#### AGENDA Idaho Water Resource Board

#### Board Meeting No. 10-24 WORK SESSION

Thursday, September 12, 2024 9:00 a.m. (MT) / 8:00 a.m. (PT)

> Courtyard - Pocatello Conference Room 290 Vista Drive POCATELLO

#### Livestream available at <a href="https://www.youtube.com/@iwrb">https://www.youtube.com/@iwrb</a>

- 1. Roll Call
- 2. Mountain Home Air Force Base Water Resilience Project
- 3. Regional Manager's Report
- 4. American Falls Dam Facilities
- 5. Non-Action Items for Discussion
- 6. Adjourn

The board will break for lunch at approximately 11:30 AM. Following lunch, they will attend a field trip of the American Falls Reservoir Dam. Transportation will be provided for board members and invited guests only.

\* Action Item: A vote regarding this item may be made at this meeting. Identifying an item as an action item on the agenda does not require a vote to be taken on the item. <u>Americans with Disabilities</u>: If you require special accommodations to attend, participate in, or understand the meeting, please make advance arrangements by contacting Department staff by email: jennifer.strange@idwr.idaho.gov or by phone at (208) 287-4800.

#### Memorandum

- To: Idaho Water Resource Board
- From: Mike Morrison
- Date: September 5, 2024

Re: Mountain Home Air Force Base Water Resilience Project

#### **REQUIRED ACTION:** No action is required.

#### **Project Update**

<u>Project Status:</u> The project is on-schedule and under budget. We have obtained all permits needed to begin construction of the inlet, pump station, and penstock in Snake River Canyon ("In-Canyon-Work"); however, delays obtaining these permits have resulted in schedule changes and a concomitant increase in construction costs.

<u>Timeline</u>: Staff is working with its Design-Builder, IMCO Construction, to assure that In-Canyon-Work is completed prior to the beginning of the 2025 nesting season.

- Sept 2024 Aug 2024: In-Canyon-Work begins (inlet, pump station, and penstock).
- Oct 2024: Pipeline construction outside canyon rim complete.
- May 2025: In-Canyon-Work complete.
- June 2025: Acceptance Testing Complete.
- July 2025: Hand-off to Air Force

<u>Coordination with the Air Force</u>: In April, the Air Force awarded a design-build contract for the Water Treatment Plant to a team headed by RSCI. The Air Force does not anticipate completing the Water Treatment Plant before July, 2027. Staff and the Board's contractors have been working with RSCI to assure the interoperability of the Water Transmission System and Water Treatment Plant.

Staff has also been working with the Air Force to draft an Omnibus Gift Package by which ownership of the Water Transmission System will be transferred to the Air Force. The Omnibus Gift Package includes the legal instruments for transferring ownership of the Water Transmission System, permits, easements, and Rights-of-Way from the Board to the Air Force.

The Omnibus Gift Package will also include a Water Use Agreement ("WUA") to provide municipal water to the base year-round via a new water right, a Water Supply Bank lease, and rental of water rights purchased from Simplot.

# MHAFB Water Resilience

Project

# Project Update

Dr. Mike Morrison, P.E. Water Planning/Projects Bureau Engineer

## **Project Status**

Project is currently on-schedule and under budget.

• Pipeline work is substantially complete along HWY 167 and inprogress on Strike Dam Cutoff Road and Air Base Road.

• All permits have been obtained, enabling construction of the inlet, pump station, and penstock (In-Canyon-Work).

## Timeline

Dec 2023: Contract approved.

Jan 2024: Begin purchasing long lead-time items.

May 2024: Complete design package. Begin work outside canyon rim.

September 2024 (August 2024): Begin In-Canyon Work.

Oct 2024: Pipeline construction complete.

May 2025 In-Canyon (intake, pump station, penstock) complete.

June 2025: Acceptance testing complete.

July 2025: Hand-off to Air Force.

### Getting Back on Schedule

Staff and the Board's Design-Build Firm, IMCO, are working

together to assure that In-Canyon-Work is complete by the 2025

bird nesting season in Snake River Canyon.

• Permitting is complete.

 Long lead-time materials were purchased in time to begin work immediately.

### Coordination with the Air Force

- Staff and the Air force are developing an Omnibus Gift Package that will:
  - Transfer ownership of the inlet, pump station, and pipeline to the Air Force.
  - Transfer all permits, easements, and Rights-of-Way to the Air Force.
  - Include a Water Use Agreement whereby the Board manages the necessary water rights, leases, and rentals on behalf of MHAFB.

# Questions?

## Air Force Update: USAF/IWRB Partnership

- Ms. Shelly Schmidt is a Registered Architect/Engineer with Installation Energy Policy and Programs, Office of the Deputy Assistant Secretary of the Air Force (Environment, Safety, and Infrastructure)
- She will speak about:
  - The Importance of the partnership between MHAFB, the State of Idaho, and the Air Force.
  - The Impact that this project has had on how the Department of the Air Force approaches water security at its installations across the country.

## Mountain Home Air Force Base Water Resilience Partnership

Ms. Shelly Schmidt Office of the Deputy Assistant Secretary of the Air Force (Environment, Safety, & Infrastructure) 12 September 2024

### Overview

- Introductions
- Partnership Overview
- Future Direction & Next Steps

### Introductions

### Shelly Schmidt, DAF

Registered Architect/Engineer Installation Energy Policy & Programs

Office of the Deputy Assistant Secretary of the Air Force (Environment, Safety, & Infrastructure)

## Partnership Overview

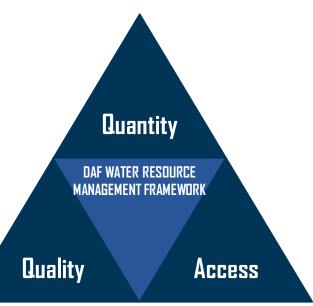

## Partnership Overview Continued

- Critical Partnership
- Enabling Department of the Air Force (DAF) Capabilities
- Collaboration is essent for Mission Assurance

## Future Direction & Next Steps

- Future Direction:
  - Impacting DAF water security across the Enterprise
  - Mission Assurance through Water Assurance
- Next Steps
  - Mountain Home AFB's Water Treatment Plant Construction
    - Beneficial Use Contingency Plan
  - Execute "Water Use Agreement (Mountain Home Air Force Base)"
    - Omnibus
  - Prepare Official Gift Package

## Questions?

### Air Force Update: Water Treatment Plant

- Mr. Eric Bowden ("Coach") is the Chief of Operations and Training at the Air Force Civil Engineering Center's Design and Construction Branch.
- He will speak about:
  - Water Treatment Plant Design-Build Progress.
  - Water Treatment Plant Schedule

### WTP Construction Zone

## WTP Project Schedule

- DB Construction Contract: Awarded 4 April 2024
  - RSCI & Jacobs
- Pre-Construction Meeting: 12 Aug 2024
- Fast Track Design Finalized: 9 Sept 2024
  - 60% Design Review: Oct 21 24
  - 95% Design Review: Jan 2025
- Commissioning of Raw Water Tanks May 2025
- Construction Complete Summer 2026

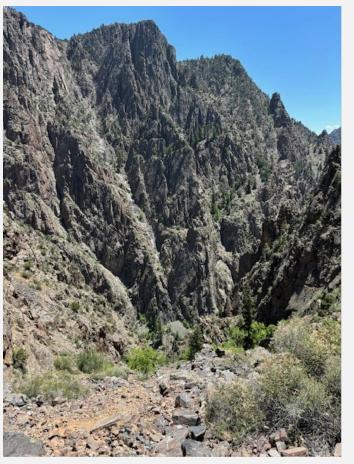

### **REGIONAL MANAGER'S REPORT**

IWRB September Meeting – Pocatello Work Session – Sept. 12, 2024

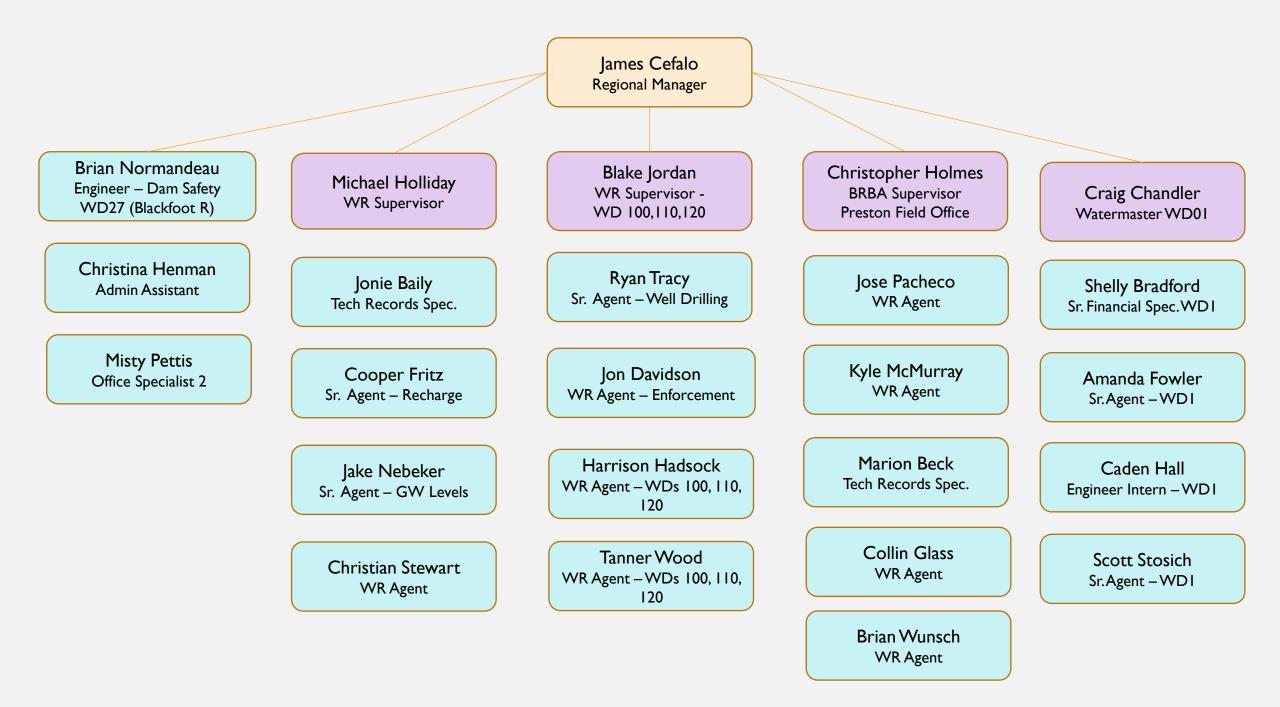

#### JAMES CEFALO - IDWR EASTERN REGIONAL MANAGER

- Born and raised in Northern Utah.
- Civil Engineering Degree from University of Utah.
- Law Degree from University of Colorado.
- Joined IDWR in July 2007. Became Regional Manager in 2019.
- Hearing officer for contested cases.
- Facilitator for ESPA GWMA Advisory Committee.

Black Canyon of the Gunnison National Park

### EASTERN REGION WORKLOAD - TRANSFERS

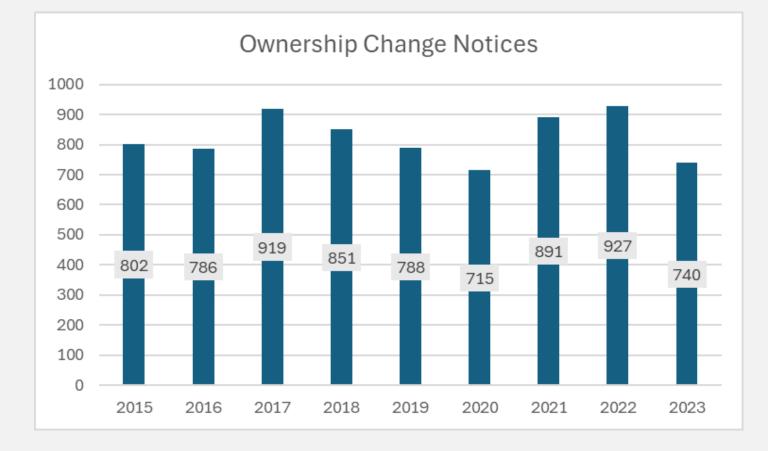

No noticeable trend.

60 apps filed so far in 2024.

#### EASTERN REGION WORKLOAD – OWNERSHIP NOTICES

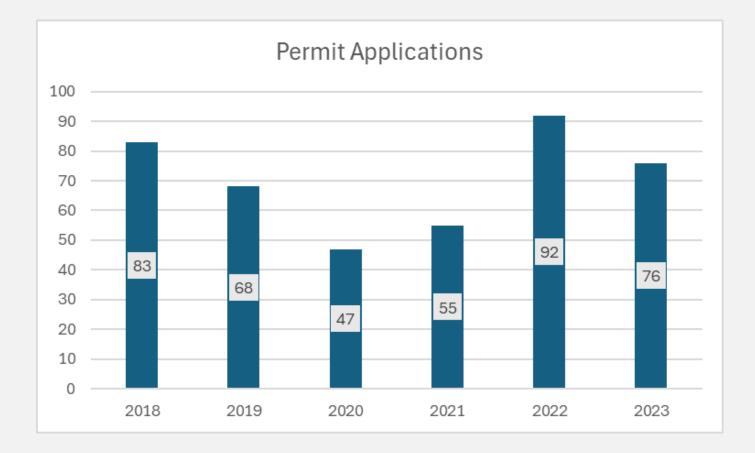

#### Average = 824 notices/year

No noticeable trend.

Increased activity in Bear River Basins.

### EASTERN REGION WORKLOAD - PERMITS

Average = 70 apps/year

Does not include 277 apps filed for Lemhi Basin Streamflow Maintenance.

Applications in Bear River Basins have doubled since the BRBA commencement.

#### ESPA ACTIVITIES

- ESPA GWMA Advisory Committee Update
  - Committee of thirteen representatives from various organizations.
  - Twelve meetings of full committee over last year and multiple breakout session.
  - Topics: annual allocations, multi-year averaging or blocking, measurement and reporting, enforcement, long-term and short-term objectives, metrics for success, future adjustments, non-irrigation rights.
  - Committee was not able to reach consensus on most topics.
  - August 30, 2024, Memo to Governor Little and Director Weaver ending committee process and providing documents summarizing the topics for a management plan and the positions of the committee members.
- Ongoing Settlement Discussions for Surface Water Coalition Delivery Call
  - Parties are meeting every two weeks.
  - Many of the topics being discussed are the same topics discussed by ESPA GWMA Advisory Committee.

Russian Olive Trees can consume at least 1.6 af/ac/year. Invasive Plants are Slurping up Precious Water in Drought-Stricken Southwest Colorado. The Colorado Sun (5/5/2022)

### WATER DISTRICT CHANGES

- New Water Districts in Upper Salmon River Basin.
- Expansion of Water Districts 110 and 120 to match ESPA Model Boundary.
- Water District 129 Ground Water Rights in Portneuf River Basin.
- Expansion of Area of Common Ground Water Supply / Additional Water Districts.
- Department's Role: Public Information Meetings, Public Hearing, Orders, Appeals, Steering Committee, Inventories, Watermaster Support

Downey, Idaho Looking at the West, Andrew McAllister

### ENFORCEMENT OF DOMESTIC EXEMPTION

- Substantial expansion in the use of the domestic exemption, particularly in subdivisions. Rather than constructing a community well, each lot owner constructs an exempt domestic well.
- Idaho Code § 42-111(1)(a) limits the domestic exemption to no more than  $\frac{1}{2}$  acre of irrigation.
- Subdivisions with lots larger than 0.7 acres often result in domestic irrigation exceeding the 1/2-acre limit.
- Challenges in enforcement of domestic exemption:
  - Enforcement actions must be pursued against each lot owner.
  - Simple enforcement cases takes at least ten hours of staff time.
  - Many subdivisions are within canal company service areas.
  - Difficult to curtail only the outside uses around a home.
  - Civil penalties (\$300/acre) are negligible for small acreage.
- Potential solutions?
  - Establish separate, strict penalty for violation of  $\frac{1}{2}$  acre limit.
  - Streamline enforcement process for domestic exemption.
  - Enforcement agents dedicated entirely to domestic uses.

Elk Ridge Estates Subdivision, Jefferson County (Avg parcel size = 1 acre; Avg irrigation = 0.7 acres)

### FINAL THOUGHTS

- Eastern Region is experiencing the same population growth and increased well drilling activity as seen in other regions and highlighted in previous board meetings.
- Regional staff will benefit from improved IT support for software development.
- In areas subject to Amended Snake River Moratorium, we are seeing proposals to stretch the domestic exemption beyond its historical limits.
- Significant effort of Eastern Region staff in 2023 Curtailment.
- Despite negative statements in news articles and social media, Eastern Region staff continue to have positive interactions with individual water users and provide help and efficient service to customers.

### Questions / Discussion

Natural Bridges National Monument Jacob W. Frank, National Park Service

#### Memorandum

To: Idaho Water Resource Board

From: Neeley Miller, Planning & Projects Bureau

Date: September 9, 2024

Re: American Falls Dam Facilities Presentation

Action: no action at this time

1DAHO IDAHO RESOURCE

Representatives from Reclamation and Idaho Power will provide presentations on features of the American Falls Dam.

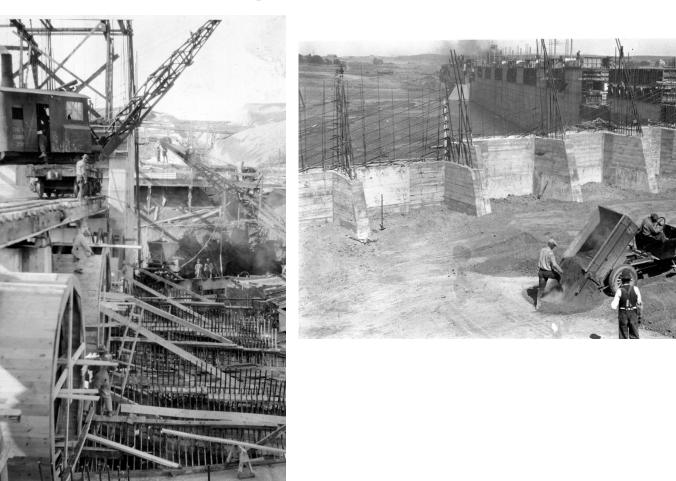

# American Falls Dam Project Updates

September 12, 2024

## **American Falls Dam Background**

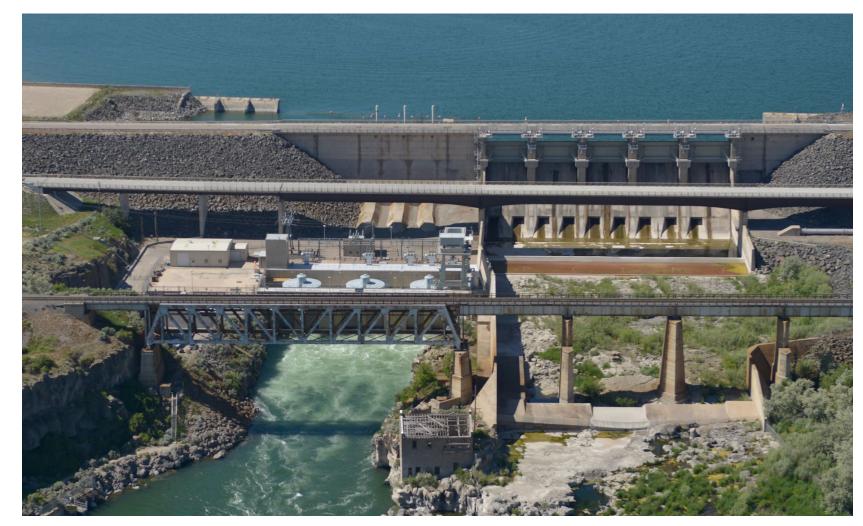

- Original Construction
  - 1925-1927
- Reconstructed
  - 1976-1978
- Operating Head
  78.0 ft
- Top of Active Pool
  4,354.5 ft

## American Falls Dam Background cont.

- Reservoir Capacity
  - 1,672,590 acer-feet
- Drainage Basin
  13,580 sq mi
- Water Passage Capacity (121,400 cfs)
  - Spillway
    - 87,000 cfs
  - Outlet Works
    - 19,400 cfs
  - Powerplant (IPC)
    - 15,000 cfs

## **American Falls Budget**

### **Dam Allocation**

- 27.80% Federal Appropriation
- 33.00% Idaho Power
- 39.20% Water Users (37 Water Users)

### **Reservoir Allocation**

- 41.50% Federal Appropriation
- 58.50% Water Users (37 Water Users)

## **American Falls IWRB Grant Assistance**

# Relicensing the American Falls hydroelectric power plant with FERC

**MIDAHO POWER** 

For the IWRB 9-12-24

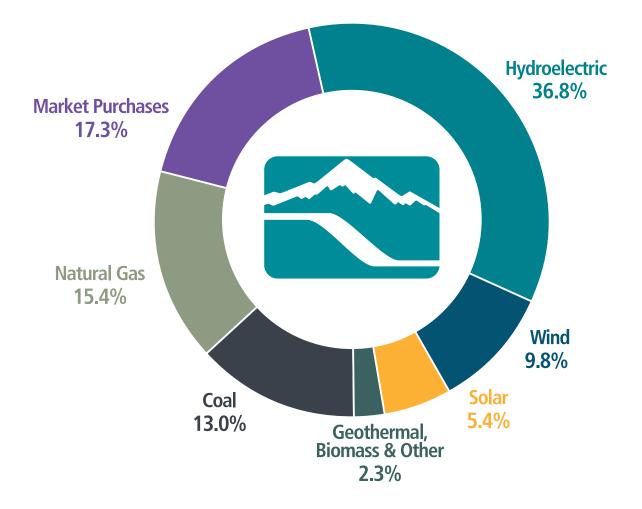

Andrea Courtney, IPC

## Roadmap

- 1. Hydropower importance
- 2. Lay of the land map... er lay of Idaho Power's hydropower plants

- 3. American Falls powerplant history
- 4. Current pictures
- 5. FERC highlights
- 6. Key dates in American Falls relicensing
- 7. Notable issues

## **Clean Energy** 2023 Energy Mix

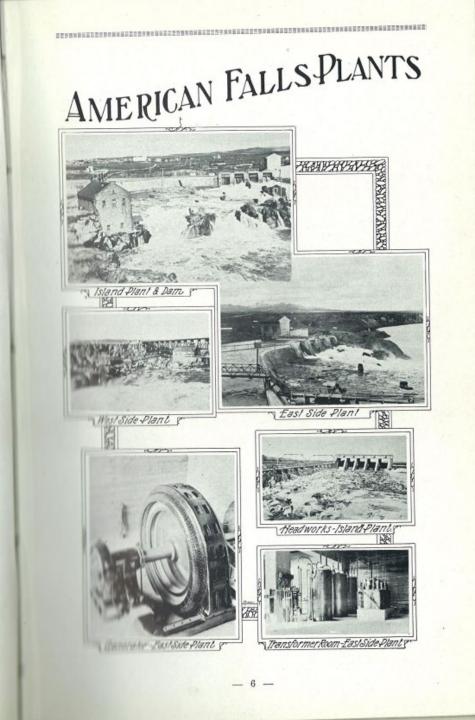

This shows the energy we generate from companyowned resources and energy we buy through longterm contracts with wind, solar, biomass, geothermal and small-scale hydro generators.

The mix does not represent the energy delivered to customers for two reasons.

- We participate in the wholesale energy market and sell energy to other utilities and to retail customers.
- Some of our purchased power from renewable sources comes with a Renewable Energy Credit, or REC, which we sell to keep customer prices low.

Source: The Electrikat, April 1920 vol. 1 number 4, Boise, ID

I'm I'll bert town in Idaho by a dam alte."

And then some say ellisants of American Falls, site of the proposed reservoir to store 1,700,000 acre fret of water, contract for construction of which was let last week to the Utah Construction company for \$1,251,000.

While the dam will be one of the biggest works ever constructed in the state, eithern of the town, county seat of Power county, point with pride to the fact that it is raided as one of the largest primary wheat shipping centers in the world.

Power county farmers have been encounted by farmers and in the average year rates a million and a half toucheds of whest of a grade particularly adaptable to fluor. They have also here successful growers of Grimm alfalfa seed and last year shipped semething around 15,000 prands, raising, their figures show, shout 100 peands to the acre. town site and preparations are being made to more homes and business houses. The new town will receive its water supply from a million and a half guilon reserveir, filled by a private pumping system installed a half mile below the west slide of the present rallroad bridge.

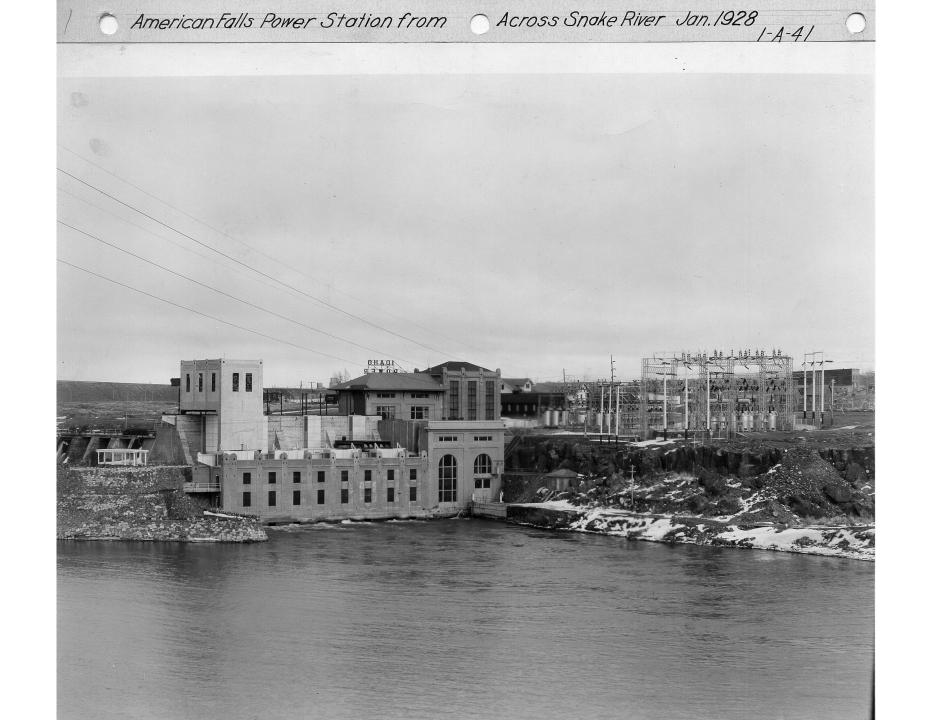

Present construction plans call for huilding of the base for the larger dam and the smaller reservoir.

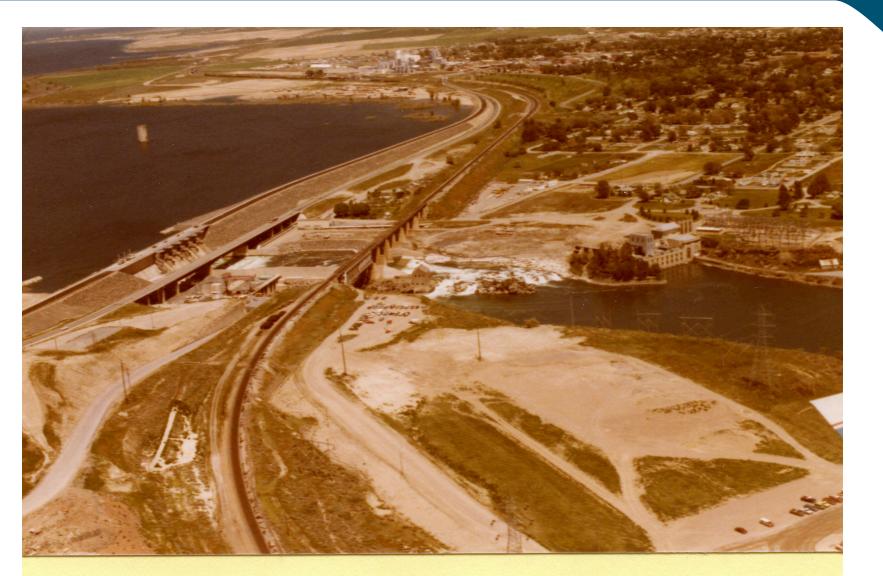

The big dam will cost farmers \$3,00 an acre foot, while assessments on the low dam will be \$7.00, building of the higher dam meaning a saving of more than invo million dollars. But these men say they are not purticularly interested primarily in the lower cost.—they want the water first of all, and are willing to pay the \$7.00 acre storage cost of the small dam in get the additional capacity that would be given with the building of the larger remervoir. They want to put their money into the project and they would reserve action to smillion back, sharing with the soverement sarth, construction of 60,000 vahic yards of sarth embasickment, 28,000 vahic yards of rock foundation and placing of 115,000 cubic yards of concrete, together with the placing of 1,100,000 pounds of reinforcing steel, 1,200,000 pounds of structural steel and 1,700,000 pounds of card from gales.

Make farmers want the larger dam and it will probably be built if the additional water can be sold. The farmers of the upper valley have agreed to purchase this surplus for \$900,000, the difference between the cost of construction of the old and new large and small dams. No essitrants have as yet been drawn for the carrying out of the agreement.

When the dam is completed it will serve in the neighborhood of one million acres, in addition is assuring a sufficient water supply to the settlers of southern idahs.

A 40,000 horse power plant, at a cost of three million doffars, is also contemplated in connection with the storage dam. All the power furnished

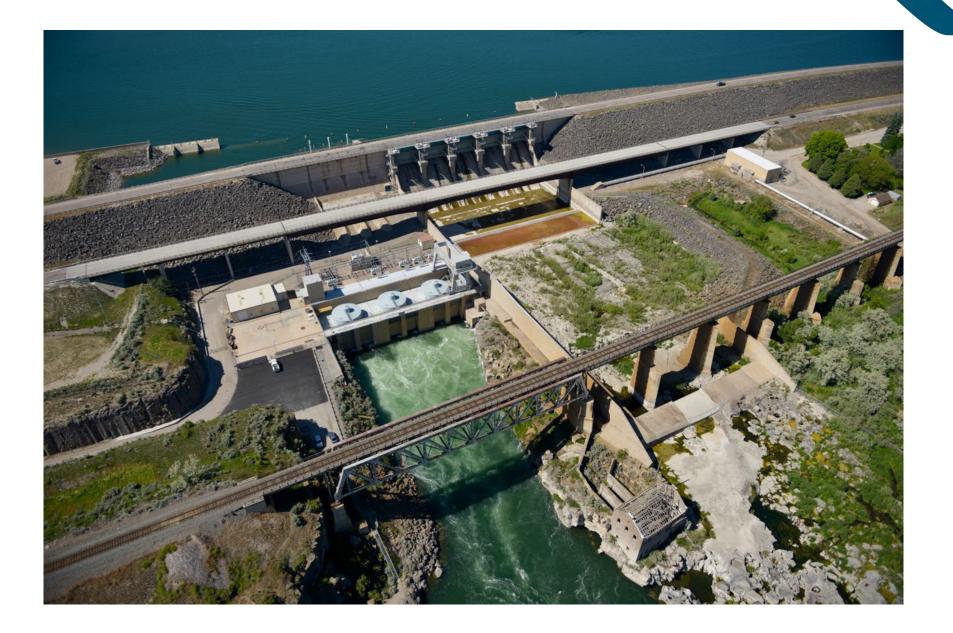

## **IDAHO POWER**®

Dam and Powerhouse

May 1978

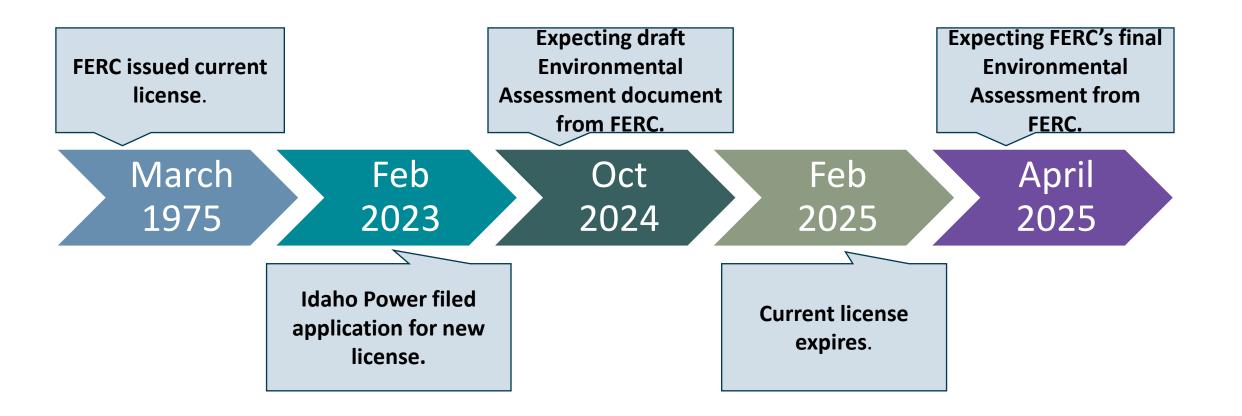

## **FERC and the Federal Power Act**

• Federal Energy Regulatory Commission (FERC) = Responsible for regulating hydroelectric power and the wholesale transmission and sale of electric power.

**MIDAHO POWER** 

- Federal Power Act (FPA) = Authorizes FERC to issue hydropower licenses.
- FERC should not only "consider the power and development purposes for which licenses are issued," but also "give equal consideration to the purposes of energy, conservation, the protection, mitigation of damage to, and enhancement of, fish and wildlife ..., the protection of recreational opportunities, and other aspects of environmental quality."
- Relicensing process involves significant public engagement.
- Service list, docket notice, FERC's elibrary and filing search. https://elibrary.ferc.gov/

## **American Falls Relicensing Timeline**

## **Relicensing issues**

# Tebruary 2023

FERC Project No. 2736 ©2023 Idaho Power

## American Falls Hydroelectric Project

Final License Application

CIDAHO POWER

## 1. Clean Water Act § 401 certification

- 2. Fish stocking
- 3. Recreation

## 

## **Clean Water Act § 401**

- FERC cannot issue a license until the certifying agency or tribe grants § 401 water certification.
- CWA regulations changed, effective last fall.
- Working with IDEQ, providing information sufficient for certification, which will be incorporated into license.

# **Fish stocking**

- State concerned about impacts on fisheries from entrainment and turbine mortality.
- Settlement Idaho Power will stock 24,000 pounds of hatchery-reared trout into the Reservoir annually.
- That agreement will be incorporated into the new license.

## Recreation

- Idaho Power has 4 developed recreation sites and river access areas.
- All public.
- Relicensing = collaborative improvements with Power County Boat Ramp and ramp area.

# Thank you

Patrick McMahon Sun Valley At Large

#### MINUTES MEETING NO. 8-24

Cobblestone Inn & Suites Conference Room 341 W. Second Street SODA SPRINGS

> July 25, 2024 Work Session

#### Agenda Item No. 1: Roll Call

Chairman Raybould called the work session meeting to order at 8:02 AM (MT) in Soda Springs, Idaho. The meeting was livestreamed on the Board's YouTube Channel online. Board members present were Al Barker, Jo Ann Cole-Hansen, Marcus Gibbs, Patrick McMahon (online), Brian Olmstead, Dean Stevenson, Dale Van Stone, and Chairman Jeff Raybould.

<u>IDWR staff members present were</u>: Brian Patton, Cynthia Bridge Clark, Wesley Hipke, Mathew Weaver, Matt Anders, James Cefalo, Jose Pacheco, Brian Wunsch, Steve Stuebner, and Jennifer Strange. Online was Kala Golden.

<u>Guests present were:</u> John Williams, Don Barnett, Mark Mathews, Travis Gilbert, Claudia Cottle, David Cottle, Brady Levy, Kevin Payne, Mark McCullough, Connely Baldwin, Jordan Stoddard, Jake Serago, and Ann Yribar. Online were Allison Lebeda, Bobby Hills, and Jonathan Jennings.

#### Agenda Item No. 2: Nez Perce Tribe Presentation

Allison Lebeda discussed Nez Perce Tribe concerns related to unmet minimum stream flows. The tribe has been active in protesting new applications due to unmet MSF, which is not seen as a sustainable way to address concerns. Director Weaver stated that adjudication had been complete in the basins and that the formation of water districts has been a slow process for that area due to lack of interest from water users. Bobby Hills added that there are two to three new applications that the tribe deals with each month.

#### Agenda Item No. 3: Bear River Basin 101

Matt Anders discussed Bear River geography, hydrology, and Bear Lake storage levels. He provided information on the unique ways that water rights are administered and accounted for in the basin. He listed several projects that the Board has funded over the years.

#### Agenda Item No. 4: Bear River Compact

Don Barnett, the engineer-manager for the Bear River Commission, provided an overview of the Bear River Compact, listed major provisions, and discussed how the Commission operates the amended compact.

#### Agenda Item No. 5: PacifiCorp Bear River & Lake Water Operations

Connely Baldwin discussed Bear Lake history, geology, and water management.

#### Agenda Item No. 6: Bear River Basin Adjudication

Jose Pacheco provided background information and updates on the Bear River water right adjudication.

#### Agenda Item No. 7: Bear River Basin Cloud Seeding Update

Kala Golden provided a review of the cloud seeding feasibility study on the Bear River Basin. She provided project recommendations with cost estimates.

Jonathan Jennings, a meteorologist with the Utah Division of Water Resources, provided the Utah perspective on cloud seeding. He provided Bear River Basin project information as well.

#### Agenda Item No. 8: Utah Water Resource Issues

Jake Serago, a hydrologist with the Utah Division of Water Resources, spoke on the conditions of the Great Salt Lake, including ecological importance and potential threats.

#### Agenda Item No. 9: Non-Action Items for Discussion

There were no other items for discussion.

#### Agenda Item No. 10: Adjourn

The meeting adjourned at 11:50 AM (MT). After lunch, the board went on a tour of the Bear Lake region.

#### July 26, 2024 Board Meeting No. 8-24

At 8:31 AM (PT) Chairman Raybould called the meeting to order in Soda Springs, Idaho. The meeting was livestreamed on the Board's YouTube Channel online upon adjournment of the executive session.

#### Agenda Item No. 1: Roll Call

Board Members Present Albert Barker Jo Ann Cole-Hansen, Vice Chairman Marcus Gibbs Patrick McMahon--online Brian Olmstead

Meeting Minutes 8-24 July 25-26, 2024 Dean Stevenson, Secretary Dale Van Stone Jeff Raybould, Chairman

Staff Members Present Mathew Weaver, Director Cynthia Bridge Clark Neeley Miller Jennifer Strange Staff Members Online	Brian Patton, Deputy Director/Exec. Manager Wesley Hipke Matt Anders Steve Stuebner
Meghan Carter Mike Morrison Garrett Hensley	Justin Ferguson Erik Boe
<i>Guests Present</i> Ann Yribar Josh Sorensen Renee Richardson	John Williams Claudia Cottle
Guests Online Bryan Horsburgh Charity Staggs Brandon Hobbs Meghan Brooksher	Tom Points Mark Zirschky Chris Keith John Spencer

#### Agenda Item No. 2: Executive Session

Mr. Stevenson moved to resolve into executive session pursuant to Idaho Code 74-206(1) subsection (f) to communicate with legal counsel regarding legal ramifications of and legal options for pending litigation or controversies not yet being litigated but imminently likely to be litigated. Mr. Van Stone seconded. <u>Roll call vote</u>: Mr. Barker, aye; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, aye. 8 ayes. The motion passed.

Ann Yribar spoke on water right application for permit 2-10556. Meghan Carter spoke on Priest Lake Dam Construction Litigation.

Mr. Stevenson moved to resolve out of executive session at 9:00 AM (MT). Mr. Van Stone seconded. <u>Voice vote</u>. All in favor. The motion carried. The meeting was closed to the public, and no actions were taken during the executive session.

#### Agenda Item No. 3: Agenda and Approval of Minutes 6-24 and 7-24

The agenda did not have changes. The minutes for meetings 6-24 and 7-24 were available for approval.

Mr. Stevenson moved to approve the minutes presented. Mr. Van Stone seconded. <u>Voice vote</u>. All in favor. The motion carried.

#### Agenda Item No. 4: Public Comment

John Williams with Bonneville Power Administration spoke on sockeye runs, mentioned an update on the Columbia River Treaty, and provided the peak usage in July at just under 1100 megawatts on the 8<sup>th</sup> and 9<sup>th</sup>.

Claudia Cottle with the Bear Lake Watch shared appreciation for the board visit to Bear Lake.

#### Agenda Item No. 5: Financial Report

Neeley Miller provided the Board's financial report. The accounts as of June 30, 2024, were: <u>Secondary Aquifer Fund</u>: cash balance \$34,597,697, committed/earmarked but not disbursed \$24,396,775, and uncommitted balance \$10,200,922; <u>Revolving Development Account</u>: cash balance \$38,154,238, committed balance \$32,602,282, loan principal outstanding \$18,603,981, and uncommitted balance \$5,551,955, and <u>Water Management Account</u>: cash balance \$293,130,493, total obligated funds \$178,430,325, and unobligated funds \$114,700,167.

Total committed/earmarked/ obligated but not disbursed \$235,429,382; total loan principal outstanding \$18,603,981; and total uncommitted/unobligated balance \$130,453,044.

<u>ARPA</u>: committed per HB 769 is \$100,000,000; committed per SB 1181 (2023) is \$24,497,543; committed per SB 1411 (2024) had not been allocated; and total received to date is \$124,497,543. Total expended \$89,956,697; obligated (but not yet expended) \$70,311,350; and total obligated \$160,268,047. Obligated (but appropriation not yet received) is (\$35,770,503).

#### Agenda Item No. 6: Administrative Rules

Erik Boe provided an updated on administrative rulemaking activities. Public meetings had been completed and deadlines for publishing were pending.

#### Agenda Item No. 7: Appointment of Hearing Officer in Hastings Matter

Meghan Carter presented a resolution to appoint a hearing officer, Pete Wood, in a stream channel alteration matter for application for permit no. S37-20565.

Mr. Barker moved to adopt the resolution. Ms. Cole-Hansen seconded. <u>Roll call vote</u>: Mr. Barker, aye; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, aye. 8 ayes. The motion passed.

#### Agenda Item No. 8: Anderson Ranch Dam Raise Update

Bryan Horsburgh stated that he was promoted to Snake River Area Manager for BOR. He updated the board on the dam raise project, highlighting recent design milestones and contingency costs. He discussed modifications to the dam raise and rim projects. Total project cost estimates based on the 60% design were \$125.8 million, not including the cost of mitigation water. There was a question about the current schedule.

#### Agenda Item No. 9: Flood Management Grant Awards

Blake Burkard introduced a resolution to award flood management grant awards to ten projects.

The Finance Committee recommended approval of funding at the July 16th meeting. Ms. Cole-Hansen mentioned a change to line 28 of the draft resolution. The resolution that Mr. Burkard shared on his screen was the updated resolution.

Mr. Van Stone moved to adopt the resolution to award grant money in the total cost of \$702, 303.50 for ten projects. Mr. Barker seconded. <u>Roll call vote</u>: Mr. Barker, aye; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, aye. 8 ayes. The motion passed.

#### Agenda Item No. 10: Groundwater to Surface Water Conversion Projects Grant Criteria

Neeley Miller discussed a resolution to adopt criteria in the matter of Groundwater to Surface Water Conversions Grant Program. The Finance Committee had recommended the criteria at the July 16<sup>th</sup> meeting. The resolution attachment was discussed. He proposed a timeline and October 4<sup>th</sup> deadline for submittals. There was discussion about the entity criteria.

Ms. Cole-Hansen moved to adopt the resolution to adopt the grant criteria. Mr. Stevenson seconded. <u>Roll call vote</u>: Mr. Barker, aye; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, aye. 8 ayes. The motion passed.

#### Agenda Item No. 11: MHAFB Water Sustainability Project Update

Mike Morrison provided an update on the MHAFB Water Sustainability Project. He stated the project was on-schedule and under budget. Work on the pipeline was being performed along Highway 167 and Strike Dam Road. Work on the inlet and pump station in the canyon at CJ Strike Reservoir was on hold pending construction permits from Federal agencies. He shared some pictures of construction.

#### Agenda Item No. 12: Director's Report

Director Weaver provided an overview of the ESPA water curtailment issues related to the SWC and IGWA mitigation plans. He provided analysis of the Department's response, mentioned a stipulated agreement made on June 20<sup>th</sup>, and discussed misconceptions that arose from the curtailment. He read from the Governor's Executive Order No. 2024-06 Protecting Idaho Water Sovereignty Act.

He also discussed the Department's FY2026 budget. He stated that submittal to DFM would be September 1<sup>st</sup>.

#### Agenda Item No. 13: Non-Action Items for Discussion

Mr. Olmstead mentioned that Idaho Power Company had asked him to sit on a commission. Mr. Gibbs mentioned some upcoming projects for the area. Ms. Cole-Hansen stated an importance for promoting the new Groundwater to Surface Water Grant program.

#### Agenda Item No. 14: Next Meeting and Adjourn

Mr. Patton stated the next meetings would be in September in Pocatello. Mr. Van Stone moved to adjourn. Mr. Stevenson seconded. <u>Voice vote</u>. All ayes. Motion carried. Meeting adjourned at 10:39 AM (MT).

Respectfully submitted this 13<sup>th</sup> day of September 2024.

Dean Stevenson, Secretary

Jennifer Strange, Administrative Assistant II

## **IDAHO WATER RESOURCE BOARD**

#### **Patrick McMahon** Sun Valley At Large

#### MINUTES MEETING NO. 9-24

Water Center Conference Room 602 B 322 E. Front Street BOISE

August 29, 2024

**Special Board Meeting No. 9-24** 

At 9:01 AM (MT) Acting Chairman Cole-Hansen called the meeting to order in Boise, Idaho. The meeting was livestreamed on the Board's YouTube Channel. Online participants joined via Zoom.

#### Agenda Item No. 1: Roll Call

Board Members Present Albert Barker—online Jo Ann Cole-Hansen, Vice Chairman—online Marcus Gibbs—online Patrick McMahon—online Brian Olmstead—online Dean Stevenson, Secretary—online Dale Van Stone—online Jeff Raybould, Chairman—absent

Staff Members Present Brian Patton, Executive Manager Wesley Hipke Erik Boe Jennifer Strange--online

Guests Present No guests were present.

#### Agenda Item No. 2: Administrative Rules

Erik Boe provided an update on the department's rulemaking activities. Updates on the Well Construction and Injection Well rulemakings were 322 East Front Street • P.O. Box 83720 • Boise, Idaho 83720-0098 Phone: (208) 287-4800 Fax: (208) 287-6700 Website: idwr.idaho.gov/IWRB/ highlighted. A resolution to adopt two chapters was presented. Mr. Barker asked about public comments related to these rules.

Mr. Barker moved to adopt the resolution to publish IDAPA 37 Chapters as proposed rules in the October 2, 2024, Idaho Administrative Bulletin Vol. 24-10. Mr. McMahon seconded. <u>Voice vote</u>. All in favor. The motion carried.

#### Agenda Item No. 3: ESPA Managed Recharge Program Conveyance Contracts

Wesley Hipke stated that conveyance contracts in the lower valley have ended or will end by the end of the year. There was discussion on ways to improve contracts. He mentioned a consistent payment structure. He suggested that the current standards be carried out through the year with new standards created within six to eight months. There was discussion on recharge funding options for nonprofit organizations. Mr. Hipke requested a vote of support for the plan.

Mr. Stevenson moved to extend the contracts for a year. Mr. Gibbs seconded. There was a voice vote, but a roll call vote was then recommended. <u>Roll call vote</u>: Mr. Barker, aye; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, absent. 7 ayes. The motion passed.

#### Agenda Item No. 4: Non-Action Items for Discussion

There were no other items.

#### Agenda Item No. 5: Next Meeting and Adjourn

Mr. Gibbs moved to adjourn. Ms. Cole-Hansen seconded. <u>Voice vote</u>. All ayes. Motion carried. Meeting adjourned at 9:36 AM (MT).

Respectfully submitted this 13<sup>th</sup> day of September 2024.

Dean Stevenson, Secretary

Jennifer Strange, Administrative Assistant II

## Memorandum

To: Idaho Water Resource Bo	ard

- The obligated balance in the Water Management Account includes the \$20M legislative appropriation per HB 285 (FY 2019) for the Anderson Reservoir Enlargement and/or Mountain Home Air Force Base Water Supply Project. The obligated balance also includes \$50M for large infrastructure projects per Senate Bill 1121 (FY 2021) for the Anderson Ranch enlargement, Mountain Air Force Base Water Supply Project, ESPA Managed Aquifer Recharge Program, other projects identified by the IWRB.
- The Water Management Account unobligated balance also includes \$150M per HB 361 to be used for expenditures, loans, or grants for water projects, including studies to address water sustainability, rehabilitate or improve aging water infrastructure, or support flood management. The legislature indicated that the IWRB may provide up to one-third of this money for grants.

\* The \$25M FY 2024 ARPA appropriation and \$50M FY 2025 ARPA appropriation were not deposited to the IWRB's account until August 2025 (total of \$75,502,456). This funding is not reflected in the July 31, 2024 balance sheets. IDWR Fiscal staff anticipates receipt of the \$50M FY 2026 ARPA appropriation on or shortly after July 1, 2025

## Memorandum

To: Idaho Water Resource Board (IWRB)

From: Cynthia Bridge Clark

Date: September 9, 2024

**Re:** Amendment of the FY 2025 Water Management Account (WMA) Spending Plan

**REQUIRED ACTION:** Consider Finance Committee's recommendation to amend the Fiscal Year 2025 Spending Plan for the WMA.

Through Resolution No. 32-2024, dated July 1, 2024, the IWRB adopted a spending plan for fiscal year 2025 to direct funding appropriated for regional water sustainability projects, grants, and loans from the WMA (resolution attached). Since 2019, the Idaho Legislature has appropriated a total of \$325 million (excluding interest) to the IWRB's WMA to support IWRB approved projects.

On August 27, 2024, Idaho Governor Little announced that Idaho would commit \$10 million to improve the long-term health of the Eastern Snake Plain Aquifer (ESPA) and directed the IWRB to support this effort with funds from the WMA. The IWRB's Finance Committee met on September 9, 2024 to discuss amending the Fiscal Year 2025 spending plan by reallocating funds budgeted to the future Dworshak/Clearwater Pipeline project to the ESPA improvement projects. A draft resolution reflecting the Finance Committee's recommendation is attached for IWRB review.

#### ATTACHMENTS(S)

- Draft Resolution to Amend the Fiscal Year Water Management Account Spending Plan
- IWRB Resolution No. 32-2024
- Governor Little New Release, August 27, 2024

#### **BEFORE THE IDAHO WATER RESOURCE BOARD**

#### IN THE MATTER OF THE FINANCE COMMITTEE'S RECOMMENDATION

**RESOLUTION TO AMEND THE IDAHO WATER RESOURCE BOARD'S FISCAL YEAR 2025** WATER MANAGEMENT ACCOUNT SPENDING PLAN AND PROVIDE SPENDING AUTHORIZATION

1	WHEREAS, the Water Management Account (WMA) was created pursuant to Idaho Code § 42-
2	1760 and is administered by the Idaho Water Resource Board (IWRB) for certain purposes; and
3	
4	WHEREAS, on July 1, 2024, through Resolution No. 32-2024, the IWRB approved a Fiscal Year 2025
5	spending plan for appropriations made to the WMA under following legislation:
6	
7	<ul> <li>House Bill 285, Section 1; passed by the 2019 Idaho Legislature (FY 2020)</li> </ul>
8	<ul> <li>Senate Bill 1121, Section 1; passed by the 2021 Idaho Legislature (FY 2022)</li> </ul>
9	<ul> <li>House Bill 769, Section 6; passed by the 2022 Idaho Legislature (FY 2023)</li> </ul>
10	<ul> <li>House Bill 361, Section 1; passed by the 2023 Idaho Legislature (FY 2024)</li> </ul>
11	<ul> <li>Senate Bill 1411, Section 3; passed by the 2024 Idaho Legislature (FY 2025)</li> </ul>
12	
13	WHEREAS, the WMA Spending Plan considers projects currently identified on the IWRB's Regional
14	Water Sustainability Projects (RWSP) Priority List, Aging Infrastructure Grants, certain IWRB approved
15	loans, and other potential projects and programs; and
16	
17	WHEREAS, a number of projects on the RWSP Priority List were determined eligible for funding
18	from American Rescue Plan Act (ARPA) State Fiscal Recovery Fund. Given that ARPA funding has specific
19	federal and state obligation and spending requirements, IWRB Resolution 32-2024 authorized allocation
20	of additional funds from the WMA to be used if additional funding is required for project completion or if
21	it is determined that ARPA funds are not authorized for specific project tasks; and
22	W/JEDEAC in accordance with direction from the Idebe Coverner and Logislature, the W/DD has
23 24	WHEREAS, in accordance with direction from the Idaho Governor and Legislature, the IWRB has supported efforts to stop the decline of ground water levels in the Eastern Snake Plain Aquifer (ESPA)
24 25	through the development of a managed aquifer recharge program and funding other projects intended
23 26	to reduce ground water use from the ESPA; and
20	to reduce ground water use norm the LSFA, and
28	WHEREAS, on August 27, 2024, Idaho Governor Little announced that Idaho would commit \$10
29	million to improve the long-term health of the ESPA and directed the IWRB to support this effort with
30	funds from the WMA in addition to other existing IWRB funding commitments for ESPA improvement
31	projects; and
32	
33	WHEREAS, on September 9, 2024, the IWRB's Finance Committee reviewed the existing Fiscal
34	Year 2025 WMA spending plan and recommended reallocation of \$10 million of the \$70 million budgeted
35	for the future Dworshak/Clearwater River Pipeline project to ESPA improvement projects; and
	Resolution No. Page 1

NOW, THEREFORE BE IT RESOLVED that the IWRB adopts the attached Amended Water
 Management Account Spending Plan for Fiscal Year 2025 as recommended by the Finance Committee.

38

NOW, THEREFORE BE IT FURTHER RESOLVED that for projects that are identified on the attached amended spending plan and have been approved by the IWRB for funding from the ARPA State Fiscal Recovery Fund, the IWRB authorizes expenditures from the WMA for project activities if additional funding is required for project completion or if it is determined that ARPA funds are not authorized for

43 specific project tasks.

DATED this 13th day of September 2024.

JEFF RAYBOULD, Chairman Idaho Water Resource Board

#### **BEFORE THE IDAHO WATER RESOURCE BOARD**

# IN THE MATTER OF THE FINANCE COMMITTEE'S RECOMMENDATION

RESOLUTION TO MODIFY THE IDAHO WATER RESOURCE BOARD'S WATER MANAGEMENT ACCOUNT SPENDING PLAN AND PROVIDE SPENDING AUTHORIZATION

1 2 3	WHEREAS, the Water Management Account was created pursuant to Idaho Code § 42-1760 and is administered by the Idaho Water Resource Board (IWRB) for certain purposes; and			
4	WHEREAS, through House Bill 285, the 2019 Idaho Legislature approp	riated \$20 Million to the		
5	Water Management Account to be used for the Anderson Ranch Reservoir Enlargement (Anderson Ranch			
6	Dam Raise) or the Mountain Home Air Force Base Sustainable Water Project (M	HAFB Project); and		
7				
8	WHEREAS, House Bill 285 made amendments to Idaho Code § 42-1760,	· · ·		
9	the Anderson Ranch Dam Raise, MHAFB Project, additional aquifer recharge i	•		
10	projects selected by the IWRB may be undertaken with funds in the Water Mana	agement Account; and		
11				
12	WHEREAS, through Senate Bill 1121, the 2021 Idaho Legislature approp	priated \$50 Million to the		
13	Water Management Account; and			
14 15	WHEREAS, the IWRB approved Resolution No. 07-2021 in March 202	1 which allocated funds		
16	appropriated under Senate Bill 1121 as follows:			
17				
18	Anderson Ranch Dam Raise Interim Funding	\$17.6M		
19	MAHFB Water Resilience Project	\$28M		
20	Eastern Snake Plain Aquifer Recharge infrastructure	\$22.4M		
21	Bear Lake Additional Water Storage	\$2.0M		
22				
23	WHEREAS, the 2022 Idaho Legislature, through House Bill 769, approp	riated \$75 Million to the		
24	Water Management Account to be used for large water projects and directed the	-		
25	for expenditures, loans, or grants for water projects, including studies, to add			
26	rehabilitate or improve aging water infrastructure, or support flood managemer	nt; and		
27				
28	WHEREAS, House Bill 769 further directed that no more than one-third o	•		
29	grants and the IWRB shall use criteria that takes into account the public's inpu	•		
30 31	money for grants, that is competitive, and prioritizes projects based on the pub and	inc benefits they provide;		
32	and			
33	WHEREAS, House Bill 361, passed and approved by the 2023 Idaho L	egislature, appropriated		
34	\$150M to the Water Management Account for large water projects and specified			
35	for purposes similar to those specified in House Bill 769, including the require	-		
36	one-third of the money be used for grants; and			
37				

- WHEREAS, the 2024 Idaho Legislature, through Senate Bill 1411, appropriated \$30 Million to the
   Water Management Account to be used for large water projects at the direction of the IWRB, resulting in
   a total of \$325 Million in appropriations to the Water Management Account for specified uses for Fiscal
   Years 2020 through 2025; and
- WHEREAS, pursuant to House Bill 769, the IWRB developed an Aging Infrastructure Grant Program
   and awarded \$25M in grant money in two Aging Infrastructure application rounds through Resolution
   nos. 31-2022 and 02-2023, passed in September 2022 and January 2023 respectively; and
- WHEREAS, in 2023, pursuant to House Bill 361, the IWRB awarded \$11,083,621 for round three
  of Aging Infrastructure Grants under Resolution no. 39-2023 and \$7,678,350 for round four of Aging
  Infrastructure Grants under Resolution no. 03-2024; and
- WHEREAS, in July 2021, the IWRB adopted an initial Regional Water Sustainability Projects (RWSP)
   Priority List to help guide the IWRB's spending from state general funds, ARPA funds, or other applicable
   sources for projects that support water supply sustainability on a regional, basin, or statewide scale; and
- 55 WHEREAS, in October 2022, the IWRB adopted criteria for inclusion of projects on the RWSP 56 Priority List and has approved funding for projects on a case-by-case basis; and
- 58 WHEREAS, on July 1, 2024, the IWRB's Finance Committee recommended a spending plan for 59 appropriations made to the Water Management Account under the legislation referenced above, 60 including estimated interest. The recommended Water Management Account Spending Plan considers 61 projects currently identified on the RWSP Priority List, Aging Infrastructure Grants, certain IWRB approved 62 loans, and other potential projects and programs; and
- 64 WHEREAS, a number of projects on the RWSP Priority List were determined eligible for funding 65 from ARPA State Fiscal Recovery Fund. Given that ARPA funding has specific federal and state obligation 66 and spending requirements, the IWRB's Finance Committee recommended allocation of additional funds 67 from the Water Management Account to be used if additional funding is required for project completion 68 or if it is determined that ARPA funds are not authorized for specific project tasks; and 69
- NOW, THEREFORE BE IT RESOLVED that the IWRB adopts the attached Water Management
   Account Spending Plan as recommended by the Finance Committee.
- NOW, THEREFORE BE IT FURTHER RESOLVED that for projects that are identified on the attached
   spending plan and have been approved by the IWRB for funding from the ARPA State Fiscal Recovery
   Fund, the IWRB authorizes expenditures from the Water Management Account for project activities that
   are determined ineligible for ARPA funding.

#### BEFORE THE IDAHO WATER RESOURCE BOARD

#### IN THE MATTER OF THE MOUNTAIN HOME AIR FORCE BASE WATER RESILIENCE PROJECT

RESOLUTION TO ACCEPT PROPOSED STIPULATIONS TO RESOLVE PROTESTS TO WATER RIGHT APPLICATION 2-10556

1	WHEREAS, the Idaho Water Resource Board ("Board") is a constitutional agency of the State of
2	Idaho and empowered by Idaho Code §42-1734 to acquire, purchase, lease or exchange land, rights,
3	water rights, easements, franchises and other property deemed necessary or proper for construction,
4	operation and maintenance of water projects, and
5	
6	WHEREAS, the State of Idaho recognizes the economic value of the Mountain Home Air Force
7	Base (MHAFB) to the local and state economy and supports the United States Military (Military) in
8	achieving its national security functions; therefore, the State of Idaho intends to coordinate with the
9	Military to develop a long-term sustainable water supply to support the MHAFB and its mission; and
10	
11	WHEREAS, on July 25, 2014, the Board purchased senior Snake River water right nos. 02-
12	10300A, 02-10330B and 02-10472 (Snake River Water Rights) for the purpose of obtaining a water
13	supply for the MHAFB; and
14	
15	WHEREAS, the Board has determined that it will pursue a water supply bank rental to change
16	the Snake River Water Rights to suit the needs of the MHAFB for summertime use; and
17	
18	WHEREAS, the Board filed water right application 02-10556 for wintertime water use on the
19	MHAFB; and
20	
21	WHEREAS, the United States Air Force owns ground water rights 61-7224, 61-11940, 61-11941,
22	61-11942, and 61-11943 for use on the MHAFB; and
23	
24	WHEREAS, the Board holds decreed minimum streamflow water rights at the Murphy Gaging
25	Station, just downstream of Swan Falls Dam, which require an average daily flow of 3,900 cfs between
26	April 1st and October 31st of every year, and 5,600 cfs between November 1st and March 31st of every
27	year; and
28	WUEDEAC Idaha Davian Campanyi (IDC) halda daaraad hudranawar watan niahta fan ita mid
29	WHEREAS, Idaho Power Company (IPC) holds decreed hydropower water rights for its mid-
30	Snake River hydropower facilities in the amount of 3,900 cfs between April 1st and October 31st and 5,600 cfs between November 1st and March 31st measured at the Murphy Gage; and
31	5,000 crs between November 1st and March 51st measured at the Mulphy Gage, and
32 33	WHEREAS, the State of Idaho, by and through the Governor, hold hydropower water rights in
33 34	trust for the benefit of IPC and the people of the State of Idaho; and
34 35	trastion the benefit of in cland the people of the state of fuallo, and
55	

Resolution No. \_\_\_\_\_

36 WHEREAS, a protest to application 02-10556 was received from IPC regarding possible injury to 37 existing natural flow water rights, that the source of water was Trust Water as defined in the Swan Falls 38 settlement with possible impacts to powerhead, and concerns under 42-203A; and 39 40 WHEREAS, a protest to application 2-10556 was received from Elmore County regarding the 41 concurrent use of both surface and groundwater sources at the MHAFB; and 42 43 WHEREAS, the protest from Elmore County may be resolved through the inclusion, in the Water 44 Use Agreement between the United States and the Board, of certain provisions regarding the primary use of surface water and supplemental use of ground water on the MHAFB and 45 46 47 WHEREAS, the protest from IPC may be resolved through the inclusion of Trust Water Right 48 conditions on water right 02-10556 and the understanding that an alternative water supply will be 49 available for the MHAFB in case of curtailment under the Trust Water conditions. 50 51 NOW THEREFORE BE IT RESOLVED that the Idaho Water Resource Board hereby approves the 52 Joint Stipulation and Notice of Conditional Withdrawal of Protest between the IWRB and IPC attached 53 hereto as Exhibit A and the Joint Stipulation and Notice of Conditional Withdrawal of Protest between 54 the IWRB and Elmore County Board of Commissioners attached hereto as Exhibit B and authorizes its 55 chairman or designee to execute said stipulations. 56

#### **BEFORE THE DEPARTMENT OF WATER RESOURCES**

#### OF THE STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR PERMIT NO. 02-10556

In the name of Idaho Water Resource Board

### JOINT STIPULATION AND NOTICE OF CONDITIONAL WITHDRAWAL OF PROTEST

Applicant Idaho Water Resource Board ("Applicant" or "IWRB") and protestant Idaho

Power Company ("Protestant" or "IPC"), by and through their undersigned counsel of record,

and pursuant to IDAPA 37.01.01. 220, 556 and .612, hereby stipulate to a settlement of

Protestant's protest to water right application 02-10556 (the "Application"), the terms and

conditions of which are set forth herein.

The Protestant's withdrawal is conditioned on the following:

1. That the source of water for the application is trust water and any approved permit shall contain the multiple trust water conditions referenced in Department Application Processing Memorandum No. 77, dated July 18, 2019.

2. That the Applicant acknowledges the Application is subject to the *Amended Snake River Moratorium Order*, dated July 16, 2024. Further, the Applicant has requested an exception to the Moratorium pursuant to Paragraphs 11(a), in support of which the Applicant has identified alternative water supplies for the proposed use that may be utilized for municipal purposes should the Application be curtailed pursuant to the Trust Water conditions herein identified:

a. The United States Air Force owns ground water rights 61-7224, 61-11940, 61-11941, 61-11942, and 61-11943 ("Air Force Ground Water Rights"). Through an agreement between the Air Force and the IWRB, these ground water rights will remain interconnected to the municipal water supply system for the Mountain Home Air Force Base ("MHAFB") as a supplemental supply. The Air Force Ground Water Rights will be used as a supplemental/alternative supply of municipal water should the Application be curtailed pursuant to the Trust Water conditions.

The parties agree that the public interest exception 11(a) to the Moratorium is satisfied given: 1) the alternative water supply identified; 2) the need for a safe and sustainable water supply for the MHAFB; 3) the existing national safety aspects of the MHAFB; and 4) the economic benefits of the MHAFB. The IWRB reserves the right to identify, in the future, additional sources of water that may be used as an alternative source of water supply for the MHAFB should the Application be curtailed due to the Trust Water conditions.

## JOINT STIPULATION AND NOTICE OF CONDITIONAL WITHDRAWAL OF PROTEST — 2

The parties move the Department, pursuant to IDAPA 37.01.01. 220, 556 and .612 for an order ("Order") approving this Joint Stipulation; each party to bear its own costs, expenses, and attorney's fees.

DATED this \_\_\_\_ day of August, 2024.

### BEFORE THE IDAHO DEPARTMENT OF WATER RESOURCES OF THE STATE OF IDAHO

)

)

)

IN THE MATTER OF APPLICATION FOR PERMIT NO. 02-10556 (Idaho Water Resource Board)

# JOINT STIPULATION AND WITHDRAWAL OF PROTEST

Applicant, the Idaho Water Resource Board ("Applicant" or "IWRB") and protestant Elmore County Board of County Commissioners ("Elmore County") by and through their undersigned counsel of record, and pursuant to IDAPA 37.01.01.204, 557 and .612, hereby stipulate to a settlement of Elmore County's protest in the above-entitled matter, the terms and conditions of which are set forth herein.

Elmore Couty's withdrawal is conditioned on the execution of a separate agreement between the United States Air Force ("Air Force") and the IWRB, which outlines the parameters for continuing use of the Air Force's ground water rights on the Mountain Home Air Force Base (the "Air Force–IWRB Agreement"). The following language will be included as definitions in the Air Force–IWRB Agreement:

- 1. *Ground Water Rights*. Water Rights Nos. 61-7224, 61-11940, 61-11941, 61-11942, and 61-11943 owned by the United States.
- 2. Surface Water Rights. The Water Rights and the Wintertime Right collectively.
- 3. *Water Rights*. Water Rights Nos. 2-10300A, 2-10300B, 2-10506. The water rights authorize a total diversion of 2500 acre-feet per year for irrigation use between April 1 and October 31.
- 4. *Wintertime Supply Right*. Application for Permit No. 2-10556 as well as any related subsequent permit or license issued by the Idaho Department of Water Resources.

The following language will be included as a provision of the Air Force-IWRB Agreement:

- 1. The Surface Water Rights shall be the primary source of water for MHAFB and such water may be used for municipal purposes.
- 2. The Ground Water Rights shall be used to supplement the Surface Water Rights in the following circumstances:
  - (a) an emergency,
  - (b) when Surface Water Rights are curtailed, and
  - (c) at least once every five (5) years to prevent forfeiture.

Provided that the above language is not subsequently amended, the withdrawal of Elmore County's protest shall be with prejudice. The parties respectfully request the entry of an Order approving the stipulated settlement set forth herein; each party to bear its own costs, expenses, and attorney's fees. DATED this \_\_\_\_\_ day of September 2024.

ANN N. YRIBAR Deputy Attorney General DATED this 9th day of September 2024.

# **MEMO**

То:	Idaho Water Resource Board	AM 14 RD
From:	Neeley Miller, Planning & Projects Bureau	THE ROLL
Date:	September 5, 2024	ESOURCE
Subject:	Regional Water Sustainability Palouse Basin Alternate Wate Conditions	er Supply Terms and

**REQUIRED ACTION:** Consider a resolution to approve terms and conditions for the Palouse Basin Alternate Water Supply Project

#### Background

At the July 2023 IWRB meeting in Moscow the IWRB approved nine Regional Water Sustainability Projects statewide for a total of \$59.4 million. The regional projects were funded with federal American Rescue Plan Act (ARPA) monies and state surplus funds allocated to the Board's Water Management Account by Governor Little as part of his Leading Idaho initiative and the Idaho Legislature.

The IWRB authorized \$182,500 for the Palouse Basin Alternate Water Supply Project (resolution no. 31-2023). The IWRB directed staff to work with project sponsors to develop appropriate contract Terms and Conditions to be brought back to the IWRB for approval.

Staff have developed proposed Terms and Conditions for this project for your consideration.

### Attachment(s):

1) Resolution w/Attachment A: Terms and Conditions for the Palouse Basin Alternate Water Supply Project

#### BEFORE THE IDAHO WATER RESOURCE BOARD

## IN THE MATTER OF THE REGIONAL WATER SUSTAINABILITY PRIORITY LIST

RESOLUTION TO APPROVE CONTRACT TERMS & CONDITIONS FOR THE PALOUSE BASIN ALTERNATE WATER SUPPLY PROJECT

1	WHEREAS, the Idaho Legislature passed House Bill 769 in 2022 and House Bill 361 in 2023 which
2	appropriated \$75 Million and \$150 Million respectively to the Idaho Water Resource Board (IWRB) to fund
3	certain projects eligible for American Rescue Plan Act (ARPA) funding and projects that the IWRB has
4	identified as high-priority water sustainability projects; and
5	
6	WHEREAS, in July 2021 the IWRB adopted an initial Regional Water Sustainability Priority List to
7	help guide the IWRB's spending for large, regional water sustainability projects from ARPA funds, state
8	general funds, or other applicable sources. The IWRB also, in January 2022, adopted criteria indicating
9	that a project must help achieve water supply sustainability on a regional, basin-wide, or state-wide basis
10	to be included on the Regional Water Sustainability Priority List; and
11	
12	WHEREAS, on July 21, 2023 the IWRB passed Resolution No. 31-2023 approving \$182,500 in
13	funding for next steps for the Palouse Basin Alternate Water Supply Project; and
14	
15	WHEREAS, in its resolution, the IWRB directed staff to work with project sponsors to develop
16	appropriate contract terms and conditions to be brought back to the IWRB for approval; and
17	
18	WHEREAS, staff has developed proposed the Terms and Conditions for a contract between the
19	IWRB and the City of Moscow to complete an engineering feasibility study for diversion and conveyance
20	from the Clearwater River to the Palouse Basin, included as Attachment A to this resolution; and
21	
22	NOW, THEREFORE BE IT RESOLVED that the IWRB approves the Terms and Conditions for the
23	Palouse Basin Alternate Water Supply Project engineering feasibility study as specified in Attachment A
24	to this resolution.
25	
26	NOW, THEREFORE BE IT FURTHER RESOLVED that the IWRB authorizes the expenditure of up to
27	\$182,500 from the Water Management Account for the Palouse Basin Alternative Water Supply Project
28	engineering feasibility study.
29	NOW THEREFORE REAT FURTHER RECOVER the contract for this project will also contain
30 31	NOW, THEREFORE BE IT FURTHER RESOLVED the contract for this project will also contain standard IWRB contract conditions and other project-specific Terms and Conditions not identified in this
32	resolution.
32 33	
33 34	NOW, THEREFORE IT BE FURTHER RESOLVED, that the IWRB authorizes its chairman or designee
35	to execute the necessary agreements or contracts for the purpose of this resolution.
55	to execute the necessary agreements of contracts for the purpose of this resolution.

DATED this  $13^{th}$  day of September 2024.

Jeff Raybould, Chairman Idaho Water Resource Board

ATTEST \_\_\_\_

Dean Stevenson, Secretary

Resolution No. \_\_\_\_\_

## ATTACHMENT A: Terms & Conditions

## Palouse Basin Alternate Water Supply Project

### PROJECT DESCRIPTION

The City of Moscow in cooperation with the Palouse Basin Aquifer Committee (PBAC), Idaho, is seeking Statements of Qualifications (SOQ) from experienced and qualified consultants to provide engineering and consulting services related to the development of an alternate water supply project. The proposed project involves the diversion of surface water from the Clearwater River and the treatment and conveyance of the water to the Palouse Basin near the City of Moscow, Idaho. The diverted water may be utilized for direct consumption, aquifer recharge, or a combination of the two. The project aims to secure a sustainable water supply for the cities and universities located within the Palouse Basin, including Moscow and Pullman, as well as the University of Idaho and Washington State University.

The scope of the current study includes:

- Determining the project's engineering feasibility
- Estimating preliminary construction and operational costs
- Verifying available water rights and other permitting requirements

Additionally, the study will encompass preparatory work necessary for the application for a water right with the Idaho Department of Water Resources (IDWR).

### PROPOSED SUMMARY SCOPE OF WORK

It is anticipated that the selected consultant will perform the following tasks. The final scope of services will be negotiated with selected consultant.

### 1. Water Supply Assessment

- Perform hydrological studies to assess water availability in the Clearwater River, including seasonal and long-term variations.
- Determine the optimal point of diversion based on hydrological data and minimal environmental impact.
- Assess the potential impacts of future climate change and weather conditions upon available water supply, incorporating climate models to ensure project sustainability.

### 2. Conceptual Design Development

- Develop conceptual designs for water diversion/intake, treatment, pumping, storage, and conveyance systems, considering multiple alternatives for routes and technologies.
- Identify and estimate costs for all anticipated property acquisitions, easements, and other property rights necessary for the construction and operation of the proposed system.

- Evaluate the benefits, reliability, and cost-effectiveness of direct water use versus aquifer recharge as the means of diversion use, considering both options' longterm implications.
- Work with the City of Moscow and the PBAC to develop criteria for determining the proportion of drinking water versus aquifer recharge, which may significantly impact the system's design and operational requirements (e.g., storage capacity, treatment processes, pumping and conveyance systems, etc.).
- Provide preliminary construction and operational cost estimates including lifecycle and maintenance costs.

#### 3. Regulatory Permitting Assessment

- Identify all regulatory requirements and permits needed for the project, including local, state, federal, and tribal regulations.
- Conduct necessary environmental impact studies and prepare a comprehensive environmental and regulatory feasibility assessment.
- Consult with all potential regulatory agencies and stakeholders early in the process to identify challenges and streamline permitting.
- Prepare an application for water rights following IDWR processes and requirements.

#### 4. Stakeholder Engagement

- Participate in meetings and consultations with stakeholders, including public agencies, community groups, and affected parties as necessary.
- Collaborate with the Nez Perce Tribe to integrate their water rights and cultural values into the project planning and execution.

#### ESTIMATED PROJECT SCHEDULE

It is anticipated that the services will be completed within approximately 12 months.

#### Cost -Reimbursement Contract and Proposed Terms & Conditions

- This is a cost reimbursement not to exceed Contract where the Board has approved limited funding for the project. The sponsor shall pay the remainder of the project costs.
- 10% holdback on funds until Project Completion Form is submitted.
- When requested by the Board, provide a monthly progress report to the Contract Manager. The progress report shall include at a minimum:
  - Updated schedule to completion
  - o Issues encountered in the reporting period
  - Final cost forecasts where applicable
  - Up to date project budget

- The Contractor shall provide with the final invoice a financial summary of the Project's costs with a detailed list of the type and amount of funds used to pay for the Project. The financial summary shall include the following:
  - Total final cost of the Project based on expenditures.
  - List all funding sources and the amount used on any aspect of the Project.
  - If a Federal or State grant was awarded for any portion of the Project, include the amount awarded.

### Memorandum

To: Idaho Water Resource Board

From: Neeley Miller, Planning & Projects Bureau

Date: September 6, 2024

Re: Aging Infrastructure Grant Scoring/Ranking – Round Five

Action: Recommendation to IWRB regarding AIG grant awards

The application period for the IWRB's fifth round of aging infrastructure funding closed on August 2, 2024. The IWRB received 23 grant applications requesting approximately \$12.4 million in funding.

Round One – awarded \$12.5M in September 2022 Round Two—awarded \$12.5M in January 2023 Round Three—awarded \$11,083,621 in November 2023 Round Four—awarded \$7.7M in January 2024 Round Five – requesting \$12.4M

#### Key Elements of the Criteria

The IWRB defines an aging water infrastructure project as any new project, or new phase of an improvement project intended to repair, maintain, replace, or improve existing infrastructure that supports irrigation water delivery, storage, drainage, treatment, and use of water for irrigation. Projects that are already completed or underway by the application deadline are not eligible for this funding opportunity. Additionally, for purposes of this grant program, the term 'aging water infrastructure' does not include municipal drinking or wastewater systems.

- Grant Award Limit is \$2,000,000
- IWRB grant portion cannot exceed (33%) of total project costs.
- No more than 50% of the total budget may be spent within a single IWRB district. This limit may be waived if there are no competing funding demands.

#### Staff Recommendation

Staff has evaluated, scored and ranked the applications according to the criteria adopted by IWRB. Staff recommends the IWRB approve Aging Infrastructure Grant awards as specified in Attachment A included with the attached resolution.

Attachment(s): Resolution w/Attachment A Project Summaries

#### IN THE MATTER OF AGING INFRASTRUCTURE GRANTS

**RESOLUTION TO AWARD FUNDS** 

1	WHEREAS, House Bill 769 and House Bill 361 passed and approved by the Idaho
2	Legislature appropriated to the Idaho Water Resource Board's (IWRB) Water Management
3	Account \$75,000,000 to be used for grants to improve aging water infrastructure; and
4	
5	WHEREAS, on May 24 <sup>th</sup> 2024 the IWRB adopted updated criteria for the award of Aging
6	Infrastructure grants (resolution no. 25-2024) and set an application deadline of August 2,
7	2024; and
8	
9	WHEREAS, twenty-three (23) aging Infrastructure grant applications were received by
10	the deadline and the applications were evaluated, scored and ranked according to the criteria
11	adopted by IWRB; and
12	
13	WHEREAS, on September 9, 2024 the Finance Committee met and discussed the
14	projects, and recommended the IWRB approve Aging Infrastructure Grant awards as specified in
15	the Attachment A included with the resolution; and
16	
17	NOW, THEREFORE BE IT RESOLVED that the IWRB approves the award of Aging
18	Infrastructure Grants from the Water Management Account as specified in Attachment A to this
19	resolution.

DATED this 13<sup>th</sup> day of September 2024.

Jeff Raybould, Chairman Idaho Water Resource Board

ATTEST \_\_\_\_\_

Dean Stevenson, Secretary

23	Palisades Irrigation Company	64.5	\$	15,403.41		
				Total: \$ 12,394,270.60		

#### **Project Summaries**

#### 1. City of Cottonwood

Funding is requested to replace and expand the City's wastewater re-use irrigation system. The City's existing wastewater treatment facility did not meet IDEQ standards to discharge into Cottonwood Creek from May to October. During those months the existing re-use system was used to irrigate a sixty-acre agroforest site comprised of hybrid poplar and grass. New IDEQ standards will prohibit any discharge from the treatment plant into Cottonwood Creek. The City finds expanding their water re-use system the most cost-effective solution to comply with the new standards. Work will consist of constructing a reservoir capable of holding 77 million gallons, expanding the re-use area, and replacing the existing irrigation system.

#### 2. Monteview Canal Company

Funding is requested to improve efficiency and modernize a part of Monteview's irrigation system. Monteview pumps groundwater from a well field into a 10-mile length of unlined canals that experience seepage. Additionally, the applicant claims the pumps and components along the delivery system are dated and inefficient. Work on the canals will include lining sections and installing electric actuated headgates. Work on the pumps will include installing automated controls, flow meters, variable frequency drives, and concrete tie-ins from the pump outlets to the canal.

#### 3. New Sweden Irrigation District

Funding is requested to relocate and replace a siphon reaching the end of its service life. A residential area has developed around the siphon increasing the risk of property damage if a failure was to happen. Additionally, the existing siphon discharges into a section of the canal that experiences high seepage; the relocation would bypass this section.

#### 4. Twin Lakes Canal Company

Funding is requested to replace a siphon and accompanying bridge. The entirety of Twin Lakes Canal Company's water is carried across the Bear River via the siphon and bridge, both of which are showing signs of failing soon. Work will include removing and replacing both.

#### 5. Nampa & Meridian Irrigation District (NMID)

Funding is requested to replace NMID's Ten Mile Spillway which is at the end of its service life. The Ten Mile Spillway serves multiple roles, most importantly being the largest emergency spillway in the Ridenbaugh canal system. NMID plans to replace the Ten Mile Spillway by installing three box culverts for the Ten Mile Drain to pass under the Ridenbaugh Canal.

#### 6. Riverside Irrigation District

Funding is requested to stabilize a 1,200-foot length of slope adjacent to the Riverside Irrigation Canal. The slope has had previous failures that resulted in property damage. Riverside Irrigation District plans to re-grade and stabilize the slope.

#### 7. Fremont-Madison Irrigation District (FMID)

Funding is requested to install automation, remote control, and data collection equipment on six control structures. Three structures will need to be rebuilt to facilitate the installation of automation equipment.

#### 8. Boise Valley Irrigation Ditch Company

Funding is requested to pipe a 920-foot section of open canal. This is to improve efficiency and to potentially provide pedestrian travel along the canal right of way for the City of Boise. Work will include piping the section and constructing two adjacent junction boxes.

#### 9. Snake River Valley Irrigation District (SRVID)

Funding is requested to replace the splitter structure for the junction of SRVID's east branch and west branch canals. The structure has reached the end of its service life and has even failed in the recent past. Once replaced, the splitter structure will be integrated into SRVID's SCADA system.

#### 10. Woodmansee-Johnson Canal Company (WJCC)

Funding is requested to install a new main diversion structure with an automated headgate. The structure has reached the end of its service life and is nearing failure. Applicant claims automating the headgate will improve efficiency.

#### 11. Water District 65

Funding is requested to implement real-time measurement technology on 100 diversion channels. Equipment includes transmitter-enabled flow meters, pressure transducers, telemetry units, connection hardware, anti-theft hardware, and new software for the collected data. Applicant claims the new measurement technology will improve efficiency by increasing the frequency of measurements.

#### 12. Falls Irrigation District (FID)

Funding is requested to replace and automate headgates on the East Canal check structure which is at the end of its service life. FID will work with Rubicon Systems to install headgates and integrate them into FID's SCADA system.

#### 13. Minidoka Irrigation District (MID)– Project B2

Funding is requested to replace and automate FID's B2 check and diversion structure. The structure has reached the end of its service life, and a failure of the structure would likely result in property damage. Applicant claims the improvements will increase efficiency, safety, and reliability.

#### 14. Moore Canal Water Users

Funding is requested to pipe approximately 3.5 miles of laterals that experience high seepage. Pipe will be various sizes of HDPE.

#### 15. Minidoka Irrigation District (MID) – Project D5

Funding is requested to replace MID's D5 site which is reaching the end of its service life. The site is comprised of a drain, pump, and canal site that recaptures surface water lost to seepage. Work will include replacement of the collection pipe, reconstruction of the pump site, and installation of automated controls and flow sensors.

#### 16. Consolidated Farmers Canal Company

Funding is requested to replace an inverted siphon running under the Teton River that is reaching the end of its service life. The failing CMP will be replaced with a precast concrete box culverts.

#### 17. Settlers Irrigation District (SID)

Funding is requested to replace SID's existing headworks structure, which has reached the end of its service life. The replacement will include automated headgates.

#### 18. Consolidated Irrigation Company (CIC)

Funding is requested to replace various sections of pipe, and replace a section of canal with pipe. Some sections of existing pipe are heavily corroded, other sections are in good condition but poorly designed and not adequately serving some of its users. The section of canal discharges water into the Lamont Reservoir; CIC would like to pipe the section to avoid the erosion repairs they often need to perform. All new pipe will be HDPE. Flow meters will be installed in various locations. CIC has acquired an EQIP/WSI grant through the USDA-NRCS. As a part of the EQIP/WSI grant the NRCS is providing engineering design and inspection services for the project.

#### 19. Burnette Water Users Association

Funding is requested to pipe 6 miles of existing canal that experiences high amounts of seepage. New pipe will be various sizes of HDPE.

#### 20. Darlington Water Users Association

Funding is requested to pipe 2.5 miles of existing canal that experiences high amounts of seepage. New pipe will be 54-inch HDPE.

#### 21. Davis Water Users

Funding is requested to replace a 270-foot length of pipe that is experiencing root infiltration. The pipe is located in urbanized north Boise within ACHD right of way.

#### 22. A&B Irrigation District

Funding is requested to upgrade software at A&B's headquarters. Work will consist of extracting existing data, reconfiguring that data to be usable in the new Rubicon software, configure Amazon Web Services and Oracle databases, and loading reconfigured data onto the new databases. Applicant claims software will autogenerate reports, improve management of records, improve security, and improve efficiency.

#### 23. Palisades Irrigation Company

Funding is requested to build four broad crested weirs, one of which will receive a new measurement device.

### Memorandum

To: Idaho Water Resource Board

- Date: September 08, 2024
- Re: ESPA Managed Recharge Infrastructure

**REQUIRED ACTION:** The Idaho Water Resource Board will consider funding for new ESPA managed recharge projects.

Attached to this memo are two summary memos for the proposed full-scale recharge projects and draft resolutions related to the proposed recharge projects.

The IWRB has been actively developing managed recharge capacity throughout the Eastern Snake Plain Aquifer (ESPA) since the start of the full-scale Program in 2014. Over the past ten years the IWRB has added over 2,300 cfs of recharge capacity across the ESPA, with only 300 cfs added in the Upper Valley (above American Falls).

Since 2018, the IWRB has focused on increasing recharge capacity in the Upper Valley, where opportunities, infrastructure, and water availability differ significantly from the Lower Valley (below American Falls Reservoir). The current strategy involves developing capacity in multiple geographic areas to provide both short- and long-term benefits to the aquifer and surface flows. Given the variations in subsurface geology the IWRB is exploring both recharge wells and basins.

Staff have been working with stakeholders developing potential recharge projects throughout the Upper Valley. An Aquifer Stabilization Committee (Committee) was held on September 5<sup>th</sup>, where the committee was provided an update on current IWRB ESPA managed recharge projects and proposals for seven new projects. The seven projects represent the first phase of potential managed aquifer recharge sites in the Upper Valley (above American Falls).

Four of the proposal represented test recharge wells. The intent of these projects is to evaluate the potential of recharge wells in their respective locations. If successful proposals for full-scale projects would be developed addressing the number of wells, the potential increase in recharge capacity, deliver capacity requirements (if any), and associated monitoring cost. The Committee recommend the following proposals for funding:

- Aberdeen-Springfield Canal Test Recharge Well \$296,500
  - Cost covers one recharge well 350', one monitor well, and associated infrastructure.
- Peoples Canal Test Recharge Well \$135,000
  - Cost covers one recharge well 250', one monitor well, and associated infrastructure.
- New Sweden/ Bingham-Jefferson Groundwater District Test Recharge Well \$250,000
  - Cost covers two recharge wells 200'-300', one monitor well, and associated infrastructure.

- New Sweden Test Recharge Well Head of the Basalt \$256,000
  - Cost covers one recharge well 350', one monitor well, and associated infrastructure.

The remaining three proposals presented were for full-scale projects. The Committee asked staff to develop a ranking system to better evaluate the proposals and present their findings at the upcoming IWRB meeting. The following is a brief summary of the three proposals

- 1. ITD Pit Recharge Basin Progressive Canal
- 2. 55<sup>th</sup> Road Expansion Basin Enterprize Canal
- 3. Egin Bench Canal Recharge Well Complex FMID

The ITD Pit proposal has been pulled from consideration due to the high-risk factor associated with developing the infiltration capacity of the proposed basin. A comparison of the 55<sup>th</sup> Road Expansion and the Egin Bench Canal Recharge Well Complex will be provided at the IWRB meeting. As background summary memos are included for the IWRB to review.

### Memorandum

To: IWRB Aquifer Stabilization Committee

From: Cooper Fritz

Date: August 29, 2024

Re: Enterprize Canal Company – 55<sup>th</sup> Road Recharge Basin Expansion Site Construction

**REQUIRED ACTION:** Consider a recommendation to the IWRB for the authorization of funding for the construction of a 14.8-acre expansion of the 55<sup>th</sup> Road Recharge Basin.

#### 55<sup>th</sup> Road Basin Expansion Project Summary:

Project Cost: \$6,196,740 Estimated 20-year Cost per Acre Foot: \$75.96 - \$63.39 Additional Recharge Capacity:45 - 55 cfsAdditional Basin Size:14.8 acresDepth to Water:110'-125'bgs

#### **Project Proposal:**

- Excavation of a new 14.8-acre recharge basin adjacent to an existing 5.6-acre recharge basin.
- Hauling off excavated material.
- Engineering oversight.

#### **Request of the IWRB:**

Authorize the expenditure of \$6,196,740 for the construction of a 14.8-acre expansion of the existing 55<sup>th</sup> Road Recharge Basin.

#### **Background:**

The ESPA Managed Recharge Program aims to stabilize and potentially enhance aquifer levels, increase spring flows, and boost reach gains along the Snake River. Since 2014, the IWRB has developed over 2,300 cfs of recharge capacity across the ESPA, with only 300 cfs added in the Upper Valley (above American Falls).

Since 2018, the IWRB has focused on increasing recharge capacity in the Upper Valley, where opportunities, infrastructure, and water availability differ significantly from the Lower Valley (below American Falls Reservoir). The current strategy involves developing capacity in multiple geographic areas to provide both short- and long-term benefits to the aquifer and surface flows. Given the variations in subsurface geology the IWRB is exploring both recharge wells and basins.

#### 55th Road Recharge Basin Expansion Project Proposal:

Enterprize Canal Company (ECC) proposes to excavate and remove the top 11 feet of material from a new 17.9acre parcel, adding 14.8 acres to the wetted area adjacent to the existing 5.6-acre 55<sup>th</sup> Road recharge basin. Located approximately 2.5 miles north of Iona (see Appendix C of the attached engineering proposal for its location within Idaho), the current basin, which is deeper than 11 feet, will be terraced at the northern edge to connect with the new basin, creating a combined total of 20.4 wetted acres. The project also proposes to pipe an existing lateral that runs through the northern portion of the property (Appendix D in the attached engineering proposal).

The existing basin recharged at an average rate of 2.73 cfs/acre (27.6 AF/day) from May 12 to June 2, 2024. with the recharge capacity may potentially be higher as operations become better understood. The proposed expansion is therefore expected to add at least 40 cfs. The proposal estimates the expansion will recharge 45.7

cfs. That rate could reach 55 cfs, if rates similar to the Jones Pit (3.7 cfs/acre), less than five miles away is achieved.

The current diversion structure can deliver 80 cfs. The source of water into the basin is Sand Creek, which branches from Willow Creek. ECC can deliver at least 80 cfs of natural flow from the Snake River to Willow Creek via a pipeline until mid-June, when peak irrigation begins. In the spring of 2024, the basin operated under a temporary natural flow recharge water right from Willow Creek, which provides an additional source of water that offers at least 80 cfs of natural flow when flood control is occurring from Ririe Reservoir.

#### <u>Cost</u>

The total proposed project cost is \$6,196,740, covering excavation, material removal, and other items generally listed in Table 1 and detailed on the final page of the attached engineering report.

Table 1 – Generalized cost breakdown of Enterprize Canal Company's proposed 55th Road Basin Expansion. More detailed cost summaries are available on the final page of the attached engineering proposal.

Item	Cost
Earthwork (Excavation and Removal of Material)	\$5,365,648.87
Engineering Services	\$481,706
Piping of Lateral Ditch	\$250,390
Inlet Trash Diverter	\$40,000
Fence	\$35,200
Construction Traffic Control	\$17,588
Total Requested	\$6,196,740

• Total project cost as requested\*\*

\$75.96 per acre-foot

- \*\*Assumptions used in the calculation:
- Cost averaged over 20 years.
- Recharge capacity of the basin:
- Yearly available of natural flow for recharge:

45.7 cfs (as proposed) 45 days\*\*\*

\*\*\* The average water availability for recharge in the Upper Valley over the 10 years the full-scale recharge program has operated has been 90 days every other year, therefore 45 days was used in the calculation.

If the expanded area achieves a rate of 55 cfs (equivalent to 3.7 cfs/acre, as at the Jones Pit), the 20-year average cost per acre-foot would be \$63.39.

#### Potential Impact

•

•

Based on ESPAM2.2 via publicly available ETRAN, which models impacts over 150 years:

20% of the water recharged returns to the river 8 months			
<ul> <li>Above Blackfoot:</li> </ul>	95%		
<ul> <li>Blackfoot to Minidoka:</li> </ul>	5%		
50% of the water recharged returns to the river	Two years		
<ul> <li>Above Blackfoot</li> </ul>	85%		
<ul> <li>Between Blackfoot and Minidoka</li> </ul>	14%		

The following figure shows the existing 55<sup>th</sup> Road recharge basin and the proposed expansion (in red).

### Memorandum

To: IWRB Aquifer Stabilization Committee

From: Cooper Fritz

Date: August 29, 2024

Re: FMID – West Egin Recharge Wells Complex

**REQUIRED ACTION:** Consider a recommendation to the IWRB for the authorization of funding of the West Egin Recharge Wells Complex within the Fremont Madison Irrigation District (FMID) system.

#### West Egin Recharge Wells Complex Summary:

Project Cost: \$7,388,500 Anticipated Cost per Acre Foot (20 yr): \$39.42 Anticipated Recharge Capacity: 105 cfs Depth to Water: Perched: 10', Regional: 85'

#### Project Proposal:

- **Procure a fully executed easement for the maintenance road** along Fremont Madison Irrigation District's (FMID) Recharge Canal, which is fed by the St. Anthony Union Canal from the Henry's Fork.
- **Construct ten recharge wells along the Recharge Canal** within the easement, including diversion structures and meters.
- Improve bridges, conduct rock hammering, and perform earthwork to increase the delivery capacity of the Recharge Canal to accommodate the new recharge rate.
- Automate the gates on the 25 check dams along the St. Anthony Union Canal between the Henry's Fork and Recharge Canal, including installation of the associated control software.

#### **Request of the IWRB:**

Authorize the expenditure of \$7,358,500 to construct the West Egin Recharge Wells Complex.

#### Background:

The ESPA Managed Recharge Program aims to stabilize and potentially enhance aquifer levels, increase spring flows, and boost reach gains along the Snake River. Since 2014, the IWRB has developed over 2,300 cfs of recharge capacity across the ESPA, with only 300 cfs added in the Upper Valley (above American Falls).

Since 2018, the IWRB has focused on increasing recharge capacity in the Upper Valley, where opportunities, infrastructure, and water availability differ significantly from the Lower Valley (below American Falls Reservoir). The current strategy involves developing capacity in multiple geographic areas to provide both short- and long-term benefits to the aquifer and surface flows. Given the variations in subsurface geology the IWRB is exploring both recharge wells and basins.

#### West Egin Recharge Wells Complex:

In spring 2024, FMID, with support from IWRB, constructed a 20-inch, 238-foot test recharge well that recharges up to 10.5 cfs. Based on these results, FMID proposes to build 10 additional recharge wells and associated diversion structures (including meters) along approximately 2.2 canal miles of its Recharge Canal about 2.5 miles northwest of Egin (Figure 1) and nine miles west of St. Anthony. As part of the proposal, FMID plans to purchase a perpetual easement for the canal's maintenance road, along which the wells will be constructed.

Although the test well lacked a monitor well, hydrologic interference is not expected. This is due to the highly permeable geologic material noted during test well construction: 69 feet of fractured basalt and 6 feet of cinders between a bottom casing depth of 140 feet and a total well depth of 238 feet (Figure 2). This geologic setting should support at least 105 cfs of additional recharge distributed over the 2.2 miles of the Recharge Canal.

Currently, the Recharge Canal delivers water to an approximately 256-acre basin (Figure 1) that infiltrates about 120 cfs (0.47 cfs/acre). The proposed wells are expected to recharge at a similar rate as the existing trial well. The additional 105 cfs of recharge capacity requires improvements to the Recharge Canal and the St. Anthony Union Canal, which delivers water to the Recharge Canal from the Henry's Fork.

The Recharge Canal requires improvements including bridge rehabilitation and deepening through rock hammering and excavation. Of the four bridges between its diversion from the St. Anthony Union Canal and its entrance into the basin, two require rehabilitation to handle the increased flows. This focus on the first two bridges is because four of the wells are located before the third bridge. The bridge rehabilitation work may include concrete reinforcement of the piers (beams) or the decking (road). Rock hammering is needed to deepen the canal, which is currently flat and situated within a solid-rock framework. Without deepening, increased water flow to the recharge wells could flood neighboring farmland. Ater rock hammering, earthwork will be conducted to further excavate the channel to accommodate the higher flow rates.

To improve water delivery to the Recharge Canal from the St. Anthony Union, this proposal includes automating the gates on 25 check dams between the St. Anthony Union's diversion from the Henry's Fork and the Recharge Canal. The proposal covers the cost of SCADA software and setup required to operate the automated dams. While this automation will streamline irrigation, its primary purpose is to support the planned increase in water delivery to the recharge well complex and enhance flow to the existing recharge basin. In the spring of 2024, FMID delivered approximately 73% of the basin's capacity (with a median rate of 88 cfs) once irrigation from the St. Anthony Union was fully underway. This limitation stemmed not from capacity constraints but from the manual labor required to adjust the wooden checks as irrigation demand fluctuated. The automated system would also support water delivery to a potential Phase II of the Egin Lakes Recharge Wells complex, which may be constructed within the BLM easement where the West Egin Lakes Basin currently sits.

#### <u>Cost</u>

The total proposed project cost is \$7,388,500, which includes the installation of two monitor wells for water quality and hydrologic monitoring. A general cost breakdown is provided in Table 1.

St. Anthony Union Canal automation accounts for 51% of the proposed cost (excluding the monitor well and contingency). While the full cost is included in this proposal, FMID is also seeking funding through the BOR's WaterSmart program and could also pursue additional funding through the IWRB Aging Infrastructure program. FMID is currently working on a WaterSmart grant proposal, which will be submitted in November. *If half of the automation cost (\$1,670,000) is secured from another source, the cost per acre-foot over 20 years would be \$30.51.* 

*Table 1* – Generalized breakdown of the total request for the development of the West Egin Recharge Wells Complex. \* denotes IWRB staff recommendation.

Item	Cost
Easement to Maintenance Road along Recharge Canal	\$200,000
Wells, including diversion structures	\$2,500,000
Recharge Canal Improvements	\$500,000
Gates for Checks in the St. Anthony Union	\$3,029,500
SCADA (Gate Automation Software)	\$225,000
Network Communications	\$85,000
15% Contingency	\$789,000
Two Monitor Wells*	\$60,000
Total Request	\$7,388,500

- Total project cost as recommended\*\*
   \*\*Assumption used in the calculation:
  - Cost averaged over 20 years
     Recharge capacity of the complex: 105 cfs
     Yearly available of natural flow for recharge: 45 days\*\*\*

\*\*\* The average water availability for recharge in the Upper Valley over the 10 years the full-scale recharge program has operated has been 90 days every other year, therefore 45 days was used in the calculation.

\$39.42 per acre-foot

#### Potential Impact

Based on ESPAM2.2 via publicly available ETRAN, which models impacts over 150 years:

٠	20% of	One year	
	0	Above Blackfoot:	100%
	0	Blackfoot to Minidoka:	0%
•	50% of	the water recharged returns to the river	4.66 years
	0	Above Blackfoot	97%
	0	Between Blackfoot and Minidoka	3%

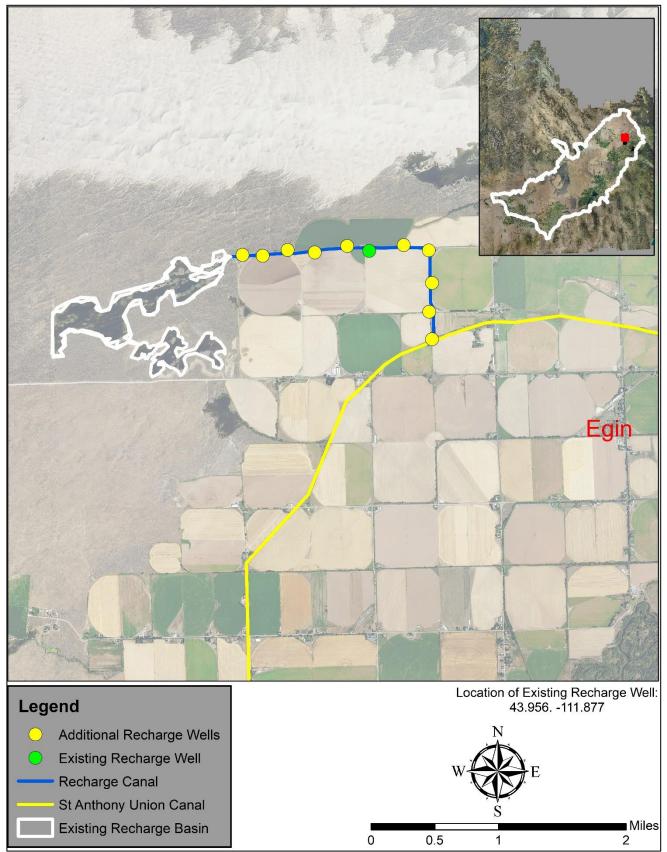

Figure 1 – The location of the Egin Lakes Wells Complex, including the existing well and the proposed additional well, in relation to the community of Egin.

#### IN THE MATTER OF THE VANDERFORD ROAD TEST RECHARGE WELL DEVELOPMENT

**RESOLUTION TO APPROVE FUNDS FROM THE** WATER MANAGEMENT ACCOUNT OR THE ARPA STATE FISCAL RECOVERY FUND AND **PROVIDE SIGNATORY AUTHORITY** 

1 WHEREAS, about one-third of Idaho's population resides on the Eastern Snake Plain and the 2 Eastern Snake Plain Aquifer (ESPA) is the primary source of drinking water for both cities and most rural 3 residents of the Eastern Snake Plain; and 4 5 WHEREAS, numerous factors, including drought, have contributed to the loss of approximately 6 216,000 acre-feet of storage annually from ESPA since the 1950's resulting in declining groundwater levels 7 in the aquifer and reduced spring flows to the Snake River; and 8 9 WHEREAS, the Idaho State Water Plan includes a goal to accomplish managed recharge in the ESPA 10 averaging 250,000 acre-feet annually; and 11 12 WHEREAS, the 2016 Idaho Legislature passed and approved Senate Concurrent Resolution 136 13 directing the IWRB to develop the capacity to achieve 250,000 acre-feet of annual average managed 14 recharge to the ESPA by December 31, 2024; and 15 16 WHEREAS, implementation of managed recharge on the ESPA will assist in the stabilization and 17 improvement of aquifer levels to protect municipal and domestic drinking water supplies, support agriculture and other industries important to the state economy, and help address variability in climatic 18 19 conditions, including drought; and 20 21 WHEREAS, the American Rescue Plan Act (ARPA), Pub. L. 117-2 subtitle M (2021), appropriated 22 \$219,800,000,000 to the Coronavirus State and Local Fiscal Recovery Fund (SLFRF) for making payments to 23 the States to mitigate the fiscal effects stemming from the public health emergency with response to the 24 Coronavirus disease; and 25 26 WHEREAS, the SLFRF funds may be used to, among other things, make necessary investments in 27 water, sewer, or broadband infrastructure. Pub L. 117-2 sec. 602(c)(1)(D), 42 U.S.C. § 802(c)(D); and 28 29 WHEREAS, eligible uses of the SLFRF include projects that would be eligible to receive financial 30 assistance through the Clean Water State Revolving Fund (CWSRF), 40 CFR Part 35.3100-35.3170, and the 31 Drinking Water State Revolving Fund (DWSRF), 40 CFR 35.3520; and 32 33 WHEREAS, the CWSRF may be used for groundwater projects that protect and restore aquifers, 34 including aquifer recharge projects; and 35 36 WHEREAS, the DWSRF can be used to fund aquifer recharge projects such as aquifer storage and 37 recovery wells and water reuse and recycling projects to replace and offset potable water use and to develop new sources of water to increase drought resilience; and 38 Resolution No.

Page 1

39 40 WHEREAS, in 2022 the Idaho Legislature passed House Bill 769 in which it expressed its intent to 41 set aside approximately \$250,000,000 of ARPA funding to support projects managed by the IWRB, including 42 for the continued identification, study, construction, or enlargement of managed aquifer recharge sites 43 above Milner Dam; and 44 45 WHEREAS, Idaho Code § 42-1760 authorizes the Idaho Water Resource Board (IWRB) to expend, loan, or grant moneys from the Water Management Account for water projects that conserve or increase 46 47 water supply, improve drought resiliency, address water sustainability, or support flood management, 48 including the identification, study, and construction of managed aquifer recharge sites above Milner dam; 49 and 50 51 WHEREAS, the IWRB passed Resolution 32-2024 for a Water Management Account Spending Plan 52 which allocates \$40,000,000 for Statewide Recharge Infrastructure; and, 53 54 WHEREAS, Aberdeen Springfield Canal Company presented a proposal to the IWRB Aquifer Stabilization Committee on September 5, 2024, for the Vanderford Road Test Recharge Well ("Project") 55 56 and associated infrastructure for a proposed cost of \$296,500. 57 58 NOW THEREFORE BE IT RESOLVED that the IWRB authorizes expenditure of up to \$296,500 from 59 the Water Management Account or the ARPA State Fiscal Recovery Fund for the construction costs 60 associated with the Project. 61 62 NOW THEREFORE BE IT FURTHER RESOLVED that the IWRB authorizes its chairman or designee, to 63 execute the necessary agreements or contracts for the purpose of this resolution.

DATED this 13th day of September, 2024.

#### RESOLUTION TO APPROVE FUNDS FROM THE WATER MANAGEMENT ACCOUNT AND PROVIDE SIGNATORY AUTHORITY

1 WHEREAS, about one-third of Idaho's population resides on the Eastern Snake Plain and the 2 Eastern Snake Plain Aquifer (ESPA) is the primary source of drinking water for both cities and most rural 3 residents of the Eastern Snake Plain; and

5 WHEREAS, numerous factors, including drought, have contributed to the loss of approximately 6 216,000 acre-feet of storage annually from ESPA since the 1950's resulting in declining groundwater levels 7 in the aquifer and reduced spring flows to the Snake River; and

9 WHEREAS, the Idaho State Water Plan includes a goal to accomplish managed recharge in the ESPA
 10 averaging 250,000 acre-feet annually; and

12 WHEREAS, the 2016 Idaho Legislature passed and approved Senate Concurrent Resolution 136 13 directing the IWRB to develop the capacity to achieve 250,000 acre-feet of annual average managed 14 recharge to the ESPA by December 31, 2024; and

16 WHEREAS, implementation of managed recharge on the ESPA will assist in the stabilization and 17 improvement of aquifer levels to protect municipal and domestic drinking water supplies, support 18 agriculture and other industries important to the state economy, and help address variability in climatic 19 conditions, including drought; and

WHEREAS, the American Rescue Plan Act (ARPA), Pub. L. 117-2 subtitle M (2021), appropriated \$219,800,000,000 to the Coronavirus State and Local Fiscal Recovery Fund (SLFRF) for making payments to the States to mitigate the fiscal effects stemming from the public health emergency with response to the Coronavirus disease; and

26 WHEREAS, the SLFRF funds may be used to, among other things, make necessary investments in 27 water, sewer, or broadband infrastructure. Pub L. 117-2 sec. 602(c)(1)(D), 42 U.S.C. § 802(c)(D); and

WHEREAS, eligible uses of the SLFRF include projects that would be eligible to receive financial
 assistance through the Clean Water State Revolving Fund (CWSRF), 40 CFR Part 35.3100—35.3170, and the
 Drinking Water State Revolving Fund (DWSRF), 40 CFR 35.3520; and

WHEREAS, the CWSRF may be used for groundwater projects that protect and restore aquifers,
 including aquifer recharge projects; and

WHEREAS, the DWSRF can be used to fund aquifer recharge projects such as aquifer storage and
 recovery wells and water reuse and recycling projects to replace and offset potable water use and to

38	develop new sources of water to increase drought resilience; and
39	
40	WHEREAS, in 2022 the Idaho Legislature passed House Bill 769 in which it expressed its intent to
41	set aside approximately \$250,000,000 of ARPA funding to support projects managed by the IWRB, including
42	for the continued identification, study, construction, or enlargement of managed aquifer recharge sites
43	above Milner Dam; and
44	
45	WHEREAS, Idaho Code § 42-1760 authorizes the Idaho Water Resource Board (IWRB) to expend,
46	loan, or grant moneys from the Water Management Account for water projects that conserve or increase
47	water supply, improve drought resiliency, address water sustainability, or support flood management,
48	including the identification, study, and construction of managed aquifer recharge sites above Milner dam;
49	and
50	
51	WHEREAS, the IWRB passed Resolution 32-2024 for a Water Management Account Spending Plan
52	which allocates \$40,000,000 for Statewide Recharge Infrastructure; and,
53	
54	WHEREAS, People's Canal Company ("PCC") presented a proposal to the IWRB Aquifer Stabilization
55	Committee on September 5, 2024, for the People's Canal Test Recharge Well ("Project") and associated
56	infrastructure for a proposed cost of \$135,000.
57	
58	NOW THEREFORE BE IT RESOLVED that the IWRB authorizes expenditure of up to \$135,000 from
59	the Water Management Account or the ARPA State Fiscal Recovery Fund for the construction costs
60	associated with the Project.
61	
62	NOW THEREFORE BE IT FURTHER RESOLVED that the IWRB authorizes its chairman or designee, to
63	execute the necessary agreements or contracts for the purpose of this resolution.

DATED this 13th day of September 2024.

#### IN THE MATTER OF NEW SWEDEN IRRIGATION DISTRICT'S OSGOOD RECHARGE PROJECT TEST RECHARGE WELLS DEVELOPMENT

RESOLUTION TO APPROVE FUNDS FROM THE WATER MANAGEMENT ACCOUNT OR THE ARPA STATE FISCAL RECOVERY FUND AND PROVIDE SIGNATORY AUTHORITY

1 WHEREAS, about one-third of Idaho's population resides on the Eastern Snake Plain and the 2 Eastern Snake Plain Aquifer (ESPA) is the primary source of drinking water for both cities and most rural 3 residents of the Eastern Snake Plain; and 4

5 WHEREAS, numerous factors, including drought, have contributed to the loss of approximately 6 216,000 acre-feet of storage annually from ESPA since the 1950's resulting in declining groundwater levels 7 in the aquifer and reduced spring flows to the Snake River; and 8

9 WHEREAS, the Idaho State Water Plan includes a goal to accomplish managed recharge in the ESPA
 10 averaging 250,000 acre-feet annually; and

12 WHEREAS, the 2016 Idaho Legislature passed and approved Senate Concurrent Resolution 136 13 directing the IWRB to develop the capacity to achieve 250,000 acre-feet of annual average managed 14 recharge to the ESPA by December 31, 2024; and

16 WHEREAS, implementation of managed recharge on the ESPA will assist in the stabilization and 17 improvement of aquifer levels to protect municipal and domestic drinking water supplies, support 18 agriculture and other industries important to the state economy, and help address variability in climatic 19 conditions, including drought; and

WHEREAS, the American Rescue Plan Act (ARPA), Pub. L. 117-2 subtitle M (2021), appropriated \$219,800,000,000 to the Coronavirus State and Local Fiscal Recovery Fund (SLFRF) for making payments to the States to mitigate the fiscal effects stemming from the public health emergency with response to the Coronavirus disease; and

26 WHEREAS, the SLFRF funds may be used to, among other things, make necessary investments in 27 water, sewer, or broadband infrastructure. Pub L. 117-2 sec. 602(c)(1)(D), 42 U.S.C. § 802(c)(D); and

WHEREAS, eligible uses of the SLFRF include projects that would be eligible to receive financial
 assistance through the Clean Water State Revolving Fund (CWSRF), 40 CFR Part 35.3100—35.3170, and the
 Drinking Water State Revolving Fund (DWSRF), 40 CFR 35.3520; and

WHEREAS, the CWSRF may be used for groundwater projects that protect and restore aquifers,
 including aquifer recharge projects; and

WHEREAS, the DWSRF can be used to fund aquifer recharge projects such as aquifer storage and
 recovery wells and water reuse and recycling projects to replace and offset potable water use and to

# Dedicated Recharge Infrastructure Funding Proposals – Round One

Presented to the Idaho Water Resource Board

Meeting Number 10-24

September 13, 2024

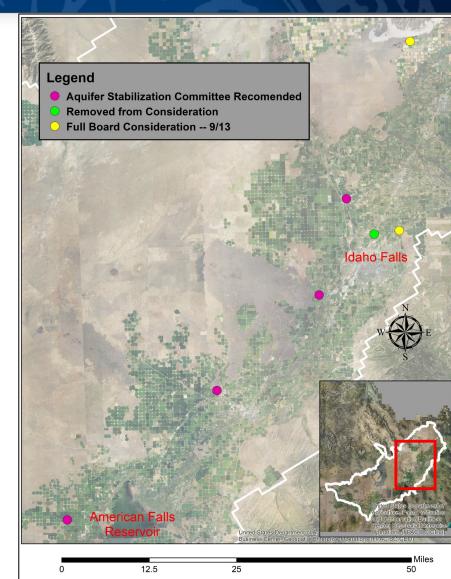

by Cooper Fritz – IWRB Recharge Program Coordinator

# **IDAHO** Water Resource Board

## Summary of Aquifer Stabilization Committee Meeting Number 3-24 (September 5)

- Seven projects were proposed.
- Funding was recommended for four projects.
  - Resolutions are included in the Meeting Materials.
- One project was pulled by staff due to risk concerns.
- Two remaining projects are presented for full board consideration without a recommendation.
  - Resolutions are provided if the board chooses to proceed with either project.

# **IDAHO** Water Resource Board

# Enterprize Canal Company 55<sup>th</sup> Road Basin Expansion

### **Amended Project Overview:**

- Summer 2024 Recharge Results: 8-acre basin (6.5 "wetted" acres), 30 feet deep, recharged 40 cfs (6.15 cfs/acre).
- **Recharge Basin Expansion**: Enterprize purchased a 21-acre parcel adjacent to the existing basin and proposes to excavate 7 acres. Expected recharge rate: 5.2 cfs/acre at 25 feet depth.
- **Engineering Oversight**: Requested due to specific site requirements.

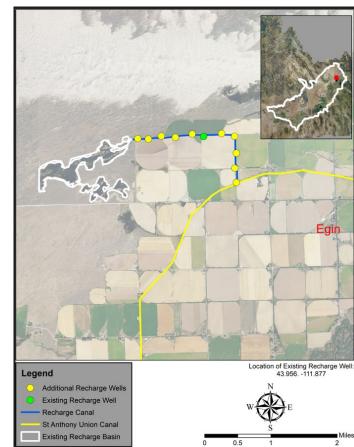

# Fremont Madison Irrigation District West Egin Recharge Wells Complex

### **Project Overview:**

- **Test Well -- Spring 2024:** FMID and IWRB built a 20-inch, 238-ft test recharge well, which recharges up to 10.5 cfs.
- Recharge Well Complex Buildout: Based on test well results, FMID proposes 10 additional wells along 2.2 miles of the Recharge Canal, located 2.5 miles northwest of Egin and 9 miles west of St. Anthony.
- **Geologic Setting:** Highly permeable geologic material (69 ft of fractured basalt, 6 ft of cinders in Test Well) should support 105 cfs of additional recharge.
- **Canal Infrastructure Improvements:** Necessary to accommodate increased recharge capacity.
  - Recharge Canal: Bridge rehabilitation, rock hammering, excavation,
  - St. Anthony Union: SCADA automation of 25 check dams.

# **JDAHO** Water Resource Board

### **Costs and Benefits**

	55th Road Basin Expansion	West Egin Recharge Well Complex
Total Price	\$2,388,587	\$7,388,500
Anticipated Recharge Rate	36.4 cfs	105 cfs
\$/AF (Averaged Over 20 Years)	\$36.76	\$39.42 - \$30.51*
Primary Reach Impacted	Heise to Shelley	Henry's Fork

\*Depending on securing additional grant

### Memorandum

To: Idaho Water Resource Board From: Kala Golden, Program Manager Date: September 5, 2024 Re: Cloud Seeding Program Expenditures

### ACTION: Approve a resolution to authorize funding for cloud seeding expenditures

### Background

On September 9, 2024 the Idaho Water Resource Board (IWRB) Cloud Seeding Committee (Committee) reviewed proposed cloud seeding program expenditures and recommended that each expenditure be considered under a separate resolution. The IWRB is being asked to consider three resolutions to authorize the expenditure of funds approved as a part of the Fiscal Year 2025 Secondary Aquifer Planning and Management Fund Budget. Staff will provide more information at the IWRB's Regular Meeting on September 13, 2024.

### Attachments:

- Resolution to authorize the expenditure of funds for development of downscaled climatology data set
- Resolution to authorize the expenditure of funds for deployment of weather instrumentation to support liquid propane investigation
- Resolution to authorize the expenditure of funds for improvements to model physics

#### **BEFORE THE IDAHO WATER RESOURCE BOARD**

### IN THE MATTER OF CLOUD SEEDING IN THE STATE OF IDAHO

### RESOLUTION TO AUTHORIZE THE EXPENDITURE OF FUNDS FOR DEVELOPMENT OF DOWNSCALED CLIMOTOLOGY DATA SET

1	WHEREAS, House Bill 266 (HB 266), passed and approved by the 2021 legislature, and recognized
2	that cloud seeding has provided a unique and innovative opportunity to support sustainable water
3	supplies for the State of Idaho, and designated the Idaho Water Resource Board (IWRB) as the agency
4	responsible for authorization of cloud seeding programs within the State; and
5	
6	WHEREAS, HB266 created section §42-4301 on cloud seeding, directing the IWRB to continue its
7	analysis of cloud seeding operations, conduct an assessment of cloud seeding opportunities across the
8	State of Idaho, and identify opportunities for expanding the Cloud Seeding Program (Program) within the
9	State; and
10	
11	WHEREAS, Cloud Seeding Program development and analysis require the use of sophisticated
12	modeling technologies, many of which are actively under development for the first time; and
13	
14	WHEREAS, to improve modeling capabilities for program development and long term monitoring
15	and analysis of cloud seeding in Idaho, climatology data that supports modeling will need to be refined;
16	and
17	
18	WHEREAS, on May 24, 2024, the IWRB adopted the Secondary Aquifer Planning, Management,
19	and Implementation Fund (Secondary Aquifer Fund) Fiscal Year 2025 Budget, which included funding for
20	Cloud Seeding Program Research & Development for modeling in the amount of \$1,000,000.
21	
22	NOW, THEREFORE BE IT RESOLVED that, the IWRB authorizes expenditures not to exceed
23	\$910,000 from the Secondary Aquifer Fund, Cloud Seeding Program, Research & Development -
24	Technology for a project to downscale the resolution of data sets available in Idaho.
25	
26	BE IT FURTHER RESOLVED that the IWRB authorizes its chairman or designee, Brian Patton,
27	Executive Manager to the IWRB, to execute the necessary agreements or contracts to complete the

28 proposed efforts.

DATED this 13<sup>th</sup> day of September 2024.

#### **BEFORE THE IDAHO WATER RESOURCE BOARD**

### IN THE MATTER OF CLOUD SEEDING IN THE STATE OF IDAHO

### RESOLUTION TO AUTHORIZE THE EXPENDITURE OF FUNDS FOR IMPROVEMENTS TO MODEL PHYSICS

1	WHEREAS, House Bill 266 (HB 266), passed and approved by the 2021 legislature, and recognized
2	that cloud seeding has provided a unique and innovative opportunity to support sustainable water
3	supplies for the State of Idaho, and designated the Idaho Water Resource Board (IWRB) as the agency
4	responsible for authorization of cloud seeding programs within the State; and
5	
6	WHEREAS, HB266 created section §42-4301 on cloud seeding, directing the IWRB to continue its
7	analysis of cloud seeding operations, conduct an assessment of cloud seeding opportunities across the
8	State of Idaho, and identify opportunities for expanding the Cloud Seeding Program (Program) within the
9	State; and
10	
11	WHEREAS, Cloud Seeding Program develop and analysis require the use of sophisticated modeling
12	technologies, many of which are actively under development for the first time; and
13	
14	WHEREAS, to advance modeling capabilities for program development and long term monitoring
15	and analysis of cloud seeding in Idaho, improvements to model physics will need to be made and an
16	assessment of the characteristics that yield effects from cloud seeding will need to be conducted; and
17	
18	WHEREAS, on May 24, 2024, the IWRB adopted the Secondary Aquifer Planning, Management,
19	and Implementation Fund (Secondary Aquifer Fund) Fiscal Year 2025 Budget, which included funding for
20	Research & Development in the amount of \$600,000 for Investigations.
21	
22	BE IT FURTHER RESOLVED that, the IWRB authorizes expenditures not to exceed \$290,000 from
23	the Secondary Aquifer Fund Cloud Seeding Program, Research & Development - Investigations for the
24	assessment of physical processes that lead to precipitation changes under varying conditions; and to
25	assess what characteristics yield the greatest seeding effects to support operational planning and
26	improved efficiency.
27	
28	BE IT FURTHER RESOLVED that the IWRB authorizes its chairman or designee, Brian Patton,
29	Executive Manager to the IWRB, to execute the necessary agreements or contracts to complete the

30 proposed efforts.

DATED this 13<sup>th</sup> day of September 2024.

#### **BEFORE THE IDAHO WATER RESOURCE BOARD**

#### IN THE MATTER OF CLOUD SEEDING IN THE STATE OF IDAHO

**RESOLUTION TO AUTHORIZE THE** EXPENDITURE OF FUNDS FOR DEPLOYMENT OF WEATHER INSTRUMENTATION TO SUPPORT LIQUID PROPANE INVESTIGATION

1	WHEREAS, House Bill 266 (HB 266), passed and approved by the 2021 legislature, and recognized
2	that cloud seeding has provided a unique and innovative opportunity to support sustainable water
3	supplies for the State of Idaho, and designated the Idaho Water Resource Board (IWRB) as the agency
4	responsible for authorization of cloud seeding programs within the State; and
5	
6	WHEREAS, HB266 created section §42-4301 on cloud seeding, directing the IWRB to continue its
7	analysis of cloud seeding operations, conduct an assessment of cloud seeding opportunities across the
8	State of Idaho, and identify opportunities for expanding the Cloud Seeding Program (Program) within the
9	State; and
10	
11	WHEREAS, Liquid Propane (LP) has been demonstrated to nucleate ice in a lab setting, does not
12	require orographic winds to disperse material, can generate ice at warmer temperatures, and is less
13	expensive than traditional cloud seeding agents; and
14	
15	WHEREAS, the IWRB has initiated a pre-investigation of the potential for use of liquid propane as
16	a seeding agent. The objective of the pre-investigation is to identify a test site for a full scale investigation
17	of liquid propane as a seeding agent; and
18	
19	WHEREAS, the State of Utah is interested in the potential use of liquid propane for cloud seeding
20	and has approved funding for a principle investigator (PI) to lead and coordinate the LP research
21	investigation, and to support instrumentation and the collection of data at current test sites in Idaho; and
22	WITEDEAS, the LD are investigation will require additional weather instrumentation and data
23 24	WHEREAS, the LP pre-investigation will require additional weather instrumentation and data support for the winter season 2024-2025; and
24 25	support for the winter season 2024-2025, and
23 26	WHEREAS, on May 24, 2024, the IWRB adopted the Secondary Aquifer Planning, Management,
20	and Implementation Fund (Secondary Aquifer Fund) Fiscal Year 2025 Budget, which included funding for
28	Research & Development in the amount of \$600,000 for Investigations.
29	
30	BE IT FURTHER RESOLVED that, the IWRB authorizes expenditures not to exceed \$170,000 from
31	the Secondary Aquifer Fund Cloud Seeding Program, Research & Development - Investigations for costs
32	related to deployment of instrumentation and the collection of data to support a full scale study of liquid
33	propane as a cloud seeding agent.
34	
35	BE IT FURTHER RESOLVED that the IWRB authorizes its chairman or designee, Brian Patton,
36	Executive Manager to the IWRB, to execute the necessary agreements or contracts to complete the
37	proposed efforts.
	Desclution No.

### Memorandum

To: Idaho Water Resource Board

From: Planning Staff

Date: August 13, 2024

Re: Meeting Dates for 2025

**ACTION:** No action at this time. Information provided for a future decision.

The following options for 2025 Regular Meetings are proposed for consideration by the Board. Please email preferences to Admin. Assistant prior to our November 2024 meetings.

- January 17, 2025
  - Things to consider: IWUA Annual Convention is planned for January 13-16, 2025 in Boise.
- March 13-14, 2025 or March 20-21, 2025
  - Usually held in Boise
  - Field trip to NY Canal option
- May 15-16, 2025 or May 22-23, 2025
  - Things to consider: Memorial Day will be May 26<sup>th</sup>
  - Possible location for meetings: Lewiston
- July 17-18, 2025 or July 24-25, 2025
  - Possible location for meetings: Idaho Falls
- September 11-12, 2025 or September 18-19, 2025
  - Possible location for meetings: tbd
- November 13-14, 2025 or November 20-21, 2025
  - Things to consider: Thanksgiving will be November 27<sup>th</sup>
  - Usually held in Boise
