Sean and Kensie,

See message below from Ron Miller. He would like his comments below to be included as part of the record. I have not received anything else from Mr. Miller after this message.

Subject: Meeting

Aaron, I was on the phone at the last meeting and was very disappointed with the way the meeting progressed!!!! Also I was not allowed to speak which I didn't understand!!!! I would like to know what the ICL is proposing and why should a non dredging and anti mining group have any say in any rule making at all!!!! Some of their remarks were clearly out of the rheum or possibly of even working in the real world and what are they basing their rules and regs on!!!! What experience do any of the ICL have in the dredging world besides observers???? I also believe no miners have been consulted besides meetings in the actual rule making process!!!! Is there f going to be a transcript of the meeting as there was too much confusion in the room for me to hear clearly!!!!

I plan on being there with some options and some suggestions at the next meeting!!!! It seemed to me the only ones allowed to talk on the phone were the agencies!!!!

Thank you and you may include this email in the list of comments!!!!
