ACTION OF THE DEPARTMENT OF WATER RESOURCES

The Idaho Department of Water Resources hereby approves the above Application for Amendment for Permit No. 37-7842 with the following:

Conditions of Approval

1. The issuance of this right does not grant any right-of-way or easement across the land of another.
2. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
3. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
5. Pursuant to Section 42-234(4), Idaho Code, to ensure that other water rights are not injured by the operations of the recharge project authorized by this right, the Director has authority to approve, disapprove, or require alterations in the methods employed to achieve ground water recharge.
6. Pursuant to Section 42-234(3), Idaho Code, the Director may reduce the amount of water that may be diverted for recharge purposes under this right even though there is sufficient water to supply the entire amount authorized for appropriation under this right.
7. Prior to further diversion and use of water in accordance with this water right, the right holder shall obtain Bureau of Land Management authorization necessary to access the point of diversion or place of use or to convey water across federal land.
8. Places of use for groundwater recharge describing federal public lands within the canals and discharges outside of the canals onto federal public land are not authorized, unless specifically authorized in writing by the United States.
10. For any proposal to change the period of use through an application for transfer (Idaho Code § 42-222) or through an application to rent the water right from the Water Supply Bank (Idaho Code § 42-1783), the right holder bears the burden of proving that the change in the period of use will not injure other water rights, including the following power generation water rights: 37-7943, 37-7857, 37-7865, 37-7922, 37-7899, 37-7916, 37-8096, 37-8251, 37-7863, 37-7911 and the following permits or licenses issued on the basis of the following permits: 37-21297, 37-8113, and 37-8262.

This amendment is issued pursuant to the provisions of Idaho Code § 42-211.
