ACKNOWLEDGEMENTS

The authors wish to acknowledge the contributions of Idaho Power Company, Stuart P. Luttrell of the University of Idaho, Gerald Lindholm and Mike Bassick of the U. S. Geological Survey, Anderson-Kelly Consultants, and Tom Nelson, attorney.

FOREWARD

This reference list was prepared by the Idaho Water and Energy Resources Research Institute to assist readers in locating references pertaining to the water resources of the Snake River basin above Swan Falls. The list concentrates on literature directed primarily at surface-water and ground-water flow systems, water and land use, and climatology. It does not include literature on water quality or geothermal ground-water systems.
