

Memorandum in Support of Temporary Transfer to Supplement Water Right No. 37-423

A copy of water right no. 37-423 is attached describing the place of use of the water right. Ground water will be diverted to supply water to 36 acres under water right no. 37-423 from 36 acres in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 13 Twp 01S Rge 19E, B.M. that is fallow and not being irrigated this year. A copy of water right no. 37-22777 and the POU map are attached.

Up to 0.5 cfs of ground water will be diverted from wells shown on the Temporary Change Application this Memorandum is accompanying. The RF shown on the Application is the response function taken from the support files accompanying Jennifer Sukow's May 17, 2021 Memorandum titled "Predicted hydrologic response in Silver Creek and the Little Wood River to curtailment of groundwater use in 2021, Basin 37 Administrative Proceeding, AA-WRA-2021-001." The RF is shown only for those wells without a well log. The well logs are attached for all other wells.

IDWR offices are open to the public and following the CDC guidelines for wearing masks and observing social distancing. For in-person visits, we encourage you to call ahead for an appointment. ×

Conditions of Approval:

1. 004 The issuance of this right does not grant any right-of-way or easement across the land of another.
2. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37M.
3. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
4. X11 The right holder shall install and maintain acceptable measuring devices at the point of injection into Loving Creek and at the point of rediversion from Loving Creek.
5. X35 Rights 37-22777, 37-2553A and 37-8571 when combined shall not exceed a total diversion rate of 5.46 cfs.
6. R55 This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
7. R63 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.

8. 065 The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
9. 105 If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
10. An intake screen acceptable to Idaho Fish & Game shall be installed at the point of rediversion on Loving Creek to prevent any negative impact on juvenile fish.

6. General Information:

- a. Who owns the water right to be changed? Blackburn Farming LLC, O'Gara (Speth), Stevenson
- b. Describe the arrangement allowing use of the right. Sharing agreement with South Valley and Galena Ground Water Districts, Water Bank
- c. Describe the affect on the land now irrigated if the change is approved pursuant to this application: Water rights are not being used in 2021 & there will be no impact to the lands these rights are appurtenant to.
- d. Has the water right sought to be transferred been used this year? Yes No If yes, explain. _____
- e. Absent the changes, how would the right be used for the remainder of the year? Remain unused.
- f. Describe other water rights used for the same purpose. None except those identified in this application.
- g. Remarks: This transfer seeks to augment the discharge of Silver Creek and the Little Wood River to supply water to mitigate the water supply for Little Wood River water users.

I hereby assume all risk in accordance with Section 42-222A, Idaho Code, and assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Temporary Change Application No. _____, and said application is hereby _____, subject to the following limitations and conditions:

Temporary Change Expiration Date _____

Signed this _____ day of _____, _____.

For the Director

Memorandum in Support of Temporary Transfer to Supplement Little Wood River Water Supply

Water from 155 acres not being irrigated this year will be provided from portions of water rights 37-23090, 37-23091, 37-23092 and 37-23093 not currently being used. The place of use for these 3 water rights has been reshaped this year with over 200 acres not being irrigated that are within the place of use of these 4 water rights. The lands have been identified through the overlay of a sketch map with the current place of use of the water rights, copy attached. A more precise mapping can be prepared of the idle acres if needed as time permits.

An additional 302 acres currently leased to the Water Supply Bank are not being irrigated and the water from those acres is available to augment the water supply of the Little Wood River. The 302 acres comes from a portion of water rights 37-2581, 37-2599, 37-2604, 37-2616 and 37-7758. A map of the fallowed acres is attached to this package.

About 893 acres covered by ground water rights are not being irrigated this year by Stevenson. Also, Lakeside Industries are not irrigating 157 acres covered by ground water rights.

Up to 9 cfs of ground water will be diverted from wells shown on the Temporary Change Application this Memorandum is accompanying. This 9 cfs will be in addition to the ground water being specifically pumped to augment the water supply for water rights 37-49 and 37-423. The RF shown on the Application, for the wells without a well log, is the response function taken from the support files accompanying Jennifer Sukow's May 17, 2021 Memorandum titled "Predicted hydrologic response in Silver Creek and the Little Wood River to curtailment of groundwater use in 2021, Basin 37 Administrative Proceeding, AA-WRA-2021-001." The response function is the fraction of the diverted water estimated to appear in Silver Creek by the end of September 2021.

IDWR offices are open to the public and following the CDC guidelines for wearing masks and observing social distancing. For in-person visits, we encourage you to call ahead for an appointment. ✕
