Jan 29, 2020

To IDWR:

Matt Weaver- Deputy Director
Tim Luke- Water Compliance Bureau

The Following petition is in reference to the: Preliminary Order Amending Measuring Device Installation in the Malad Valley Measurement District. We Petition the IDWR to reconsider that the date requiring flow meters and measuring devices be Postponed until 2030, which time will allow us as water users, (those who have received this your letter) to compile more data and assist and work with the IDWR in supplying more wells for you to measure. Then at that time, set a meeting to vote and decide if the majority of users would like to install the meters and/or measuring devices, or if the work we've done will suffice in enough data to protect our water. All signatures are from owners of water rights and wells in this district.
