**Re: 2022 Conjunctive Administration (Step 1 Methodology Order)**

Dear Director Spackman:

We are writing on behalf of our clients A&B Irrigation District, Burley Irrigation District, Milner Irrigation District, North Side Canal Company, and Twin Falls Canal Company in response to your March 1, 2022 letter concerning Step 1 of the Third Amended Methodology Order.

With respect to the Step 1 requirement to confirm irrigated acreage for the year, our clients adopt and resubmit the letter that was delivered to you for purposes of 2014 administration that is on file with you in this matter.<sup>1</sup> As noted in that letter, all of our clients' decreed natural flow water rights identify the number of authorized acres to irrigate within their respective project boundaries. Further, NSCC recently submitted information regarding certain changes to its boundary, but it did not change the total irrigated acreage. Accordingly, the Director is required to use the elements of the partial decrees for purposes of water right administration. I.C. §§ 42-607; 1417.

Moreover, all clients have confirmed that the expected irrigated area within each project this year has not varied by more than 5% from the existing information (electronic shape files) that have been submitted to you in prior years.

---

<sup>1</sup> Step 1 did not change for purposes of the various methodology orders.

The number of irrigated acres identified by existing shape files on file with the SRBA Court or as submitted to you in prior years is as follows: A&B – 15,924<sup>2</sup>; BID – 46,083; Milner – 13,335; NSCC – 154,067; TFCC – 194,778.

If you have any questions please contact me at (208) 733-0700.

Sincerely,

<sup>2</sup> This is the number of acres associated with A&B's decreed natural flow surface water rights (1-14 et al.). The District is also delivering surface water to other District lands through "soft conversion" projects. *See Travis L. Thompson December 22, 2016 Letter to Director Spackman.*
