Attorneys for Idaho Ground Water Appropriators, Inc.

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF DISTRIBUTION OF
WATER TO WATER RIGHT NOS. 36-02356A, 36-07210 AND 36-07427

IGWA’s RESPONSE TO DIRECTOR’S JUNE 7, 2005 ORDER REGARDING REPLACEMENT WATER PLAN (BLUE LAKES DELIVERY CALL)

Idaho Ground Water Appropriators, Inc. (“IGWA”), through its counsel Givens Pursley LLP and on behalf of its ground water district members, Magic Valley Ground Water District (“MVGWD”) and North Snake Ground Water District (“NSGWD”) (collectively the “Ground Water Districts”), hereby files this Response (“Response”) to Director’s June 7, 2005 Order Regarding IGWA’s Replacement Water Plan (“June 7th Order”) in this matter.

INTRODUCTION

On May 30, 2005, IGWA, on behalf of its members MVGWD and NSGWD, filed a Replacement Water Plan that proposed to implement actions in 2005 that would produce steady state and transient reach gains to the Devils Washbowl subreach of the Thousand Springs Reach (“TSR”) of the Snake River sufficient to satisfy the Director’s the Director’s May 19, 2005 Order
responding to the Blue Lakes Trout Farm, Inc. Delivery Call ("Delivery Call Order"). These proposed actions included providing a surface water supply for irrigation of up to 9,369 ground water-irrigated acres within the NSGWD ("Conversions") and a substitute supply of water to Billingsley Creek water users. Delivery of surface water to the Conversions through the North Side Canal will directly offset ground water depletions associated with irrigation of Conversions. Delivery of surface water through the North Side Canal to the Conversions and to the head of Billingsley Creek via the Sandy Pipeline Project also will result in incidental recharge to the aquifer from canal seepage and seepage from the Sandy Pipeline Ponds. The proposed actions also included a voluntary curtailment of ground water irrigation of up to ten percent of the ground water irrigated acres in the two Ground Water Districts in 2005 and, where feasible, opportunistic recharge actions.

The Director’s June 7 Order denied any credit for canal seepage and voluntary curtailments and significantly limited credit for Conversions. Based on the information reviewed by the Department, the June 7 Order credited the Ground Water Districts with only 5.3 cfs of the 10 cfs steady state benefits to the Devils Washbowl subreach required by the Delivery Call Order. The June 7 Order also required the Ground Water Districts, by June 14, 2005, to "identify specific actions in 2005 in addition to the steady state replacement water provided by the existing ground water to surface water conversions that will provide the full 10.0 cfs of replacement water in the Devils Washbowl [subreach] at steady state conditions. . . ." Order at 14-15.

This Response is intended to comply with the above requirement by clarifying the additional ground water rights that are appurtenant to the Conversions previously tabulated in Attachment B of the Replacement Water Plan. This Response also provides documentation of
those acres within the Ground Water Districts that as of June 14, 2005 have been specifically identified as voluntary curtailments for 2005 ("Curtailment Acres"). These identified Curtailment Acres either were irrigated in 2004 or were not irrigated in 2004 as part of an approved mitigation plan (i.e., the March 15, 2004 Agreement—calling for at least 3,000 idled acres in MVGWD in 2004).

For the record, the Blue Lakes Delivery Call was filed immediately before the irrigation season commenced, and the Delivery Call Order was issued a full month into the irrigation season and has required, in literally a matter of days, the preparation of detailed documentation of historical water sources and irrigation practices across hundreds of thousands of acres of land together with complex analysis using the ESPA model. Such documentation has never been previously required, generated or maintained by the Ground Water Districts or the Department. There are no guidelines, formats or templates that the Ground Water Districts may use to anticipate what information the Department might require, or to expeditiously implement or document actions on the scale required here.

Moreover, the Director’s position has been that because the Blue Lakes Delivery Call is a contested case proceeding, neither he nor his staff will provide the Ground Water Districts with an indication of what specific documentation might be required or in what format, or how that documentation might be reviewed by the Department, or what standards might apply in that review, or how the Ground Water Districts’ actions would be overseen and administered by the Department. Given the shortness of time, and the lack of any guidance in the matter, the Ground Water Districts have been severely handicapped in being able to compile and submit relevant information. The Ground Water Districts object to the unreasonable demands and limitations
being imposed on them by the lateness of the Delivery Call and resulting orders, and reserve the right to supplement this Response as additional documentation is obtained.

**CONVERSIONS FROM GROUND WATER IRRIGATION TO SURFACE WATER IRRIGATION**

Attachment B filed with the Replacement Water Plan inadvertently omitted a full listing of all of the ground water rights appurtenant to the Conversions. Attachment 1 to this Response provides a complete listing of the ground water rights appurtenant to the Conversions.

The Additional ground water rights contained in Attachment 1 were researched in the IDWR water rights database to determine the following: 1) whether the rights addressed the same point of diversion as the originally submitted right, 2) the additional acreage permitted to be served by the rights, and 3) whether the rights were supplemental to surface water supplies from the North Side Canal company. Permitted acreage for rights that were noted as supplemental was reduced by a factor of 0.3 consistent with the methodology used in the Director’s June 7th Order. IGWA reserves the right to contest the methodology used by the Director in factoring acreage served by supplemental rights. Based on this database analysis, it was determined that a total of 6,896 acres of converted land that had originally been served only with ground water qualify as Conversions under the June 7th Order.

In 2004 a total water supply of 31,137 acre-feet was provided to the existing conversions. Prorating this supply to the 6,896 acres of ground water-only lands results in a total water supply of 22,971 acre-feet for those lands.

Seepage losses from the North Side Canal were explicitly represented in the development and calibration of the new ESPA model, as described in Water Budget Design Document DDW-20 (Contor, 2004). In DDW-20, Contor cites an article by Dreher and Tuthill (1999).
acknowledging that virtually all of the water lost to canal seepage becomes recharge to the aquifer.

The Director acknowledged a relationship between seepage from the North Side Canal facilities and spring discharge from the aquifer in Paragraph 23 of his May 19th Amended Order regarding Rangen.

The documentation of the Conversion Scenario (IWRRI Technical Report 05-003c; Contor, et. al., 2005) states that the aquifer benefit from supplying surface water to ground water conversions was assumed to equal the entire volume of surface water supply. All water supplied in excess of the net ground water extraction being replaced was assumed to become incidental recharge. This is consistent with discussions and decisions made by the Eastern Snake Hydrologic Modeling Committee providing guidance to the IWRRI modelers.

The pro-rated water supply of 22,917 acre-feet available to the 6,896 acres of validated conversions was input to the spreadsheet tool developed by IWRRI for steady-state analysis of conversions. This produced a steady-state reach gain to the Devils Washbowl – Buhl subreach of 11.9 cfs.¹

The June 7 Order states that "[w]ells that once provided water to the conversion acres must be disabled so water cannot be diverted from the wells or, alternatively, a means of accounting employed, as approved by the Watermaster of Water District No. 130 and the Department that will prevent diversion of the ground water replaced by surface water and to prevent delivery of ground water to the conversion acres." June 7 Order at 14. As the June 7 Order recognizes, the on-the-ground plumbing and metering of wells, particularly those which serve as the point of diversion for multiple ground water rights is complex. Simply disabling a

¹ The same rationale for accounting for canal seepage for the Conversions should apply to water delivered to the Sandy Pipeline Project. IGWA objects to the Director's denial of credit for these delivery losses.
well may prevent pumping to irrigate non-converted acres. And power records are not necessarily a good indication of whether a well (or replacement surface water) is being pumped or well water is being pumped to Conversion Acres. Rather than attempt to assume what kind of accounting methodology would be acceptable to the Watermaster and the Department, the Ground Water Districts will cooperate with the Watermaster and the Department to develop an appropriate accounting methodology.

The Ground Water Districts do not believe, however, that the accounting methodology should prohibit any ground water diversion under a decreed primary ground water right to supplement a the surface water supply on the Conversions. Rather the accounting methodology should track whether and to what extent ground water is used as a supplemental supply and reduce any credit afforded the affected Converted Acre accordingly. To do otherwise will severely impair the ability of the to enroll any additional acres in conversion projects under programs initiated by the Ground Water Districts or any other entity under programs such as the State's Strawman Proposal. It also will certainly result in the disenrollment or non-participation of existing conversions in NSGWD in 2005 and future years. Because the Ground Water Districts' 2005 actions will more than meet the 10 cfs requirement (i.e., 17.7 cfs steady-state), it is appropriate to allow for an after-the-fact accounting of credits for Conversions to incorporate supplemental use of wells.

**Voluntary Curtailment**

The June 7 Order held that “no replacement credit is recognized for future, voluntary alternative curtailments that have not yet been identified.” Again, because of the shortness of time provided by the Delivery Call and resulting orders, and the magnitude of the task of working with landowners to identify acres to be removed from ground water irrigation in 2005,
that documentation was not available when the Replacement Water Plan was filed. Attachment 2 and Attachment 3 hereto contain documentation that has been compiled as of June 14, 2005 of those voluntary curtailments that are being implemented in the Ground Water Districts in 2005. Landowners are continuing to meet with Ground Water District personnel to provide curtailment documentation for their farms and that documentation will be forwarded to the Department as it is obtained.

Attachment 2 consists of a spreadsheet documenting Curtailment Acres identified to date in the NSGWD, together with FSA maps showing the locations of Curtailed Acres on each farm. NSGWD has requested a certification from each participating landowner that the Curtailed Acres were irrigated with ground water in 2005.

Attachment 2 documents 1,987 Curtailed Acres in NSGWD, of which 1,344.6 acres will not be irrigated with any water source in 2005. NSGWD has not had sufficient time to confirm whether, or the extent to which, ground water rights might be deemed supplemental to the remaining Curtailed Acres. Therefore, solely for purposes of this Response, and without admitting that ground water is or is not supplemental to surface water on such acres, the 642.4 acres have been assumed to be supplemental (i.e., credited at the rate of 0.3 acres/Curtailed Acre) for purposes of ESPA model simulations of steady state reach gain impacts associated with the Curtailed Acres. This produces an equivalent dry-up in NSGWD of 1,538 acres, or approximately 1.8% of the modeled NSGWD ground water-irrigated acres.

Again because of the shortness of time the Ground Water Districts have had to compile and analyze this information, which precludes model runs based on actual locations of Curtailed Acres, it has been assumed that the Curtailed Acres in NSGWD are evenly distributed. With these assumptions, the ESPA model indicates that the Curtailed Acres documented in
Attachment 2 to this Response will produce approximately an additional 1.6 cfs of steady-state reach gain in the Devils Washbowl subreach.

Attachment 3 contains copies of Commitments to Curtail Pumping in Water District 130 that have been obtained by the MVGWD from landowners as of June 14, 2005. These Commitments document Curtailed Acres in MVGWD that either were irrigated in 2004 or were not irrigated in 2004 because they were part of MVGWD's "water bank" in 2004 for purposes of complying with MVGWD's commitment in the March 15, 2004 Agreement to idle at least 3,000 ground water-irrigated acres during the 2004 irrigation season.

Attachment 3 documents commitments to idle 6,755 acres of ground water-irrigated lands in the MVGWD in 2005. This is 7.1% of modeled acres in the MVGWD. Because of the shortness of time the Ground Water Districts have had to compile and analyze this information, which precludes model runs based on actual locations of Curtailed Acres, it has been assumed that the Curtailed Acres in MVGWD are evenly distributed. With this assumption, the ESPA model indicates that the Curtailed Acres documented in Attachment 3 to this Response will produce approximately an additional 4.2 cfs of steady-state reach gain in the Devils Washbowl subreach.²

**OPPORTUNISTIC RECHARGE**

The Replacement Water Plan proposed that the Ground Water Districts "may participate in 'opportunistic,' targeted recharge activities in 2005 if and as water may be available under existing water rights to be delivered to approved recharge sites." Replacement Water Plan at 6. The June 7 Order stated that "[n]o replacement credit is recognized for *ad hoc* or ordinary NSCC operation activities that result in opportunistic recharge." June 7 Order at 14. The Ground Water

² Copies of the spreadsheets summarizing the above simulations will be forwarded to the Department on CD as soon as they are received by counsel for IGWA.
Districts do not read this to mean that the Director will not give credit for ground water recharge that they facilitate at approved recharge sites using valid water rights authorized for use in ground water recharge. If that is not a correct understanding, the Ground Water Districts request clarification from the Director of whether, when, where and how ground water recharge might be undertaken by a ground water districts as a mitigation activity.

**SUMMARY**

The proposed 2005 actions produce a simulated steady-state reach gain to the Devil’s Washbowl subreach of 17.9 cfs which is more than sufficient to meet the requirements of the Director’s May 19, 2005 Delivery Call Order. The Replacement Water Plan should be approved.

DATED this 14th day of June, 2005.

- Have not needed to use any conversion water in the past but will be using water in 2005.
- Has got some water in the past year after doing some work, but ditch rider failed to document this delivery.

ATTACHMENT 3
COMMITMENT TO CURTAIL PUMPING
WATER DISTRICT 130

2005 Irrigation Season

1. Idaho Youth Ranch, hereby certify and attest as follows:

   1. I am the owner (or authorized agent having control) of the ground water-irrigated land in Water District 130 described below (the "Irrigated Parcel").

   2. In response to recent orders issued by the Director, Idaho Department of Water Resources ("Director"), and with the intent to participate in the [circle one] North Snake/Magic Valley Ground Water District's mitigation or water replacement plan, I am voluntarily curtailing all ground water pumping to serve the Irrigated Parcel during the 2005 irrigation season. I will cooperate with the watermaster for Water District 130 to provide any necessary assurance that the Irrigated Parcel will not be irrigated with ground water in 2005.

   3. The Irrigated Parcel was irrigated in 2004, or was not irrigated in 2004 due to voluntary curtailment in conformance with the interim mitigation or water replacement arrangements embodied in the March 15, 2004 Interim Agreement between the State of Idaho, ground water districts, and certain spring users.

   4. Pursuant to this Commitment to Curtail Pumping, the Irrigated Parcel will not be irrigated with ground water during the 2005 irrigation season. If a crop can be produced on the Irrigated Parcel without the aid of irrigation, I reserve the right to cultivate and raise such a crop in 2005.

   5. The Irrigated Parcel is more particularly described as follows:

2. In response to recent orders issued by the Director, Idaho Department of Water Resources ("Director"), and with the intent to participate in the [circle one] North Snake/Magic Valley Ground Water District's mitigation or water replacement plan, I am voluntarily curtailing all ground water pumping to serve the Irrigated Parcel during the 2005 irrigation season. I will cooperate with the watermaster for Water District 130 to provide any necessary assurance that the Irrigated Parcel will not be irrigated with ground water in 2005.

3. The Irrigated Parcel was irrigated in 2004, or was not irrigated in 2004 due to voluntary curtailment in conformance with the interim mitigation or water replacement arrangements embodied in the March 15, 2004 Interim Agreement between the State of Idaho, ground water districts, and certain spring users.

4. Pursuant to this Commitment to Curtail Pumping, the Irrigated Parcel will not be irrigated with ground water during the 2005 irrigation season. If a crop can be produced on the Irrigated Parcel without the aid of irrigation, I reserve the right to cultivate and raise such a crop in 2005.

COMMITMENT TO CURTAIL PUMPING
WATER DISTRICT 130

2005 Irrigation Season

1. __RANDY GILLETTE__, hereby certify and attest as follows:

   1. I am the owner (or authorized agent having control) of the ground water-irrigated land in Water District 130 described below (the "Irrigated Parcel").

   2. In response to recent orders issued by the Director, Idaho Department of Water Resources ("Director"), and with the intent to participate in the [circle one] North Snake/Magic Valley Ground Water District's mitigation or water replacement plan, I am voluntarily curtailing all ground water pumping to serve the Irrigated Parcel during the 2005 irrigation season. I will cooperate with the watermaster for Water District 130 to provide any necessary assurance that the Irrigated Parcel will not be irrigated with ground water in 2005.

   3. The Irrigated Parcel was irrigated in 2004, or was not irrigated in 2004 due to voluntary curtailment in conformance with the interim mitigation or water replacement arrangements embodied in the March 15, 2004 Interim Agreement between the State of Idaho, ground water districts, and certain spring users.

   4. Pursuant to this Commitment to Curtail Pumping, the Irrigated Parcel will not be irrigated with ground water during the 2005 irrigation season. If a crop can be produced on the Irrigated Parcel without the aid of irrigation, I reserve the right to cultivate and raise such a crop in 2005.

COMMITMENT TO CURTAIL PUMPING  
WATER DISTRICT 130  
2005 Irrigation Season

1. John Stevenson, hereby certify and attest as follows:

1. I am the owner (or authorized agent having control) of the ground water-irrigated land in Water District 130 described below (the "Irrigated Parcel").

2. In response to recent orders issued by the Director, Idaho Department of Water Resources ("Director"), and with the intent to participate in the [circle one] North Snake/Magic Valley Ground Water District’s mitigation or water replacement plan, I am voluntarily curtailing all ground water pumping to serve the Irrigated Parcel during the 2005 irrigation season. I will cooperate with the watermaster for Water District 130 to provide any necessary assurance that the Irrigated Parcel will not be irrigated with ground water in 2005.

3. The Irrigated Parcel was irrigated in 2004, or was not irrigated in 2004 due to voluntary curtailment in conformance with the interim mitigation or water replacement arrangements embodied in the March 15, 2004 Interim Agreement between the State of Idaho, ground water districts, and certain spring users.

4. Pursuant to this Commitment to Curtail Pumping, the Irrigated Parcel will not be irrigated with ground water during the 2005 irrigation season. If a crop can be produced on the Irrigated Parcel without the aid of irrigation, I reserve the right to cultivate and raise such a crop in 2005.

5. The Irrigated Parcel is more particularly described as follows:

WATER DISTRICT 130

2005 Irrigation Season

1. [Name], hereby certify and attest as follows:

1. I am the owner (or authorized agent having control) of the ground water-irrigated land in Water District 130 described below (the "Irrigated Parcel").

2. In response to recent orders issued by the Director, Idaho Department of Water Resources ("Director"), and with the intent to participate in the [circle one] North Snake Magic Valley Ground Water District's mitigation or water replacement plan, I am voluntarily curtailing all ground water pumping to serve the Irrigated Parcel during the 2005 irrigation season. I will cooperate with the watermaster for Water District 130 to provide any necessary assurance that the Irrigated Parcel will not be irrigated with ground water in 2005.

3. The Irrigated Parcel was irrigated in 2004, or was not irrigated in 2004 due to voluntary curtailment in conformance with the interim mitigation or water replacement arrangements embodied in the March 15, 2004 Interim Agreement between the State of Idaho, ground water districts, and certain spring users.

4. Pursuant to this Commitment to Curtail Pumping, the Irrigated Parcel will not be irrigated with ground water during the 2005 irrigation season. If a crop can be produced on the Irrigated Parcel without the aid of irrigation, I reserve the right to cultivate and raise such a crop in 2005.

5. The Irrigated Parcel is more particularly described as follows:

<table>

COMMITMENT TO CURTAIL PUMPING
WATER DISTRICT 130

2005 Irrigation Season

1. ORLO MAUGHAN, hereby certify and attest as follows:

1. I am the owner (or authorized agent having control) of the ground water-irrigated land in Water District 130 described below (the "Irrigated Parcel").

2. In response to recent orders issued by the Director, Idaho Department of Water Resources ("Director"), and with the intent to participate in the [circle one] North Snake/Magic Valley Ground Water District's mitigation or water replacement plan, I am voluntarily curtailing all ground water pumping to serve the Irrigated Parcel during the 2005 irrigation season. I will cooperate with the watermaster for Water District 130 to provide any necessary assurance that the Irrigated Parcel will not be irrigated with ground water in 2005.

3. The Irrigated Parcel was irrigated in 2004, or was not irrigated in 2004 due to voluntary curtailment in conformance with the interim mitigation or water replacement arrangements embodied in the March 15, 2004 Interim Agreement between the State of Idaho, ground water districts, and certain spring users.

4. Pursuant to this Commitment to Curtail Pumping, the Irrigated Parcel will not be irrigated with ground water during the 2005 irrigation season. If a crop can be produced on the Irrigated Parcel without the aid of irrigation, I reserve the right to cultivate and raise such a crop in 2005.

5. The Irrigated Parcel is more particularly described as follows:

<table>
<thead>
<tr>
<th>Twp</th>
