Idaho Ground Water Appropriators, Inc., ("IGWA"), through its attorneys Jeffrey C. Fereday and Michael C. Creamer of the law firm of Givens Pursley LLP hereby opposes Idaho Power Company's ("IPCo") Petition to Intervene in the above-captioned matter now pending before the Idaho Department of Water Resources ("Department"). The grounds for this opposition are stated below.

1. IGWA is an intervenor party to the above-captioned contested case. IGWA was granted party status by order of the Department dated February 14, 2005 (the "February 14 Order").
2. On February 14, 2005, IPCo filed a letter with the Department supporting the 
Surface Water Coalition’s ("Coalition") delivery call and requested curtailment of ground water 
rights in the Eastern Snake Plain Aquifer ("ESPA"). IPCo also requested that its letter be treated 
as a "motion to intervene" if the Department initiated a contested case or formal administrative 
proceeding in the above-captioned matter and/or the Coalition’s Petition for Designation of the 
ESPA as a Ground Water Management Area ("GWMA").

3. On February 14, 2005, IPCo filed a formal Petition to Intervene in the matter of 
the Coalition’s Petition for GWMA designation.

4. In the February 14 Order, the Department initiated two contested cases in 
response to the Coalition’s request and Petition, denied the Coalition’s request to designate the 
ESPA as a GWMA and withheld a decision on IPCo’s requested intervention.

5. Department Rule of Procedure 350 provides that “Persons not applicants or 
claimants or appellants, petitioners, complainants, protestants, or respondents to a proceeding 
who claim a direct and substantial interest in the proceeding may petition for an order from the 
presiding officer granting intervention to become a party, if a formal hearing is required by 
statute to be held in the proceeding.” IDAPA 37.01.01.350.

6. Department Rule of Procedure 353 provides that a Petition to Intervene may be 
granted where the petitioner has demonstrated a direct and substantial interest and intervention 
will not unduly broaden the issues, unless the petitioner’s interests are adequately represented by 
existing parties. IDAPA 37.01.01.353.

7. IPCo’s February 11, 2005 letter demonstrates that its interests already are 
adequately represented by existing parties—namely the Coalition—and that if granted 
tervention, IPCo will unduly broaden the issues in this proceeding.
8. IPCo’s February 11, 2005 letter expresses IPCo’s “support of the request for water right administration and delivery call submitted [to the Department] by a group of surface water interests identified as the ‘Surface Water Coalition.’” (See IPCo February 11, 2005 letter at 1). That letter goes on to confirm that IPCo is “similarly situated with the members of the Coalition” and that IPCo has “similar expectations” with respect to the Coalition’s request for administration of ground and surface water rights. (See IPCo February 11, 2005 letter at 2).

9. The administration sought by the Coalition is direct curtailment of junior priority ground water rights. This is the form of administration sought by IPCo as well (see IPCo February 11, 2005 letter at 3, in which IPCo asserts the primary tool for achieving long-term sustainability of southern Idaho’s water resources is “curtailing the use of water under junior priority water rights that impact senior water rights through priority administration”). On its face, IPCo’s request for intervention demonstrates that its legal position and the relief sought are the same as those of the Coalition.

10. The Coalition consists of seven large irrigation districts represented by four different law firms—i.e., existing parties fully represented by legal counsel. The Department can reasonably conclude that IPCo’s interests are adequately represented by existing parties.

11. Moreover, IPCo’s February 11, 2005 letter also clearly indicates that if IPCo were granted intervention, it would unduly broaden the issues before the Department by revisiting the intent and terms of the Swan Falls Agreement between IPCo and the State. The 1984 Swan Falls Agreement subordinated many of IPCo’s Snake River hydropower rights, provided for staged, continued development of ground water rights on the ESPA (i.e., those rights of IGWA’s members developed after 1984 in reliance on that agreement) and contemplated the incremental reduction of Snake River flows down to a minimum summertime flow of 3900 cfs.
Nevertheless, IPCo asserts that its reason for supporting the Coalition is the need to curtail junior ground water rights that it alleges have reduced Snake River flows serving its subordinated hydropower rights which may result in IPCo increasing its customers’ power rates.

12. IPCo has an alternative legal means to raise such issues: IPCo can seek to renegotiate the Swan Falls Agreement with the State, or administratively, it may file its own delivery call under the Department’s conjunctive management rules. Neither of these avenues, would unduly broaden the issues in the present contested case.

13. For the foregoing reasons, IPCo should not be granted intervenor status in the above-captioned matter.

DATED this 18th day of February 2005.
