37.03.03 – RULES AND MINIMUM STANDARDS FOR THE CONSTRUCTION AND USE OF INJECTION WELLS

| | pter is adopted under the legal authority of Sections 42-3903A, and 42-3913, 42-3914, and through 42 ho Code. (3-18-22 |
|--|--|
| 001. | TITLE AND SCOPE. |
| and Use | 01. Title. These rules are titled IDAPA 37.03.03 "Rules and Minimum Standards for the Construction of Injection Wells." (3-18-22) |
| injection 035.01). wells are wells ap | O2. Scope. These rules and establish minimum standards are and criteria for construction and ment of Class V deep and shallow use of injection wells in the state of Idaho, except Indian lands, and the of fluids to such wells. Upon promulgation, these rules apply to all injection wells (see Rule Subsection). The construction and use of Class I, III, IV, or VI injection wells are prohibited by these rules. Class IV also prohibited by federal law. These rules and minimum standards for construction and use of injection by to all injection wells in the state of Idaho, except in Indian lands. All injection wells shall be permitted tructed in accordance with the "Well Construction Standards Rules" found in IDAPA 37.03.09 which are d under Section 42-238, Idaho Code. [3-18-22] |
| reauiren | 0302. Rule Coverage. In the event that a portion of these rules is less stringent than the minimum ents for injection wells as established by Federal regulations (40 CFR Parts 141, 144, 145, and 146), the |
| | re Federal requirement will be used to regulate the injection well. (3-18-22 |

| Idaho Code 42-3902 | 2 . (3-18-22) | |
|---|--|-----------------|
| | pplicant. Any owner or operator submitting an application for permit to construct, modify on well to the Director-of the Department of Water Resources. (3–18–22 | |
| | pplication . The standard Department forms for applying for a permit, including any additions rations to the forms. (3–18–22 | |
| of water from the fe | quifer. Any formation that will yield water to a well in sufficient quantities to make production permation reasonable for a beneficial use, except when the water in such formation results solely get through an injection well. Any geologic formation(s) that yields water to a well in sufficient | |
| quantities to make t | he production of water from the formation feasible for beneficial use. (3-18-22 | |
| limited to, domest recharge and storag user of the water as | eneficial Use. One (1) or more of the recognized beneficial uses of water including but no ic, municipal, irrigation, hydropower generation, industrial, commercial, recreation, aquifer e, stockwatering and fish propagation uses, as well as other uses which provide a benefit to the determined by the Director. Industrial use as used for purposes of these rules includes, but is no turing, mining and processing uses of water. (3-18-22) | |
| mmied to, manurac | turing, mining and processing uses of water. (3-18-22) | |
| | est Management Practice (BMP). A practice or combination of practices that are more rechniques at preventing or reducing contamination of ground water and surface water by tion. (3-18-22 | |
| 07. B | oard. The Idaho Water Resource Board. | |
| | · · · · · · · · · · · · · · · · · · · | |
| borehole during or | asing. A pipe or tubing of appropriate material, of varying diameter and weight, lowered into a after drilling in order to support the sides of the hole and thus prevent the walls from caving, to ing fluid into porous ground, or to prevent water, gas, or other fluid from entering or leaving the | |
| hole. The permaner | ing fund into porous ground, or to prevent water, gas, or other fund from entering or reaving the at conduit installed in a well to provide physical stabilization, prevent caving or collapse of the | |
| borehole, maintain t | the well opening and serve as a solid inner barrier to allow for the installation of an annular seal. | <u>(3-18-22</u> |
| 10. C | ementing. The operation whereby a cement slurry is pumped into a drilled hole and/or forced (3-18-22) | |
| | esspool. An injection well that receives sanitary waste without benefit of a treatment system of | |
| treatment device su | ch as a septic tank. Cesspools sometimes have open bottom and/or perforated sides. An injection | |
| well that receives und/or perforated si | untreated sanitary waste containing human excreta, and which sometimes has an open bottom des. (3-18-22 | |
| and of perforated si | (5.10.22 | |
| forming, rod-shape thirty-five degrees | oliform Bacteria . All of the aerobic and facultative anaerobic, gram-negative, non-spord bacteria that either ferment lactose broth with gas formation within forty-eight (48) hours a Celsius (35C), or produce a dark colony with a metallic sheen within twenty-four (24) hours or um containing lactose. | |
| 13 <u>11</u> . C adjacent to one (1) o | onfining Bed . A body of impermeable or distinctly less permeable material stratigraphically or more aquifers. | |
| 14 <u>12</u> . C | onstruct. To create a new injection well or to convert any structure into an injection well. | |
| 45 <u>13</u> . C | ontaminant. Any physical, chemical, biological, or radiological substance or matter.(3-18-22 | |
| | ontamination. The introduction into the natural ground water of any physical, chemical active material that may: | |
| a. C | ause a violation of Idaho Ground Water Quality Standards found in IDAPA 58.01.11 "Ground | |
| | | |

Page 2

| Water Quality R | tule" or the federal drinking water quality standards, whichever is more stringent; or | (3-18-22) | |
|---------------------------|---|------------------------|--|
| b. | Adversely affect the health of the public; or | (3-18-22) | |
| c. | Adversely affect a designated or beneficial use of the State's ground water. | Contamination | |
| includes the intr | oduction of heated or cooled water into the subsurface that will alter the ground wa | | |
| and render the lo | ocal ground water less suitable for beneficial use. | (3-18-22) | Commented [BE2]: ICL (Comment, 5/11/23) requested |
| | | | that IDWR retain this language. |
| 17 <u>15</u> . | Conventional Mine. An open pit or underground excavation for the production of | | |
| | | (3-18-22) | *Since the common definition of contamination in Idaho |
| 1017 | December (Abouton) To announce and from an action and shot initiation to | ll. 4l11 | Rules does not include reference to heated/cooled water |
| 18 <u>16</u> . | Decommission (Abandon). To remove a well from operation such that injection to See "permanent decommission" and "unauthorized decommission". Any well | | Heated/cooled water could raise/lower baseline temp, which could adversely impact WQ. IDWR recommends re |
| | noved from service and filled or plugged in accordance with these rules so as to m | | taining the language. |
| | roperly decommissioned well will not: | eet the intent of | () |
| a. Produce or ac | | () | |
| | nduit for the movement of contaminants inside or outside the well casing; or | | |
| | vement of surface or ground water into unsaturated zones, into another aquifer, or be | tween aquifers. | |
| | * | | (3-18-22) |
| | | | |
| 19 <u>17</u> . | DEQ . The Idaho Department of Environmental Quality. | (3-18-22) | |
| *** | | | |
| 20 18. | Deep Injection Well. An injection well which is more than eighteen (18) feet in | | |
| pelow land surfa | ace. | (3-18-22) | |
| 2110 | Department. The Idaho Department of Water Resources. | (2.19.22) | |
| 21 19. | Department. The Idano Department of Water Resources. | (3-18-22) | |
| 22 20. | Director . The Director of the Idaho Department of Water Resources. | (3-18-22) | |
| - | | (* 14 11 | |
| 23 21. | Disposal Well. A well used for the disposal of waste into a subsurface stratum. | (3-18-22) | |
| | | | |
| 24 <u>22</u> . | Draft Permit. A prepared document indicating the Director's tentative decision to | | |
| | and reissue, terminate, or reissue a "permit." Permit conditions, compliance | | |
| | irements are typically included in a "draft permit". A notice of intent to terminate to deny a permit are types of "draft permits." A denial of a request for modification. | | |
| | rmination is not a "draft permit." | $(\frac{3-18-22}{})$ | |
| reissuarice, or te | miniation is not a draft permit. | (3-10-22) | |
| 25 23. | Drilling Fluid. Any number of liquid or gaseous fluids and mixtures of fluids and | solids (such as | |
| solid suspension | s, mixtures and emulsions of liquids, gases, and solids) used in operations to drill be | reholes into the | |
| earth A heavy s | uspension used in drilling an "injection well," introduced down the drill pipe and t | hrough the drill | |
| bit. | | (3-18-22) | |
| | | | |
| | Drywell. An injection well completed above the water table so that its bottom | | |
| typically dry exc | cept when receiving fluids. | (3-18-22) | |
| 27 | E.J | | |
| | Endangerment. Injection of any fluid which exceeds Idaho ground water quality water quality standards, whichever is more stringent, that may result in the r | | |
| | t water quality standards, whichever is more stringent, that may result in the percent water which supplies or can reasonably be expected to supply any public or n | | |
| | ground water which supplies or can reasonably be expected to supply any public or no presence of such contaminant may result in such a system not complying with ar | | |
| | or may otherwise adversely affect the health of persons or result in a violation of | | |
| | s that would adversely affect beneficial uses. | (3-18-22) | Commented [PE2]: Definition is not personal |
| quarity biandard | s that it data and ottory affect beneficial about | (3 10 22) | Commented [BE3]: Definition is not necessary. |
| 28 24. | Exempted Aquifer. An "aquifer" or its portion that meets the criteria in the defin | ition of USDW | |
| but which has be | een recategorized as "other" according to the procedures in IDAPA 58.01.11 "Ground | | |
| Rule". | | (3-18-22) | |

| 29. | Existing injection wen. An injection wen other than a new injection wen. (3-18-2 |
|--|--|
| 30 <u>25</u> . conditions in w | Experimental Technology. A technology which has not been proven feasible under the nich it is being tested. (3-18-22 |
| | Facility or Activity. Any UIC "injection well," or another facility or activity that is subject the UIC program. (3-18-2 |
| 32. | Fault. A surface or zone of rock fracture along which there has been displacement. (3-18-2 |
| | Flow Rate. The volume per time unit given to the flow of gases or other fluid substance which orifice, pump, turbine or passes along a conduit or channel. (3-18-2) |
| 3426. gaseous or any | Fluid. Any material or substance which flows or moves, whether in a semisolid, liquid, sludgother form or state. |
| homogeneity w | Formation. A body of consolidated or unconsolidated rock characterized by a degree of litholog nich is prevailingly, but not necessarily, tabular and is mappable on the earth's surface or traceable (3-18-2). |
| | Generator. Any person, by site location, whose act or process produces hazardous was ed in 40 CFR part 261. (3-18-2 |
| <mark>37<u>27</u>. rock or soil <u>Wa</u></mark> | Ground Water. Any water that occurs beneath the surface of the earth in a saturated formationer below the land surface in a zone of saturation. (3-18-22 |
| 3828. Rule," Section 2 | Ground Water Quality Standards . Standards found in IDAPA 58.01.11, "Ground Water Quality 00. (3-18-22_ |
| <mark>39<u>29</u>.</mark> Hazardous Was | Hazardous Waste. Any substance defined by IDAPA 58.01.05, "Rules and Standards fte." |
| 40 <u>30</u> . Country as: | Indian Lands. "Indian Country" as defined in 18 U.S.C. 1151. That section defines India (3-18-22_ |
| a. government, no reservation; | All land within the limits of any Indian reservation under the jurisdiction of the United State of twithstanding the issuance of any patent, and, including rights-of-way running through the issuance of any patent, and, including rights-of-way running through the issuance of any patent, and, including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent, and including rights-of-way running through the issuance of any patent running |
| b. original or subs | All dependent Indian communities within the borders of the United States whether within the equently acquired territory thereof, and whether within or without the limits of a State; and (3-18-22) |
| c. way running thi | All Indian allotments, the Indian titles to which have not been extinguished, including rights-cough the same. $(3-18-22)$ |
| non-residential 1 | Individual Subsurface Sewage Disposal System. For the purpose of these rules, any standard osal system which injects sanitary waste from single family residential domestic septic systems, son-domestic septic systems which are used solely for the disposal of sanitary waste and have the fewer than twenty (20) people a day. (3-18-22 |
| 4232. volcanic terrain emplacing fluid | Improved Sinkhole . A naturally occurring karst depression or other natural crevice found and other geologic settings which that have been modified by man for the purpose of directing as into the subsurface. (3-18-22 |
| 4 <u>333</u> . | Injection. The subsurface emplacement of fluids through an injection well. (3–18–22_ |
| | |

Section 000 Page 4 MWeaver_11012022

| a. | iteria: A bored, or driven shaft whose depth is gre- | ater than the largest surface dir | (3-18-22) mension; (3-18-22) | |
|----------------------------------|--|-----------------------------------|--------------------------------------|--|
| | | C | , ,, | |
| b. | A dug hole whose depth is greater than the | largest surface dimension; | (3-18-22) | |
| c. | An improved sinkhole; or | | (3-18-22) | |
| d. | A subsurface fluid distribution system. | | (3-18-22)_ | Commented [BE4]: City of Middleton (Comment requested that IDWR revise this definition to allow |
| 45. through an "inje | Injection Zone. A geological "formation section well." | n", or those sections of a for | rmation receiving fluids (3-18-22) | irrigation systems. |
| 46. | IWRB. Idaho-Water Resource Board. | | (3-18-22) | *As a primacy program, we need to keep definition sistent with EPA definition. Added language in Rule to address the City's concern. |
| | Large Capacity Cesspools. Any cesspool lisposal of sanitary wastes (for example: a duse used by twenty (20) or more people per data. | plex or an apartment building) | or any cesspool used by | 13 - 1-1-1-250 tile St, 3 St. (Gallier) |
| 48. septic tank and | Large Capacity Septic System. Class V do not meet the criteria of an individual subsu | | | |
| as to accept or l | Maintain. To allow, either expressly or by se able to accept fluids. Unless a well has bee se rules it is considered to be capable of accep | en permanently decommissione | | |
| 5036. operations which | Modify . To alter the construction of an inj h neither deepen nor increase the dimensions | | ide cleaning or redrilling (3-18-22) | |
| | Motor Vehicle Waste Disposal Wells. In r maintenance activities, such as an auto body ialty repair shop (transmission and muffler re | repair shop, automotive repai | r shop, new and used car | |
| | New Injection Well. An "injection well' State applicable to the well is approved or pro- | | or injection after a UIC (3-18-22) | |
| 5338. that has been pa | Open-Loop Heat Pump Return Wells. In ssed through a heat exchange system for cool | | ce water or ground water (3-18-22) | |
| 54. | Operate. To allow fluids to enter an injection | on well by action or inaction o | f the operator. (3-18-22) | |
| 55. county, state ag well. | Operator. Any individual, group of individual, group of individual, group of other control of the control of th | | | |
| | Owner_or Operator. Any individual, gre- ounty, state agency, taxing district, federal age is proposed to be constructed_The owner or o rogram. | ency or other entity owning lan | d on which any injection | (3-18-22) |
| | Packer. A device lowered into a well to pro | oduce a fluid-tight seal. | (3-18-22) | |
| 3/. | 1 | | ` ' | |
| 57. | Perched Aquifer. Ground water separated | from an underlying main bod | ly of ground water by an | |

| unsaturated zon | c. | (3-18-2. |
|---------------------------|--|-------------------------------|
| | Permanent Decommission. The discontinuance of use of an injection well in a | |
| | such that the injection well no longer has the capacity to inject fluids and the upv | |
| | iid is prevented. This also includes the disposal and proper management of any so | |
| | materials removed from or adjacent to the injection well in accordance with all a | |
| State, and local | regulations and requirements. | (3-18-22 |
| | | |
| 60 <u>40</u> . | Permit . An authorization, license, or equivalent control document issued by the | |
| | | (3-18-22 |
| 61. | Person. Any individual, association, partnership, firm, joint stock compan | v. trust. politica |
| subdivision, pul | blic or private corporation, state or federal governmental department, agency or i | nstrumentality, c |
| | | (3-18-22 |
| 62 41. | Point of Beneficial Use. The top or surface of a USDW, directly below an inju- | action wall when |
| | le for a beneficial use. | (3-18-22 |
| water is availab | ic for a beneficial use. | (3-10-22 |
| 63 42. | Point of Diversion for Beneficial Use. A location such as Location of a produc | ing well or sprin |
| where ground w | vater is taken under control and diverted for a beneficial use. | (3-18-22 |
| 6442 | | 1 11 |
| 64 <u>43</u> . | Point of Injection. The last accessible sampling point prior to waste being | |
| | ronment through an injection well. For example, the point of injection for a Clas | |
| might be the dis | stribution box. For a drywell, it is likely to be the well bore itself. | (3-18-22 |
| 65. | Pressure. The total load or force per unit area acting on a surface. | (3-18-22 |
| | | (3 |
| 6644 . | Radioactive Material. Any material, solid, liquid or gas which emits radiation | on spontaneously |
| Radioactive geo | ologic materials occurring in their natural state are not included. | (3-18-22 |
| | | |
| 67<u>45</u>. | | |
| | tablished for discharges to water in an unrestricted area by 10 CFR 20.1302.(b)(2) 10 CFR 20 listed in 10 CFR part 20, appendix B, table II, column 2. | (3-18-22) |
| Appendix B of | 10 CFR 20 listed in 10 CFR part 20, appendix B, table 11, column 2. | (3-18-22 |
| 68. | RCRA. The Solid Waste Disposal Act as amended by the Resource Conservat | ion and Recover |
| Act of 1976. | | |
| | | |
| | Remediation Project. Use of an injection well for the removal, treatment | |
| | om ground water through actions or the removal or treatment of a contaminant in | |
| approved by the | Director. | (3-18-22 |
| 70. | Residential (Domestic) Activities. Human activities that generate liquid or s | olid waste in an |
| public, private, | industrial, commercial, municipal, or other facility. | (3-18-22 |
| | | |
| //I. | Sanitary Waste. Any fluid generated through residential (domestic) activity | ies, such as foo |
| preparation, cie | aning and personal hygiene. This term does not include industrial, municipal, cor process fluids. | |
| non-residentiai | process nads. | (3-18-22 |
| 72. | Schedule of Compliance. A schedule of remedial measures including an enforce | eable sequence o |
| actions or opera | tions leading to compliance with the standards. | (3-18-22 |

| 77. Stratum (plural strata). A single-sedimentary bed or layer, regardless of thickness, that consists of generally the same kind of rock material. (a) 18-22) 7848. Subsidence. The lowering of the natural land surface in response to: Earth movements; lowering of fluid pressure; removal of underlying supporting material by mining or solution of solids, either artificially or from natural causes; compaction due to wetting (Hydrocompaction); oxidation of organic matter in soils; or added oad on the land surface. 7949. Subsurface Fluid Distribution System. An assemblage of perforated pipes, drain tiles, or other similar mechanisms intended to distribute fluids below the surface of the ground. 8050. UIC. The Underground Injection Control program under Part C of the Safe Drinking Water Act, including an "approved State program." 81. Unauthorized Decommission. The decommissioning of any injection well that has not received the approval of the Department prior to decommissioned when discovered by the Director. These wells may have to be properly decommissioned when discovered by the Director to ensure that the well prevents commingling of aquifers or is no longer capable of injection. 82. Underground Injection. See "injection. 8351. Underground Source of Drinking Water (USDW). An aquifer or its portion: (3-18-22) 8351. Underground Source of Drinking Water (USDW). An aquifer or its portion: (3-18-22) ii. Contains a sufficient quantity of ground water to supply a public water system; or (3-18-22) (1) Currently supplies drinking water for human consumption; or (3-18-22) b. Which is not an exempted aquifer. (3-18-22) 84. Unreasonable Contamination. Endangerment of a USDW or the health of persons or other confedical uses by injection. See "endangerment." (3-18-22) 852. Water Quality Standards. Refers to those standards found in Idaho Department of Environmental Quality Rules, IDAPA 58.01.02, "Water Quality Standards" and IDAPA 58.01.11, "Ground Water Quality Rule." a notice, which shall be in accordance with Chapter 52, Title 67, Idaho Code, shall be sent by certified mail to the owner or operator whose permit is proposed to be canceled. The Board shall affirm, modify, or reject the Director's decision and make its decision in the form of an order to the Director. 021011. -- 034<u>019</u>. (RESERVED) 035020. CLASSIFICATION OF INJECTION WELLS. Classification of Injection Wells. For the purposes of these rules, injection wells are classified as follows: (3-18-22)Class I: (3-18-22)a. Wells used by generators of hazardous waste or owners or operators of hazardous waste i. management facilities to inject hazardous waste beneath the lowermost formation containing, within one-quarter (1/4) mile of the well bore, an underground source of drinking water. Other industrial and municipal disposal wells which inject fluids beneath the lowermost formation containing, within one-quarter (1/4) mile of the well bore, an underground source of drinking water. Radioactive waste disposal wells which inject fluids below the lowermost formation containing an underground source of drinking water within one-quarter (1/4) mile of the well bore. (3-18-22)Class II. Wells used to inject fluids: (3-18-22)Which are brought to the surface in connection with natural gas storage operations, or i. conventional oil or natural gas production and may be commingled with waste waters from gas plants, dehydration stations, or compressor stations which are an integral part of production operations, unless those waters are classified as a hazardous waste at the time of injection. (3-18-22)ii. For enhanced recovery of oil or natural gas; and (3-18-22)iii. For storage of hydrocarbons which are liquid at standard temperature and pressure. (3-18-22)c. Class III. Wells used to inject fluids for extraction of minerals including: (3-18-22)i. Mining of sulfur by the Frasch process; (3-18-22)In situ production of uranium or other metals; this category includes only in-situ production from ore bodies which have not been conventionally mined. Solution mining of conventional mines such as stopes leaching is included in Class V. (3-18-22)(3-18-22)iii. Solution mining of salts or potash. d. Class IV: (3-18-22)Wells used by generators of hazardous waste or of radioactive waste, by owners or operators of hazardous waste management facilities, or by owners or operators of radioactive waste disposal sites to dispose of hazardous waste or radioactive waste into or above a formation which within one-quarter (1/4) mile of the well contains an underground source of drinking water. Wells used by generators of hazardous waste or of radioactive waste, by owners or operators of hazardous waste management facilities, or by owners or operators of radioactive waste disposal sites to dispose of hazardous waste or radioactive waste above a formation which within one-quarter (1/4) mile of the well contains an underground source of drinking water.

| 051. (RESERVED) |
| 052. CLASS V INJECTION WELL CONSTRUCTION AND OPERATION REQUIREMENTS (|
| 01. Construction Requirements. The following requirements apply to all Class V injection we authorized by permit unless noted differently: |
| a. Deep injection wells shall be constructed by an Idaho licensed well driller to conform with current Well Construction Standards (IDAPA 37.03.09), the conditions of the well construction permit, and conditions of the UIC permit issued pursuant to these rules, except that a driller's license is not required for construction of a driven mine shaft or a dug hole. |
| b. Well drillers or other persons involved with the construction of any injection well—shall a commence construction of the injection well until a certified copy of the approved injection well permit is obtain from the Director. |
| c. Injection wells shall be constructed in accordance with the conditions of the permit. Ru authorized shallow injection wells shall be constructed as shown or described in the inventory submittal. |
| d. Injection wells shall be constructed to prevent the entrance of any fluids other than specified in permit. |
| e. Deep injection wells shall be constructed to prevent waste of artesian fluids or movement of flu from one aquifer into another. |
| f. When construction or modification of an injection well has been completed, the owner or opera shall inform the Director of completion on a form provided by the Department. |
| g. A sampling port shall be provided for deep injection well systems if the system is enclosed. (|
| h. All new injection wells constructed into alluvial formations shall have a minimum ten (10) for separation from the bottom of the well and seasonal high ground water. |
| 02. Operational Conditions and Requirements. The following requirements apply to all Class injection wells authorized by permit unless noted differently: |
| a. The injection well shall not be used until the construction, operation and maintenar requirements of the permit are met and provisions are made for any required inspection, monitoring and receiveping. |
| b. For both permitted injection wells and rule-authorized shallow injection wells, injection of a contaminant at concentrations exceeding the standards set in Paragraph 050.03.c. into a present or future drinking other ground water source that may cause a health hazard or adversely affect a designated and protected use prohibited. |
| c. The injection well owner or operator shall develop approved procedures to detect constructional operational failure in a timely fashion and shall have contingency plans to cope with the well failure. (|
| d. Authorized representatives of the Department shall be allowed to enter, inspect and/or sample: |
| (i.) The injection well and related facilities; (|

060. HEARING BEFORE THE IDAHO WATER RESOURCE BOARD.

01. General. All hearings before the Board will be conducted in accordance with Chapter 52, Title 67, Idaho Code. Judicial review of the final determination by the Board may be secured by the owner by filing a petition for review as prescribed by Chapter 52, Title 67, Idaho Code, in the District Court of the county where the injection well is situated or proposed to be located. The petition for review shall be served upon the Chairman of the Board and upon the Attorney General.

One of the purpose of determining whether the permit shall be issued, whether the conditions imposed in a permit are reasonable, whether a change in circumstances warrants a change in conditions imposed in a permit are reasonable, whether a change in circumstances warrants a change in conditions imposed in a permit are vertically a permit are reasonable.

Director: Drior to the cancellation of such permit there shall be a hearing before the Board for the purpose of determining whether or not the permit should be cancelled. At least thirty (30) days prior to the hearing, a notice, which shall be in accordance with Chapter 52, Title 67, Idaho Code, shall be sent by certified mail to the owner or operator whose permit is proposed to be canceled. The Board shall be sent by certified mail to the owner or operator whose permit is proposed to be canceled. The Board shall affirm, modify, or reject the Director's decision and make its decision in the form of an order to the Director.

061. -- 069. (RESERVED)

070. VIOLATIONS, FORMAL NOTIFICATION AND ENFORCEMENT.

Decommission a well in an unauthorized manner.

- a. Fail to comply with a permit or authorization, or terms or conditions thereof;

 b. Fail to comply with applicable standards for water quality;

 c. Fail to comply with any permit application notification or filing requirement;

 d. Knowingly make any false statement, representation or certification in any application, report,
- document or record filed pursuant to these rules, or terms and conditions of an issued permit;

 ()

 e. Falsify, tamper with or knowingly render inaccurate any monitoring device or method required to
- be maintained or utilized by the terms and conditions of an issued permit; (
 - f. Fail to respond to any formal notification of a violation when a response is required; or (
- 02. Additional. It shall be a violation of these rules for any person to construct, operate, maintain,

convert, plug, decommission or conduct any other activity in a manner which results or may result in the unauthorized injection of a hazardous waste or of an advantage waste by an injection well.

Commented [BE19]: Removed, not necessary. Duplicative of Idaho Code.

Section 000 Page 24 MWeaver_11012022

Formal Notification. Formal notification of violations may be communicated to the owner or operator with a letter, a notice of violation, a compliance or enforcement order or other appropriate means

Enforcement. Violation of any of the provisions of the Injection Well Act (Chapter 39, Title 42, Idaho Code) or of any rule, regulation, standard or criteria pertaining to the Injection Well Act may result in the Director initiating an enforcement action as provided under Chapters 17 and 39, Title 42, Idaho Code.
