Carey, ID 83320

April 30, 2024

Director Weaver,

Carey Valley Groundwater District is proposing the following mitigation plan for 2024 to prevent curtailment for the patrons of our District. We are writing this plan to address the prediction for April IDS of 74,100 acre feet. We have been purchasing a percentage of the recharge water that IGWA has been supplying for mitigation. We have been participating with our share of 172.32 acre feet of recharge. We predict that our usage for 2024 will be very similar to 2023 that we have listed below. The analysis below was generated by our usage that we presented for 2023 to Water Well Consultants.

We are providing this information to prevent curtailment for the patrons of Carey Valley Groundwater District.

This analysis was provided to us by Jaxon Higgs at Water Well Consultants.

2023 Usage Analysis
all values in acre-ft

	205,000 AF Allocation	240,000 AF Allocation	Baseline	2023 Usage	Diverslon Reduction	Accomplished Recharge	Total Conservation	2023 Mitigation Balance
Carey	703	821	5,671	1,103	4,568	0	4,568	3,747

If you have any further questions please feel free to contact one of our directors listed below.

Many thanks,
Leta Hansen
