10 AWARD

Awards will be made to the responsive, responsible Bidder(s) with the lowest Total Cost, as provided on the Bid Schedule. It is likely that there will be multiple awards based on the lowest total cost for each well specified in the Bid Schedule. Each well will receive an individual award. The apparent successful Bidder may be required to demonstrate that the proposed timeframes will ensure completion of wells by March 15, 2025, in order to be considered for award. If the cost for a well exceeds IDWR's anticipated budget, IDWR reserves the right to negotiate cost with the lowest responsive bidder. If IDWR and lowest responsive bidder cannot reach an acceptable cost, IDWR may enter into negotiations with the next lowest responsive bidder or cancel the drilling of the well.

11 INSTALLATION AND ACCEPTANCE

Construct six-inch diameter ground water monitoring wells that are capable of being measured with an electronic water level tape or other industry standards of water level measurement to the specified depth listed in Attachment 3, Table 1 (Specifications). Upon completion of each well, the borehole must be open to its total depth, such that a pump can be installed. An IDWR representative shall be onsite during all work to monitor the drilling activity and the lithology.

12 SERVICE AND SUPPORT, MAINTENANCE, ETC.

The Contractor shall supply and maintain drilling equipment at each well location. The Contractor shall be responsible for repair and routine maintenance of the drilling equipment owned by the Contractor. IDWR will not be responsible for repair, maintenance, or loss of equipment due to any cause, including vandalism. The Contractor must repair or replace equipment as quickly as possible to ensure work continuity. The Contractor shall notify the IDWR Contract Manager of any equipment damage or malfunction within three (3) working days of discovery of the occurrence and provide an assessment of the problem and proposed solution. Equipment shall be repaired or replaced within five (5) working days of discovery of the occurrence unless an alternative agreement is reached with IDWR. IDWR shall not be responsible for the costs of any downtime related to drilling equipment problems or for unforeseen situations that develop at the site such as adverse weather, rangeland fires, etc., that cause temporary suspension of drilling.

13 CONTRACT MONITORING

Each award will be monitored by IDWR staff through correspondence between the Contractor and IDWR. Correspondence will occur prior to the start of any work, prior to the completion of each well, and upon any unforeseen issues that may arise. IDWR may request an updated drilling schedule to ensure all wells are completed by March 15, 2025. During the contract term, IDWR reserves the right to cancel one or more wells based upon scheduling or lack of funding.

14 REPORTING REQUIREMENTS

Completed driller's reports must be submitted to IDWR within thirty (30) days of the completion of each well.

15 CRITICAL DATES FOR WELL CONSTRUCTION AND REPORTING

Drilling start dates will be negotiated at contract award, and drilling may commence as soon as a contract is signed. All wells must be completed by March 15, 2025. The Contractor shall submit well drillers' reports, descriptions of services provided, and invoices within thirty (30) days of the completion of each well.

16 COMPLIANCE

Contractor must comply with the requirements of Idaho Code § 42-238 and IDAPA 37.03.10 "Well Driller Licensing Rules." Materials used for the construction of the wells must be new material and in accordance with the Idaho Well Construction Standard Rules (IDAPA 37.03.09). Drilling and construction methods must comply with the Idaho Well Construction Standard Rules (IDAPA 37.03.09). Drillers must comply with any additional requirements imposed by the landowner (e.g., sage-grouse restrictions).

17 PRICE ADJUSTMENT CLAUSE

Any price adjustment due to unforeseen circumstances will only be allowed if the Contractor provides justification and requests the increase prior to completing work for which a price adjustment has been requested. The request and justification for any increase above the specified bid amount will be reviewed by IDWR and either approved or denied, based on the circumstances and information presented.

18 RECORDS MAINTENANCE

Contractor shall maintain or supervise the maintenance of all records necessary to properly account for all payments made to the Contractor pursuant to the Contract. These records shall be retained by the Contractor for at least three (3) years after the Contract terminates, or until all audits initiated within the three (3) years have been completed, whichever is later.

19 AUDIT RIGHTS

The Contractor agrees to allow State and Federal auditors and State purchasing staff access to all the records relating to this Contract, for audit, inspection, and monitoring of services or performance. Such access will be during normal business hours or by appointment.

ATTACHMENT 3 - SCOPE OF WORK

Overview

The objective of the services requested is to drill and construct ten groundwater monitoring wells in the Mountain Home Plateau and Camas Prairie (Figure 1). All drillers providing bids through this ITB must comply with the requirements of Idaho Code § 42-238, and IDAPA 37.03.10 “Well Driller Licensing Rules.” Materials used for the construction of the wells must be new material and in accordance with the Idaho Well Construction Standard Rules (IDAPA 37.03.09). Drilling and construction methods must comply with the Idaho Well Construction Standard Rules (IDAPA 37.03.09). All wells are to be completed as cold water wells.

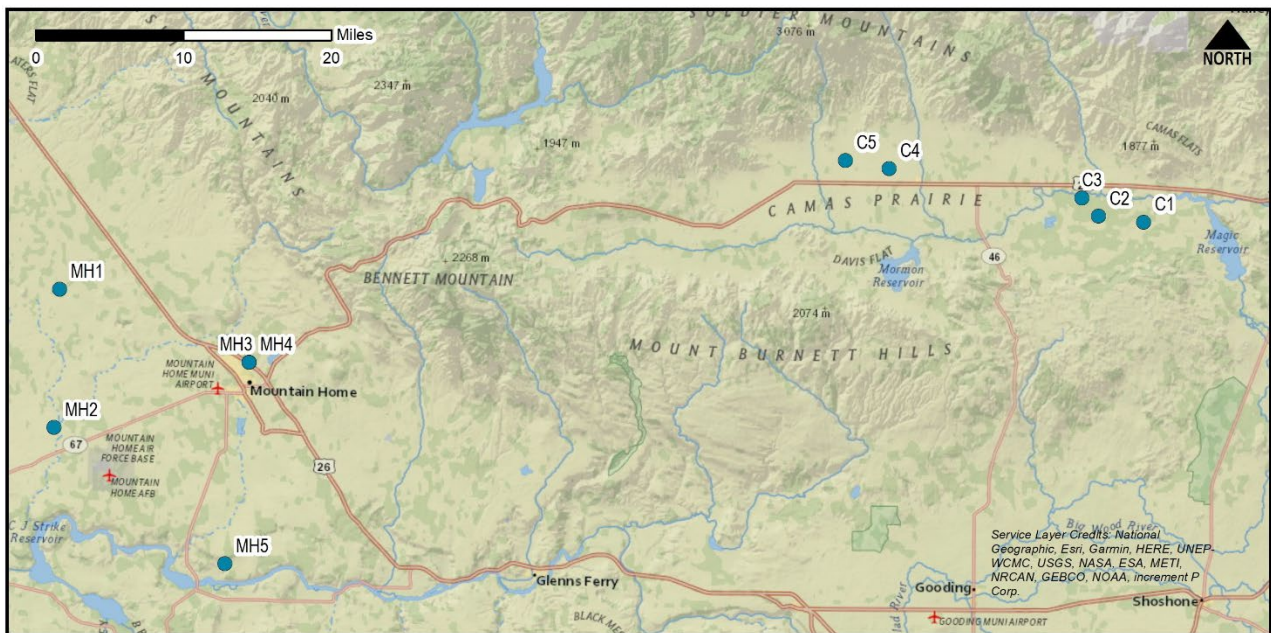

Figure 1. Locations of the proposed monitoring wells. Additional locational information can be found in Table 1.

Station Locations

Specific geographic coordinates for each well are included in Table 1. The wells will be drilled on public or private property through an access agreement between IDWR and the landowner. If access is not granted, IDWR may terminate or move the location of the well. Drillers must comply with any special requirements requested by the landowner (e.g., drill cuttings evenly spread and graded).

Three of the well sites lie within the boundaries of Idaho State Board of Land Commissioners Greater Sage-Grouse Conservation Plan (Table 1). Certain restrictions may apply to the sites that are within such boundaries (e.g., timeframe restrictions, noise restrictions, fire suppression plans, etc.). A complete description of the plan and related restrictions can be found at <https://www.idl.idaho.gov/wp-content/uploads/sites/2/2020/06/land-board-sage-grouse-plan.pdf>. Upon request, IDWR will communicate specific restrictions related to sage-grouse to the driller as access agreements are obtained.

Well Specifications

IDWR is requesting bids based on specific well designs shown in the following section and will rely on the driller's expertise and experience to meet the requirements.

The well depths are variable, based on the location of the well site. The proposed depths, seal depths, and minimum casing diameters are listed in Table 1. The proposed depths are estimates based on limited nearby well information and may change depending on subsurface conditions encountered while drilling each well. No pumps or monitoring tubes are requested through this ITB.
