Idaho Water Resource Board

ITB No. 2020-001 Priest Lake Thorofare Improvement Project

Pre-Bid Meeting

Presented by: Emily Skoro, Janet Garrett, and Shane Phillips

Date: June 23, 2020

Priest Lake Thorofare Improvements Project

ITB No. 2020-001

Mandatory Pre-Bid Meeting

State of Idaho
ITB No.: 2020-001
RFP Issue Date: June 18, 2020
Pre-Bid Meeting Date: June 23, 2020
Optional Pre-Bid Onsite Meeting Date: June 29, 2020
Questions Due Date: July 6, 2020
Proposal Closing Date: July 24, 2020
Pre-Bid Meeting June 23, 2020
10:00 a.m. – 11:30 a.m. MDT

ITB Lead – Emily Skoro representing the Idaho Water Resource Board (IWRB)

• Purpose of the Meeting:
  • Introductions
  • Project background
  • Project goals
  • Project scope overview
  • Discuss and highlight critical elements of the ITB bid documents and the submittal process

Welcome and Overview of Invitation to Bid Process
ITB Lead – Emily Skoro, IWRB

• Introduction:
  • State's procurement and contracting team
    • Janet Garrett, Purchasing Agent
    • Sascha Marston, Financial Officer
    • Meghan Carter, Deputy Attorney General
  • ITB IDWR representatives
    • Emily Skoro, P.E., Staff Engineer
    • Rick Collingwood, P.E., Staff Engineer
    • Neeley Miller, Senior Planner
  • Owner’s Representative
    • Shane Phillips, PE, D.PE, D.CE with Mott MacDonald
Project Background

- Project was initiated by the IWRB to evaluate means of improving operation of the Priest Lake and Priest River system to meet long-term water management objectives.
- Phase 1 - Study was completed in January 2018 and evaluated a range of feasible alternatives in consultation with stakeholders and the public.
- Phase 2 – Preliminary Engineering was completed in June, 2019 and was a continuation of the project including the selection of a final design concept, preliminary design, and regulatory permitting.
- Phase 3 – Final Design includes final design and bid solicitation.
- Construction is scheduled to commence in November, 2020, with completion by March 31, 2021.

Project Goals

- Prevent sediment deposition in the Thorofare channel from the lake and adjacent shoreline
- Enhance self-sustainability of the Thorofare channel
- Improve marine navigation

Project Scope Overview – Shane Phillips with Mott MacDonald will now present the project scope and requirements.
Introduction & Background
Project Areas

- Thorofare Improvement Project
- Outlet Dam Improvement Project

Project Background

- (1) Overall Water Improvement Project funded by IWRB
- (2) Project sites w/ separate bid packages
Priest Lake History

Outlet Dam
- Enhancements for Water Management
  - 1951 – Timber Dam
  - 1979 – Concrete Dam Reconstruction

Thorofare Uses
- 1930’s – Dredging/Breakwater
- Recreation
- Industry – Timber, Mining

The Problem – Low Snowpack

Low Water Years
- More frequent low summer flow & drought conditions
- Considerations for climate change should be part of the alternative water management plan evaluation
- Criteria to be developed for low water years
The Problem – Water Management

Water Shortage Dry Years
- 3’ Lake Level Management
- 60 cfs Instream Flows Priest River

Navigable Access to Upper Priest Lake
- Thorofare Shoaling
- Loss of Navigation
- Erosion Protection
- Timber Breakwater Deterioration

6/24/2020 Prebid Meeting 7

Priest Lake Water Management Study

Study Criteria & Objectives

- Maintain Lake Level 3’ for recreation in Dry years
- Maintain Thorofare with Sustainable Improvements
- Minimize Impact on Water Quality & Shoreline Properties
- Preserve Beneficial Uses and Critical Habitat
- Maintain 60 cfs min. Instream Flows
Seasonal Water Levels

- 3.0' Gage during Recreational Season

ANNUAL LAKE LEVEL RUNOFF

Flow data and reference location provided in Appendices.
Thorofare
Project Overview – New Work

Existing Breakwater Demolition, Access Road, Stream Diversion & Water Management, New Stone Breakwater Structure, Dredging, Beneficial Re-use Dredged Materials (Aquatic & Upland), Surveying

Thorofare Conditions & Objectives

MAY 29, 2017

Objective: Provide sustainable navigation into Thorofare for access between lower and upper Priest Lake

Condition: Combination riverine and coastal processes
Thorofare Conditions

November 19, 2018
Lake Level Unregulated ~ 0.5’ gage

---

Thorofare Conditions – March 2005

- Shallow sand bar at the mouth on 3/15/2005, WL = 0.33’ USGS Lake Gage
- Significant flow spreading & flow cutting into the sand bar and underneath the breakwater
THOROFARE GEOMORPHOLOGY

- Sediment deposition is result of decreased transport capacity as low-gradient Thorofare meets zero-gradient lake and flow spreading through the breakwater.

- Deposition has been accentuated by three factors at the mouth:
  1) Widening of Thorofare channel along Breakwater
  2) Reduced Thorofare discharge & velocity as water passes through or under existing timber breakwater
  3) Wind-driven sediments get pushed through and around the breakwater eastern end during periods of low Thorofare flow

Thorofare & Lake Bathymetry

- Water depths at the Mouth outlined by black dashed line is mostly shallower than 3 ft, with many areas shallower than 1.5 to 2 ft

- Survey is circa 2017; additional shoaling has occurred since that time
Low Pool Photo

Note: Photo & Hydro Survey Plot vary in time by 2 years
**Project Overview – New Work**

Existing Breakwater Demolition, Access Road, Stream Diversion & Water Management, New Stone Breakwater Structure, Dredging, Beneficial Re-use Dredged Materials (Aquatic & Upland), Surveying
Thorofare Access

ACCESS ROAD - SANDPIPER SHORES RD (LOOKING WEST)

- Access Road Precon survey requirements
- Utility Protection Requirements
- Bulkhead protection measures
- Road maintenance
- Snow Plowing
- Site restoration

Project Overview – Site Access

- Private HOA – Easement
- Utility Protection Requirements; Variable along route
- Access and use of lake bed allowable within the limits of construction – to be restored to pre-project conditions upon completion of work
- Low Water time period

CONSTRUCTION ACCESS POINT - LOT 10 (LOOKING NORTHEAST)
Overall Site Plan

Project Overview – Stream Diversion & Water Quality

- Stream Diversion to ensure work is done not in flowing water condition
- Access and use of lake bed allowable within the limits of construction – to be restored to pre-project conditions upon completion of work
Project Overview – Stream Diversion & Access

Existing Timber Breakwater – Demolition

DEMOLISH BREAKWATER WALL AND SECOND LINE OF SUPPORT PILES AND LATERAL BRACING
Overall Site Plan – Proposed Work

Breakwater Sections

- 3 gradations
- Quality requirements similar to USACOE
Breakwater Sections

Stone Breakwater (C)

Stone Breakwater (D)

Dredging Sections

Disposal
Aquatic = 9,700 cy
Upland = 2,500 cy
Stockpiling and Placement Areas

- Lions Head
  - Boat Ramp – Trailerable boats only

- Huckleberry
  - Up to 800 cy dredged material

- Bear Creek
  - Temporary stone stockpile area

REGULATORY PERMITTING

- Fish Recovery
  - No stranding of fish as part of stream diversion
  - No fish handling. Any fish observed during dewatering must be encouraged to leave the site voluntarily.

- Water Quality Monitoring
  - Turbidity Monitoring in Lake per water quality certification

- Onsite Aquatic vs. Upland Beneficial Re-use
  - Specified volume for transport offsite for upland reuse
Priest Lake Water Management Project

Pre-Bid Meeting – Thorofare Improvements
June 23, 2020

Pre-Bid Meeting June 23, 2020
11:30 a.m. – 1:00 p.m. MDT

ITB Bid Documents Review and Submittal Process
Introduction to Bidders

• Fixed Price Construction Contract for the Project

• Individual bid items shall be on lump-sum and unit-price basis, and the award will be based on the lowest total Bid Price of the lowest, responsive, responsible, and qualified Bidder.

• Bid Documents: Available for download at https://idwr.idaho.gov/solicitations/

• It is the Bidder’s responsibility to check for addenda prior to submitting a bid. A Bidder is required to acknowledge receipt of all addenda by identifying the addenda numbers in the space provided on the bid proposal form. Failure to do so may result in the bid being declared nonresponsive.
Pre-Bid Meeting  June 23, 2020
11:30 a.m. – 1:00 p.m. MDT

ITB Bid Documents Review and Submittal Process

Bid Requirements

• Bid Security of 5% of the bid is REQUIRED.

• All permits are the responsibility of the Contractor unless specified that it would be Owner provided. No extra time shall be allowed for completion of project due to failure to obtain approval of correct permits.

• Contractor shall commence its Scope of Work in accordance with the Notice to Proceed and complete its work by April 1, 2021.

• A Public Works Contractors License for the State of Idaho is required to bid on this work.

Bid Forms that Require Signatures

• Bid Proposal Form
• Contractor’s Affidavit Concerning Alcohol and Drug-Free Workplace
• Bidder’s Acknowledgment Statement
• Bidder’s Qualification Statement
• Bid Bond (bid security)
• Bidder’s Checklist
Pre-Bid Meeting June 23, 2020
11:30 a.m. – 1:00 p.m. MDT

ITB Bid Documents Review and Submittal Process

Bid Submittal Instructions

• Bids shall be submitted in a sealed envelope with the following clearly printed on the outside of the envelope: Project name and ITB No.; the name and address of the bidder; and a statement, such as “BID ENCLOSED” to indicate that it is a bid. When bids are mailed or shipped with hard copies, the sealed envelope containing the hard copy bid shall be enclosed in a separate mailing envelope with the notation “SEALED BID ENCLOSED” on the face thereof. If mailed, the mailing envelope shall be addressed as follows:

  Idaho Water Resource Board
  Attn: 2020-002 ITB Lead
  322 E Front Street, Suite 648
  PO Box 83720
  Boise, ID 83720-0098

• Electronic version of the bid may be submitted on a flash drive. If the bidder chooses to submit their bid on a flash drive, compile the bid into one pdf document.

• Late submissions will be rejected, will not be opened and will be returned to the bidder. No deviations will be allowed.

• It is anticipated that a contract will be executed on or around August 14, 2020, with in-water construction to commence on or around November 1, 2020. The Project is to be substantially complete by March 15, 2021.
Pre-Bid Meeting  June 23, 2020
11:30 a.m. – 1:00 p.m. MDT

ITB Bid Documents Review and Submittal Process
Review of Project Drawings and Specifications

It is the responsibility of the Respondent to:

• Review the complete set of bid documents and compare them as needed, including with regard to any other work that is or may be under construction that might affect the Bidder or its work

• Review project site limitations and access

• Review to examine the site and local conditions

• Report via email any questions, errors, inconsistencies, or ambiguities in the bid documents to the ITB Lead

Opportunity to ask Questions

• Proposers participating in this meeting will have an opportunity to ask questions during the question answer portion of the meeting.

• If you have a question, raise your hand, state your name and the company you represent, and ask your question. Responses to all questions presented orally at this meeting is considered unofficial.

• If you are participating by teleconference, please write your name and question in the comment bar and your questions will be addressed during the question answer portion of the meeting as well.

• All questions that will have official responses are required to be submitted via email to IDWR.purchasing@idwr.idaho.gov.
Opportunity to ask Questions

• Questions will be accepted until 5:00 p.m. MDT on July 6, 2020. Proposers shall be responsible to review the questions and answers posted on the IDWR website at https://idwr.idaho.gov/solicitations/.

• INTERESTED PROPOSERS ARE CAUTIONED NOT TO RELY ON ORAL RESPONSES PROVIDED BY THE STATE. ALL QUESTIONS AND OFFICIAL RESPONSES WILL BE PUBLISHED IN AN ADDENDUM.

Closing Remarks

• Submit all questions prior to 5:00 p.m. MDT on July 6, 2020.
• Review the ITB thoroughly, and respond to all requirements.
• We appreciate your interest in meeting the needs of the State of Idaho.
