To Whom it may concern,

Date: 5-14-2021

In response to the May meeting, we at Mt. Pisgah Mining District, are in agreement with the standard regulation of 5" and 15 horse power. The Letter Permit, however, is not in affect in our area due to a numbered amount of dredges even though the Forest Service is good with a standard letter permit for this time for McCoy Creek and it's tributaries. We would like this area put back to standard regulations. The Forest Service is in agreement with returning to a letter permit with the federal claim owners as the priority to receive these permits. We are looking forward to the June 2nd meeting. Please send us the phone numbers to join in. Thank You.

*Thanks
Jeff Bowman*
