Dear Managers:

As you are aware, the Second Amended Final Order Regarding Methodology for Determining Material Injury to Reasonable In-Season Demand and Reasonable Carryover (Methodology Order), which was issued in response to the Surface Water Coalition (SWC) delivery call, establishes the process for determining material injury to your respective surface water entities.

The Methodology Order states that junior ground water users will be required to mitigate, or face curtailment, in the event of shortfalls to the water supply. Step 1 of the Methodology Order states in relevant part:

By April 1, members of the SWC will provide electronic shape files to the Department delineating the total irrigated acres within their water delivery boundary or confirm in writing that the existing electronic shape file from the previous year has not varied by more than 5%; provided that the total acreage count does not exceed the number of acres to be irrigated within the decreed place of use. Because the SWC members can best determine the irrigated acres within their service area, the SWC should be responsible for submitting the information to the Department. If this information is not timely provided, the Department will determine the total irrigated acres based upon past year cropping patterns and
current satellite and/or aerial imagery. If an SWC member fails or refuses to identify the number of irrigated acres within its service area by April 1, the Department will be cautious about recognizing acres as being irrigated if there is uncertainty about whether the acres are or will be irrigated during the upcoming irrigation season. The Department will publish electronic shape files for each member of the SWC for the current water year for a review by the parties.

Methodology Order at 34.

In light of the above, please either provide the Department with your electronic shape files as soon as possible or confirm in writing that the existing electronic shape file from the previous year has not varied by more than 5%.

Sincerely,

Gary Spackman
Director

---

1 The Methodology Order is currently before the Department as a result of the Memorandum Decision and Order on Petitions for Judicial Review entered on September 26, 2014, in the Fifth Judicial District in consolidated Case No. CV-2010-382. The requirement that SWC members provide this information to the Department was not challenged on appeal and remains a requirement of the Methodology Order.
