

Swan Falls Implementation Group - 2022 Technical Analysis Objectives or “The 5 Questions”

1. Impacts of surface water trust water right diversions on the Snake River below the Milner Dam (assume paper diversion limits apply)
2. Impacts of ESPA groundwater trust water rights (TWR) to the Snake River below the Milner Dam (assume paper diversion limits apply)
3. Impacts of groundwater trust water rights not located on the ESPA to the Snake River below the Milner Dam (assume paper diversion limits apply)
4. Technical analysis to determine if flows at Murphy would have been below the minimums at any time since 2016, but for IGW-SWC-Cities settlement activities and IWRB recharge.
 - a. Include a summary of modeled benefits from (1) SWC-IGWA Settlement, (2) SWC-IGWA-Cities Settlement, (3) IWRB recharge program, and (4) other qualifying activities(?)
5. Analysis of the necessary ESPA levels, storage volumes, and discharge required to maintain minimum flows at the Murphy Gage
