

Oregon's Integrated Water Resources Strategy

Inland NW Drought Forum Boise Idaho Water Center October 18, 2013

Alyssa Mucken, Program Coordinator
Oregon Water Resources Department

THE CHARGE TO DEVELOP THE STRATEGY

Oregon's House Bill 3369 (2009)

- Directs WRD to lead efforts to "understand and meet"
 Oregon's water needs"
- Partner with water quality, fish & wildlife, agriculture, other agencies, tribes, stakeholders, & public
- Account for coming pressures

7ath ORSGON LEGISLATIVE ASSEMBLY-2009 Regular Session

Enrolled House Bill 3369

instream and out-of-stream ...quality, quantity & ecosystem needs ...today and in the future

Relating to water supply management; creating new provisions; amending ORS 536.220, 541.700, 541.705, 541.705, 541.705, 541.705, 541.705, 541.705, 541.705, 541.705, 541.705, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805, 541.805,

Whereas the western United States is projected to experience substantial population growth this century, including an additional one million people in Oregon before 2030; and

Whereas dimate change is expected to after the timing and form of precipitation in Oregon; and Whereas surface water is almost completely allocated across Oregon during summer months, ground water levels have declined precipitously in several areas and the hydrological connection between surface water and ground water levels is significant; and

Whereas Oregon needs to develop an integrated statewide water management plan to address existing and likely fishere in-stream and out-of-stream demands on Oregon's water supplies; and

Whereas having coordinated plans and programs to address in-stream and out-of-size am water needs will make Oregon a more likely recipient of federal investments and give Oregon strenger standing in interestate water disputes; and

Whereas water is a valuable economic commodity; and

Whereas water development projects can be designed to simultaneously benefit commercial development, the natural environment and the fiscal sesponsibilities of the state; and

Whereas it is the policy of the Water Resources Department to directly address Oregon's water supply needs and to restore and protect stream flows and watersheds; and

Whereas it is desirable that the Wahr Resources Department and the Wahr Resources Commission have greater authority to issue leans and grants to public and private bodies, inclina tribes and others for the purpose of developing projects that will ensure the availability of a sufficient and sustainable wahr supply to most Onegon's current and future wahr needs and

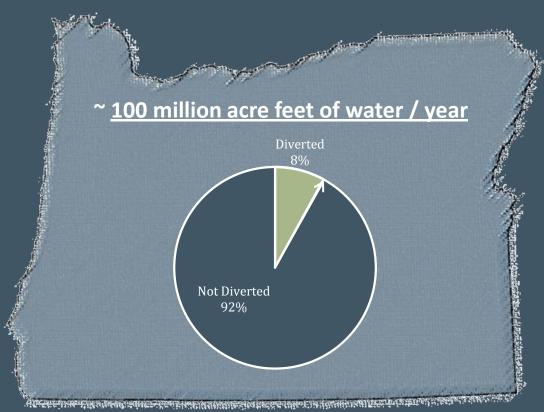

Whereas bun and grant moneys for developing projects that ensure a sufficient and sustainable water supply must be administered in a product and fiscally sound manner and used expeditiously; and

Wherean water development projects that deliver mutual benefits for water users, the environment and the fiscal condition of this state should be funded or financial with public deliars, and Wherean all water within Oregon belongs to the public pursuant to law; now, therefore,

Be It Enacted by the People of the State of Oregon

ADDING

WATER IN OREGON

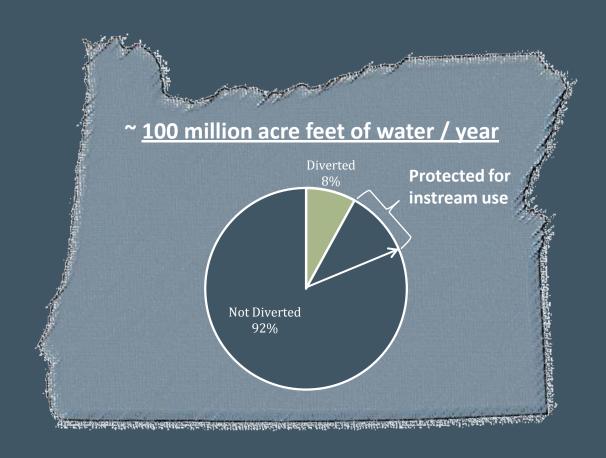

WATER IN OREGON

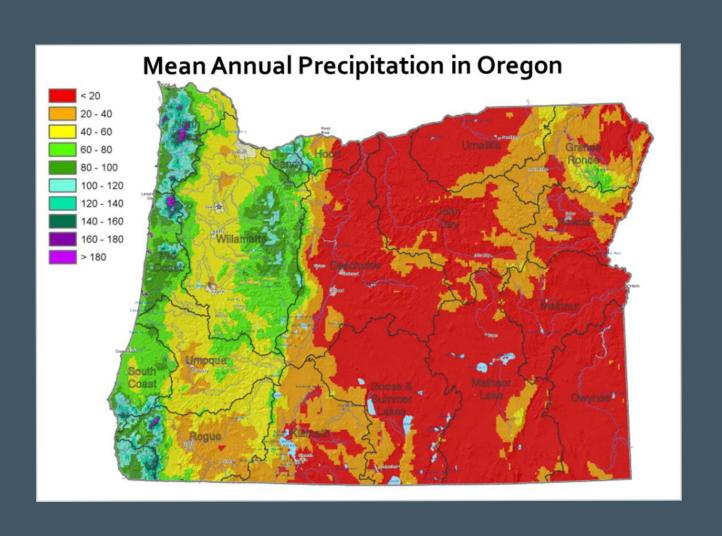

WATER IN OREGON

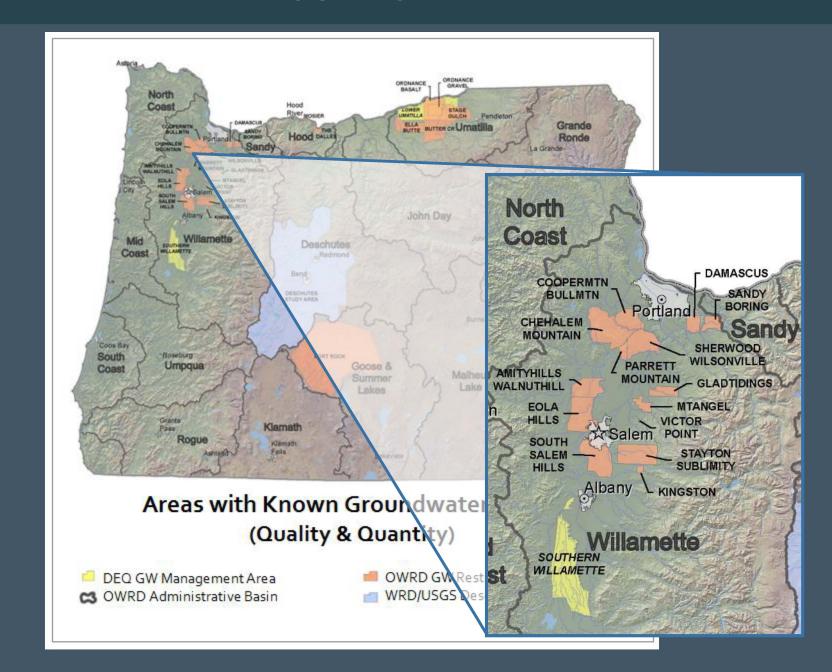

If the majority of the water is unallocated, why is it a challenge to meet our instream & out-of-stream needs?

- Location
- Timing
- Form
- Quality
- Access / Ecological Issues

LOCATION

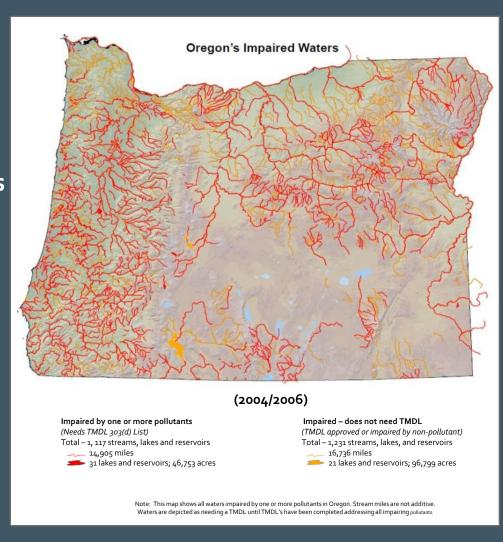

LOCATION

QUALITY: SURFACE WATER

- More than 1,860 water bodies are impaired and not meeting water quality standards
- More than 30 lakes and reservoirs
- About 22,000 stream miles are impaired
 - Temperature
 - Sedimentation
 - Nutrients
 - Dissolved Oxygen
 - Habitat Alteration

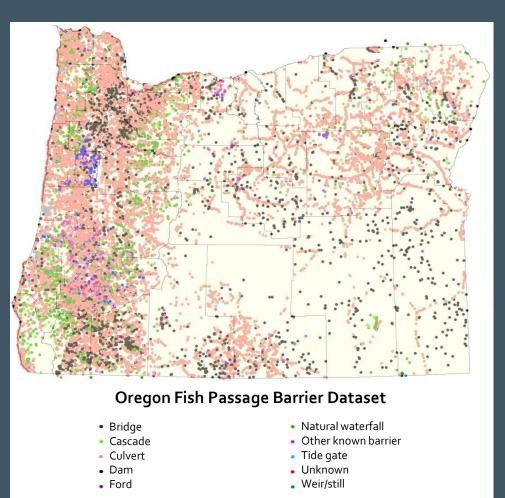

ACCESS / ECOLOGICAL ISSUES

Since 1991, NOAA has listed

27 Pacific salmonid species under

the Endangered Species Act, and has

delisted zero species

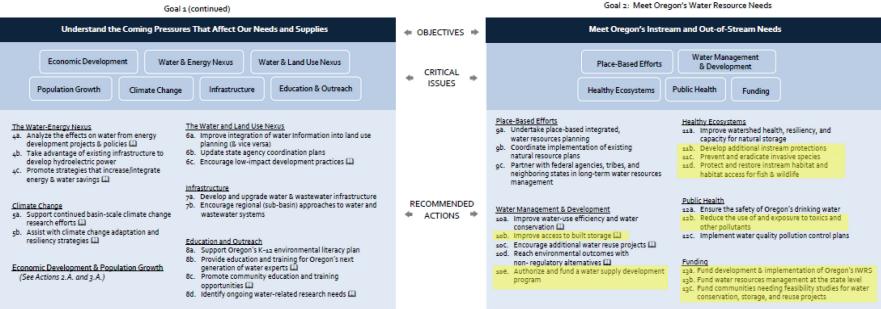

THE FRAMEWORK

Oregon's Integrated Water Resources Strategy 🚳

Goal 1 (continued) Understand Water Resources Today Understand Instream and Out-of-Stream Needs Further Understand Limited Water Supplies & Systems Further Define Out-of-Stream Needs / Demands (groundwater, surface water and their interaction) CRITICAL (i.e., diverted water) ISSUES Improve Water Quality & Further Understand Our Further Define Instream Needs / Demands Water Quantity Information Water Management Institutions (i.e., left-in-place water) Understanding Oregon's Instream Needs/Demands Understanding Oregon's Out-of-Stream Needs/Demands Understanding Water Resources / Supplies / Institutions 2a. Update long-term water demand forecasts [2] 2a. Determine flows needed (quality & quantity) to 4a. Conduct additional groundwater investigations RECOMMENDED 2b. Improve water-use measurement & reporting support instream needs (1) 4b. Improve water resource data collection and monitoring 2C. Determine pre-1909 water right claims ab. Determine needs of groundwater dependent ← ACTIONS ⇒ ac. Coordinate inter-agency data collection, processing, and 2d. Update water right records with contact information use in decision-making 2e. Update Oregon's water-related permitting guide

Goal 1 (continued)

Goal 1: Improve Our Understanding of Oregon's Water Resources

DROUGHT RESPONSE IN OREGON

- Drought Council
 - Assesses impacts of drought conditions
 - Makes recommendations to Governor
- Water Availability Committee
 - OWRD (chair), includes Oregon Climate Service, NRCS, National Weather Service, ODF, USGS, USACE, NW River Forecast Center
 - Meets monthly
- Oregon Water Resources Department has three primary tools to help communities respond to drought:
 - 1. Emergency Water Use Permits
 - 2. Temporary Drought Transfers
 - 3. Use of existing right (option/agreement)
- Water Resources Commission also has special authorities during a drought declaration

STRATEGIES FOR ASSISTING COMMUNITIES

Three Actions to Highlight from the Strategy:

- 1. Improve Water Resource Data Collection and Monitoring (Action 1b)
- 2. Improve Access to Built Storage (Action 10b)
- 3. Authorize and Fund a Water Supply Development Program (Action 10e)

EXPANDING THE STATE'S MONITORING NETWORKS

Groundwater Monitoring in Oregon

- More than 350 groundwater observation wells located across the state
- Expanding our network by 13 additional wells
- 2 additional hydrogeologists

Identifying Well Locations, OWRD

Water Level Measurements, OWRD

EXPANDING THE STATE'S MONITORING NETWORKS

Surface Water Monitoring in Oregon

- More than 225 state-operated gaging stations
- Expanding our network by 16 additional gaging sites
- 2 hydrologic technicians

Aquatic Species Surveying, ODFW

Streamflow Measurements, OWRD

IMPROVE ACCESS TO BUILT STORAGE

Available Storage in the Willamette Basin

- 13 reservoirs operated by USACE
- Operated primarily for flood control
- Storage = 1.6 million acre-feet
- Today, less than 5% of that water is under contract (for irrigation uses only)
- OWRD/USACE evaluate how to meet multiple water needs during wet, dry years

WATER SUPPLY DEVELOPMENT

New program for Oregon

- \$10 million available in 2013-15 for water supply projects
- Eligible Projects for Funding
 - Conservation/Efficiency Projects
 - New or expanded storage (above/below)
 - Basin Studies (BOR)
 - Streamflow protection/restoration
 - Repair/replace infrastructure
 - Water reuse
 - Water measurement

CLOSING

Update the Strategy every 5 years (2017)

Many opportunities to learn from other states
