Well Driller Report Available

No Well Driller Report

Other Wells

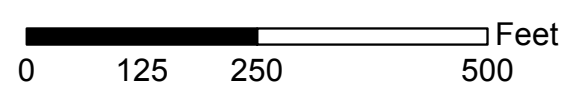

Cold (<68° F) or Unknown

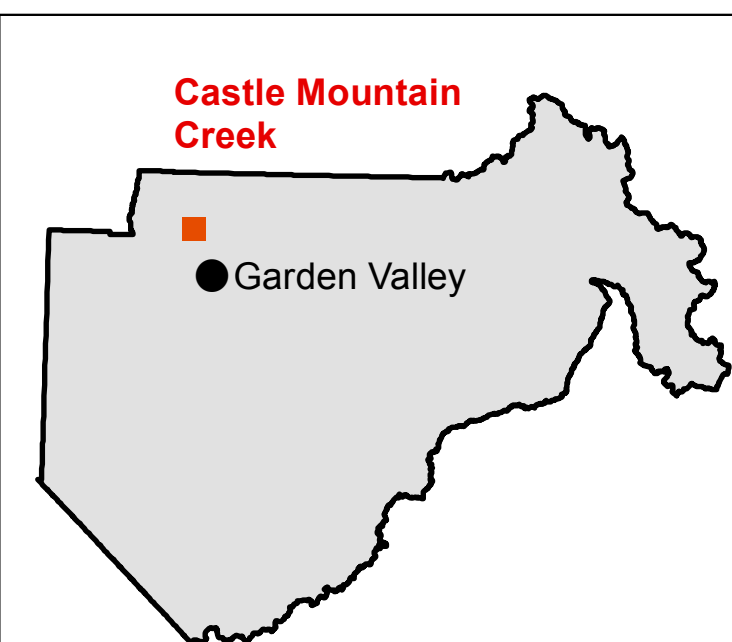

Warm (68 - 85° F)

* > 85° F and < 212° F

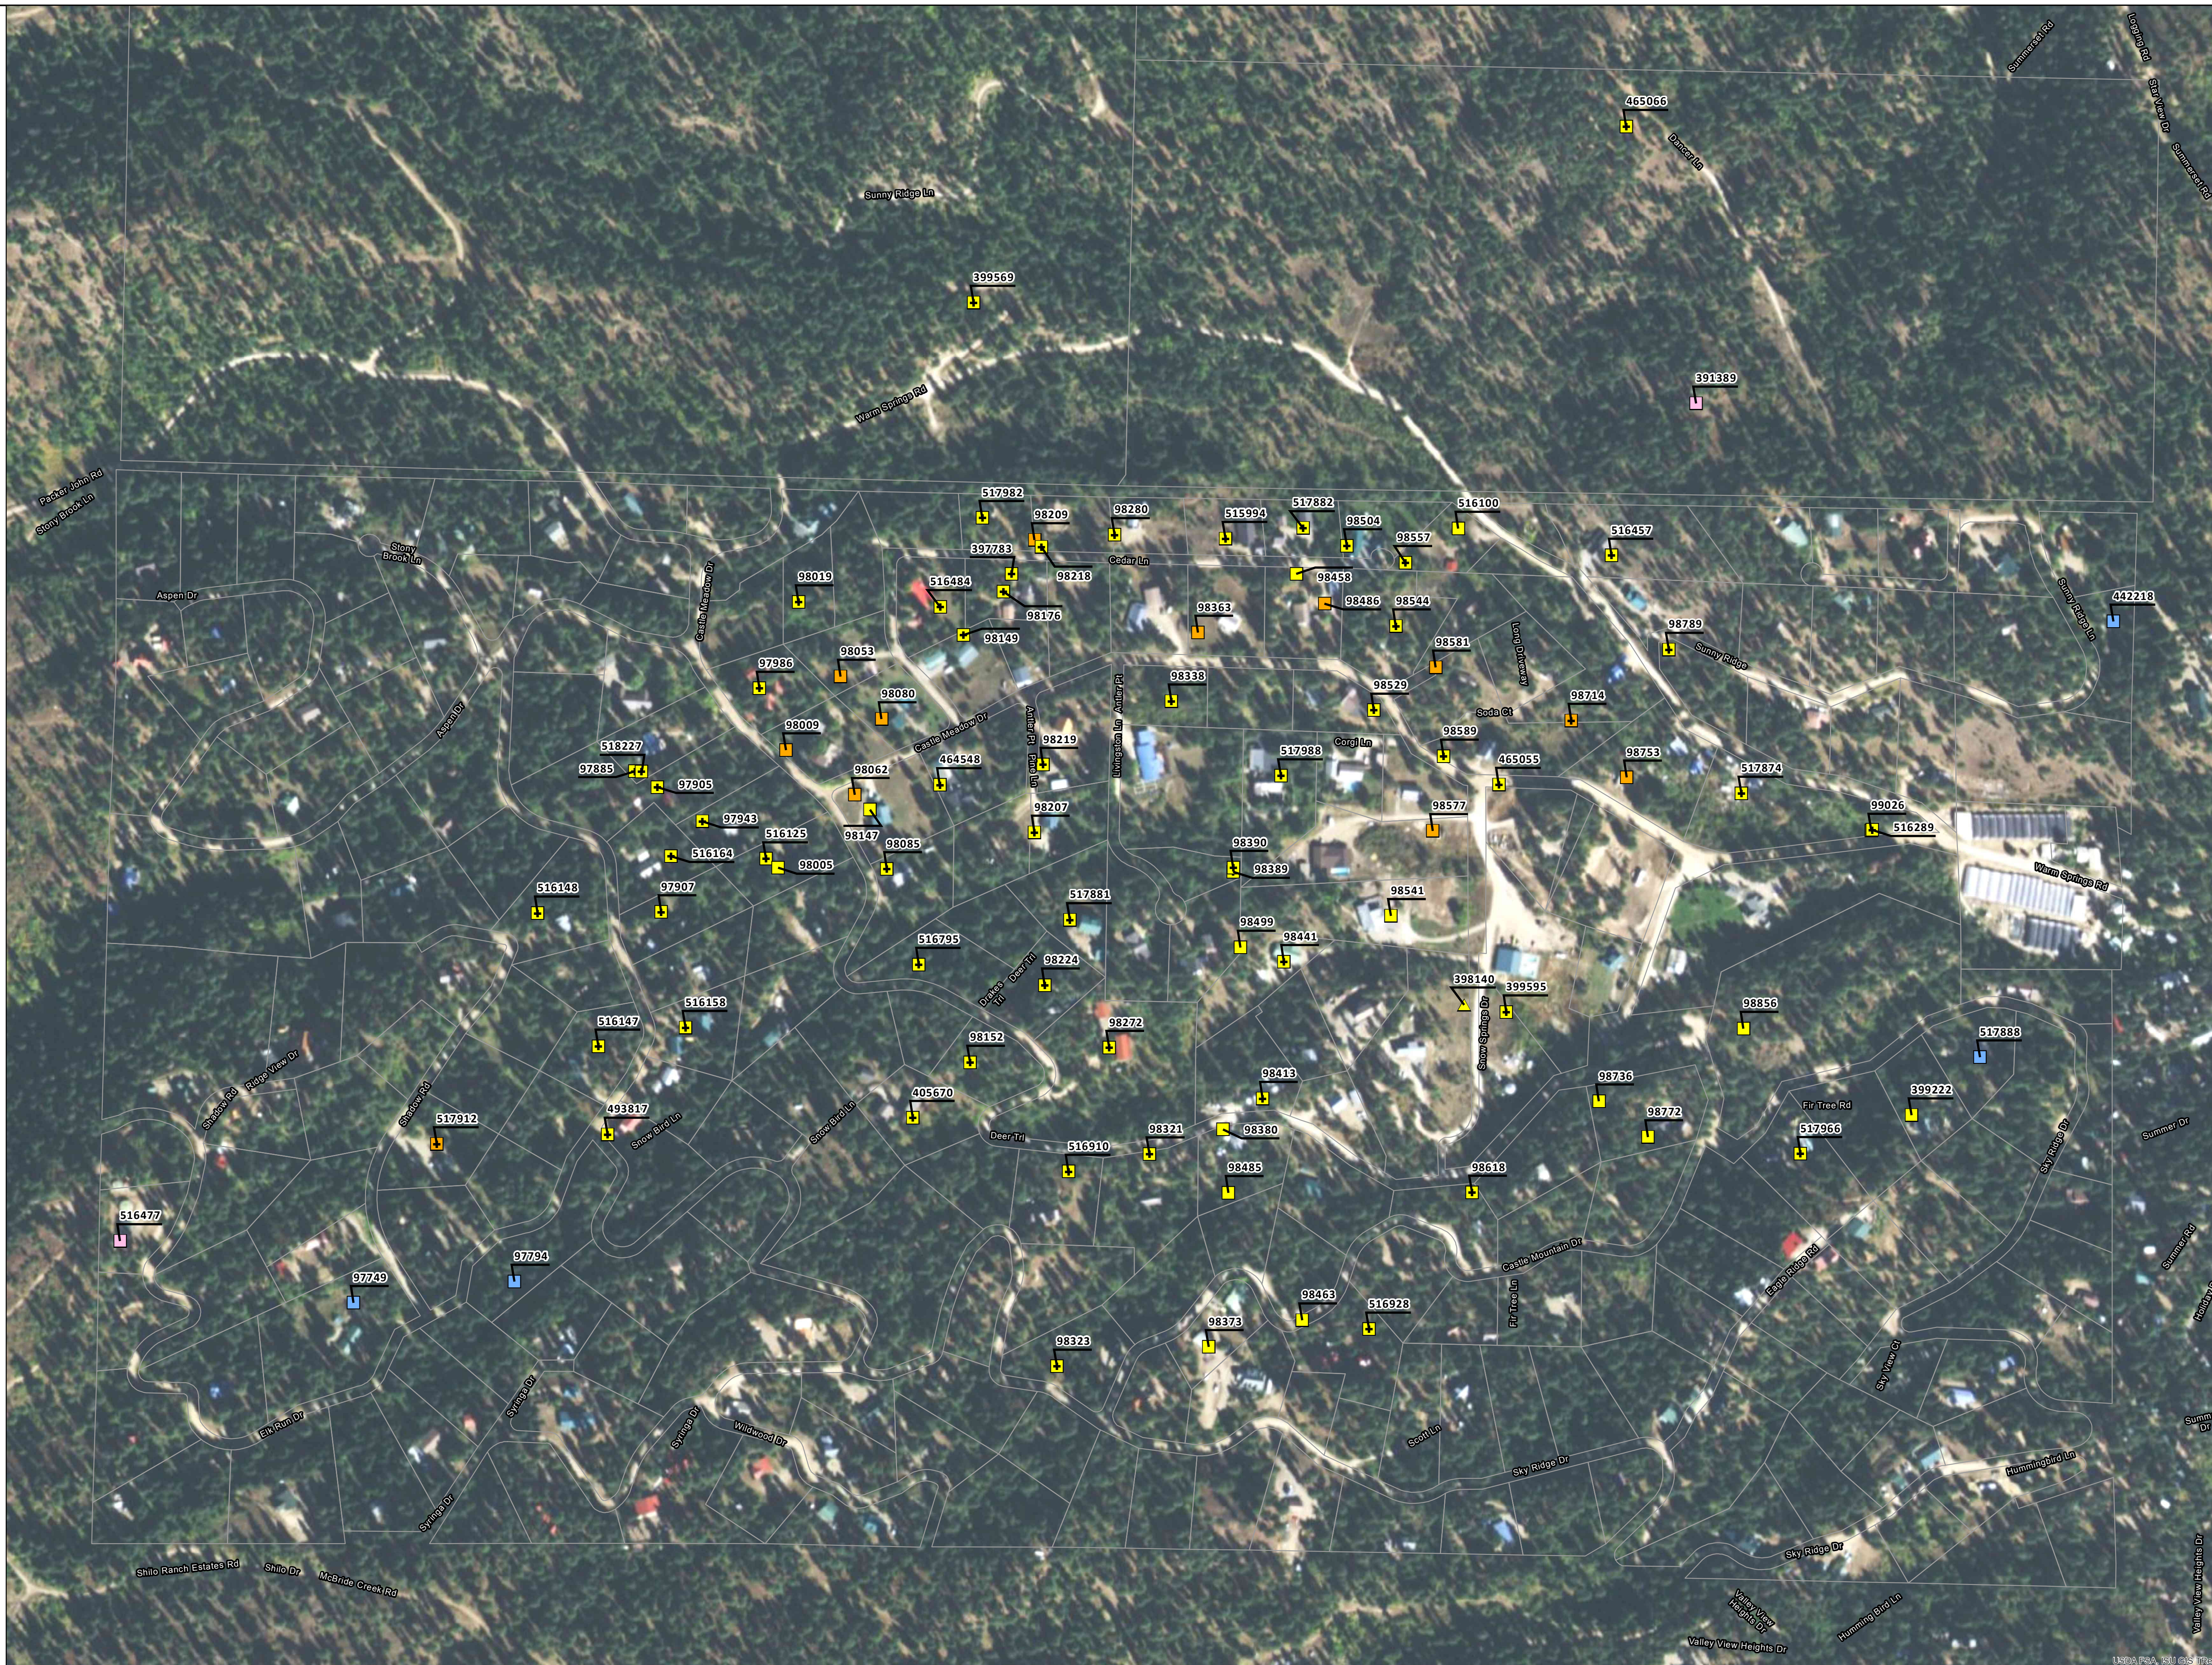

The Geothermal Sites and Wells labels in this map display the Spatial Data ID, or location identifier. These IDs may be associated with more than one entity, such as a well and a geothermal site. A list of the entities and their Spatial Data IDs has been published on the IDWR website and may be used together with this map to learn more details about specific sites.
