

# Observation Wells

---

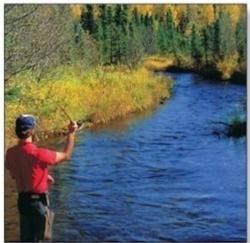

Presented by Allan Wylie, IDWR

Date August 12, 2014

# Outline

- Need for aquifer water-level data
- Sources of water level data
- Wood River Valley Water-level Database

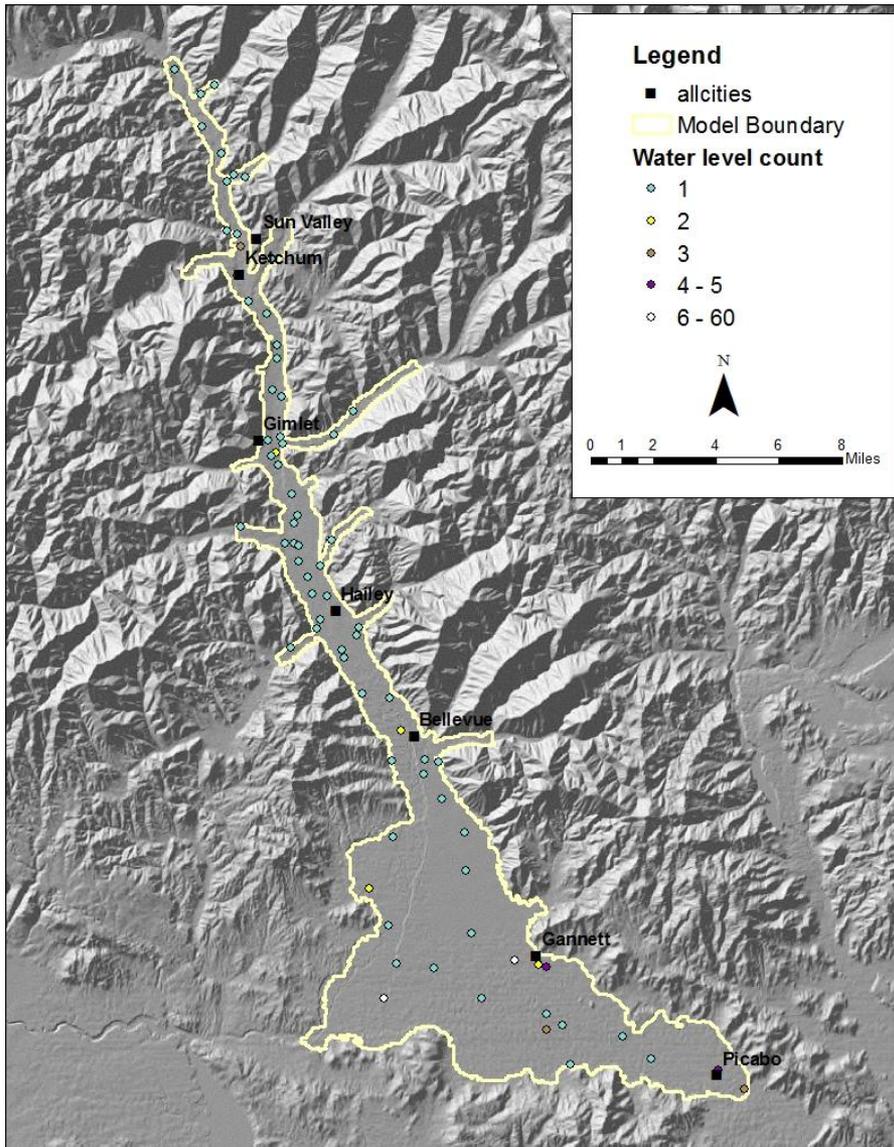

# The Need for Water-level Data

- Ground water model calibration involves matching model output with field observations.
  - We need field observations
    - River gains and losses
    - Water table elevations measured in wells

# Sources of Water-level Data

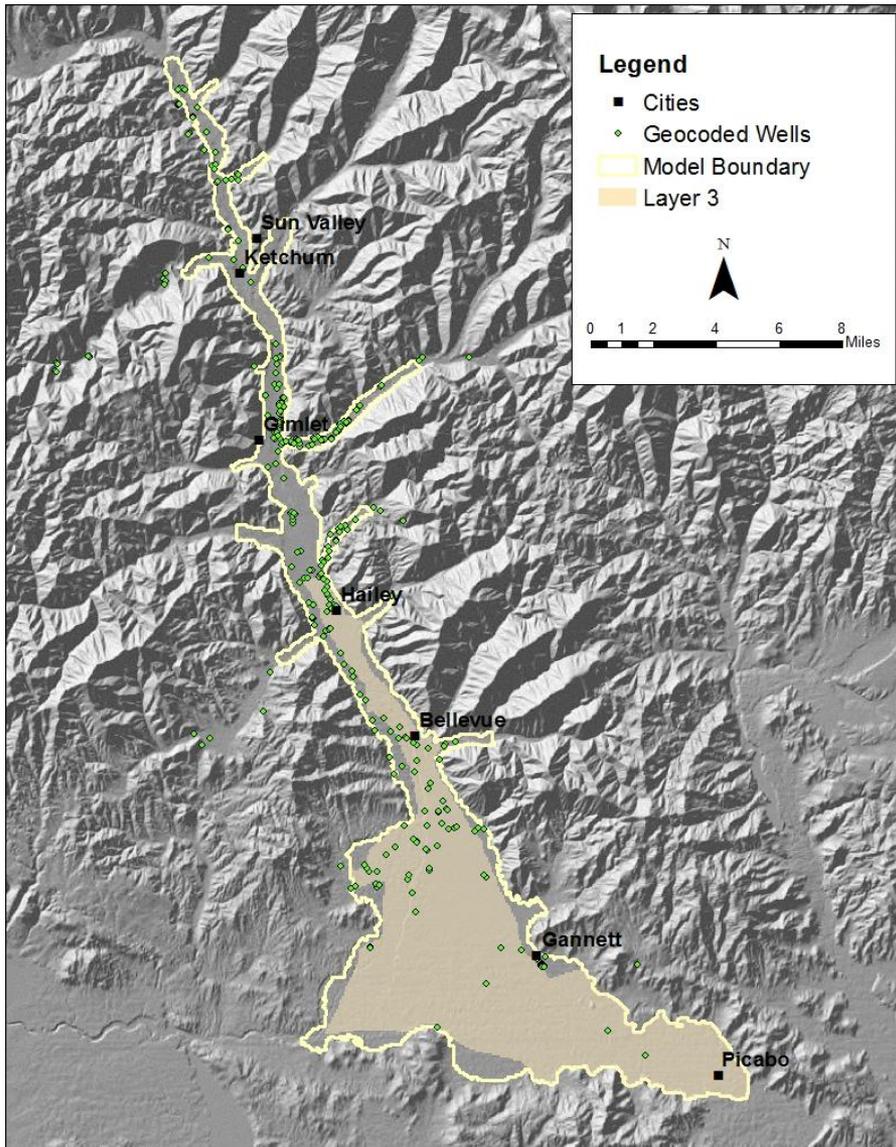

- USGS aquifer water-level database
  - National Water Information System (NWIS)
    - Over 850,000 records nation wide
- IDWR hydrologic database
  - Data collected by the USGS in Idaho
  - Data collected by the IDWR
  - Data collected for the IDWR
- Well driller reports
  - Data drillers are required to report to IDWR upon completion of a well included depth to water

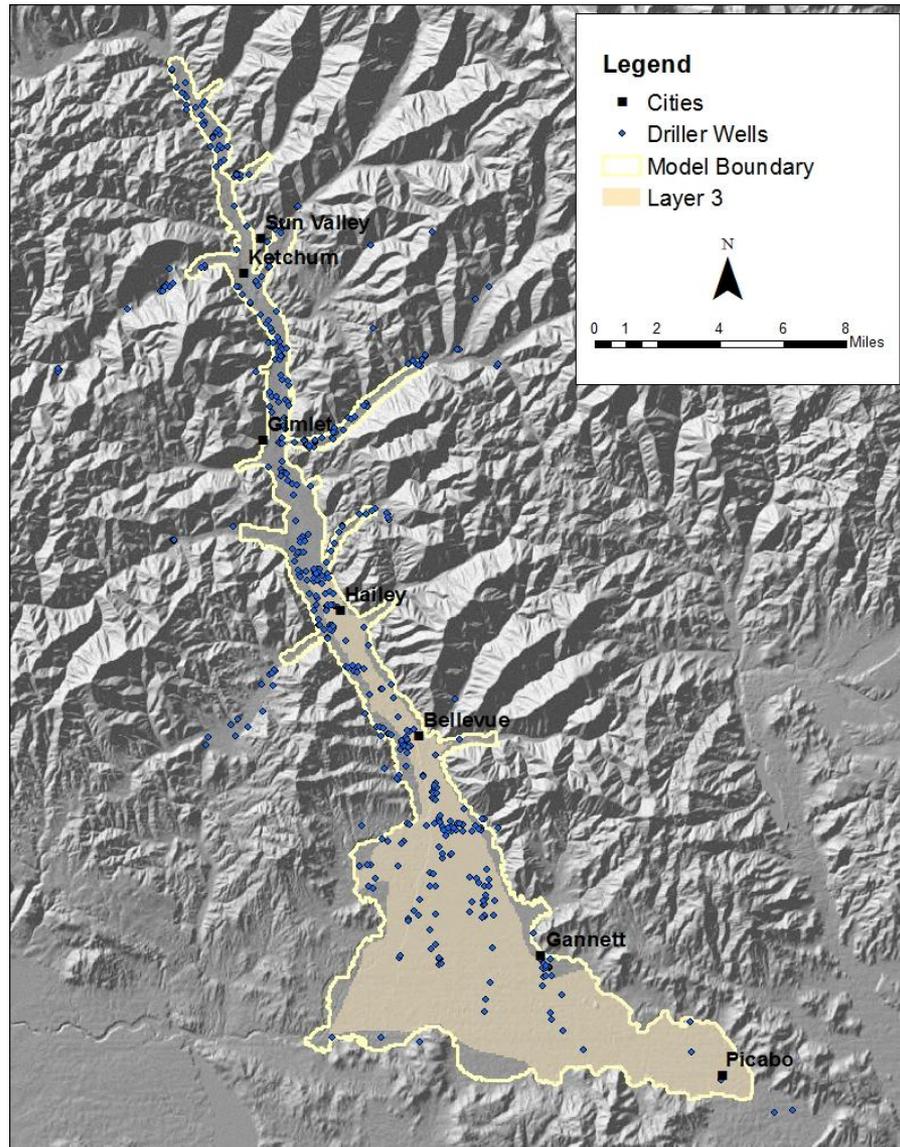

- 76 wells with 214 observations
- 120 in two wells
- 14 wells with more than 1 water-level
- 94 observations dispersed amongst 74 other wells
- Since download in June
  - Jim thinks there should be 98 wells
  - We have found other observation wells
  - We are making sure all measured wells are GPSed and updated in database.
  - Both the number of wells and the number of observations will increase
  - Significant percentage of the observations were collected by the USGS in Oct 2006

# Additional water-level data are needed

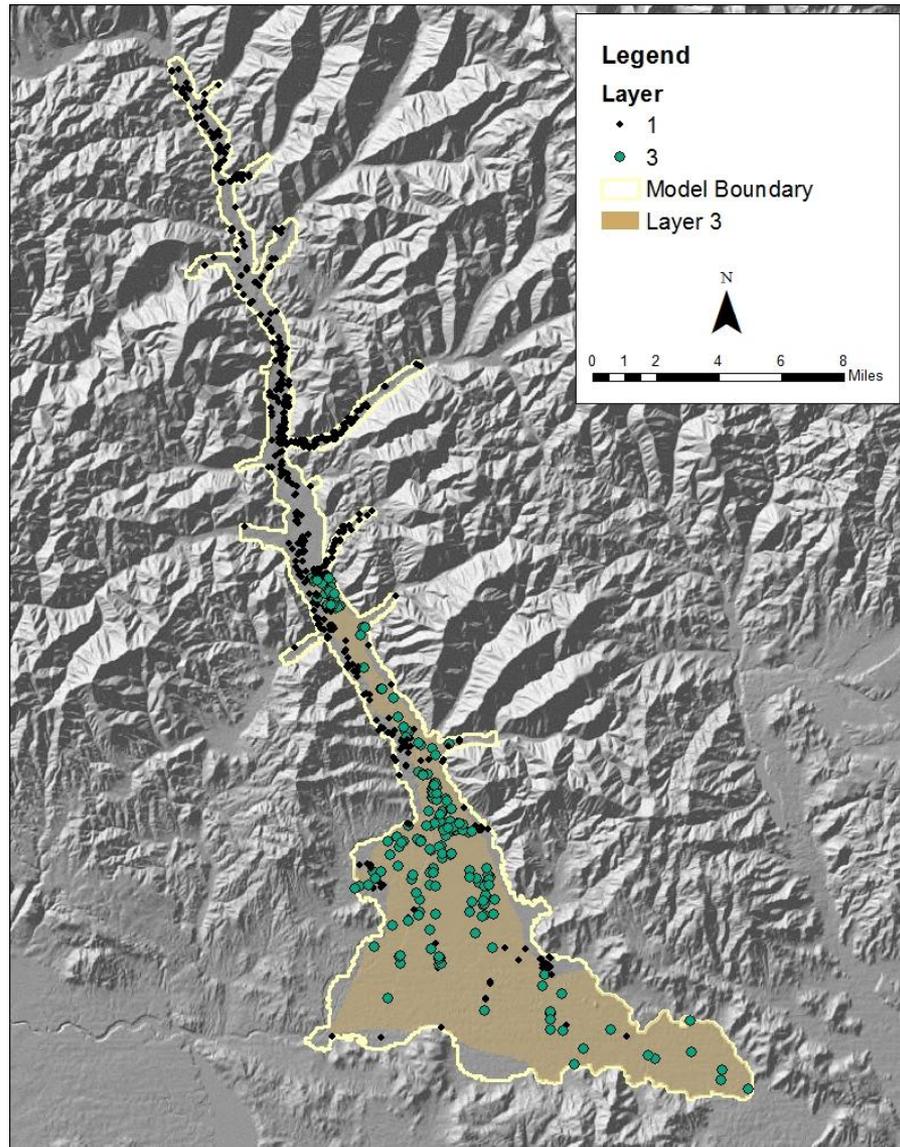

- Bartolino and Adkins (2012) evaluated 2,500 well driller reports to construct the bedrock surface map.
- Quality logs with good locations were selected
- Not all of these wells were drilled during the calibration period
  - Water-level data from these wells could be used to augment the observation well data

- Geocoded well logs
  - Geocoded = finding geographic coordinates from data such as street addresses
  - 290 wells
  - 78 greater than 100 ft (30.5 m) in the area with 3 layers

- Driller located well logs
  - 501 wells
  - 168 greater than 100 ft (30.5 m) in the area with 3 layers

- Layer assignments
  - 501 wells
  - 168 greater than 100 ft (30.5 m) in the area with 3 layers

# Wood River Model Water-levels

Criteria	Number of Observations
Observation Well Water-Levels	214
Geocoded Driller Reports	272
Driller Located Driller Reports	428
Total	914
1/1/1995 - 1/1/2000	308
1/1/2000 - 1/1/2005	361
1/1/2005 - 1/1/2010	245
Total	914

WoodRiverWells : Database (Access 2007) - Microsoft Access

Security Warning: Certain content in the database has been disabled. Options...

Table Name	Description
SiteID	Unique identifier within the IDWR hydrologic database
WellNumber	For the Observation Wells = Township, Range, Section, QQQ, for geocoded wells 1000001-5000000, for driller located wells > 5000001
PestName	The well identifier used by the program PEST. Observation wells 1-1000, geocoded driller report water levels 1001-5000, driller located driller reports >
MethodDrill	The drilling method.
Total Depth	The depth at which drilling stopped (ft)
OpeningMin	The top of the screened interval (ft)
Opening Max	The bottom of the screened interval (ft)
CompletionDate	Date on which the well drilling and construction stopped
WCWellID	Well Construction Well Identifier
Altitude	Land Surface elevation (ft)
AltMethod	Method of obtaining the land surface elevation
XIDTM	easting in the IDTM coordinate system (meters)
YIDTM	northin in the IDTM coordinate system (meters)
XYMethod	method of obtaining the easting and northing
CountyName	Idaho county
TwpRge	Township and Range the well is located in
SiteName	A local name for the well
WLCOUNT	the number of water level observations collected in the well
WLDateMin	the date of the minimum water level observation
WLDateMax	the date of the maximum water level observation
WLMin	the minimum water level (ft below land surface)
WLMax	the maximum water level (ft below land surface)

# Database with 'current' water-level data

- Go to <ftp://ftp1.idaho.gov>
- Login using the account name `idwrngen` and the password `Rg7d952O` (capital O, not the number 0)
- Click "View" then click "Open FTP Site in Windows Explorer" This will open a new window.
- Log in again using the same user name and Password
- Click "Outgoing" to get files from IDWR. Look for "WoodRiverWells\_07312014.zip"
- Drag "WoodRiverWells\_07312014.zip" from FTP site onto your desktop.
- Unzip and enjoy.

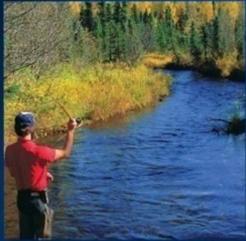

FTP directory /Outgoing/ at ftp1.idaho.gov

To view this FTP site in File Explorer: press Alt, click View, and then click **Open FTP Site in File Explorer**.
