## AGENDA Idaho Water Resource Board

Board Meeting No. 6-24 WORK SESSION

Thursday, May 23, 2024 8:30 a.m. (PT) / 9:30 a.m. (MT)

University of Idaho Bonner County Extension Conference Room 4205 N. Boyer Ave. SANDPOINT

#### Livestream available at <a href="https://www.youtube.com/@iwrb">https://www.youtube.com/@iwrb</a>

- 1. Roll Call
- 2. Administrative Rules Update
- 3. Mountain Home Air Force Base Water Resilience Project Update
- 4. North Idaho Adjudication Update

5. North Idaho Fisheries Streamflow Challenges & Opportunities by Idaho Fish & Game

- 6. Palouse Basin Aquifer Committee Presentation
- 7. Regional Manager's Update
- 8. Priest Lake Outlet Dam Operations Update
- 9. Non-Action Items for Discussion
- 10. Adjourn

The board will break for lunch at approximately 11:30 AM. Following lunch, they will attend a field trip of the Priest Lake Outlet Dam. Transportation will be provided for board members and invited guests only.

# \* Action Item: A vote regarding this item may be made at this meeting. Identifying an item as an action item on the agenda does not require a vote to be taken on the item. <u>Americans with Disabilities</u>: If you require special accommodations to attend, participate in, or understand the meeting, please make advance arrangements by contacting Department staff by email: jennifer.strange@idwr.idaho.gov or by phone at (208) 287-4800.

#### Memorandum

- To: Idaho Water Resource Board (IWRB)
- From: Cynthia Clark, Planning & Projects Bureau
- Date: May 20, 2024
- Re: Administrative Rules

#### ACTION: No action requested at this time

Erik Boe will provide a briefing on the agency's rulemaking efforts.

#### Memorandum

To: Idaho Water Resource Board

From: Mike Morrison

Date: May 20, 2024

Re: Mountain Home Air Force Base Water Resilience Project

**REQUIRED ACTION:** No action is required.

#### **Project Update**

<u>Project Status:</u> The project is on-schedule. Final design review will begin this week, and the construction contractor is mobilizing for pipeline construction in BLM lands along Highway 167.

<u>The Air Force's Water Treatment Plant</u>: Staff recently learned that the Air Force will not be completing construction of the Water Treatment Plant until summer, 2026, and that the plant will not be fully commissioned until July, 2027. This delay should result in little or no impact to the schedule for completing and testing water transmission facilities being built by the Board.

<u>Easements and Rights-of-Way:</u> The Board and the J.R. Simplot Company have concluded a Purchase Sale Agreement for the easements needed to construct the pipeline through two miles of Simplot land along Simco Road. Staff is concluding land use agreements with the Mountain Home Highway District and the Idaho Department of Lands.

The Bureau of Land Management is currently processing the Board's request to amend its 2018 Right-of-Way Grant to accommodate design modifications requested by the Air Force, Mountain Home Highway District, and the J.R. Simplot Company. Until the BLM completes its review, the contractor is working within the limits of the 2018 BLM Right-of-Way grant.

<u>Water Rights:</u> Staff is completing a short-term Water Supply Bank rental to use the Board's water rights to provide construction water. A long-term Water Supply Bank rental using the same water rights to provide municipal water is currently being processed by the Idaho Department of Water Resources.

The winter use right application has been protested by three parties. Staff and the protestants are currently working toward a resolution.

<u>Schedule</u>

May 2024: Mobilization for pipeline construction outside canyon rim and complete design package.

Aug 2024: In-Canyon work begins (inlet, pump station, and penstock).

**Oct 2024:** Pipeline construction outside canyon rim complete.

May 2025: In-Canyon work complete (inlet, pump station, and penstock).

June 2025: Acceptance Testing Complete.

July 2025: Hand-off to Air Force

# **Adjudication Program Updates**

Presentation to the Idaho Water Resource Board May 23, 2024

Presented by: Evan Roda – Water Rights Supervisor, Northern Region

# Northern Idaho Water Rights Adjudications

I.C. § 42-1406B: "Effective management of the waters of northern Idaho requires that a comprehensive determination of the nature, extent and priority of the rights of users of surface and ground water be determined."

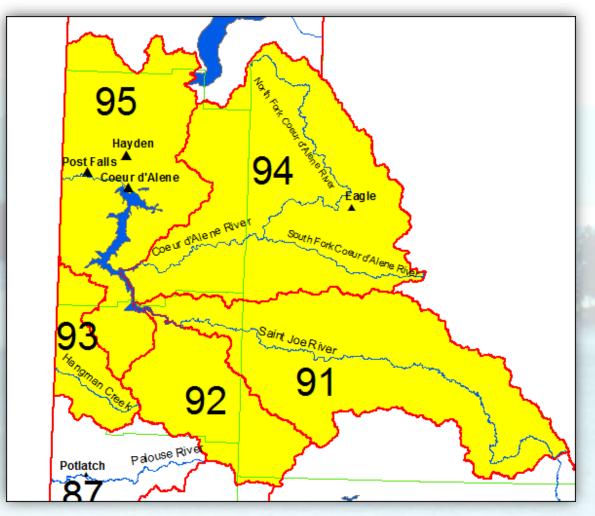

# Northern Idaho Adjudication (NIA) was split into three (3) phases:

- Phase 1 Coeur d'Alene-Spokane River Basin Adjudication (CSRBA)
- Phase 2 Palouse River Basin Adjudication (PRBA)
- Phase 3 Clark Fork-Pend Oreille River
   Basin Adjudication (CFPRBA)

# Implementation

- 2006 Idaho State Legislature authorized IDWR to proceed with planning and implementation of the first of three water right adjudications in Northern Idaho, beginning with the Coeur d'Alene-Spokane River Basin Adjudication (CSRBA)
- Commencement Order for first phase, the CSRBA, issued by the Court on November 12, 2008

## Phase 1 – Basins 91-95

Coeur d'Alene-Spokane River Basin (CSRBA)

# Current Status of

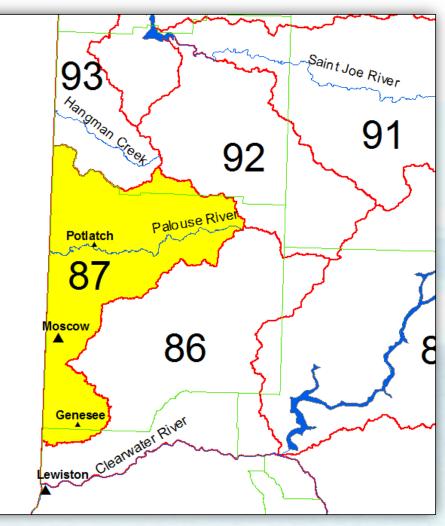

# Coeur d'Alene-Spokane River Basin Adjudication (CSRBA)

- Director's Report for last remaining basin in CSRBA (Basin 95 Part 2) filed February 26, 2019
- 14,280 total claims reported to the Court with 13,840 claims now decreed

# **Outstanding Issues**

- Basin 95: 14 Objections to 9 state-based subcases remain
  - Includes Avista Power claims & Governor's water right for Lake Coeur d'Alene
- Federal Reserve Claims: 286 Active Tribal Claims
  - Order Granting Motion to Amend Claims / Order for Expedited DR / Order Granting Motion to Modify Amended Final Order Disallowing Water Right Claims were issued by the Court on April 1, 2024
  - Deadline to file objections is June 14, 2024 & Deadline to file responses is July 19, 2024
  - Trial scheduled for approx. 2 months to commence at date & loc. in CDA April 2026

## Phase 2 – Basin 87

# Palouse River Basin (PRBA)

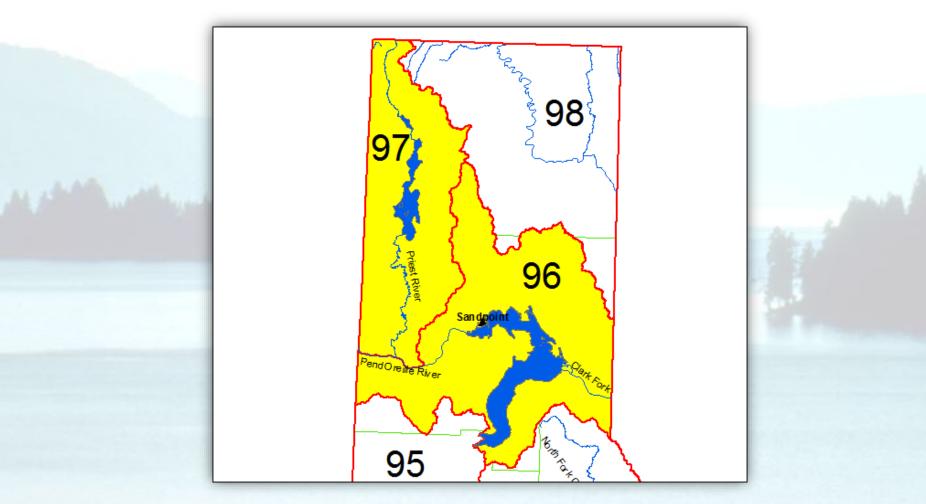

# Current Status of Basin 87 Palouse River Basin Adjudication (PRBA)

- Commencement Order issued March 1, 2017
- Director's Report filed August 2, 2021
  - Included recommendations for 1,987 state-based claims and abstracts for 197 claims based on federal law
- 2,299 total claims reported to the Court with 1,968 claims now decreed

## **Outstanding Issues**

- 159 Objections to 81 state-based subcases remain
  - Includes 73 Objections by Nez Perce Tribe & 73 Objections by U.S. as Trustee
    - Objections primarily filed against claims listing springs as water source
- 203 Federal Reserved Claims
  - Includes 183 DOJ, 18 tribal provisional, 2 USFS (will be more once split)

# Phase 3 – Basins 96 and 97

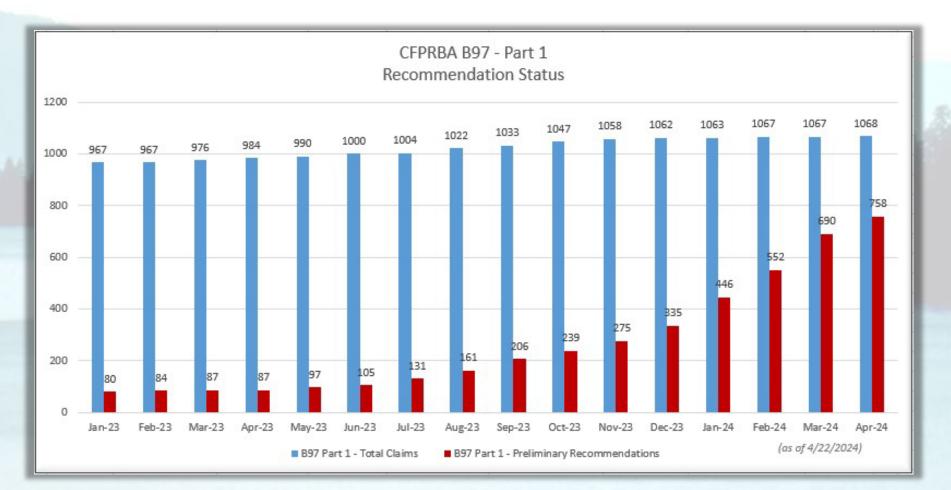

# Clark Fork-Pend Oreille River Basin (CFPRBA)

# Current Status of Clark Fork-Pend Oreille River Basin Adjudication (CFPRBA)

- Commencement Order for the CFPRBA entered June 15, 2021
   Allows deferral of small domestic & stockwater rights (I.C. § 42-111)
- First Commencement Notices mailed September 3, 2021 (B97)
- 2,021 claims received in B97; 6,295 claims received in B96
  - Preliminary recommendations completed for 838 claims
- Second Round Service notifications have been mailed
  - Filing Deadline for non-de minimis rights in Basin 97 has passed (11/17/23)
  - Filing Deadline for non-de minimis rights in Basin 96 set as May 17, 2024
    - > Non-de minimis claims can still be filed after deadline, but must pay a late fee

# Basin 97 Part 1 Progress

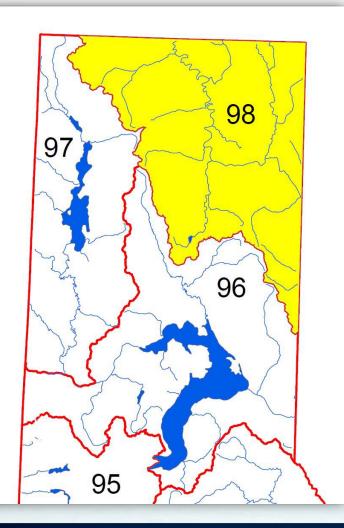

# Topics of Interest in CFPRBA

- Water right for operation of the Priest Lake outlet control structure (Idaho Code § 70-507)
- Minimum stream flow WR in Priest River
- Defining elements of Governor's 1927 priority water rights for Priest Lake and Lake Pend Oreille
- Albeni Falls Dam Operated by US Army Corps of Engineers
- Kalispel Tribe

# Kootenai River Basin Adjudication (KRBA)

- Met with KVRI to discuss potential adjudication on February 12, 2024
- House Bill 687 to authorize the Kootenai River Basin Adjudication (KRBA) signed by Governor Little on March 28, 2024
- Petition to Commence KRBA will be filed with the Court by December
- Once Commencement Order issued by the Court, tentative plan to begin claims taking early 2026

# Questions?

# Thank you.

# Fisheries Streamflow Challenges and Opportunities in North Idaho

Clay Hickey and Merritt Horsmon, Regional Technical Assistance Managers

and

# Tom Bassista

**Technical Assistance Program Coordinator** 

# IDFG is Collaborating with the following

A small working group was formed to discuss water rights and flow issues in North Idaho, members include:

- DEQ
- OSC
- NOAA Fisheries
- Nez Perce Tribe

Amy Cassel and John Loffredo representing the IWRB

**IDWR Northern Region personnel** 

# Working Together

• Idaho Fish and Game's mission is to protect, preserve, perpetuate and manage Idaho's wildlife resources.

 Idaho's Minimum Stream Flow Program was approved to preserve stream flows and lake elevations for public health, safety, and welfare. The minimum stream flow is the amount of flow necessary to preserve desired stream values, including fish and wildlife habitat, aquatic life, navigation and transportation, recreation, water quality, and aesthetic beauty.

# **Purpose and Objectives**

- Briefly discuss some challenges North Idaho fish are facing
- Talk about our analysis centered around Minimum Stream Flow Water Rights (Potlatch and Pack River as examples)
- Seek assistance from the Idaho Water Resource Board (IWRB) to investigate opportunities and solutions

# Challenges

- Salmon and trout are facing less stream flow
- A changing hydrology
- A warming trend
- We have spring, summer, and fall spawning stocks of fish:
  - Spawning (March-November)
  - Eggs and Fry
  - Juveniles in system for up to 2 years

### **Simultaneously**

- Some IWRB Minimum Stream Flows water rights are not being met
- Continued water use applications and permits
- Lack of water use accounting

Leading to:

• Burdensome water right protest procedures

# **Our Request**

- We'd like to work with IWRB Planning and Projects Bureau and the Minimum Streamflow and Streamflow Enhancement Committee
- Help understand the opportunities and solutions to maintain and enhance streamflow in Northern Idaho
- Support future water demands <u>and</u> help protect fisheries and habitat restoration projects

# Habitat Restoration Efforts in Clearwater and Pend Oreille systems

Clearwater (Potlach, Lapwai, SF Clearwater, Lolo, Lochsa, Selway and other tribs.

- Since 1996 over 200 projects have been implemented totaling over \$136,000,000
  - An estimated 50-60 miles of stream have been treated
  - These projects have been implemented by 22 restoration partners and include PCSRF and BPA Funds but don't include USFS, BLM, DEQ, USFWS, SRBA

## Work in the Potlatch Drainage

- Since 2002 90 projects have been implement totaling over \$33,000,000
  - Over 15 miles of stream have been treated
  - These projects have been funded by PCSRF and BPA

Avista Clark Fork Settlement (place holder)

#### Potlatch River Flows monthly average at the Gauge

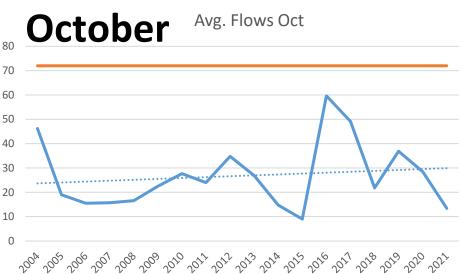

#### Potlatch River Flows monthly average at the Gauge Continued

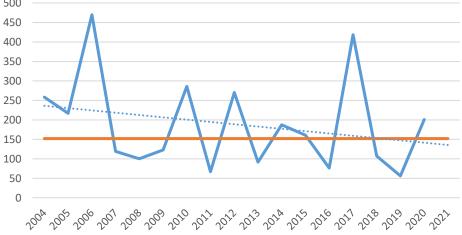

### Potlatch River Flows monthly average at the Gauge Continued

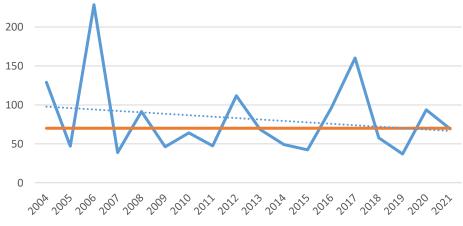

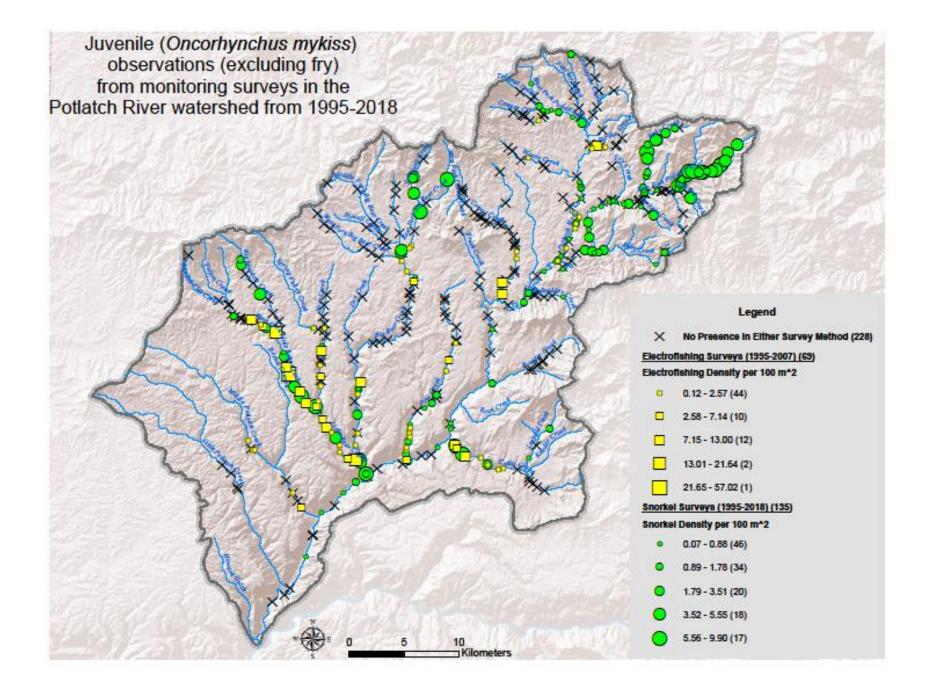

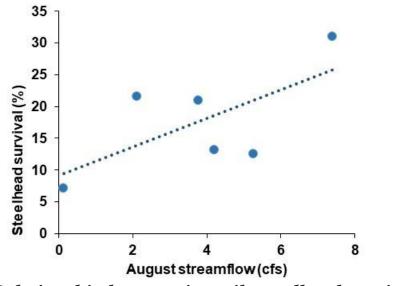

November Avg. Flows Nov

Relationship between juvenile steelhead survival and summer streamflow in the Potlatch River.

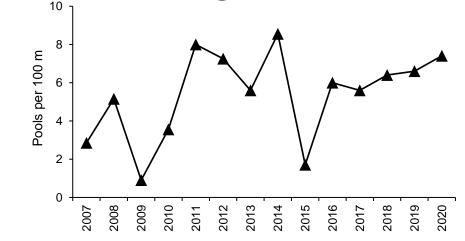

#### Flow Study Findings in the Potlatch River Drainage

- Big Meadow Creek: 0.21 cfs restored flow to 10 km of stream
- Spring Valley and Little Bear Creek: 0.5 cfs restored flow to 18 km stream
  - Reduced Water Temperature
  - Increase Dissolved Oxygen
  - Increase Fish Habitat
- IDFG and partners is currently planning on a \$4 million project to raise the dam on Spring Valley Reservoir to augment flow.

Flow conditions in the Potlatch River in April (left) and August (right) 2023

# Habitat monitoring in the Potlatch basin $10_{10_1}$

Year

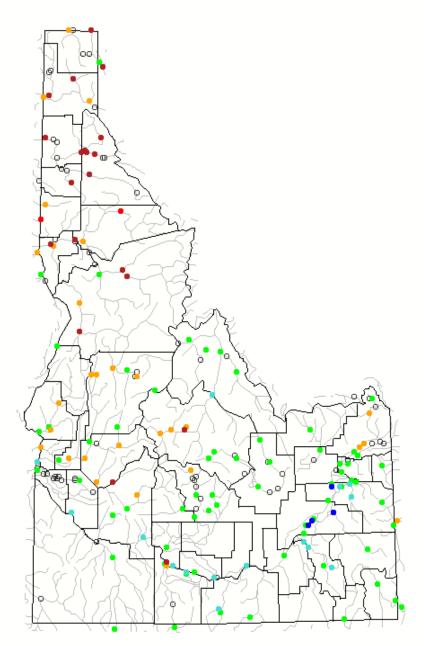

The same reach of stream on different water years

# Percent of normal Stream Flow (mean)

As reported on 05/09/2024

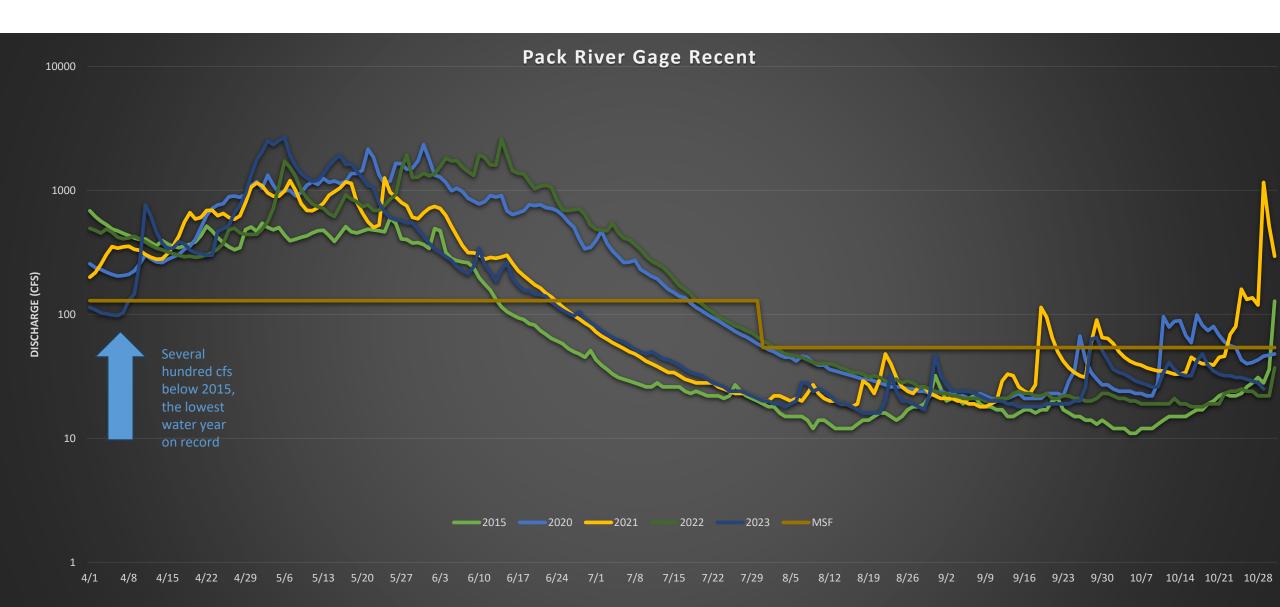

Pack River @ Colburn – 39% Priest River @ Priest River – 23% Coeur d'Alene River @ Cataldo – 27% St Joe River @ Calder – 37%

- All are partly or entirely within Bull Trout critical habitat designated by USFWS
- All have minimum stream flow water rights not being met for up 100+ days

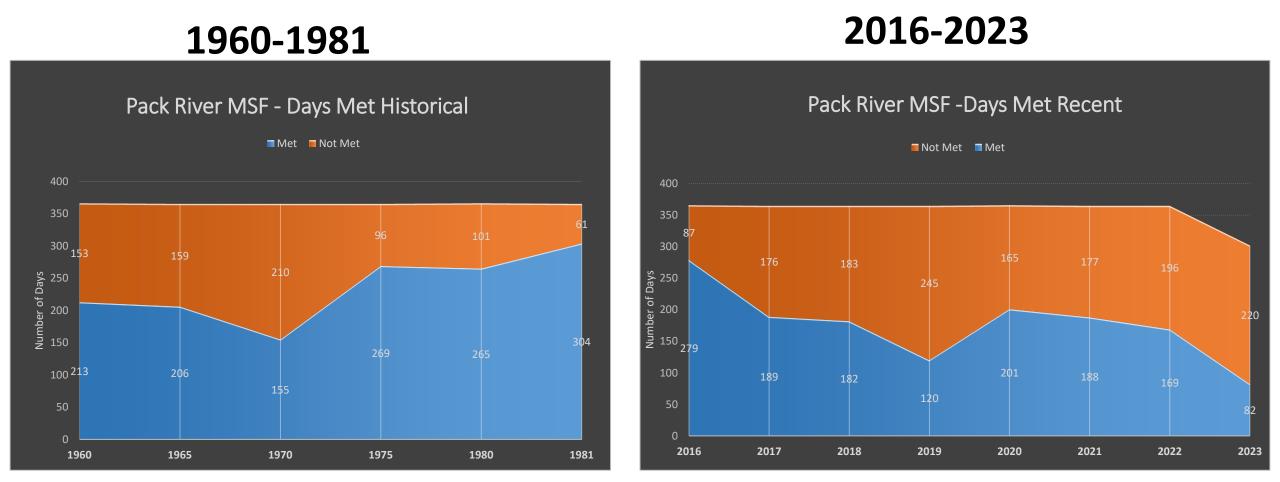

### Gage Data Plotted with Pack River Minimum Stream Flow (2015, 2020, 2021, 2022, and 2023)

# Idaho Water Resources Board Water Rights Pack River 96-8717

Priority Date 6/15/1992 Minimum Stream Flow 11/01 to 7/31 – 129 cfs Minimum Stream Flow 8/01 to 10/31 – 54 cfs

# Quick Recap

- Shift in hydrology, runoff, and water availability
- IDFG has fishery and habitat concerns with increasing water use
- New water rights are being proposed and permitted in streams where Minimum Stream Flow water rights are not being met
- No established water districts or water use quantification

# **Potential Solutions**

- Continued collaboration with interested parties
- Better understanding of water use and changing stream flow conditions in basins with MSF Water Rights
- More stream flow data (better calibration of models)
- Water right adjudication, administration, and curtailment
- Instream flow studies for key fisheries
- Water right application review process considers limiting factors for ESA listed fish (6A-From State Water Plan)
- Others????

# **General Conclusions**

 Northern Idaho was always thought to be water rich and plentiful; are times changing?

• We know how to do this! We have good working programs and collaborations from the Upper Salmon Basin.

• We are better when we work together to solve problems.

• Let's be proactive NOW so we can secure water for the FUTURE

# Questions, Comments, and Feedback

#### Memorandum

To: Idaho Water Resource Board

From: Neeley Miller, Planning & Projects Bureau

Date: May 20, 2024

Re: PBAC Update

Action: no action at this time

Representatives from the Palouse Basin Aquifer Committee will provide an update on their efforts to find an alternative water supply.

# Palouse Basin Alternate Supply Project

# Idaho Water Resource Board

pool, generating additional power in the process. The upper reservoir could also be tapped for water for this area.

We've supported the idea of a study of a suctace-water supply for the area, because it seems likely that such a supply will be needed sometime in the future. Opponents of the plan make some good points, however. Farmers in the area fiercely oppose the idea of taking several thousand acres of productive farmland out of operation. Some hydrogeologists at the University of Idaho and elsewhere say that studies in-

P-NWRC Members:

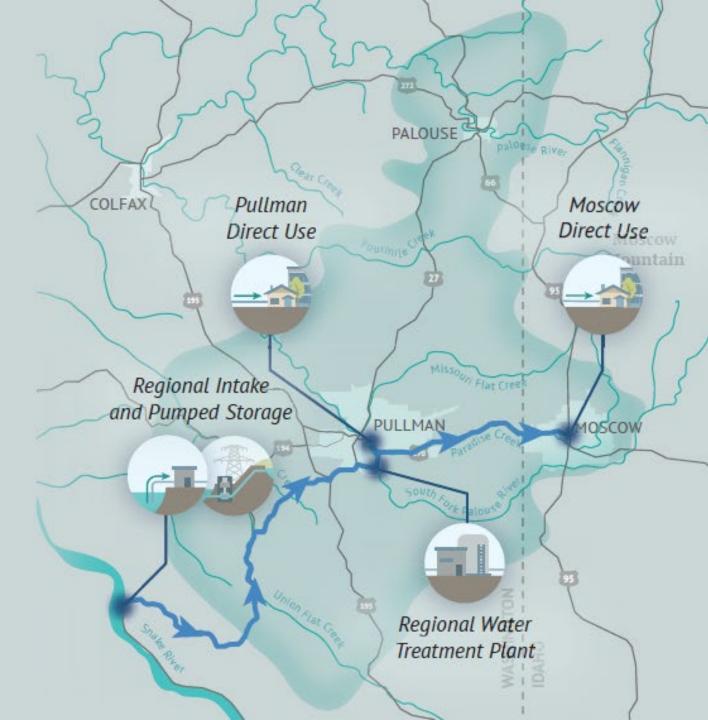

Pue to recent "controversy" And A letter dated 3/24/76 from OPAL, I Suggest we better decide soon what the suture of our Committee is to be. I further suggest that we assess what our Adjuinistrators' views Are. If any Agree in principle with the CALL Letter. I'm for Abandoning surther work. If A study Committee can't study, to with it all.

Direct Use of the Snake River:

Surface water would be diverted from the Snake River and conveyed to a new regional water treatment plant. There it would be treated and conveyed into the existing municipal water system for Pullman and WSU. An additional pipeline would allow treated water to be conveyed to Idaho into the existing municipal system for Moscow and UI.

Due to the topography change from the Snake River to the Palouse region, the potential for an off-channel pumped storage reservoir and hydropower facility would be considered to help offset costs and create additional power for the region.

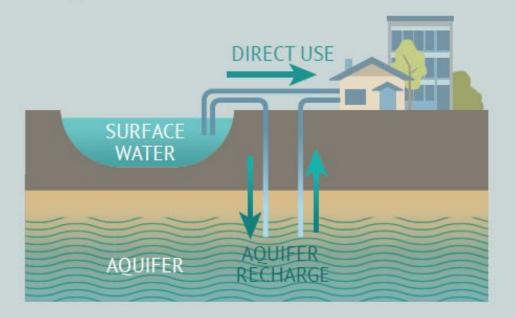

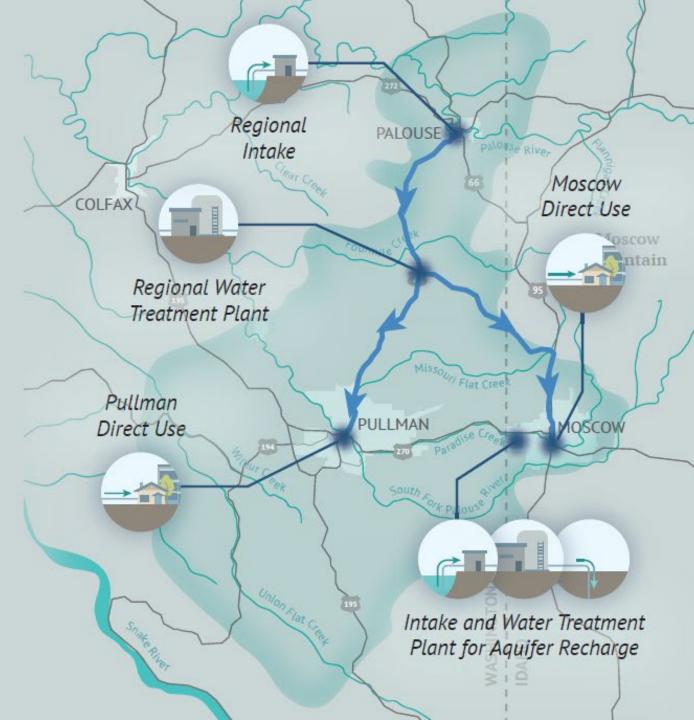

#### Direct Use of the North Fork of the Palouse River:

Surface water would be diverted from the North Fork of the Palouse River near Palouse and conveyed to a new regional treatment plant. There it would be treated and conveyed into the existing municipal water system for Pullman and WSU. An additional pipeline would allow treated water to be conveyed to Idaho into the existing municipal system for Moscow and UI.

## Aquifer Recharge from the South Fork of the Palouse River or Paradise Creek:

Surface water would be diverted from the South Fork of the Palouse River or Paradise Creek, treated, and injected into the aquifer system via recharge wells.

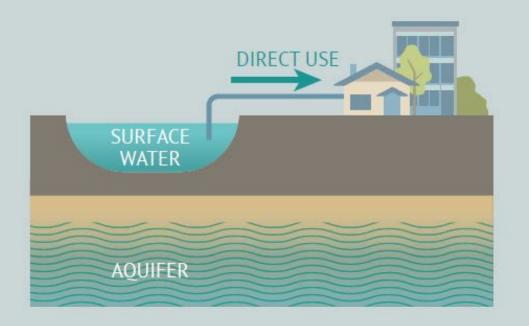

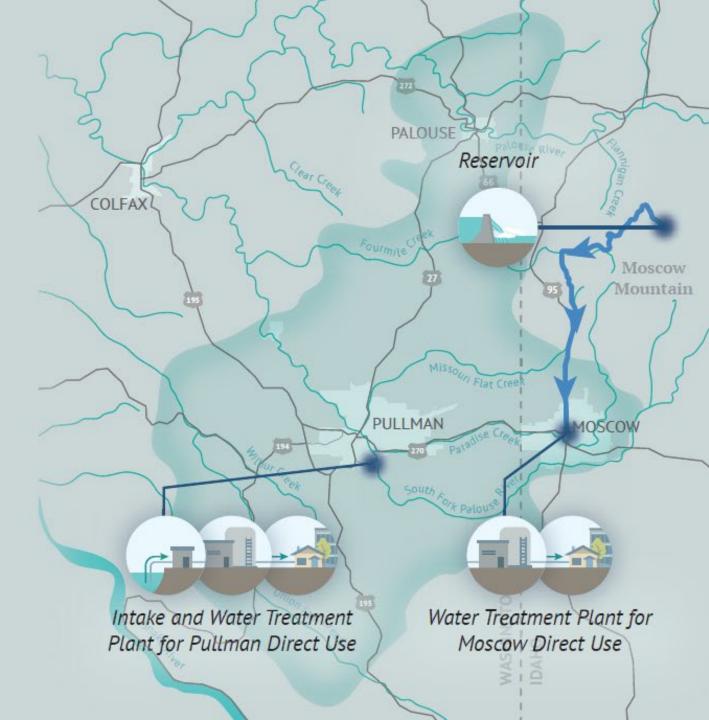

#### Direct Use of Flannigan Creek:

Surface water from Flannigan Creek would be stored behind a new reservoir. Water would be pumped to Moscow to be treated and conveyed into the existing municipal water system for Moscow and UI.

#### Direct Use of the South Fork of the Palouse River:

Surface water would be diverted from the South Fork of the Palouse River, treated, and conveyed into the existing municipal water system for Pullman and WSU.

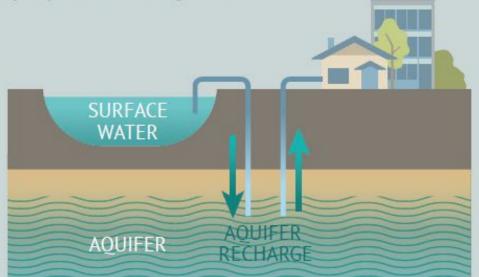

Aquifer Recharge from the South Fork of the Palouse River: Surface water would be diverted from the South Fork of the Palouse River in Pullman, treated, and injected into the aquifer system via recharge wells.

#### Aquifer Recharge from Paradise Creek:

Surface water would be diverted from Paradise Creek in Moscow, treated, and injected into the aquifer system via recharge wells. **Pullman Wastewater Reuse:** Using treated wastewater for irrigation in Pullman.

Moscow Wastewater Reuse: Using treated wastewater for passive aquifer recharge in Moscow.

Additional Water Conservation: Implementing conversation measures resulting in 15% less water than currently being used.

### NORTH IDAHO ADJUDICATION

- Nearly 8300 claims for CFPRBA
- Basin 96 Second Round Service, Filing deadline May 17, 2024
- New adjudication agent
- KRBA legislative approval, Director petition, claims-taking 2026

PRBA & CFPRBA Claims & Recommendations

## APPLICATIONS FOR PERMIT RECEIVED BY REGION

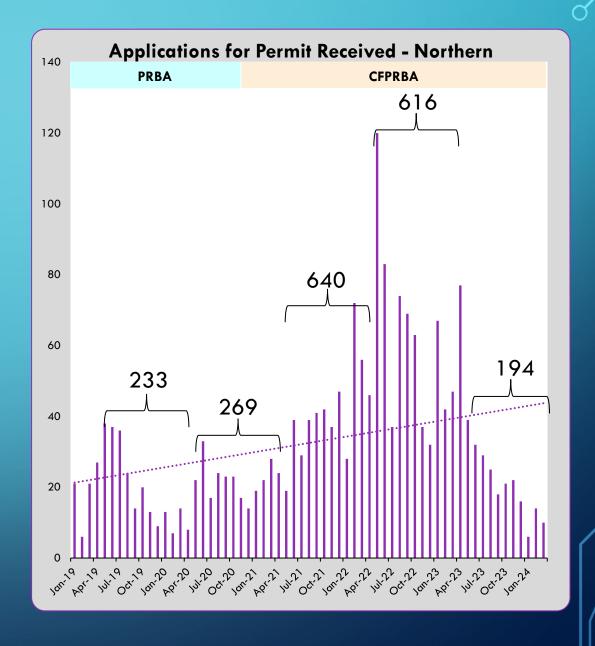

Eastern
 Southern
 Western
 Northern

## WATER RIGHT PERMITS

- Adjudication impacts permits
- Fewer incoming applications
- Fully staffed allocations group
- RAFN applications
- Boundary County Outreach

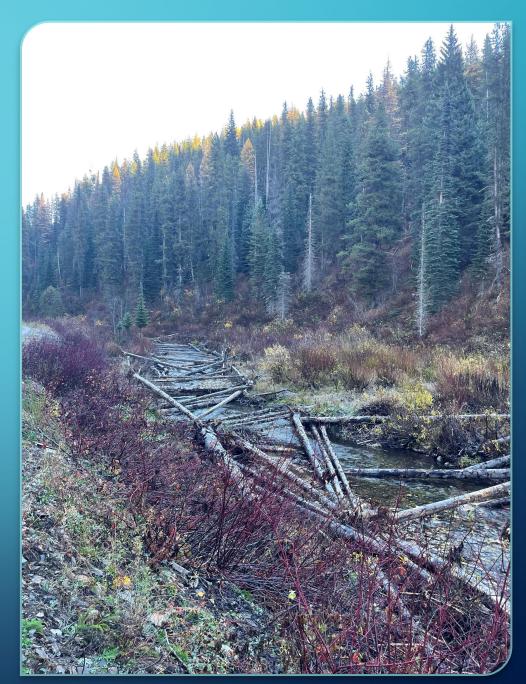

## WELL CONSTRUCTION

- Scott started in May of 2021
- Good rapport with drillers, presentations
- Inspection rate of 42%
- Helps to meet 30% Department-wide goal

### STREAM CHANNEL PROTECTION PROGRAM

- New specialist in January 2022
- Neighborly complaints (daily)
- 60-day permit turn-around time
- 76% inspection rate, IDWR met 40% strategic benchmark goal
- Many restorations

Red Ives Creek, tributary to St. Joe River

## DAM SAFETY

- Inspections shared effort with staff elsewhere in Dept.
- Mine Tailings Impoundment Structures
- Staffing

Spring Valley Dam near Troy, ID

## HYDROGEOLOGY

- Characterization of the aquifers high priority – Boundary County
- Increased monitoring and expansion of network – new transducers
- New Staff
- Regional aquifers status

## **REGIONAL SUCCESSES**

- Adjudication switching gears
- Regional reset and catchup
- Staffing
- Successful outreach, sets stage for Kootenai River Basin Adjudication

Location: Clearwater River near Orofino

## **REGIONAL CHALLENGES**

### • Decline of regional aquifers

## NEXT STEPS FOR NORTHERN

- Adjudication recommendations
- Allocations filings
- RAFN applications for water providers
- Expanded hydrogeologic monitoring
- Continued public outreach

Deer Creek Dam, East of Dworshak Dam

### Memorandum

То:	Cynthia Bridge Clark, Planning and Projects Bureau Chief
From:	Kara Ferguson, Technical Hydrologist, Michelle Richman, Northern Region Manager
Date:	May 9, 2024
Re:	Idaho Water Resource Board Presentation – May 23, 2024

IDWR Hydrology and Northern Region staff will be providing the Idaho Water Resource Board with a presentation on the Priest Lake Outlet Dam operations. Areas of focus will include hydrologic considerations as well as operational guidance and. We will also discuss actual operations with the recent modifications in place.

# Priest Lake Outlet Dam Operations

Presented to the Idaho Water Resource Board

May 23, 2024

Kara Ferguson (Hydrologist, Technical) Michelle Richman (Northern Region Manager)

### Purpose

- Hydrologic Considerations
- Other Key Considerations for Operations
- Operation of Modified Dam
- 2024 Operations
- Next Steps
- Conclusions

### Idaho Code 70-507

- "…that the water surface level of Priest Lake shall be maintained at 3.0 feet during the recreation season when the water supply to Priest Lake is <u>plentiful, meaning normal to wet years</u>,"
- "and between 3.0 feet and 3.5 feet during the recreation season when the water supply to Priest Lake is lacking, meaning dry and marginally dry years..."

### Hydrologic Considerations

Consideration						Timef	rame					
	Jan	Feb	Mar	Apr	Мау	June	July	Aug	Sept	Oct	Nov	Dec
Basin Conditions												
Water Supply Forecast												
Inflow Timing												
Fill Guidance												
Minimum Lake Level

### National Weather Service Three-Month Outlook

- Northern Idaho currently categorized as "moderate drought" conditions
- NWS June-July-August Outlook
  - 50-60% chance Above Normal Temperatures
  - 40-50% chance Below Normal Precipitation

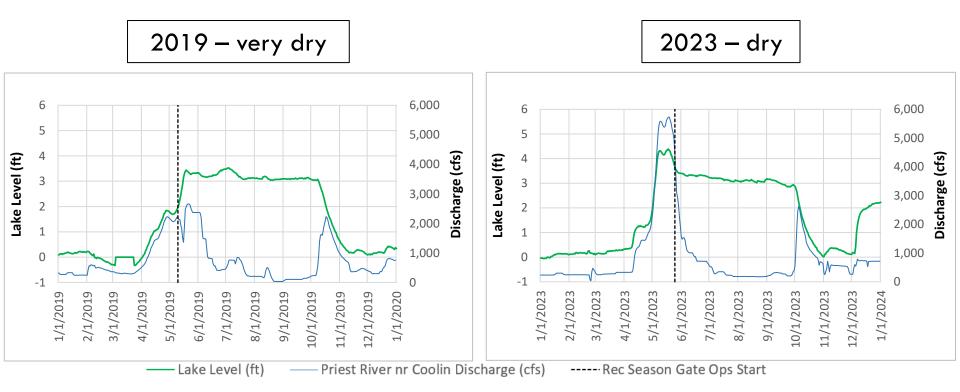

## May-September Streamflow Volume

### Fill Guidance

- Fill Operations Scenarios
  - Bring lake to minimum level
  - Catch lake level after peak inflow

# Challenges

- Forecast limitations
  - No outflow data between 2006-2016
  - Evaporation
  - Multi-year drought
  - Melt and inflow timing
- Variable conditions
- No measured, real-time inflow data

Granite Creek at Reeder Bay Road near Nordman, ID

# Priest Lake Operational Guidance

- I.C. §70-507 Priest Lake (updated 2018)
  - May exceed 3.0 ft during spring runoff
  - Maintain between 3.0 and 3.5 ft through recreation season (interpreted to begin on Memorial Day weekend)
  - Other times of year, maintain between 0.1 and 3.0 ft
- □ Governor's Storage Water Right 97-2020
  - 800 KAF, Recreation Storage
  - Priority date: 1/24/1927
- Idaho Water Resource Board's Minimum
   Stream Flow Water Right 97-7380, 10/22/1997
- Guideline from prior operations agreements to maintain a minimum of 60 cfs discharge during summer months

# Priest River Basin Plan Guidance

### Updated in 2003

- Fall Release gradual, < 1200</li>
   cfs flow change per 24 hours
- Fall release not prior to October 1 and, if possible, not until the second weekend in October
- Lake level to reach natural (unregulated) level <u>by early</u>
   <u>November</u> for kokanee spawning
- IF&G to report date in November to achieve natural lake level; (reported in 1972 report as November 1)

Priest River below Outlet Dam

# Stakeholder Feedback

- DEQ, Pr. R. Watershed Group, IF&G, DOL, Lakes Commission, Resorts and Residents, Others
- Lake Considerations
  - Docks, beach frontage, recreation
  - Timing of drawdown
- <u>River Considerations</u>
  - What is the acceptable minimum flow?
  - Significance of 60 cfs?
  - Sudden fluctuation in river
  - River temperatures
  - Fish passage through dam

# **Operations Communications**

- IDWR informs IF&G, DOL, DEQ, Lakes Commission, & Albeni Falls Dam in Fall and Spring of high-level operations
- Email distribution via
  - Lakes Commission
  - Priest River Watershed Grp
- IDWR web site
- IDWR Facebook

Floodplain Management -

Flood Control Districts -

#### Lake Management

#### **Priest Lake**

The Priest Lake Outlet Dam, which was constructed in 1978, is owned by IDWR an operated by a contractor on behalf of IDWR.

#### Notices

#### May 15, 2023:

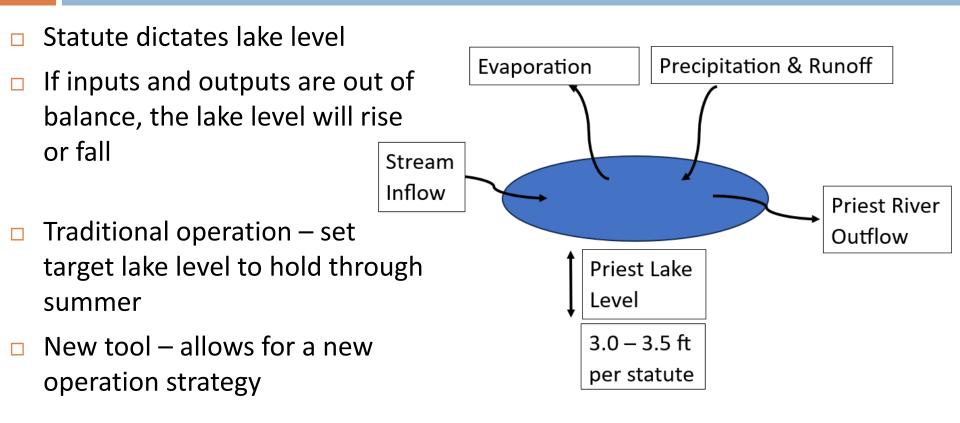

May's warm temperatures melted much of the snow in the Priest Lake basin. Priest Lake levels peaked once last week and could peak again as snow continues to melt.

As of today, the lake level is 4.21 feet (ft), with and flow through the dam is 5360 cubic feet per second (cfs). Department staff continue to watch two SNOTEL sites, Bunchgrass Meadow and Hidden Lake, both at an elevation of about 5000 ft. The general rule of thumb is peak flow into Priest Lake occurs when the Hidden Lake site has about 75% melt-out and when the Bunchgrass Meadow site has about 60% melt-out. These melt-out conditions (75% and 60%) are approaching with the warmer temperatures. Below are links to the SNOTEL charts for both the Bunchgrass Meadow and Hidden Lake sites.

Bunchgrass Meadow: AWS Plot (usda.gov) Hidden Lake: AWS Plot (usda.gov)

Once peak inflow and a corresponding peak lake level occur, the gates will be operated to maintain the lake level for summer recreation. The Department's hydrologists are predicting a dry year, and the Department will aim to stabilize the lake level at 3.2 to 3.3 ft through the summer

# **Traditional Summer Operations**

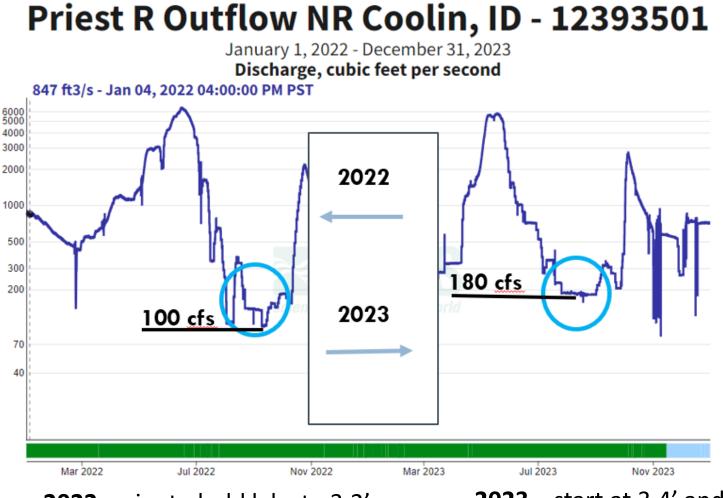

### 2022 Gate Height Increase

- Improvements to all 11 gates
- Six-inch gate height increase in place Spring 2022

# 2022-2023 Operations Strategies

- **2022** – aim to hold lake to 3.2'

- **2023** – start at 3.4' and allow evaporation to bring lake down

## 2024 Lake Level Planning

- Fill by Memorial Day weekend
- Aim for 3.4-3.5 feet by early Summer
- Through Summer, allow evaporation to drop the lake level while aiming to preserve river flow

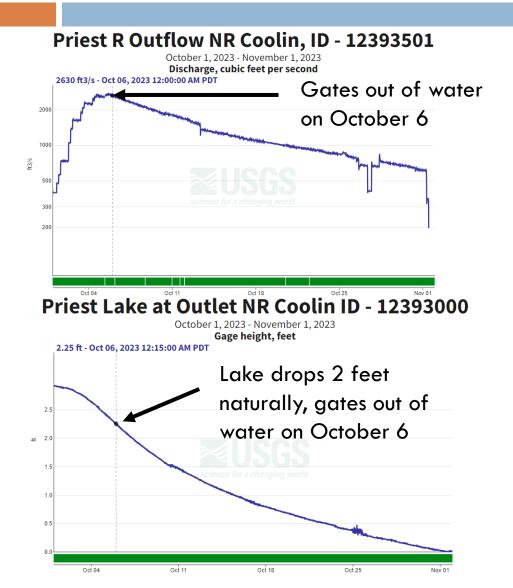

### Fall Release of Lake Level

[The lake level shall be held]"until
the time after the close of the main
recreational season, as determined by
<pre>said board", [prior to releasing it</pre>
below 3.0 feet.] I.C. §70-507

Take-aways:

- Many varying interpretations.
- A start date of <u>October 1</u> in 2023 achieved a drawdown by <u>November 1</u>.

### Fall Lake Release - 2023

 Started Gate operations on October 1
 Gates out of water by October 6

- $\Box$  Lake ~ 2' on Oct. 6
- Lake needs 3 weeks to recede at run of river
- Lake reached .1 feet by November 1

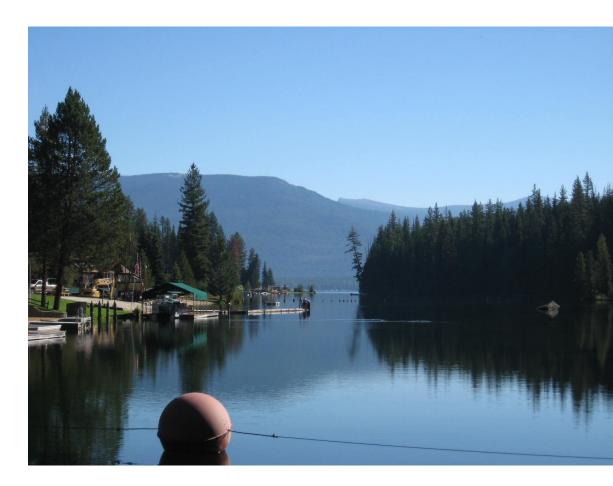

# Flexibility in Gate Configuration

- Dam allows for fish passage
- Seek agency feedback gate configuration

### Next Steps

- Studies &
   Stakeholder
   Feedback
- Propose New
   Gage on Granite
   Creek
- Safety
   Improvements and
   Maintenance

### Conclusions

Still testing the waters Modifications enable balancing of river and lake interests Seeking stakeholder input

### MINUTES MEETING NO. 4-24

Water Center Conference Rooms 602 B-D 322 E. Front Street BOISE

> March 28, 2024 Work Session

#### Agenda Item No. 1: Roll Call

Chairman Raybould called the work session meeting to order at 8:06 AM (MT) in Boise, Idaho. The meeting was livestreamed on the Board's YouTube Channel online. Board members present were Al Barker (joined after item 5), Jo Ann Cole-Hansen, Marcus Gibbs, Patrick McMahon, Brian Olmstead, Dean Stevenson, Dale Van Stone, and Chairman Jeff Raybould.

<u>IDWR staff members present were</u>: Brian Patton, Cynthia Bridge Clark, Mathew Weaver, Wesley Hipke, Mary Condon, Matt Anders, Sean Vincent, David Hoekema, Ethan Geisler, Neal Farmer, Amy Steimke, Rob Whitney, Shelley Keen, Tito Sanabria, Collin Macheel, Kara Ferguson, Erik Boe, Craig Tesch, Steve Stuebner, and Jennifer Strange.

<u>Guests present were:</u> Neil Shippy, Scott Pugrud, Kresta Davis, John Simpson, John Williams, Paul Arrington, and Ann Yribar.

#### Agenda Item No. 2: Social Media Strategy

Steve Stuebner discussed the department's social media strategy. There was some discussion about handling comments. He displayed some of the recent posts on the Facebook page and examples of posts from other state agencies.

#### Agenda Item No. 3: Groundwater Modeling update

Sean Vincent discussed groundwater modelling process and all modelling projects across the state.

#### Agenda Item No. 4: Water Supply Meeting Update

David Hoekema shared snowpack conditions across the state and provided a discussion on basin-wide seasonal volumes and drought conditions.

The board took a short break. Immediately following the break, Director Weaver announced that Sean Vincent would soon be retiring. Appreciation was expressed.

#### Agenda Item No. 5: Stream and Return Flow Monitoring

Tito Sanabria and Collin Macheel discussed the Eastern Snake Plain surface water monitoring program. They highlighted collaboration and the importance of telemetry, including data quality and calibration.

#### Agenda Item No. 6: Rental Pool Procedures

Mary Condon presented amended rental pool procedures for Water District 01-Upper Snake, Water District 65-Payette, and Water District 65K-Lake Fork. Mr. Barker asked for a summary of the discussion on proposed changes to the last official rules in WD 65.

#### Agenda Item No. 7: Administrative Rules Update

Erik Boe updated the board on four active rulemakings, including well construction standards and injection well rules.

#### Agenda Item No. 8: Big Wood GWMA Management Plan Update

Shelley Keen provided an update on Wood River Groundwater Management Area management plan. He discussed current progress and future plans for the committee. There was discussion about the board's commitment to the CIEF (Conservation, Infrastructure, and Efficiency Fund) committee.

#### Agenda Item No. 9: Potential Legislation of Interest

Garrick Baxter provided the dispositions of several pieces of legislation of interest to the board.

#### Agenda Item No. 10: Non-Action Items for Discussion

There were no other items for discussion.

#### Agenda Item No. 11: Adjourn

Dean Stevenson moved to adjourn. Mr. Van Stone seconded. The meeting adjourned at 11:45 AM.

#### March 29, 2024 Board Meeting No. 4-24

At 8:30 AM (MT) Chairman Raybould called the meeting to order in Boise, Idaho. The meeting was livestreamed on the Board's YouTube Channel online upon adjournment of the executive session.

#### Agenda Item No. 1: Roll Call

Board Members Present Albert Barker, online video only—audio didn't work Jo Ann Cole-Hansen, Vice Chairman Marcus Gibbs Patrick McMahon Brian Olmstead Dean Stevenson, Secretary Dale Van Stone

Meeting Minutes 4-24 March 28-29, 2024 Jeff Raybould, Chairman Staff Members Present Mathew Weaver, Director Cynthia Bridge Clark Mary Condon Neeley Miller Meghan Carter Mike Morrison

Brian Patton, Deputy Director/Exec. Manager Wesley Hipke Dylan Wimer Amy Cassel Justin Ferguson

*Staff Members Present Online* Mike Morrison

Guests Present Scott Campbell Bryan Horsburgh Chris Keith Nick Smith

Ann Yribar Neil Shippy Erik Boschulte

#### Agenda Item No. 2: Executive Session

Mr. Stevenson moved to resolve into executive session pursuant to Idaho Code 74-206(1) subsection (f) to communicate with legal counsel regarding legal ramifications of and legal options for pending litigation or controversies not yet being litigated but imminently likely to be litigated and pursuant to Idaho Code 74-206(1) subsection (d) to consider records that are exempt from disclosure. Mr. Van Stone seconded. <u>Roll call vote</u>: Mr. Barker, unavailable; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, aye. 7 ayes. The motion passed.

Scott Campbell spoke on the topic of Nez Perce Water Rights. Ann Yribar spoke on City of Pocatello WD 01 Rental Pool Litigation. The topic of ARPA Funding was not discussed.

Mr. Stevenson moved to resolve out of executive session at 9:07 AM. Mr. McMahon seconded. <u>Voice</u> <u>vote</u>. All in favor. The motion carried. The meeting was closed to the public, and no actions were taken during the executive session.

#### Agenda Item No. 3: Agenda and Approval of Minutes 1-24, 2-24, and 3-24

The agenda did not have changes. The minutes for meetings 1-24, 2-24, and 3-24 were available for approval. Mr. McMahon moved to approve the minutes presented. Mr. Gibbs seconded. <u>Voice vote</u>. All in favor. The motion carried.

#### Agenda Item No. 4: Public Comment

There was no public comment.

#### Agenda Item No. 5: Financial Report

Neeley Miller provided the Board's financial report. The accounts as of February 29, 2024, were: <u>Secondary Aquifer Fund</u>: cash balance \$39,198,253, committed/earmarked but not disbursed \$30,321,408, and uncommitted balance \$8,876,845; <u>Revolving Development Account</u>: cash balance \$35,939,252, committed balance \$33,014,247, loan principal outstanding \$19,082,964, and

uncommitted balance \$2,925,005, and <u>Water Management Account</u>: cash balance \$291,283,543, total obligated funds \$257,754,803, and unobligated funds \$33,528,740.

Total committed/earmarked/ obligated but not disbursed \$321,090,458; total loan principal outstanding \$19,082,964; and total uncommitted/unobligated balance \$45,330,590.

<u>ARPA</u>: committed per HB 769 is \$100,000,000; committed per SB 1181 is \$24,497,543; expended \$76,387,526; obligated \$88,884,921; and unobligated (\$40,774,903).

The obligated balance in the Water Management Account includes the \$20M legislative appropriation per HB 285 (FY 2019) for the Anderson Reservoir Enlargement and/or Mountain Home Air Force Base Water Supply Project. The obligated balance also includes \$50M for large infrastructure projects per Senate Bill 1121 (FY 2021) for the Anderson Ranch enlargement, Mountain Air Force Base Water Supply Project, ESPA Managed Aquifer Recharge Program, other projects identified by the IWRB.

The Water Management Account unobligated balance also includes \$150M per HB 361 to be used for expenditures, loans, or grants for water projects, including studies to address water sustainability, rehabilitate or improve aging water infrastructure, or support flood management. The legislature indicated that the IWRB may provide up to one-third of this money for grants.

Mr. Patton commented about Senate Bills 1411 and 1269.

#### Agenda Item No. 6: Anderson Ranch Dam Raise Update

Cynthia Bridge Clark introduced Bryan Horsburgh of Bureau of Reclamation who discussed progress on design packages and environmental compliance on the Anderson Ranch Dam Raise.

Ms. Bridge Clark discussed a draft resolution to authorize additional expenditures from the ARPA State Fiscal Recovery Fund, up to \$950,000, for the remaining activities defined in Modification No. 3 to the MOA

Mr. Olmstead moved to adopt the resolution. Mr. Stevenson seconded. <u>Roll call vote</u>: Mr. Barker, absent; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, aye. 7 ayes. The motion passed.

#### Agenda Item No. 7: Priest Lake Dam Modification Update

Mike Morrison introduced engineer Dylan Wimer. He shared the finishing touches to the Priest Lake Dam modification construction and named future needs for dam maintenance and operations. There was some discussion on automation options.

#### Agenda Item No. 8: Mountain Home Air Force Base Water Resilience Project Update

Mike Morrison introduced Nick Smith with Stantec and Erik Boschulte with IMCO Construction.

He discussed reasons for a change order for \$350,502.00. He provided a draft resolution. There were questions about the pumps for the station.

Mr. Van Stone moved to adopt the resolution. Mr. Gibbs seconded. <u>Roll call vote</u>: Mr. Barker, absent; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, aye; and Chairman Raybould, aye. 7 ayes. The motion passed.

#### Agenda Item No. 9: Rental Pool Procedures & Appointments (WD 01, 63, 65, 65K, 74)

Mary Condon shared a draft resolution for Water District 01-Upper Snake River amended rental pool procedures and appointments. Director Weaver provided his recommendation.

Mr. Van Stone moved to approve the resolution for WD 01. Mr. McMahon seconded. <u>Voice vote</u>. All in favor. The motion carried.

Ms. Condon discussed a draft resolution for WD 63 Boise River rental pool procedures and appointments.

Mr. Olmstead moved to approve the resolution for WD 63. Mr. Gibbs seconded. <u>Voice vote</u>. All in favor. The motion carried.

Ms. Condon discussed a resolution to adopt updated procedures and appointments. Director Weaver stated he would recommend the procedures that Water District 65-Payette River amended.

Mr. Gibbs moved to approve the resolution for WD 65. Mr. Van Stone seconded. <u>Voice vote</u>. All in favor. The motion carried.

Ms. Condon presented amended rental pool procedures. Director Weaver had looked over the amended procedures. Resolution reappointed committee for Water District 65K-Lake Fork and adopted amended procedures.

Mr. McMahon moved to approve the resolution for WD 65K. Mr. Olmstead seconded. <u>Voice vote</u>. All in favor. The motion carried.

Ms. Condon shared a draft resolution to reappoint the local committee for the WD 74-Lemhi River Basin Rental Pool.

Mr. Van Stone moved to approve the resolution for WD 74. Mr. McMahon seconded. <u>Voice vote</u>. All in favor. The motion carried.

#### Agenda Item No. 10: Regional Water Sustainability Project Priority List

#### a. <u>Proposed List Update</u>

Neeley Miller shared an updated list for priority projects. Mr. Olmstead had a question about Minidoka dam raise. Mr. Patton discussed options for that project. Ms. Cole-Hansen stated that the Finance Committee recommended the updated list.

Ms. Cole-Hansen moved to approve the resolution to update the RWSP List. Mr. Van Stone seconded. <u>Voice vote</u>. All in favor. The motion carried.

#### b. Proposed Criteria Update

Neeley Miller discussed a proposed criteria update. The Finance Committee recommended the updates. He shared the updated criteria and a draft resolution.

Ms. Cole-Hansen moved to approve the resolution to update the RWSP List criteria. Mr. McMahon seconded. <u>Voice vote</u>. All in favor. The motion carried.

#### Agenda Item No. 11: Regional Water Sustainability Project Contract Terms and Conditions for New York Canal Rehabilitation Project

Neeley Miller presented terms and conditions for the New York Canal Rehabilitation Project. He provided a draft resolution. There was discussion that the project would be considered eligible for ARPA funding. Mr. Patton stated that the Attorney Generals' office review was pending for that determination. They recommended the resolution be amended to add "pending review" language.

Mr. Gibbs moved to approve the resolution with the mentioned amendment. Mr. McMahon seconded. <u>Voice vote</u>. All in favor. The motion carried.

#### Agenda Item No. 12: Director's Report

Director Weaver shared thoughts on social media and discussed the policy related to public comments. He provided an update on employee compensation. He provided an update on ESPA Area of Common Groundwater. A map was shown on screen. He mentioned that seven new mitigation plans from groundwater districts have been received. He explained how SB 1341 modified the area of common groundwater boundary. He provided updates on the methodology order and joint runoff forecast timeline.

#### Agenda Item No. 13: Non-Action Items for Discussion

There were no other items for discussion.

Wesley Hipke had a brief update on ESPA recharge.

#### Agenda Item No. 14: Next Meeting and Adjourn

Mr. Van Stone moved to adjourn. Mr. Stevenson seconded. <u>Voice vote</u>. All ayes. Motion carried. Meeting adjourned at 11:00 AM (MT).

Respectfully submitted this 24<sup>th</sup> day of May 2024.

Dean Stevenson, Secretary

### MINUTES MEETING NO. 5-24

Water Center Conference Room 602 B 322 E. Front Street BOISE

May 16, 2024 Special Board Meeting No. 5-24

At 4:00 PM(MT) Chairman Raybould called the meeting to order in Boise, Idaho. The meeting was livestreamed on the Board's YouTube Channel, following the executive session. Online participants joined via Zoom.

#### Agenda Item No. 1: Roll Call

Board Members Present Albert Barker—online Jo Ann Cole-Hansen, Vice Chairman—online Marcus Gibbs—online Patrick McMahon—online Brian Olmstead—online Dean Stevenson, Secretary—online Dale Van Stone—absent Jeff Raybould, Chairman—online

Staff Members Present Brian Patton, Executive Manager Cynthia Bridge Clark, Bureau Chief Mike Morrison Justin Ferguson Meghan Carter Jennifer Strange

Guests Present Garrett Hensley Ann Yribar-online

#### Agenda Item No. 2: Executive Session

Mr. Stevenson moved to resolve into executive session pursuant to Idaho Code 74-206(1) subsection (f) to communicate with legal counsel regarding legal ramifications of and legal options for pending litigation or controversies not yet being litigated but imminently likely to be litigated. Mr. Barker seconded. <u>Roll call vote</u>: Mr. Barker, aye; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, absent; and Chairman Raybould, aye. 7 ayes. The motion passed.

Meghan Carter spoke on the topic of MHAFB Water Resilience Project Easements.

Mr. Stevenson moved to resolve out of executive session at 4:26 PM. Mr. Barker seconded. <u>Voice vote</u>. All in favor. The motion carried. The meeting was closed to the public, and no actions were taken during the executive session.

#### Agenda Item No. 3: MHAFB Water Resilience Project Easements

Cynthia Bridge Clark discussed a draft resolution to grant signatory authority for easements, permissions, and other related contracts for the Mountain Home Air Force Base project.

Ms. Cole-Hansen moved to adopt the resolution. Mr. Gibbs seconded. <u>Roll call vote</u>: Mr. Barker, aye; Ms. Cole-Hansen, aye; Mr. Gibbs, aye; Mr. McMahon, aye; Mr. Olmstead, aye; Mr. Stevenson, aye; Mr. Van Stone, absent; and Chairman Raybould, aye. 7 ayes. The motion passed.

#### Agenda Item No. 4: Non-Action Items for Discussion

There were no other items.

#### Agenda Item No. 5: Next Meeting and Adjourn

Mr. Stevenson moved to adjourn. Ms. Cole-Hansen seconded. <u>Voice vote</u>. All ayes. Motion carried. Meeting adjourned at 4:35 PM (MT).

Respectfully submitted this 24<sup>th</sup> day of May 2024.

Dean Stevenson, Secretary

Jennifer Strange, Administrative Assistant II

### Memorandum

ď

From: Neeley Miller, Planning & Projects Bureau

Date: May 19, 2024

Re: Financial Status Report

As of **March 31<sup>st</sup> 2024** the IWRB's available and committed balances are as follows:

Secondary Aquifer Fund: Cash Balance Committed/earmarked but not disbursed Uncommitted Balance	\$38,361,952 \$29,485,107 \$8,876,845	
Revolving Development Account: Cash Balance Committed Balance Loan principal outstanding Uncommitted Balance	\$35,836,499 \$32,918,051 \$18,864,804 \$2,918,448	
Water Management Account Cash Balance Total Obligated Funds Unobligated Funds	\$290,349,765 \$183,278,863 \$107,070,902	
Total committed/earmarked/obligated but not disbursed Total loan principal outstanding Total uncommitted/unobligated balance		\$364,548,216 \$18,864,804 \$118,866,195
Total loan principal outstanding	\$100,000,000 \$24,497,543 <u>\$25,502,500</u> \$150,000,043 \$82,234,932 <u>\$78,033,115</u> \$160,268,047	\$18,864,804 \$118,866,195

- The obligated balance in the Water Management Account includes the \$20M legislative appropriation per HB 285 (FY 2019) for the Anderson Reservoir Enlargement and/or Mountain Home Air Force Base Water Supply Project. The obligated balance also includes \$50M for large infrastructure projects per Senate Bill 1121 (FY 2021) for the Anderson Ranch enlargement, Mountain Air Force Base Water Supply Project, ESPA Managed Aquifer Recharge Program, other projects identified by the IWRB.
- The Water Management Account unobligated balance also includes \$150M per HB 361 to be used for expenditures, loans, or grants for water projects, including studies to address water sustainability, rehabilitate or improve aging water infrastructure, or support flood management. The legislature indicated that the IWRB may provide up to one-third of this money for grants.

\* Anticipate ARPA appropriation for FY 2025 of \$50,000,000 to be received on or shortly after July 1, 2024; Anticipate ARPA appropriation for FY 2026 of \$50,000,000 to be received on or shortly after July 1, 2025. These appropriations would bring the total ARPA appropriation to \$250,000,000.

Re: Proposed Secondary Aquifer Planning, Management & Implementation Fund – FY 2025 Budget

#### **REQUIRED ACTION:** Consider resolution for Proposed FY 2025 Secondary Aquifer Fund Budget

On May 13, 2024, the Finance Committee discussed the proposed Secondary Aquifer Planning, Management & Implementation Fund budget for FY2025 and recommended the IWRB consider the attached budget for adoption.

#### Attachments:

1) Proposed Secondary Aquifer Fund – FY 2025 Budget & Draft Resolution

#### **BEFORE THE IDAHO WATER RESOURCE BOARD**

IN THE MATTER OF STATEWIDE WATER SUSTAINABILITY AND AQUIFER STABILIZATION, AND THE SECONDARY AQUIFER STABILIZATION, AND SECONDARY AQUIFER PLANNING, MANAGEMENT, AND IMPLEMENTATION FUND FISCAL YEAR 2025 BUDGET RESOLUTION TO PASS FISCAL YEAR 2025 BUDGET

1 WHEREAS, House Bill 547 passed and approved by the 2014 Legislature allocates \$5 million 2 annually through 2019 from the Cigarette Tax to the Idaho Water Resource Board's (IWRB) Secondary 3 Aquifer Planning, Management, and Implementation Fund (Secondary Aquifer Fund) for statewide aquifer 4 stabilization; and

5 WHEREAS, House Bill 256 passed and approved by the 2019 Legislature allocated \$5 million in 6 ongoing General Fund dollars to the IWRB's Secondary Aquifer Fund for statewide water sustainability 7 and aquifer stabilization; and

8 WHEREAS, un-allocated funds already in the Secondary Aquifer Fund will be carried forward into 9 the Fiscal Year 2025 budget; and

WHEREAS, many aquifers across Idaho are declining or have existing or potential conjunctive
 administration water use conflicts, including the Eastern Snake Plain Aquifer, Mountain Home Aquifer,
 Wood River Valley Aquifer, Big Lost Aquifer, Raft River Aquifer, Malad Valley Aquifer, Treasure Valley
 Aquifer, Rathdrum Prairie Aquifer, Palouse Basin Aquifer, Lewiston Plateau Aquifer, and others; and

WHEREAS, the State of Idaho relies on spring discharge from the Eastern Snake Plain Aquifer (ESPA) through the Thousand Springs to assist in meeting the minimum streamflow water rights at the Murphy Gage established under the Swan Falls Agreement; and

WHEREAS, prior to the initiation of significant aquifer stabilization efforts around 2014, the ESPA
 had been losing approximately 216,000 acre-feet annually from aquifer storage since the 1950's resulting
 in declining ground water levels in the aquifer and declining spring flows from the aquifer; and

- 20 WHEREAS, during parts of 2013 and 2014 flows at the Murphy Gage approached the minimum 21 flow, and in 2015 flows at the Murphy Gage went below minimum flows; and
- 22 WHEREAS, the ESPA experienced conjunctive administration water use conflicts over the past two 23 decades that had the potential to significantly impact Idaho's economy; and
- 24 WHEREAS, on June 30, 2015 members of the Idaho Ground Water Appropriators entered into an 25 agreement with the Surface Water Coalition whereby the ground water users agreed to reduce their 26 consumptive use from the ESPA by 240,000 acre-feet annually and take other actions, and

WHEREAS, the 2016 Idaho Legislature passed and approved Senate Concurrent Resolution 138
 supporting this agreement; and

29 WHEREAS, the State Water Plan includes a goal to accomplish managed recharge in the ESPA 30 averaging 250,000 acre-feet annually; and

31 WHEREAS, the 2016 Idaho Legislature passed and approved Senate Concurrent Resolution 136 32 directing the IWRB to develop the capacity to achieve 250,000 acre-feet of annual average managed 33 recharge to the ESPA by December 31, 2024; and

34 WHEREAS, in 2018 the cities on the ESPA entered into an agreement with the Surface Water 35 Coalition and the Idaho Ground Water Appropriators whereby the cities agreed to enhance the ESPA by 36 an average of 7,650 acre-feet annually; and

WHEREAS, the 2019 Idaho Legislature passed and approved House Concurrent Resolution 10supporting this agreement; and

WHEREAS, the ground water use reduction and managed recharge are together designed tostabilize and then recover the ESPA; and

41 WHEREAS, a 2016 study commissioned by the IWRB predicts the growing Treasure Valley 42 population could result in an increase in Domestic, Commercial, Municipal, and Industrial water-demand 43 ranging from 109,000 to 188,000 acre-feet per year by the year 2065; and

WHEREAS, the IWRB approved development of the Treasure Valley Ground Water Model in partnership with the U.S. Geological Survey to support future monitoring of ground water conditions, water use, and administration of ground water and surface water rights, and approved entering into an agreement with the U.S. Bureau of Reclamation to complete the Boise River Storage Feasibility Study to provide additional water supply through new surface water storage, and

WHEREAS, conjunctive administration water delivery calls have been made in the Big and Little
 Wood River Basins against junior-priority upstream ground water uses; and

51 WHEREAS, the Mountain Home aquifer is being over-drafted by about 30,000 acre-feet annually;

52 WHEREAS, the deep aquifer in the Palouse Basin has been declining for decades despite 53 aggressive conservation measures; and

54 WHEREAS, the Department of Water Resources recently enacted Ground Water Management 55 Areas in the Eastern Snake Plain Aquifer, Big Wood River Aquifer, Malad Valley Aquifer, Mountain Home 56 Aquifer and the Lewiston Plateau Aquifer in response to declining ground water levels in those aquifers; 57 and 58 WHEREAS, ground water levels in many aquifers are inadequate to sustain a supply of water for 59 surface and ground water irrigation, hydropower, municipal, industrial, and other uses, the curtailment 60 of which would cause severe economic harm to Idaho's economy; and

61 WHEREAS, the 2016 Idaho Legislature passed and approved Senate Concurrent Resolution 137 62 which recognized that stabilizing and enhancing aquifer levels is in the public interest, and directs the 63 IWRB to take actions in aquifers across the state to stabilize and enhance aquifer levels thereby 64 maintaining water supply for consumptive and non-consumptive uses and minimizing harm to Idaho's 65 economy arising from water supply shortages; and

66 WHEREAS, on May 13, 2024 the IWRB Finance Committee recommended the approval of a Fiscal 67 Year 2025 Budget for the use of available funds in the Secondary Aquifer Fund for statewide water 68 sustainability and aquifer stabilization purposes; and

69 NOW THEREFORE BE IT RESOLVED that the IWRB adopts the Fiscal Year 2025 Budget for the 70 continuously-appropriated Secondary Aquifer Planning, Management, and Implementation Fund as 71 shown in <u>Attachment A</u> to this resolution.

BE IT FURTHER RESOLVED that the budget may be adjusted if necessary based on the actual amount of Cigarette Tax funds received, interest income received, or the actual amount of carry-over from Fiscal Year 2024.

BE IT FURTHER RESOLVED that expenditures for identified ESPA managed recharge operations,
 investigations, and engineering for further ESPA managed recharge capacity development may proceed
 with no further approvals; however, the IWRB shall be kept apprised of such expenditures.

BE IT FURTHER RESOLVED that expenditures for monitoring in support of the Treasure Valley model and Big Lost Ground Water Model, and for hydrologic studies/monitoring in the Portneuf Basin/ Raft River Basin/Mid Snake Basin, for statewide surface water and aquifer monitoring, new monitoring wells and instrumentation for ESPAM data gaps, Lemhi/Palouse/Bear River water sustainability projects, to support the settlement in the Wood River Basin, professional assistance for securing federal funding, and administrative expenses may proceed with no further approvals; however, the IWRB shall be kept apprised of such expenditures.

BE IT FURTHER RESOLVED that expenditures for the Operations and Maintenance costs for the Cooperative Cloud Seeding Program may proceed with no further approvals; however, the IWRB shall be kept apprised of such expenditures. Further, it is the IWRB's stated goal that both the state and the water users financially participate with Idaho Power in the Cooperative Cloud Seeding Program.

BE IT FURTHER RESOLVED that the IWRB may modify this budget during Fiscal Year 2025 at a properly noticed meeting of the IWRB.

91

DATED this 24<sup>th</sup> day of May, 2024

Jeff Raybould, Chairman Idaho Water Resource Board

\*These items will require the IWRB pass an additional resolution to authorize funding. \*\*Since FY2019, \$3.5 M has been budgeted for ESPA Recharge Conveyance annually with the understanding that money budgeted but not spent within a fiscal year would stay committed and accrue for years when there is a large magnitude of water available for managed recharge. Counting the current fiscal year (FY24) there is ~\$8.5 M reserved for future conveyance fees.

### Memorandum

To: Idaho Water Resource Board (IWRB)

From: Cynthia Bridge Clark

Date: May 20, 2024

**Re:** FY 2025 Water Management Account and American Rescue Plan Act Funds (ARPA) Spending Plans

#### **REQUIRED ACTION:** No action required.

The IWRB has developed spending plans to direct funding appropriated for regional water sustainability projects, grants, and loans. These projects are supported with state general funds, ARPA funds, and other sources. Since the 2019, the Idaho Legislature has appropriated a total of \$325 million (excluding interest) to the IWRB's Water Management Account and has set aside approximately \$250 million of the State's ARPA funding to support IWRB approved projects.

Of the funds appropriated to the Water Management Account, the IWRB has obligated approximately \$169 million for Regional Water Sustainability projects, awarded over \$68.7 million for Aging Infrastructure Grants, and committed approximately \$20.8 million in loans, for a total of \$258,569,027. The IWRB has received several other project proposals for which funding has not yet been approved.

For the anticipated ARPA funding, the IWRB developed a spending plan for over \$238 million and has obligated over \$160 million. Federal ARPA guidance requires that the funds are obligated and under contract by December 31, 2024, and funds must be expended prior to December 31, 2026.

The Finance Committee met on May 13, 2024 to review the spending plans for both the Water Management Account and the ARPA funding. There are a number of projects currently approved for funding that require either updated costs or clarification of contract and spending schedules. Therefore, staff recommends the Finance Committee reconvene in June to review the spending plans based on updated project costs and schedules, with the intent of obligating all of the anticipated ARPA funding to meet Federal spending requirements.

The IWRB also received two new ARPA funding requests for consideration by the Finance Committee (attached). Both are projects on the Regional Water Sustainability Projects List:

- 1. The IWRB approved \$25 million for the New York Canal Rehabilitation/Lining Project. The project sponsor, the Boise Project Board of Control (BPBC), requested an additional \$50 million to complete the project based on increased construction bid estimates.
- 2. The IWRB approved \$1.287 million from the Water Management Account to complete 30% engineering design for the Lewiston Orchards Exchange Project (LOEP), sponsored by the Lewiston Orchards Irrigation District (LOID). LOID submitted a request to the IWRB to authorize \$25 million of ARPA funding for the construction of the LOEP.

Staff is reviewing these requests and would like input or guidance from Finance Committee and IWRB members.

Idaho Water Resource Board Attn: Neeley Miller PO Box 83720 Boise, ID 83720

Dear Neeley:

In November 2022, Boise Project applied for the Sustainability Priority List requesting \$50,000,000 to modernize and rehabilitate six miles of canal lining in the New York Canal. Boise Project was fortunate enough to be selected to receive \$25,000,000 from ARPA funds.

As we move through the process of the project, the anticipated costs to complete the six-mile project have increased due to inflation and the cost of living. Please see below for the updated estimated costs:

Mile	Year	Costs
One	2024	\$11,394,650
Two	2025	\$12,192,275
Three	2026	\$13,045,734
Four	2027	\$13,958,936
Five	2028	\$14,936,061
Six	2029	\$15,981,585
Total Costs		<u>\$81,509,241</u>

The above estimate is based on a bid received (attached) on May 3, 2024, for the work to be performed on Mile One in the Fall/Winter of 2024/2025. A 7% escalation cost has been added for Miles Two – Six.

Boise Project Board of Control is requesting an additional **\$50,000,000** from any remaining availability of ARPA funds. This project is "Shovel-Ready" with construction of Mile One scheduled to begin at the end of irrigation season in October 2024.

Idaho Water Resource Board Page Two

Boise Project Board of Control appreciates IDWR in providing this opportunity to obtain additional funding to rehabilitate and improve our aging water infrastructure. Should you have any questions or need additional information, please feel free to contact me.

Sincerely,

Rober Canter

Robert Carter Project Manager

Domestic and Irrigation Water

1520 Powers Avenue Lewiston, ID 83501 (208)746-8235

May 20, 2024

Idaho Water Resource Board Attn: Neeley Miller PO Box 83720 Boise, ID 83720

RE: IWRB Regional Water Sustainability Priority List Funding Request

Dear Neeley:

The Lewiston Orchards Irrigation District (LOID) is requesting \$25,000,000 from any remaining available ARPA funds for the construction of the Lewiston Orchards Exchange Project (LOEP).

The concept level cost estimate is \$60,498,000 as reported on page 5-1 of the attached Clearwater River Pump Station Design Concept Technical Report. This cost estimate was developed in 2022, during a period of high volatility in material costs.

A project description along with a J-U-B Engineers, Inc. stamped copy of the complete Clearwater River Pump Station Design Concept Technical Report are attached. The LOID is actively engaged in an engineering design to further refine the costs and obtain the required permits and easements to move forward. The LOID graciously thanks the IWRB for funding \$1,287,000 to move the engineering design to the 30% design level. Work is expected to be completed by winter 2024.

The Lewiston Orchards Exchange Project is on the IWRB's Regional Water Sustainability Priority List. We understand that is not a guarantee of funding; however, LOID would appreciate any funding that helps move this project to completion. The Lewiston Orchards Project (LOP) relies on water that passes through the Nez Perce Reservation, impacting endangered anadromous fish, water quality and tribal needs and uses. LOID delivers this water to patrons within the Irrigation District.

The project includes building a water intake on the lower Clearwater River, a pump station and piping to deliver 18 cfs to Reservoir A (Mann Lake), a storage reservoir on the Reservation, just to the east of Lewiston Orchards. The project is necessary as a replacement water supply for Reclamation's LOP. The previous path of an irrigation well field has proven to be unsustainable.

By providing funding, the Board would help resolve irrigation water supply issues, endangered species issues, tribal trust issues, and reduce the declining impact to the regional aquifer.

Sincerely,

Eugene B.

Eugene Barney Metz General Manager Lewiston Orchards Irrigation District

Attachments

### PROJECT BACKGROUND

- The Lewiston Orchards Irrigation District (LOID) manages the Lewiston Orchards Project (LOP) for the Bureau of Reclamation (RECLAMATION).
- The LOP diverts water from the Lapwai Creek watershed, particularly Sweetwater and Webb Creeks, for irrigation of 3848 acres in the Lewiston Orchards and serves approximately 22,000 people.
- Sweetwater Creek is used for spawning and rearing by ESA-listed Snake River A-run steelhead, reintroduced Coho salmon, spring Chinook salmon, and ten resident fish species and runs through the Nez Perce Reservation.
- The Nez Perce Tribe (NPT) sued the RECLAMATION for LOP water diversions from Sweetwater Creek to the Lewiston Orchards under the Endangered Species Act.
- A group of stakeholders was formed to address issues related to the LOP. The group is called the Lower Clearwater Exchange Project (LCEP) stakeholder group and consists of the LOID, the Nez Perce Tribe (Tribe), the County of Nez Perce, Idaho, the City of Lewiston, Idaho, and the Lewis Clark Valley Chamber of Commerce.
- In July 2009, the LCEP stakeholders formalized their project purposes and objectives by signing a Memorandum of Understanding (MOU). The LCEP MOU identifies three key objectives:
  - > Creation of a reliable quantity and quality water supply for LOID
  - Permanent resolution of the ESA issues surrounding the LOP
  - > Permanent resolution of Federal/Tribal Trust issues surrounding the LOP.
- In 2012, an LCEP appraisal study identified a reliable water exchange source using a pumping station on the lower Clearwater River, a pumping station on the Snake River, and a well field located near Tammany Creek. RECLAMATION proposed a Pilot Well due to incremental funding availability from RECLAMATION, and the ability to leave water in Sweetwater and Webb Creeks incrementally as each well came online.
- The Pilot Well was completed in 2017 and produced 2,000 gallons per minute. As part of the agreement, LOID left 4.5 cfs in the streams for fish. The well performed without any noticeable decline in the aquifer.
- Construction of a second well started in 2018 and began production in June 2022. This well also produced 2,000 gallons per minute, similar to the Pilot Well. Unfortunately, the District experienced an impact. The water level in one of LOID's domestic wells significantly dropped when the two irrigation wells were in production. This caused the shutdown of a domestic well during a time when the water was greatly needed (during a period of extreme drought).
- With only half of the LOP's full negotiated water right realized, 4,250 acre feet (the full negotiated replacement water right is 8,500 acre feet), the well field concept may no longer be considered a reliable replacement system for the LOP.
- The LCEP stakeholders would like to return to the original water exchange source of utilizing surface water from the lower Clearwater River.

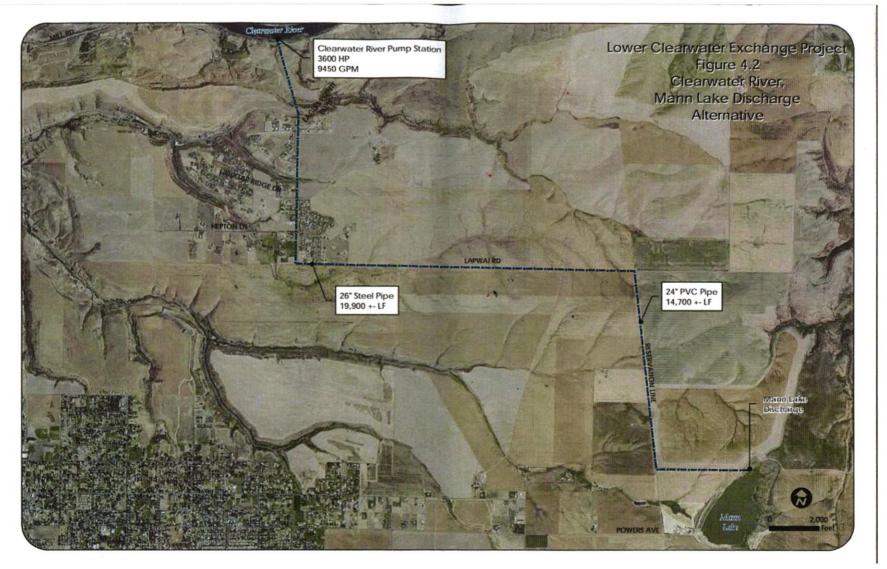

### **PROJECT SPONSOR**

The Lewiston Orchards Irrigation District (LOID) is the project sponsor. LOID is a special government district formed to distribute water to users within the Lewiston Orchards Project (LOP). The LOP is a Bureau of Reclamation Project. As a RECLAMATION project, the LCEP qualifies for the use of ARPA funds.

### PROJECT DESCRIPTION

- Pumping station out of the lower Clearwater River.
- Either change the point of diversion for natural flow water right to the Clearwater River or apply for new water right.
- Pump 18 cfs. 8500 AF per year from the Clearwater River.
- Storage water rights would transfer to the Nez Perce Tribe.
- Install 7.5 miles of 24" pipe to Reservoir A (Mann Lake).
- Reservoir A sits on the NPT Reservation. Ownership of Reservoir A will transfer to the NPT.
- LOID will continue to use Reservoir A as a storage reservoir for the Irrigation District.
- Once the replacement water supply is secure, LOID would participate in a title transfer transaction with RECLAMATION, divesting itself from RECLAMATION.

### MAP OF PROJECT AREA

#### **Key Concepts:**

- Elimination of adverse effects on ESA-listed Snake River A-run steelhead, and restoration of ESAdesignated critical habitat in the Lower Lapwai Creek Basin, tributary to the Clearwater River above Lewiston, Idaho.
- Creation of a drought resistant reliable quality and quantity of water for 22,000 Lewiston Orchards Irrigation District (LOID) patrons.
- Settlement/resolution of legal claims by the Nez Perce Tribe and its people, including long-term
  impacts to natural resources and to cultural and religious water uses, resulting from the
  predominant location of the current federal Lewiston Orchards Project (LOP) on the Nez Perce
  Reservation; as well as unlawful takings of Indian trust lands from the Tribe and its members in
  the origins of the LOP.
- Elimination of potentially \$30 million in future repairs to aging LOP infrastructure.

#### **Ecological Benefits:**

- The Lapwai Creek watershed is currently used for spawning and rearing by ESA-listed Snake River A-run steelhead, Coho salmon, and ten resident fish species. (Chinook salmon juveniles have been captured within the Lapwai Creek watershed, although adult spawning activity has not been recently recorded.)
- The Lewiston Orchards Water Exchange would allow steelhead and salmon to access an
  additional nineteen miles of spawning and rearing critical habitat currently blocked by a current
  federal Lewiston Orchards Project (LOP) diversion dam. (In total, 43 stream miles of ESAdesignated critical habitat are presently impaired by the existing diversion project and would be
  restored.) The total watershed acreage presently drained by diversion-affected streams is
  61,325 acres.
- Lake Waha, used as part of the LOP system and unique to the lower Clearwater River, has no natural outlet. Instead, the lake provides groundwater connectivity and year-round cold water flows to Sweetwater Springs. Sweetwater Springs is anticipated to contribute 3-10 cubic feet per second (cfs) flows at 50-degrees Fahrenheit, under restored natural lake elevation fluctuations.
- Because of the unique hydrologic characteristics of Sweetwater Springs, with unusually large amounts of discharge of cold water in the summer, the biological value of Sweetwater Creek for steelhead is very high in relation to all other streams in the lower Clearwater River basin.
- Soldiers Meadow Reservoir, total storage capacity 2,370 acre-feet, would be used to maximize ESA-designated critical habitat in Webb, Sweetwater, and Lapwai Creeks. Additionally, water released from Soldiers Meadow Reservoir in the summer averages 50 degree Fahrenheit.

#### LOID – CLEARWATER PUMP STATION PROJECT SUMMARY

- 10,500 acre-feet of stored water rights in Sweetwater and Webb Creeks will be transferred to uses that will maximize ESA-designated critical habitat in Sweetwater, Webb, and Lapwai Creeks.
- 55 cfs of natural flow diversion to storage will be transferred to uses that will restore Sweetwater Creek and Lapwai Creek.
- A reliable, quality water supply will be provided for 22,000 LOID/Lewiston citizens, covering 3,848 acres.

#### Mediation:

- RECLAMATION agreed to replace the water supply from the Craig Mountain Watershed that fed Sweetwater Creek, the point of diversion for the LOP. In exchange, the LOID would agree to transfer the title of the irrigation works to the NPT.
- In September 2011, an appraisal study was completed by the LCEP stakeholders that identified multiple water supply alternatives, including surface pumping from the Snake and Clearwater Rivers, and wells from the deep Lewiston Basin Aquifer.
- Surface pumping from the Clearwater River was the preferred alternative, but the timeline for the Federal budget process proved to be many years out with little or no guarantees.
- The wellfield alternative allowed for incremental financial support from RECLAMATION, and incremental water replacement. For each 2000 gallon per minute well online, 4.5 cfs could remain in the stream.

#### **Course Correction Needed:**

- After two wells came online, the LOID saw impacts to existing domestic water wells in the summer of 2022.
- The wells are expensive and no guarantee that LOID's water right will be replaced with four wells.
- The wells tap into the regional aquifer that is also used by the City of Lewiston, the Asotin County PUD, and various developments in Nez Perce County.
- A recent decline in the aquifer has been noted per an Idaho Department of Water Resource Hydrogeologist

In short, the wellfield concept is an unreliable source of irrigation water as a replacement system, and the number of wells needed to achieve LOID's full water right of 8,500 acre feet is unknown. The Clearwater River would provide a reliable and sustainable source of water to the Lewiston Orchards.

#### Water Sustainability:

The project helps achieve water sustainability in a variety of ways:

• By preserving groundwater in the regional aquifer for domestic water use.

#### LOID - CLEARWATER PUMP STATION PROJECT SUMMARY

- By keeping cold water in Sweetwater Creek for fish. The water comes out of the ground at 55 degrees year-round, cooling the stream in summer.
- By changing the point of diversion for the water right 85-16 from Sweetwater Creek to the Clearwater River, no additional water needs allocated.
- Water remains in Sweetwater Creek to be used for fish and cultural resources as it travels to the Clearwater River.

#### Regional Sustainability Benefits:

- Allows the regional aquifer to be used predominately for drinking water.
- Mitigates the decline of the regional aquifer.
- Provides a long-term supply of irrigation water for the LOP.
- Keeps water in the stream for fish.
- Removes the federal assets from the NPT's reservation.

#### Public Interest:

- Rather than diverting water from Sweetwater and Webb creeks, essentially draining the streams, water will continue to flow to the Clearwater River, protecting existing water rights.
- By changing the point of diversion to the Clearwater River, the waterflow, previously diverted can now be used for endangered anadromous fish and cultural resources for the Nez Perce Tribe.
- The project should produce a net gain in water accounting as 55 cfs will flow down to the Clearwater River, but only 18 cfs will be pumped back to Reservoir A.
- Water quality improves in Sweetwater Creek and Lapwai Creek due to the influx of cold water from underground springs that feed Sweetwater Creek during the hot summer months when ESA listed steelhead are spawning. A portion of this water is currently diverted to the LOP area.
- A cold water fishery can be maintained in Reservoir A with water from the Clearwater for both Tribal and non-tribal sportsman. The well water surfaces at around 90 degrees Fahrenheit, too warm for a cold water fishery.

#### Broad Stakeholder Support:

- In July 2009, a Memorandum of Understanding (MOU) was executed by the Lower Clearwater Exchange Project (LCEP) stakeholder group: the LOID, the Nez Perce Tribe (Tribe), the County of Nez Perce, Idaho, the City of Lewiston, Idaho, and the Lewis Clark Valley Chamber of Commerce. Although the MOU is not a legally binding document, it does set forth the direction to solve the issues of the current Lewiston Orchards Project (LOP) system. The LCEP group's objective is to explore and pursue the potential of constructing an alternate water supply replacing the LOP surface water system to provide the following:
  - > Creation of a reliable quantity and quality water supply for LOID
  - > Permanent resolution of the ESA issues surrounding the LOP
  - > Permanent resolution of Federal/Tribal Trust issues surrounding the LOP.

#### Resolution of Long-Standing Water Supply Challenges and Conflicts:

• The LOP diverts water that flows through the Nez Perce Reservation. This project will return the use of that water to the Nez Perce Tribe. Once LOID receives its full water right, the LOP will go through a title transfer process and no longer remain as a RECLAMATION project.

#### Stabilization and Recovery of Groundwater Levels:

- The wellfield concept draws irrigation water from the regional aquifer.
- Hydrologists have noted a decline in the aquifer in the past year after running the two irrigation wells.
- Irrigation usage is significantly greater than domestic usage.
- A pump station from the lower Clearwater River as the primary source of irrigation water for the LOP will help sustain the regional aquifer.

#### Project Readiness:

 The project is moving forward with the RECLAMATION and the NPT. LOID has found a willing landowner with river access. Discussions are taking place with the Army Corp of Engineers to determine the needed permits and approximate placement of the intake pipe. Contact has also been made to the Camas Railroad to determine the cost of an easement as the pipe will need to pass under the railroad.

# COST ESTIMATE AND BUDGET

• From the Clearwater River Pump Station Design Concept, January 11, 2023:

#### Table 5-1: Cost Estimate

Item	Item Description	Unit	Total Price - Low <sup>a</sup>	Total Price - High
1	Pump Station Intake	1LS	\$5,636,000	\$10,406,000
2	Pump Station	1 LS	\$10,827,000	\$12,325,000
3	Canyon Transmission	1LS	\$3,274,000	\$3,571,000
4	Eagle & County Rd Transmission and Outlet Structures	1 LS	\$11,003,000	\$14,040,000
5	Low Pressure Count Rd Transmission (Contractor Installed)	1 LS	\$9,072,000	\$14,306,000
6	Clearwater Power Service	1 LS	\$5,850,000	\$5,850,000
	To	tal Costb	\$45,662,000	\$60,498,000

a) The low option includes assumptions that reflect lower cost outcomes on facility locations, low pressure pipe material, and intake structure requirements. These items will not be fully developed until after coordination with the railroad company, USACE, and environmental review, which will occur during final design. This also reflects lower project cost risk assumptions and a lower range of soft costs, which requires a reduced scope.

b) Includes total construction cost, soft costs including final design, and AIS and Davis Bacon Wages.

### PROJECT FUNDING SOURCES

LOID currently has a grant open with RECLAMATION for a replacement water supply. The grant was initially written to provide funding for the third well in the proposed wellfield with the ability to transfer funding to a surface water solution. The signed Grant Agreement for Grant Number R22AP00634 is for \$11,010,396 of which RECLAMATION has authorized funds of \$5,800,000. LOID is able to contribute inkind labor and equipment to install the low-pressure pipe to Reservoir A (Mann Lake).

### Memorandum

To: Idaho Water Resource BoardFrom: Neeley Miller, Planning & Projects BureauDate: May 19, 2024Re: Aging Infrastructure Grant criteria

Action: Consider resolution to adopt Aging Infrastructure criteria

Staff will discuss the proposed update to the Aging Infrastructure Grant criteria. On May 13<sup>th</sup> 2024 the IWRB's Finance Committee met to discuss the updated Aging Infrastructure Grant criteria developed by staff. The Finance Committee recommended the attached criteria for consideration by the IWRB.

#### Attachment(s):

Resolution w/proposed criteria

#### **BEFORE THE IDAHO WATER RESOURCE BOARD**

# IN THE MATTER OF AGING WATER INFRASTRUCTURE GRANTS

**RESOLUTION TO ADOPT CRITERIA** 

1 WHEREAS, House Bill 361 passed and approved in 2023 by the Idaho Legislature 2 appropriated to the Idaho Water Resource Board (IWRB) \$50,000,000 to be used for 3 expenditures, loans, or grants for water projects, including studies, to address water 4 sustainability, rehabilitate or improve aging water infrastructure

WHEREAS, the Idaho Legislature provided that these moneys shall be used for grants and 6 7 directed the IWRB to develop criteria, taking into account the public's input for the expenditures 8 of money for grants, which shall be competitive, matching grants that prioritize projects based 9 on the public benefits they provide. Considerations of public benefits should include the 10 protection of existing water rights, the uses identified in Section 42-1760(2)(d), Idaho Code, which include consideration of the value of existing hydropower to the state's economy, 11 providing water for future development, and addressing aging water storage and delivery 12 infrastructure for projects that provide environmental, safety, or recreational benefits; and 13 14

15 WHEREAS, staff prepared an updated criteria for the award for Aging Infrastructure 16 Grants based upon feedback from previous funding rounds; and

17

5

18 WHEREAS, on May 13<sup>th</sup> 2024 the IWRB's Finance Committee met to discuss the updated 19 Aging Infrastructure Grant criteria developed by staff. The Finance Committee recommended 20 the attached criteria be adopted by the IWRB; and

21

NOW, THEREFORE BE IT RESOLVED that the IWRB adopts the attached criteria for the award of Aging Infrastructure Grants.

24

DATED this 24<sup>th</sup> day of May 2024.

JEFF RAYBOULD, Chairman Idaho Water Resource Board

Resolution No.

ATTEST

DEAN STEVENSON, Secretary

Resolution No. \_\_\_\_\_

# **IWRB Aging Infrastructure Grant Criteria**

The Idaho legislature has appropriated to the Idaho Water Resource Board (IWRB) funding to be used for grants for water projects to *rehabilitate or improve aging water infrastructure*. The legislature provided that "no more than one-third of these moneys shall be used for grants", and directed the IWRB to:

develop criteria, taking into account the public's input for the expenditures of money for *grants*, which shall *be competitive, matching grants that prioritize projects based on the public benefits they provide*. Considerations of public benefits should include the protection of existing water rights, the uses identified in Section 42-1760(2)(d), Idaho Code, which include consideration of the value of existing hydropower to the state's economy, providing water for future development, and addressing aging water storage and delivery infrastructure for projects that provide environmental, safety, or recreational benefits. H.B. 769, § 7.

Projects that rehabilitate or improve Idaho's water infrastructure support the Idaho economy, provide economic value, and ensures long-term water resource stability and sustainability. Pursuant to House Bill 769, the IWRB has developed these criteria to provide financial assistance on a statewide competitive basis through grants to eligible entities interested in pursuing eligible projects to rehabilitate or improve aging water infrastructure.

**Eligible Projects:** The IWRB defines an aging water infrastructure project as any new project, or new phase of an improvement project intended to repair, maintain, replace, or improve existing infrastructure that supports irrigation water delivery, storage, drainage, treatment, and use of water for irrigation. Projects that are already completed or underway by the application deadline are not eligible for this funding opportunity. Additionally, for purposes of this grant program, the term 'aging water infrastructure' does not include municipal drinking or wastewater systems.

**Eligible Entities:** Irrigation Districts, Irrigation Boards of Control, Canal Companies, Drainage Districts, Groundwater Districts, Ditch Companies, Lateral Ditch Users Associations, Reservoir Districts, Municipal Irrigation Districts (formed per Title 42, chapter 18, Idaho Code), Municipalities, Counties and Water Districts

### Eligible Geographic Area: Statewide

### **Grant Considerations:**

- IWRB grant portion cannot exceed 1/3<sup>rd</sup> (33%) of total project costs.
- In-kind services can be used for 30% of the total projects costs. Legal/Administrative inkind services are limited to 5% of total project costs.
- Funding awards may be reallocated if a project is not completed within the grant period of the grant award contract.

- Permits are not required during the application phase. For those projects that are funded and require local, state, or federal permitting, funding reimbursement will not be made unless the project is fully permitted. Sponsor is responsible for providing permit documentation to IWRB staff, if requested.
- Costs incurred after IWRB grant funding award are eligible for reimbursement. Reimbursement requests can be made once a cost-reimbursement contract is established between Sponsor and IWRB. No reimbursement will be made until contracts are fully executed.

### Grant Award Limit: \$2 million

**Grant Application Requirements:** Grant applications will require the applicant to provide the following information:

- Project background (infrastructure description, repair, rehabilitation, improvement needs/objectives/benefits)
- Project sponsor description (organization type, background, revenue sources, current operations)
- Project description (narrative, map, conceptual plan and design, land entitlements at project location, description of any known environmental issues).
- Cost estimate and budget
- Project funding sources (IWRB grant, other state and federal grants, sponsor's contribution)
- Project implementation schedule

**Evaluation Criteria:** To maximize the effective and efficient use of available funds, grant applications submitted by eligible entities for eligible projects will be evaluated, scored (*100-point scale*), and ranked according to the following criteria. Project scoring will be used to prioritize funding. <u>Applications shall discuss how the project under consideration meets the evaluation criteria.</u>

### Project Proposal Clarity and Detail (up to 30 points)

- Clarity and detail of project proposal: need, description, budget and benefits (up to 10 points)
- Plans and specifications included with the grant application (up to 10 points)
- Description of the personnel (sponsor employees, contractors and/or volunteers) that will plan, design, construct and implement the proposed project (descriptions may include the number, qualifications (resumes if applicable) and time of personnel that will be involved in the project. *(up to 10 points)*

### Public Interest of Project (up to 30 points)

• Economic values supported by the infrastructure, including consideration of the communities, irrigated acres, provision of water for future development and

economic activity served by the water infrastructure (up to 20 points)

Uses/benefits identified in Section 42-1760(2)(d), Idaho Code (up to 10 points):
 -water quality
 -fish and wildlife
 -recreation
 -hydropower
 -water supply stability and sustainability
 -drought resiliency
 -public safety
 -other benefits to the citizens of the State

### Urgency and Effectiveness of Project (up to 30 points)

- Urgency of the project (e.g., infrastructure age, infrastructure function) (up to 20 points)
- Effectiveness of the proposal in accomplishing project objectives and benefits (e.g., nature and magnitude of operational efficiency improvement and/or water savings) (up to 5 points)
- Budget cost/benefit (i.e., reasonableness of labor and materials costs, comparison of those costs to project outcomes) (up to 5 points)

### Organizational Capacity of Applicant (up to 10 points)

• Has the sponsor demonstrated the capacity, authority and ability to complete the project? Demonstration may include a synopsis of the sponsor's organization and descriptions of similar projects completed by the Sponsor. (up to 10 points)

### **Grant Process:**

- Application deadline will be set by IWRB for each round
- IWRB staff will make project funding recommendations to IWRB Finance Committee
- IWRB reviews Finance Committee recommendations and makes grant funding awards
- IWRB staff will notify project applicants of grant approval.
- Project sponsors will provide notice to the IWRB of acceptance of funding within 90 days after they have been notified of grant approval.
- Grant contracts between the IWRB and project sponsors will be developed and executed following IWRB funding awards.
- During and/or after project implementation, IWRB will distribute and/or reimburse grantees for projects costs per those contracts. Grant reimbursement requests should be sent to <a href="https://www.idaho.gov">idaho.gov</a>
- Additional funding rounds will be held if more funding becomes available.

#### **IWRB Districts are:**

District No. 1: Boundary, Bonner, Kootenai, Shoshone, Benewah, Latah, Clearwater, Nez Perce, Lewis and Idaho counties.

District No. 2: Adams, Valley, Washington, Payette, Gem, Boise, Canyon, Ada, Elmore and Owyhee counties.

District No. 3: Camas, Gooding, Jerome, Twin Falls, Cassia, Blaine, Lincoln, Minidoka, Lemhi, Custer and Butte counties.

District No. 4: Clark, Fremont, Jefferson, Madison, Teton, Bingham, Bonneville, Power, Bannock, Caribou, Oneida, Franklin and Bear Lake counties.

\* No more than 50% of the total budget may be spent within a single IWRB district. This limit may be waived if there are no competing funding demands.

### United States Department of the Interior

BUREAU OF RECLAMATION Snake River Area Office 230 Collins Road Boise, ID 83702-4520

VIA ELECTRONIC MAIL ONLY

Mr. Jeff Raybould Chairman Idaho Water Resource Board 322 East Front Street Boise, ID 83702

Mr. Bryan Horsburgh Deputy Area Manager Snake River Area Office 230 Collins Road Boise, ID 83702

Subject: Boise River Basin Feasibility Study / Anderson Ranch Dam Raise Status Update, Boise Project, Idaho

Dear Mr. Raybould and Mr. Horsburgh:

This status update is being sent in preparation for the Idaho Water Resource Board (IWRB) meeting on May 24, 2024.

The IWRB and the Bureau of Reclamation partnered to complete a feasibility study of new surface water storage opportunities in the Boise River Basin (Study). Authorized under Water Infrastructure Improvements for the Nation (WIIN) Act of 2016, the Study focused on a 6-feet raise of Anderson Ranch Dam in Idaho to achieve approximately 29,000 acre-feet of new water storage.

### **Current Status**

Recent project activities include:

- Designers nearing completion of 60% designs for the dam raise.
- Coordination between subject matter experts to analyze and plan a strategy for reservoir operations during construction.
- Subject matter experts working to finalize geotechnical field exploration reports and drawings for both the dam raise and reservoir rim projects.

Ongoing project activities include:

- 60% designs and 90% designs, planning reservoir operations during construction, and water supply mitigation analysis.
- Coordination and support for environmental compliance activities.
- Project team working to resolve several outstanding items necessary to finalize environmental compliance schedule.
- Stakeholder coordination and project awareness.
- Standing monthly oversight team meetings between Reclamation and IWRB staff.

### **Completed Key Milestones**

Nov. 2017 – Jan. 2019	Reclamation completed initial screening of the three potential dam raise alternatives and developed a project management plan.
July 27, 2018	IWRB passed a resolution supporting the narrowed focus of the Study to a raise at Anderson Ranch Dam.
August 28, 2018	Reclamation and IWRB hosted a Legislative Infrastructure Tour to discuss large water infrastructure projects in Idaho with representatives from Idaho's Congressional delegation.
November 8, 2018	Reclamation and IWRB hosted an informational public open house on the Study in Boise, Idaho.
December 3-7, 2018	Reclamation conducted a Value Planning Study with a final Accountability Report received in February 2019.
December 25, 2018	Reclamation awarded an Indefinite Delivery / Indefinite Quality contract for architect and engineering services to Sundance-EA Joint Venture (Consultant) to complete the Study and environmental compliance activities.
April 30, 2019	Consultant submitted land, structure, infrastructure, and real estate impact assessment (Rim Analysis) for Anderson Ranch Reservoir.
June 7, 2019	IWRB filed a water right permit application for the potential additional storage (Water Right No. 63-34753).
June 19, 2019	Reclamation's Technical Service Center (TSC) completed feasibility- level design and cost estimates completed for Anderson Ranch Dam raise.
August 9, 2019	Reclamation published the Notice of Intent for an environmental impact statement (EIS) in the Federal Register.
August 27-29, 2019	Reclamation conducted Public Scoping Open Houses in Pine, Boise, and Mountain Home, Idaho.
February 3-7, 2020	Reclamation completed the Design, Estimate, and Construction review of the feasibility-level designs.
April 6-10, 2020	Reclamation completed the Peer Review of the Water Operations Technical Memorandum
IN	TERIOR REGION 9 • COLUMBIA-PACIFIC NORTHWEST

July 31, 2020	3 Reclamation released the Draft EIS and Draft Feasibility Report.
October 30, 2020	Reclamation initiated formal Endangered Species Act consultation with National Oceanic and Atmospheric Administration National Marine Fisheries Service and submitted its biological assessment.
December 2020	The Secretary of the Interior determined the Study's recommended plan to be feasible in accordance with the WIIN Act.
December 2020	Reclamation transmitted the Final Feasibility Report to Congress.
December 2020	Fiscal Year 2021 Appropriations legislation secured \$12.88 million in WIIN Act funding for completing the Study, environmental compliance, and construction.
May 2021	Initiated pause in environmental compliance process pending further development of final design.
July / August 2021	Reclamation's Columbia-Pacific Northwest Region requested delegation of authority and received approval from the Commissioner to negotiate, execute, and administer a cost-share agreement pursuant to section 4007 of the WIIN Act with the IWRB.
Sept. / Oct. 2021	Reclamation and IWRB completed cost-share contract negotiation sessions: Sept. 22, Oct. 5, Oct. 19, and Oct. 28.
November 2021	IWRB and Reclamation signed and executed cost-share contract. IWRB provided first interval payment of advanced funds. TSC initiated final design activities.
June 2022	Reclamation's TSC completed dam spillway overlay feasibility design and conducted risk neutrality and construction risk workshop.
September 2022	Reclamation's risk neutrality and construction risk analysis, Dam Safety Advisory Team review and concurrence.
September 2022	Received total non-federal project funding based on the feasibility level total project cost estimate.
May 2023	Completed Dam Raise and Reservoir Rim Projects 30% Designs.
June 2023	Completed Dam Raise and Reservoir Rim Projects 30% design reviews, Value Engineering Studies, and Dam Raise Constructability Review.
November 2023	Completed on-site field explorations.
Jan. / Feb. 2024	Completed Reservoir Rim Projects 60% designs and Constructability Review.

### Key Critical Path Milestones

Winter 2024/2025	Complete Supplemental Draft EIS
2025	Complete environmental compliance

Thank you for this opportunity to provide an update on the Boise River Basin Feasibility Study / Anderson Ranch Dam Raise Project. If you have any questions, please contact me at (208) 378-5360 or via email at <u>ckeith@usbr.gov</u>. *If you are deaf, hard of hearing, or have a speech disability, please dial 7-1-1 to access telecommunications relay services.* 

Sincerely,

Chris Keith Project Manager

### Memorandum

- To: Idaho Water Resource Board
- From: Mike Morrison
- Date: May 16, 2024

Re: Priest Lake Outlet Dam: Requesting approval of funds to procure operations and maintenance services for the Priest Lake Outlet Dam.

**REQUIRED ACTION:** The Board will consider approval of a resolution to provide funding and signature authority for operations and maintenance contracts for the Priest Lake Outlet Dam.

<u>Background:</u> The Idaho Water Resource Board (Board) owns and operates the Priest Lake Outlet Dam. Day-to-day operation and maintenance of the dam is performed by a senior dam operator and an assistant dam operator who operate and adjust the dam's 11 Tainter Gates.

The dam operators conduct periodic checks of the dam and are available to respond in the event of emergencies. During periods of high spring runoff, the operators must often remove logs and other detritus from the Tainter Gates. During the winter, the operators alert the Board to ice damming and other conditions that could damage the dam.

Maintaining proper lake levels while also maintaining downstream flows sufficient to sustain fish populations in the Priest River is a difficult balancing act requiring a thorough understanding of snowpack and stream flows into the Priest Lake watershed.

<u>Division of Purchasing Exemption:</u> The small size of the permanent population of the Priest Lake area has made finding and recruiting qualified dam operators difficult under normal procurement rules, and so the Division of Purchasing has approved a service contract exemption request allowing us to continue contracts with the present operators for the next five years under the following conditions:

- Total cost shall not exceed \$150,000 over five years; and
- Contracts shall be renewed in one-year increments.

Staff notes that the contracts with both operators will expire on June 30<sup>th</sup>, 2024.

<u>Resolution</u>: Staff requests that the Board consider approval of the attached resolution authorizing expenditure of up to \$150,000 from the Revolving Development Account to procure the services of qualified dam operators. Staff also requests that the Board's Executive Manager or his designee be authorized to sign all necessary dam operation contracts for the next five years.

### IN THE MATTER OF PRIEST LAKE OUTLET DAM OPERATIONS AND MAINTENANCE SERVICES

### RESOLUTION TO FUND OPERATIONS AND MAINTENANCE CONTRACTS FOR FIVE YEARS

1	WHEREAS, the State of Idaho owns the Priest Lake Outlet Dam (Dam) which was constructed in
2	1950 and reconstructed in 1978 as an outlet control structure to maintain lake levels in Priest Lake in
3	accordance with Idaho Code §70-507; and
4	
5	WHEREAS, Senate Bill 1261, passed and approved by the 2018 Legislature, updated Idaho Code
6	§70-507 to clarify that management of the Dam is under the jurisdiction of the Idaho Water Resource
7	Board; and
8	
9	WHEREAS, operation and maintenance of the dam requires knowledge and skills that are unique
10	to the Dam; and
11	
12	WHEREAS, The Idaho Division of Purchasing has approved a five-year service contract exemption
13	permitting the Board to contract for five years provided that 1) Total costs do not exceed \$150,000 and
14	that 2) Contracts be renewed in 1 year increments;
15	
16	NOW, THEREFORE, BE IT RESOLVED that the IWRB authorizes the expenditure of funds, not to
17	exceed \$150,000, from the Revolving Development Account to procure dam operation and maintenance
18	services during Fiscal years 2025 through 2029; and
19	
20	NOW, THEREFORE, BE IT FURTHER RESOLVED that the IWRB authorizes its Executive Manager or
21	designee to sign all contracts needed to procure operation and maintenance services for the Dam over
22	the next five years.

DATED this 24<sup>th</sup> day of May 2024

### Memorandum

To: Idaho Water Resource Board

From: Mike Morrison

Date: May 20, 2024

Re: Approval of funds for continued litigation with Strider, inc.

**REQUIRED ACTION:** The Board will consider approval of a resolution to approve funds to defray the costs of litigation in the Strider matter.

Since July, 2022, the Board and Strider Construction Co., Inc. (Strider) have been involved in a legal dispute over the Priest Lake Outlet Dam Construction Project.

The Office of the Attorney General (OAG) recommended that the Board retain the services of a private law firm to assist the OAG in this matter and, in September, 2022, the Board entered into an agreement for Professional Services with the law firm of Kirton McConkie.

At the January and July, 2023 Board meetings, the Board approved, respectively, expenditures of \$370,000 and \$815,000 for professional services from Kirton McConkie (\$1,185,000). These funds have been exhausted and the OAG recommends that the Board approve additional funds to defray the continuing costs of litigation.

Kirton McConkie's estimate of additional costs will be provided at May's IWRB meeting.

## IN THE MATTER OF PRIEST LAKE CONSTRUCTION LITIGATION

RESOLUTION TO APPROVE FUNDS FOR OUTSIDE COUNSEL

1	WHEREAS, on August 20, 2020, the Idaho Water Resource Board (IWRB) and Strider Construction
2 3	Co., Inc. (Strider) entered a construction contract for improvements to the Priest Lake Outlet Dam; and
4	WHEREAS, on July 27, 2022, Strider submitted a notice of termination of the contract; and
5 6	WHEREAS, on July 29, 2022, Strider filed a lawsuit against the IWRB related to the contract; and
7 8	WHEREAS, on August 23, 2022, the IWRB filed a counterclaim against Strider; and
9 10	WHEREAS, the Office of the Attorney General (OAG) determined that it was necessary and
11	appropriate to retain the private law firm of Kirton McConkie (Counsel) to assist the OAG in the
12 13	representation of the IWRB's interest in the defense of litigation with Strider; and
13 14	WHEREAS, on September 27, 2022, the Board entered into an agreement for Professional Services
15 16	with the firm of Kirton McConkie on the Strider matter; and
17	WHEREAS, on January 20, 2023, the Board authorized expenditure of up to \$370,000 from the
18 19	Water Management Account to defray the costs of litigation in the Strider matter; and
20	WHEREAS, on July 21, 2023 the Board authorized expenditure of an additional \$815,000 from the
21 22	Water Management Account to defray the costs of litigation in the Strider matter; and
23	WHEREAS, the funds authorized in January and July have been expended; and
24 25	WHEREAS, Kirton McConkie has estimated that the costs of litigation in the Strider matter for the
26	next 6 months could be as much as \$280,000.00; and
27 28	NOW THEREFORE BE IT RESOLVED, that the IWRB authorizes expenditure of up to \$280,000.00
29	from the Water Management Account to defray the costs of litigation in the Strider matter; and
30	
31 32	NOW THEREFORE BE IT FURTHER RESOLVED that the IWRB authorizes its chairman or designee, to execute the necessary agreements or contracts for the purpose of this resolution.
33	to execute the necessary agreements of contracts for the purpose of this resolution.

DATED this 24th day of May, 2024.

### Memorandum

To: Idaho Water Resource Board

From: Neeley Miller, Planning & Projects Bureau

Date: May 20, 2024

Re: Regional Water Sustainability Projects Priority List

Action: Consider recommendation from the Finance Committee to add a project to the Regional Water Sustainability Priority List

The Upper Payette Storage Association presented a project proposal to the IWRB's Storage Committee on May 6, 2024. The proposal involves the acquisition of uncontracted storage water from the U.S. Bureau of Reclamation to help meet water supply needs in the Payette River Basin. The proposal is outlined in the attached materials. The Storage Committee recommended the Finance Committee consider adding this project to the Regional Water Sustainability Priority List. The Finance Committee met on May 13, 2024, and recommended the IWRB add the Upper Payette Basin Storage Project to the Regional Water Sustainability Priority List.

### Attachment(s):

Letter and project proposal slides Resolution to add the project to the Regional Water Sustainability List

## IN THE MATTER OF THE REGIONAL WATER SUSTAINABILITY PRIORITY LIST

RESOLUTION TO ADD A PROJECT TO THE LIST

1	WHEREAS, the Idaho Legislature, through House Bill 769 passed in 2022 appropriated \$75
2	Million to the Idaho Water Resource Board (IWRB) to be used for certain ARPA-eligible water
3	projects and projects that have been identified by the IWRB as high priority sustainability
4	projects; and
5	
6	WHEREAS, the Idaho Legislature, through House Bill 361 passed in 2023 appropriated
7	\$150 Million to the IWRB to be used for certain ARPA-eligible water projects and projects that
8	have been identified by the IWRB as high priority sustainability projects; and
9	
10	WHEREAS, in July 2021 the IWRB adopted an initial Regional Water Sustainability Priority
11	List (List) to help guide the Idaho Water Resource Board's (IWRB's) spending for large, regional
12	water sustainability projects from ARPA funds, state general funds, or other applicable sources;
13	and
14	
15	WHEREAS, in January 2022 the IWRB adopted a threshold criteria indicating that for a
16	project to be included on the List it must "help achieve water supply sustainability on a regional,
17	basin-wide, or state wide basis;" and
18	
19	WHEREAS, on October 26 <sup>th</sup> , 2022, the IWRB adopted criteria for the inclusion of projects
20	on the List; and
21	
22	WHERAS, the IWRB updated the List on January 20 <sup>th</sup> 2023 (resolution # 03-2023) and
23	again on March 29 <sup>th</sup> 2024 (resolution #20-2024); and
24	WUEDEAS on May oth 2024 the Starson Committee recommended the Singness
25	WHEREAS, on May 6 <sup>th</sup> 2024 the Storage Committee recommended the Finance
26 27	Committee consider adding the Upper Payette Basin Storage Project to the Regional Water Sustainability Priority List; and
27	Sustainability Filolity List, and
28 29	WHEREAS, on May 13 <sup>th</sup> 2024 the Finance Committee recommended the Upper Payette
29 30	Basin Storage Project be added to the Regional Water Sustainability Priority List; and
31	basin storage Project be added to the Neglonal Water Sustainability Priority List, and
32	NOW, THEREFORE BE IT RESOLVED the Upper Payette Basin Storage Project is added to
33	the Regional Water Sustainability Priority List.

DATED this 24<sup>th</sup> day of May 2024.

### Re: Request for Board to Consider Acquisition of Uncontracted Storage for Water Supply Needs in the Payette River Basin

Dear Brian:

This request is submitted on behalf of the Upper Payette Storage Association (the "Association"), seeking to have the Idaho Water Resource Board (the "Board") consider the acquisition of available uncontracted storage from the U.S. Bureau of Reclamation to help meet emerging water supply needs in the Payette River Basin. The Association stands ready to cooperate with and assist the Board in this endeavor.

We understand that the first step in this process is to have the matter on the agenda for a meeting of the Water Storage Projects Committee of the Board. We look forward to that meeting being scheduled in the near future.

Attached is a set of PowerPoint slides setting forth the need and potential pathway for acquiring uncontracted water from the Bureau in the Payette Basin, which the Association would be glad to present to the Committee and the full Board. In short, both irrigation and municipal needs in the Basin could be met in large part through the acquisition of more than 16,000 acre-feet of federal storage that is dedicated for those purposes in Cascade Reservoir, with an additional 22,000 acre-feet of uncontracted water also potentially available from Deadwood Reservoir.

We appreciate your facilitation of our request.

Regards,

PARSONS BEHLE & LATIMER

Norman M. Semanko

## UPPER PAYETTE STORAGE WATER ASSOCIATION

parsonsbehle.com

# Reasons to Contract Storage Space

- Enlarged administration by Water District 65 to include Payette River tributaries
- Water rights on tributaries will now be identified and accounted for as storage users
- Will not alter stream flows; use already exists
- Rental Pool Procedures prioritize in-basin storage use over flow augmentation
- Supplemental (contracted) storage for tributary users would avoid reliance on Rental Pool

PARSONS BEHLE & LATIMER

# Reasons to Contract Storage Space

- Upper Payette Storage Water Association to serve a large group of users including irrigation and municipal providers (e.g., McCall, Cascade and Horseshoe Bend)
- Equal opportunity to access federal storage; under current situation, one storage space owner can dictate the fate of another producer

# Reasons to Contract Storage Space

- Uncontracted Cascade space (16,747 acre-feet) is committed to irrigation/municipal uses (also 22,000 acre-feet uncontracted in Deadwood)
- Separate from uncontracted space (95,000 acrefeet) available for flow augmentation
- Improve supply for flow augmentation by avoiding increased in-basin Rental Pool demand
- Fulfill Federal responsibilities to Payette Basin and project cost recovery/spread O&M costs

PARSONS BEHLE & LATIMER

# 2008 Upper Snake Biological Opinion

13.3.1 New Contracts for Water Stored in Reclamation Projects. Reclamation's salmon flow augmentation program is heavily dependent on annual water rentals from Idaho's water rental pools, which are variable and insecure sources. Due to this variability, Reclamation must consult with NOAA Fisheries prior to issuing a new contract that would reduce streamflows or reduce Reclamation's ability to meet salmon flow augmentation commitments, as described in its PA; or whenever Reclamation otherwise determines that listed salmon or steelhead species or critical habitat may be affected.

# 2008 Upper Snake Biological Opinion

13.4.1 New Contracts for Water Stored in Reclamation Projects. Prior to entering into any agreement to commit uncontracted storage space in any of its reservoirs covered by this Opinion to any use other than salmon flow augmentation, Reclamation shall consult with NOAA Fisheries under Section 7(a)(2) of the ESA. In addition, Reclamation shall consult with NOAA Fisheries under Section 7(a)(2) of the ESA prior to entering into a new contract that would reduce streamflows or reduce Reclamation's ability to meet its salmon flow augmentation commitments, as described in its PA, or whenever Reclamation otherwise determines that listed salmon or steelhead species or critical habitat may be affected. Such consultations shall identify the amount of discretionary storage being sought or the amount of streamflow reduction, the current probability of such storage or streamflow being available for salmon flow augmentation, and any plan to replace the storage volume or streamflows currently available to salmon flow augmentation that would be lost as a result of the proposed commitment. NOAA Fisheries criterion in conducting such a review is to ensure that there either be an improvement or "zero net impact" on Snake River flows and on Reclamation's ability to provide up to 487 kaf for salmon flow augmentation. Replacement supplies should have at least an equal probability of being available for salmon flow augmentation as the storage space or streamflows that are being committed.

MEMO		T DAHO
То:	Idaho Water Resource Board	KD CAR
From:	Justin Ferguson	THE ROOM
Date:	May 24, 2024	ESOURCE
Subject:	Farmers Land & Irrigation Company – New Water Proje	ect Loan Application
REQUESTED ACTION: Approve loan request of \$185,333.00		

### **1.0 INTRODUCTION**

Farmers Land & Irrigation Company (FLIC) is requesting a new loan in the amount of \$185,333 from the Idaho Water Resource Board (IWRB) to replace their existing Soda Creek check structure, located in Soda Springs. Included in the design are additional gates to improve diversion controls and an overshot weir, allowing unrestricted flows within the creek outside the irrigation season.

### 2.0 BACKGROUND

The Farmers Land & Irrigation Company, established in 1890, began diverting and delivering water from both Soda and Big Spring Creeks through the FLIC Soda Creek Diversion works constructed in 1923. Since that time, the service area has grown with 22 shareholders and 4,670 shares servicing 4,300 acres across 20 miles of canals.

### **3.0 PRIOR LOANS**

FLIC has not held loans with the IWRB directly however, they are included in the Pooled Loan Program Revenue Bond, Series 2011A (October 7, 2011) to Caribou County. As such, they are responsible for a \$29,736 annual payment to Caribou County. At the time of this memo, a total of 8 payments (annual) remain on the outstanding balance.

### 4.0 PROPOSED PROJECT

The Project will replace the existing 1923 diversion works with a new structure to address deterioration & provide more accurate flow control. The existing radial gates will be replaced with three smaller slide gates to control leakage and, more precisely, control flows within the canal. Additionally, the new structure will include a pivot weir allowing FLIC to drop the gate to the channel bottom during the non-irrigation season, providing unrestricted flows through Soda Creek. This weir will also help FLIC better control the surface elevation upstream and provide more consistent flow rates.

### 5.0 BENEFITS

Accomplishing the Project would provide FLIC with multiple benefits, most notably a more reliable system to consistently deliver water for their patrons. The updated gates prevent leakage and allow for more precise deliveries, which will help conserve water within the system, while the overshot gate provides full, unrestricted flows within the creek during the non-irrigation season.

### **6.0 FINANCIAL ANALYSIS**

The total Project cost is estimated at \$246,500 with a \$28,500 contingency for a total of \$275,000. Of that total, FLIC is requesting a loan of \$185,333 with the remaining portion to be covered under an IWRB Aging Infrastructure grant (awarded Jan. 2024).

The current assessment per share is \$27.00, representing 0.92 acres. Currently, there are 4,760 shares held by 22 shareholders for a total estimated income of \$128,500 with no other sources of income. The estimated annual payment, based on a 15-year term and an estimated 3 equal disbursements, would be \$22,500 at an 8.5% interest rate.

Per the application information, FLIC plans to raise the shareholder assessment in February 2025 for the term of the loan, including costs for operation and maintenance. Aside from the payment due to Caribou County, no other debits were listed in the application.

Water Right	Source	<b>Priority Date</b>	Rate	Beneficial Use
11-432	Big Spring Creek	7/1/1905	20.00 cfs	Irrigation
11-531A	Soda Creek	5/1/1892	76.10 cfs	Irrigation
11-2109	Waste Water	4/23/1953	2.84 cfs	Irrigation
11-8081	Soda Creek	12/31/1965	50.00 cfs	Irrigation, Irrigation from Storage

### 7.0 WATER RIGHTS

### **8.0 SECURITY**

As security for the loan, the applicant has authorized the Board to hold a lien against the company's infrastructure, including the reservoir dam, diversion works, water rights, and parcels of land under the reservoir. Ownership documentation has been provided in the application package from the applicant.

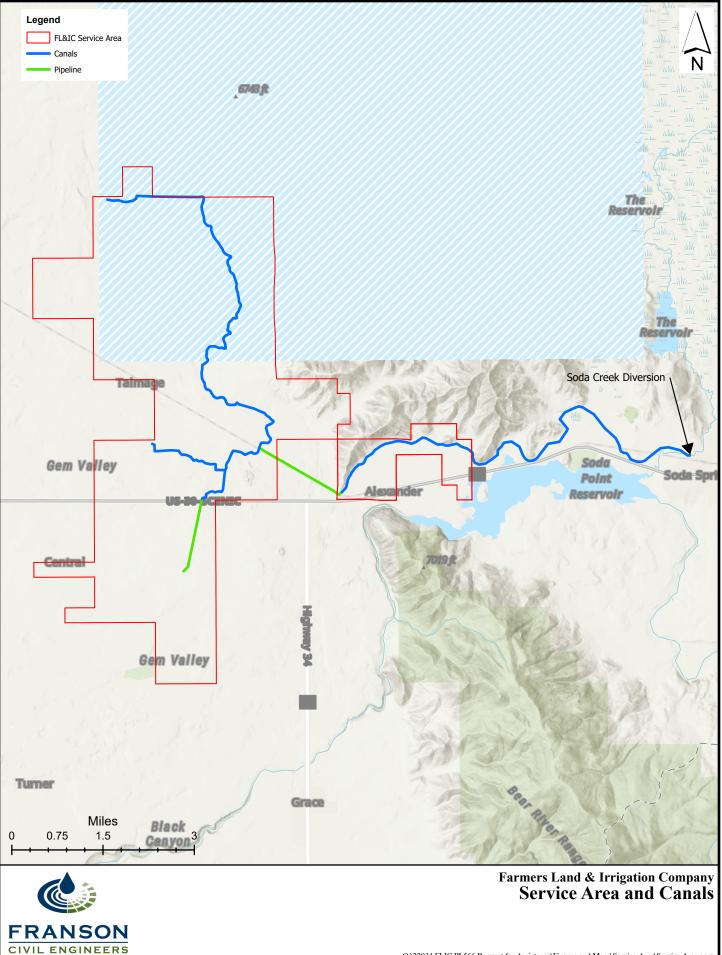

### 9.0 CONCLUSION AND RECOMMENDATION

The funds requested will be used to repair the existing Soda Creek diversion works, originally constructed in 1923. Improving the structure will allow the Company to more finely control diversions and, allow for the entire volume to pass through during the non-irrigation season without significantly raising the water level downstream.

As a non-profit organization, the Company plans to raise shareholder assessments to meet the estimated annual payment and will provide adequate collateral to secure the loan.

The applicant meets the qualification criteria, and the proposed project is consistent with the goals established by the Board in the Idaho State Water Plan. Staff recommend approval of the loan request, for the total amount of \$185,333.00.

### IN THE MATTER OF THE FARMERS LAND & IRRIGATION COMPANY LOAN REQUEST

RESOLUTION TO AUTHORIZE LOAN FUNDING FOR COSTS RELATED TO DIVERSION WORKS REPAIRS AND IMPROVEMENTS

1	WHEREAS, Farmers Land & Irrigation Company (Company) submitted a loan application to the Idaho Water Resource Board (IWRB) in the amount of \$185,333 to cover costs associated with the repair
2 3	and replacement of the existing Soda Creek diversion works; and
4	
5	WHEREAS, the Company was established in the 1890s and currently delivers approximately
6	11,000 acre-feet of irrigation water across 4,300 acres for 22 shareholders; and
7	
8	WHEREAS, the Soda Creek diversion works were constructed in 1923 and repairs are no longer
9	economically feasible; and
10	
11	WHEREAS, the proposal is requesting funds to rebuild the structure allowing the Company to
12	better control diversions during both the irrigation season and non-irrigation season; and
13	
14	WHEREAS, alternative options were explored but did not provide the Company a long-term
15	solution to deliver irrigation water to their patrons; and
16	
17	WHEREAS, the Company will increase assessments to their shareholders, beginning in February
18	2025, to cover costs associated with the annual loan payments; and
19	
20	WHEREAS, the Company is a qualified applicant, and the proposed Project is eligible for a loan
21	from the Board's Water Management Account; and
22	
23	WHEREAS, the proposed Project is in the public interest and is in compliance with the State
24	Water Plan.
25	
26	NOW THEREFORE BE IT FURTHER RESOLVED that the IWRB provides authority to the Chairman
27	of the Idaho Water Resource Board, or his designee, to enter into contracts, to effectuate the loan, with
28	the Company on behalf of the IWRB.
29	
30	NOW THEREFORE BE IT RESOLVED that the IWRB approves a loan not to exceed \$185,333 from
31	the Water Management Account at 8.5 % interest with a 15-year repayment term.
32	
33	NOW THEREFORE BE IT FURTHER RESOLVED that this resolution and the approval of the loan are
34	subject to the following conditions:
35	

36	1)	The Company shall comply with all applicable rules and regulations that apply to the
37		proposed Project.
38	2)	Prior to the disbursement of any funds, the Company shall comply with all statutory
39		requirements for incurring debt.
40	3)	Prior to the disbursement of any funds, the Company will provide acceptable security for the
41		loan to the IWRB.
42	4)	The IWRB reserves the opportunity to review the proposal at any time prior to the execution
43		of the contract.
44	5)	The Company shall be under contract within 60 days of the date of this resolution unless
45		otherwise approved by the IWRB.
46		

DATED this 24<sup>th</sup> day of May 2024.

JEFF RAYBOULD, Chairman Idaho Water Resource Board

ATTEST \_\_\_\_\_\_ DEAN STEVENSON, Secretary

## MEMO

To: Idaho Water Resource Board

From: Justin Ferguson

Date: May 24, 2024

Subject: Boise City Canal Company – Contract Extension of Time

**REQUIRED ACTION:** The Board will consider approval of a resolution to extend the 1-year period for execution on IWRB1041 for the Boise City Canal Company

A loan application for the Boise City Canal Company (BCCC) was approved at the March 2023 meeting and executed in June of that year. The loan was for a total of \$200,000 to be used to repair and modernize the existing canal infrastructure, lower the canal floor, and improve water accessibility for the Company throughout the season. Per IWRB resolution number 04-2023, an applicant has one year to act on the loan unless otherwise granted by the Board.

After the execution of the contract, BCCC applied for and received an Aging Infrastructure grant for \$122,000 in January of 2023 to help offset the costs of the Project. At the time of the loan, BCCC was unaware they would receive the grant funding. To date, BCCC has not drawn upon the loan, however, the loan is expected to be required to finish the project. In recognition that using the grant funding rather than the loan until such time as needed is in the best interests of the BCCC patrons, staff would request an extension of time through December 2025.
