board

Attest:

Vince Alberdi, Secretary
Idaho Water Resource Board

Dated this 2nd day of November 2016.
