Brownlee Reservoir and Boat Ramps

Current Brownlee Elevation

As of 03/07 2012, Brownlee Reservoir elevation was 2050.

NOTE:
1. Indicated water levels are approximate.
2. End of ramp is 4 ft. above water level.

With caution when launching boats.

Brownlee Reservoir Elevation

- On March 8, 2012, 3:00 AM, Brownlee Reservoir level was 2050.

Brownlee Reservoir Three-Day Average Inflow
- As of 03/07 2012, 18281 cfs
- Elevation History

Notes:
Idaho Power anticipates Brownlee Reservoir elevation to be at 20,428.8 feet by March 3rd to provide our required flood control space as determined by the US Army Corp of Engineers. If operations go as planned, boat ramps at Hewitt Park and Woodhead Park will remain usable through the month of March.

Access
Access across Brownlee Dam, Oxbow Dam and the Oxbow Intake area has been restricted to employees only. All parks and day-use facilities remain open at the Helix Canyon Complex.

Additional Information
For additional information on this area, visit the Oregon Parks and Recreation Department Website.
Notes:

Idaho Power anticipates Brownlee Reservoir elevation to be at 2042.8 feet by March 31st to provide our required flood control space as determined by the US Army Corp of Engineers. If operations go as planned, boat ramps at Hewitt Park and Woodhead Park will remain usable through the month of March.
