Memorandum

To: Idaho Water Resource Board

From: Mike Morrison

Date: January 11, 2023

Re: Priest Lake Outlet Dam Improvement Project

REQUIRED ACTION: No action is required.

Project Update

<u>Summary</u>: Staff continues to work with the dam operators and the Engineering firm of Record (Mott MacDonald) to assure that the dam remains safe and in operable condition this winter.

Staff is working with the contractor to complete, by the end of January, a site survey and inventory of work that has been completed satisfactorily, as well as work that either needs to be completed or corrected. This survey and inventory will be used to update drawings and specifications used in bid packages for construction contractors who will complete the project by May 2024.

<u>Milestones and Tentative Timeline</u>: Staff anticipates that the project will progress according to the following timeline:

- January 31st, 2023: Site survey and inventory complete.
- February 28th, 2023: 90% Design Review Complete
- March 24th, 2023: RFQ ready to advertise. We will be working with the design firm concurrently to complete the RFP.
- June 2023: Begin negotiating with a responsive bidder.
- Sept 2023: Contractor begins work.
- May 2024: Outlet Dam Modifications complete

<u>Priest Lake Construction Litigation</u>: On September 27, 2022 the Board entered into an agreement for outside counsel with the firm of Kirton McConkie on the Strider matter. Staff will present a resolution to approve funds to defray the costs of litigation.

BEFORE THE IDAHO WATER RESOURCE BOARD

IN THE MATTER OF PRIEST LAKE CONSTRUCTION LITIGATION

RESOLUTION TO APPROVE FUNDS FOR OUTSIDE COUNSEL

1	WHEREAS, on August 20, 2020, the Idaho Water Resource Board (IWRB) and Strider Construction
2	Co., Inc. (Strider) entered a construction contract for improvements to the Priest Lake Outlet Dam; and
3	
4	WHEREAS, on July 27, 2022, Strider submitted a notice of termination of the contract; and
5	WHEREAS, on July 29, 2022, Strider filed a lawsuit against the IWRB related to the contract; and
6 7	WHEREAS, OILJUIY 29, 2022, Strider filed a lawsuit against the fire feated to the contract, and
8	WHEREAS, on August 23, 2022, the IWRB filed a counterclaim against Strider; and
9	
10	WHEREAS, the Office of the Attorney General (OAG) has determined that it is necessary and
11	appropriate to retain a private law firm to assist the OAG in the representation of the IWRB's interest in
12	the defense of litigation with Strider; and
13 14	WHEREAS, the OAG has selected Stephen B. Andersen of the firm Kirton McConkie (Counsel) to
14 15	assist in legal representation of the IWRB in the Strider litigation; and
16	assist in regulation of the twite in the struct inigation, and
17	WHEREAS, on September 16, 2022, the Board approved contracting with Counsel to represent
18	the IWRB in the Strider litigation; and
19	
20	WHEREAS, on September 27, 2022, the Board entered into an agreement for Professional Services
21	with Stephen B. Anderson of the firm of Kirton McConkie on the Strider matter; and
22 23	WHEREAS, the firm of Kirton McConkie has estimated that the costs of litigation in the Strider
23	matter through May, 2023 could be as much as \$370,000; and
25	
26	NOW THEREFORE BE IT RESOLVED, that the IWRB authorizes expenditure of up to \$370,000 from the
27	Water Management Account to defray the costs of litigation in the Strider matter; and
28	
29 20	NOW THEREFORE BE IT FURTHER RESOLVED that the IWRB authorizes its chairman or designee,
30 31	to execute the necessary agreements or contracts for the purpose of this resolution.

Committed per HB 769 Obligated Unobligated	\$13,415,533 \$13,712,953	

- The obligated balance in the Water Management Account includes the \$20M legislative appropriation per HB 285 (FY 2019) for the Anderson Reservoir Enlargement and/or Mountain Home Air Force Base Water Supply Project. The obligated balance also includes \$50M for large infrastructure projects per Senate Bill 1121 (FY 2021) for the Anderson Ranch enlargement, Mountain Air Force Base Water Supply Project, ESPA Managed Aquifer Recharge Program, other projects identified by the IWRB.
- The Water Management Account unobligated balance includes \$75M per HB 769 (FY 2022) to be used for expenditures, loans, or grants for water projects, including studies, to address water sustainability, rehabilitate or improve aging water infrastructure or support flood management. The legislature provided that no more than one-third of these moneys shall be used for grants. At the September IWRB

meeting the IWRB authorized \$12,500,000 in funds for Aging Infrastructure grants.

- At the September IWRB meeting the IWRB approved \$15,148,255 in loans from the Revolving Development Account to accompany the Aging Infrastructure Grants awarded from the Water Management Account.
- Since the September IWRB meeting \$72,871,514 has been expended from the ARPA funds for the Anderson Ranch Reservoir Enlargement.

Re: Lemhi Basin Comprehensive Settlement Implementation

REQUIRED ACTION: No action required

The Lemhi River Basin Comprehensive Settlement Agreement (Agreement), executed on February 24, 2022, sets forth a legal process for irrigators in the Lemhi River Basin who divert high flow ancillary to their decreed water rights under a General Provision in the Snake River Basin to perfect a water right for their 'high-flow' use. Parties to the Agreement include various Lemhi Basin water users, the Idaho Water Resource Board (IWRB), Idaho Department of Fish and Game, and Idaho Office of Species Conservation. Participation in the Agreement is voluntary and allows water users to continue to divert water under the General Provision if they do not choose to obtain a protectable a water right for high-flow use.

The attached Lemhi Basin Comprehensive Settlement Progress Report summaries the status of the various actions required under the Agreement.

Clive Strong will provide an update on activities associated with the implementation of the Settlement at the January 20 IWRB meeting.

Re: Anderson Ranch Dam Raise

REQUIRED ACTION: None.

Project Background

The Idaho Water Resource Board (IWRB) partnered with the U.S. Bureau of Reclamation (Reclamation) to complete a feasibility study of new surface water storage options on the Boise River. Reclamation issued the Final Feasibility Study and Draft Environmental Impact Statement (DEIS) in 2020 which recommended a six foot raise of the Anderson Ranch Dam (project) and approximately 29,000 acre-feet of new storage space. The recommended plan was deemed feasible by the Secretary of Interior in December 2020 which met a required deadline for authorization under the Water Infrastructure Improvements for the Nation Act (WIIN Act). Fiscal Year 2021 appropriations legislation secured \$12.88 million in WIIN Act funding as the federal cost share for completion of the Feasibility Study, environmental compliance, and construction.

The WIIN Act also required an agreement between Reclamation and a partner capable of funding the nonfederal share of the project costs through initiation of construction or final design activities prior to December 16, 2021. On November 19, 2021, the IWRB passed a resolution authorizing execution of a cost-share agreement (contract) between Reclamation and the IWRB to continue development of the Anderson Ranch Dam Raise through construction. The Feasibility Study estimate for total design and construction cost of the project is \$83.3 million, not including applicable interest during construction. In accordance with the contract, the non-federal share of the total project construction cost is 88.95%, or approximately \$74.1 million, and will be the responsibility of the IWRB. The federal share of the total construction cost is 11.05% and will be paid by Reclamation appropriations. The contract was executed on November 19, 2021 and Reclamation initiated dam raise design activities. The Anderson Ranch Dam Raise project met the December 16, 2021 WIIN Act construction initiation deadline.

Project Funding

In 2021 the IWRB advanced \$1,223,944 to Reclamation to partially fund the non-federal cost share for final design and construction activities associated with the project. Pursuant to House Bill 769 of the 2022 Idaho Legislative Session, the IWRB authorized expenditure of the remainder of the current non-federal cost obligation, approximately \$72.9 million in September 2022.

Project Ownership

The IWRB's contract with Reclamation affirms that Reclamation will retain sole ownership of 10% of the water accruing to the new storage space created in Anderson Ranch Reservoir, through this project. The contract also provides that Reclamation and the IWRB may negotiate the IWRB's ownership of the remaining non-federal balance of the new space crated in Anderson Ranch Reservoir. During a November 18, 2022 meeting of the IWRB, the Board affirmed by voice vote that it desired to exclusively retain ownership of the non-federal portion of the permit. Board staff are working with USBR staff to negotiate the IWRB's ownership of the non-federal portion of the permit.

Ongoing Project Activities

- IWRB staff continues to coordinate with Reclamation and provide support where appropriate. This includes supporting reservoir rim projects by coordinating with stakeholders as needed. Staff are also tracking post-feasibility study design work in anticipation of an update to the spillway design, potential reservoir elevation restriction and mitigation during construction. Staff are also providing support for a Supplemental Draft Environmental Impact Statement (SDEIS) which is currently being prepared by Reclamation;
- Reclamation is preparing to complete dam spillway overlay feasibility design work in the coming weeks;
- IWRB staff are working with IDWR Hydrology staff, using the Boise River water right accounting model to better understand Reclamation's hydrologic analysis and estimate the frequency of fill of storage in the new reservoir space, created through a raise of the dam;
- IWRB staff met with protestants to application 63-34753 on January 11, 2022, as part of an informal settlement discussion. The protestants provided Board staff with input regarding their concerns and the purposes of their protests. Board staff will work with the protestants in an effort to address their concerns and a follow up informal settlement discussion has been scheduled for May 24, 2022.

Reclamation will provide an update on project activities at the January 20, 2022 IWRB meeting. A briefing letter from Reclamation and copy of its preliminary project development schedule are attached.

Ms. Melanie Paquin Area Manager Snake River Area Office 230 Collins Road Boise, ID 83702

Subject: Boise River Basin Feasibility Study / Anderson Ranch Dam Raise Status Update, Boise Project, Idaho

Dear Mr. Raybould and Ms. Paquin:

This status update is being sent in preparation for the Idaho Water Resource Board (IWRB) meeting on January 20, 2023.

The IWRB and the Bureau of Reclamation (Reclamation) partnered to complete a feasibility study of new surface water storage opportunities in the Boise River Basin (Study). Authorized under Water Infrastructure Improvements for the Nation (WIIN) Act of 2016, the Study focused on a 6-feet raise of Anderson Ranch Dam in Idaho, to achieve approximately 29,000 acre-feet of new water storage.

Current Status

Recent project activities include:

- Updated the project timeline and posted it to the project's website.
- Design engineers developing 30% design drawings and quantity estimates.
- Initial planning and coordination for post-30% design Value Engineering Studies.
- On-boarding and knowledge sharing for new rim projects project manager.

Ongoing project activities include:

• Preparations for reinitiating environmental compliance activities.

- Detour route design analysis and stakeholder coordination.
- Continuing lab testing of samples collected during field explorations.
- Standing monthly oversight team meetings between Reclamation and IWRB staff.

Completed Key Milestones

Nov. 2017 – Jan. 2019	Reclamation completed initial screening of the three potential dam raise alternatives and developed a project management plan.
July 27, 2018	IWRB passed a resolution supporting the narrowed focus of the Study to a raise at Anderson Ranch Dam.
August 28, 2018	Reclamation and IWRB hosted a Legislative Infrastructure Tour to discuss large water infrastructure projects in Idaho with representatives from Idaho's Congressional delegation.
November 8, 2018	Reclamation and IWRB hosted an informational public open house on the Study in Boise, Idaho.
December 3-7, 2018	Reclamation conducted a Value Planning Study with a final Accountability Report received in February 2019.
December 25, 2018	Reclamation awarded an Indefinite Delivery / Indefinite Quality contract for architect and engineering services to Sundance-EA Joint Venture (Consultant) to complete the Study and environmental compliance activities.
April 30, 2019	Consultant submitted land, structure, infrastructure, and real estate impact assessment (Rim Analysis) for Anderson Ranch Reservoir.
June 7, 2019	IWRB filed a water right permit application for the potential additional storage (Water Right No. 63-34753).
June 19, 2019	Reclamation's TSC completed feasibility-level design and cost estimates completed for Anderson Ranch Dam raise.
August 9, 2019	Reclamation published the Notice of Intent for an environmental impact statement (EIS) in the Federal Register.
August 27-29, 2019	Reclamation conducted Public Scoping Open Houses in Pine, Boise, and Mountain Home, Idaho.
February 3-7, 2020	Reclamation completed the Design, Estimate, and Construction review of the feasibility-level designs.
April 6-10, 2020	Reclamation completed the Peer Review of the Water Operations Technical Memorandum.
July 31, 2020	Reclamation released the Draft EIS and Draft Feasibility Report.
October 30, 2020	Reclamation initiated formal Endangered Species Act consultation with National Oceanic and Atmospheric Administration National Marine Fisheries Service and submitted its biological assessment.
December 2020	The Secretary of the Interior determined the Study's recommended plan to NTERIOR REGION 9 • COLUMBIA-PACIFIC NORTHWEST

	be feasible in accordance with the WIIN Act.
December 2020	Reclamation transmitted the Final Feasibility Report to Congress.
December 2020	Fiscal Year 2021 Appropriations legislation secured \$12.88 million in WIIN Act funding for completing the Study, environmental compliance, and construction.
May 2021	Initiated pause in environmental compliance process pending further development of final design.
July / August 2021	Reclamation's Columbia-Pacific Northwest Region requested delegation of authority and received approval from the Commissioner to negotiate, execute, and administer a cost-share agreement pursuant to section 4007 of the WIIN Act with the IWRB.
Sept. / Oct. 2021	Reclamation and IWRB completed cost-share contract negotiation sessions: Sept. 22, Oct. 5, Oct. 19, and Oct. 28.
November 2021	IWRB and Reclamation signed and executed cost-share contract. IWRB provided first interval payment of advanced funds. TSC initiated final design activities.
June 2022	Reclamation's Technical Service Center completed dam spillway overlay feasibility design and conducted risk neutrality and construction risk workshop.
September 2022	Reclamation's risk neutrality and construction risk analysis, Dam Safety Advisory Team (DSAT) review and concurrence.
September 2022	Received total non-federal project funding based on the feasibility level total project cost estimate.

3

Key Critical Path Milestones

Spring 2023	Complete dam raise 30% Design and Cost Estimate
Summer 2024	Complete environmental compliance
Summer 2024	Complete final design

IDAHO THATER RESOURCE

Re: Mountain Home Air Force Base Water Resilience Project

REQUIRED ACTION: No action is required.

Project Update

<u>Project Schedule and Budget:</u> Staff continues to work with its Owner's Advisor, the U.S. Air force, and other stakeholders to complete construction of water transmission facilities by summer 2025. This completion date will allow the Air Force sufficient time to commission its water treatment plant prior to the February 1, 2026, Simplot water rights beneficial use deadline.

At previous Board meetings, I have estimated that total project cost would most likely be \$52.8 Million and could be as high as \$61.7 Million. This estimate includes costs for design, construction, land acquisition, and the costs of professional services. Our Owner's Advisor has estimated that the costs of design and construction, alone, could be as high as \$52.0 Million.

Supply chain issues for key components and a tight regional construction market continue to pose substantial risk to the project schedule, and Staff is currently working with its Owner's Advisor to identify and mitigate these risks.

<u>Meeting with the J.R. Simplot Company:</u> The proposed location for the inlet and pump station at CJ Strike Reservoir is adjacent to an existing pump station owned by the J.R. Simplot Company, and the proposed pipeline would traverse property owned by Simplot. On January 10th, Staff met with the representatives from Simplot and the U.S. Air Force at Simplot's offices in Grandview, Idaho to discuss the project, its impact to the Simplot company, project schedule, water rights, and the need for the easement.

Introduction to the Brown and Caldwell Team: Staff will introduce Vincent Roquebert, Contract Manager for our Owner's Advisor, Brown and Caldwell.

Re: Aging Infrastructure Grant Scoring/Ranking

Action: Consider resolution to award aging infrastructure grant funding awards

During its 2022 session, the Idaho legislature appropriated \$75,000,000 to the IWRB to "be used for expenditures, loans, or grants for water projects, including studies, to address water sustainability, rehabilitate or improve aging water infrastructure or support flood management." H.B. 769, §§ 6, 7. The legislature provided that "no more than one-third of these moneys shall be used for grants", and directed the IWRB to develop criteria, taking into account the public's input for the expenditures of money for grants, which shall be competitive, matching grants that prioritize projects based on the public benefits they provide.

In September 2022 the IWRB authorized round one funding in the amount of \$12.5 million for 12 statewide aging infrastructure grant projects.

On October 6, 2022 the IWRB adopted amended aging infrastructure grant criteria which set out the application guidelines, application due date of December 9th and the budget for round one of \$12.5 million.

The application period for the IWRB's second round of aging infrastructure funding closed on December 9th. The IWRB received 36 grant applications requesting approximately \$28 million in funding. These applications were evaluated, scored and ranked by the staff evaluation team according to the criteria adopted by IWRB. The Finance Committee met and discussed the rankings and recommended the IWRB approve grant awards as specified in the attached resolution.

Re: Regional Water Sustainability Priority List

Action: Consider resolution update of Regional Water Sustainability Priority List

Background

In July 2021 the IWRB adopted an initial Regional Water Sustainability Priority List to help guide the Idaho Water Resource Board's (IWRB's) spending for large, regional water sustainability projects from ARPA funds, state general funds, or other applicable sources. The IWRB also, in January 2022, adopted a threshold criteria indicating that for a project to be included on the Regional Water Sustainability Priority List it must "help achieve water supply sustainability on a regional, basin-wide, or state wide basis."

On October 26th 2022 the IWRB adopted criteria for the inclusion of projects on the Regional Water Sustainability Priority List. The criteria include a process for how projects can be added, types of information required to be submitted in requests, considerations for inclusion, and a process for removing projects from the list. At the October 26th meeting the IWRB also set a deadline of December 1 for requests to be submitted.

The IWRB received 15 requests to be remain on or be added to the list. Staff prepared an update to the list and discussed it with the Finance Committee on January 13th. The Committee recommended the IWRB approve updates to the List as specified in the attached resolution.

RESOLUTION TO UPDATE LIST

WHEREAS, in July 2021 the IWRB adopted an initial Regional Water Sustainability Priority 1 2 List to help guide the Idaho Water Resource Board's (IWRB's) spending for large, regional water sustainability projects from ARPA funds, state general funds, or other applicable sources; and 3 4 5 WHEREAS, in January 2022 the IWRB adopted a threshold criteria indicating that for a project to be included on the Regional Water Sustainability Priority List it must "help achieve 6 7 water supply sustainability on a regional, basin-wide, or state wide basis;" and 8 9 WHEREAS, state general funds made available for regional water sustainability projects 10 are placed into the Water Management Account, which is managed by the IWRB. Idaho Code 42-1760(2)(d) requires that when authorizing the use of funds from the Water Management 11 Account the IWRB "must protect all existing water rights and consider the effects of such projects 12 on other water uses, such as water quality, fish and wildlife, recreation, and hydropower, that 13 provide economic value, stability, water sustainability, drought resiliency, and other benefits to 14 the citizens of the state.;" and 15 16 WHEREAS, on April 20th 2022 staff presented the Finance Committee with a proposed 17 criteria for inclusion on the Regional Water Sustainability Priority List. The Committee chose to 18 19 open a 30-day public comment period on the draft criteria for funding water projects statewide; 20 and 21 WHEARAS, on September 8th 2022 staff presented the Finance Committee with an 22 23 updated criteria and discussed the public comments that were received. The Committee chose 24 to open a second 30-day public comment period on the updated draft criteria for funding water projects statewide; and 25 26 27 WHEREAS, on October 20th 2022 the IWRB's Finance Committee met to discuss the updated criteria incorporating the new round of public comments. The Finance Committee 28 29 reviewed the comments and recommended updates to the criteria for IWRB adoption; and 30 31 WHEREAS, on October 26th 2022 the IWRB adopted criteria for the inclusion of projects 32 on the Regional Water Sustainability Priority List and set a deadline for requests to be received 33 of December 1; and 34

WHERAS, the IWRB received 15 requests to be remain on or be added to the list. Staff prepared an update to the list and discussed it with the Finance Committee on January 13th. The Committee recommended the IWRB approve updates to the List as specified in the updated Regional Water Sustainability Priority List attached to this resolution; and

- 39
- 40 NOW, THEREFORE BE IT RESOLVED that the IWRB adopts the attached updated Regional
 41 Water Sustainability Priority List.

MEMOTo:Idaho Water Resource BoardFrom:Kala Golden & Justin FergusonDate:January 20, 2023Subject:Finance Committee Recommendations Regarding New Loan ApplicationsREQUESTED ACTION: Approve the proposed loan applications

King Hill Irrigation District – Cold Springs Project

The Idaho Water Resource Board Finance Committee recommends approval of a new loan application for the King Hill Irrigation District's Cold Springs project in the amount of \$500,000. The project will install new pipelines and replace aging canal system infrastructure.

North Side Canal Company – Canal Relining Project

The Idaho Water Resource Board Finance Committee recommends approval of a new loan application for the North Side Canal Company's canal relining project in the amount of \$5,000,000. The project will reline a 4,200-foot section of the canal downstream of Milner Dam.

Raft River Recharge Group – Loan Securities

The Idaho Water Resource Board Finance Committee recommends approval of the securities proposed by the Raft River Recharge Group used to secure a loan with the Board in the amount of \$14,111,000. The proposed project will provide flood protection for the Raft River Basin, provide recharge to a designated CGWA aquifer, and provide a sustainable source of irrigation water for agricultural producers.

MEMO

To:Idaho Water Resource BoardFrom:Kala GoldenDate:January 14, 2023Subject:Loan Program Policy Considerations

AHZ

REQUESTED ACTION: Approve Finance Committee Recommendations

BACKGROUND

On January 13, 2023, the Idaho Water Resource Board's (IWRB) Finance Committee (Committee) met to consider a number of policy considerations as they relate to the IWRB's Loan Program. The following program policies were recommended for approval by the full the IWRB.

POLICY CONSIDERATIONS

Refinancing of Loans

Policy consideration: Should the IWRB allow the refinancing of privately held loans?

Recommendation: The Committee is recommending that the IWRB adopt an interim policy that the refinancing of loans shall not be authorized.

Definition of Aging Infrastructure

Policy consideration: Should the IWRB modify the Loan Program's definition of Aging Infrastructure to better align with the original intent for this incentive?

Recommendation: The Committee is recommending that the full IWRB consider a policy on the definition of Aging Infrastructure as it relates to the Loan Program. Staff developed the following proposed definition for the IWRB's consideration:

"...defined broadly as a project intended to address repair, maintenance, replacement, or improvements to existing aged infrastructure that supports existing water delivery, treatment, OR application of water."

Background

In November of 2021 the IWRB adopted a policy for the Loan Program on reduced interest rate incentives for projects that address aging water infrastructure.

• The following definition of Aging Infrastructure was included in the Loan Program policy:

"...defined broadly as a project intended to address repair, maintenance, replacement, or improvements to existing infrastructure that supports water delivery, treatment, OR application of water."

• The definition of Aging Infrastructure under the IWRB Aging Infrastructure Grant Programs is:

"any new project, or new phase of an improvement project intended to repair, maintain, replace, or improve existing infrastructure that supports irrigation water delivery, storage, drainage, treatment, and use of water for irrigation. Projects that are already completed or underway by the application deadline are not eligible for this funding opportunity. Additionally, for purposes of this grant program, the term 'aging water infrastructure' does not include municipal drinking or wastewater systems."

Time Limit to Exercise a Loan

Policy Considerations: Should the IWRB set a time limit on how long an applicant has to exercise use of approved loan funds? How should the exercising of a loan be defined? Should the IWRB set a time limit on how long an application may be held?

Recommendations:

- The Committee recommends that a completed loan application submitted to the IWRB may not be held for any longer than 90 days from the date the completed loan application was submitted. Applications not processed within 90-days may still be considered for funding, however the interest rate assigned to the loan shall be locked as the current program rate as of the date the IWRB reviews the loan request for consideration.
- The Committee recommends that once a loan application is approved, the applicant has 1 year from the date of approval to act on the loan, unless otherwise granted by the board under consideration of extenuating circumstances.
- The Committee recommends that acting on the loan application shall be defined as withdrawing funds on the approved loan based on eligible project costs.

IN THE MATTER OF THE IDAHO WATER RESOURCE BOARD LOAN PROGRAM CONDITIONS

RESOLUTION TO AUTHORIZE ADJUSTMENT TO LOAN PROGRAM CONDITIONS

1 2	WHEREAS, the Idaho Water Resource Board (IWRB) is authorized to make loans from its Revolving Development Account, and from the Secondary Aquifer Planning, Management, and
3	Implementation Fund for aquifer management projects which are in the public interest and which
4 5	further implement the State Water Plan; and
6	WHEREAS, on January 13, 2023, the IWRB Finance Committee (Committee) convened and made
7	recommendations to the IWRB on the refinancing of loans, the definition of aging infrastructure as it
8	relates to the loan program, the timing for processing a loan application as it relates to the interest rate
9	assigned, and the time limit an approved application has to exercise use of approved funds; and
10	
11	WHEREAS, the refinancing of loans may not support program objectives and may utilize funds
12 13	that could otherwise be used to support new projects; and
13	WHEREAS, the current definition of Aging Infrastructure as it relates to the loan program may be
15	too broad or otherwise not align with the IWRB's original intent for the reduced rate incentive; and
16	too broad or otherwise not aligh with the twild's original intent for the reduced rate incentive, and
10	WHEREAS, loan funds approved but not utilized within a designated time period may tie up
17	funds that could otherwise be used to support new projects.
